

If your print fleet
is vulnerable,
so is your reputation.

MPS Guardia™

FUJIFILM Business Innovation Australia Pty Ltd

Secure
devices

Secure
documents

Secure
data

It only takes one cyber attack to ruin a business.

The growing threat to Australian business

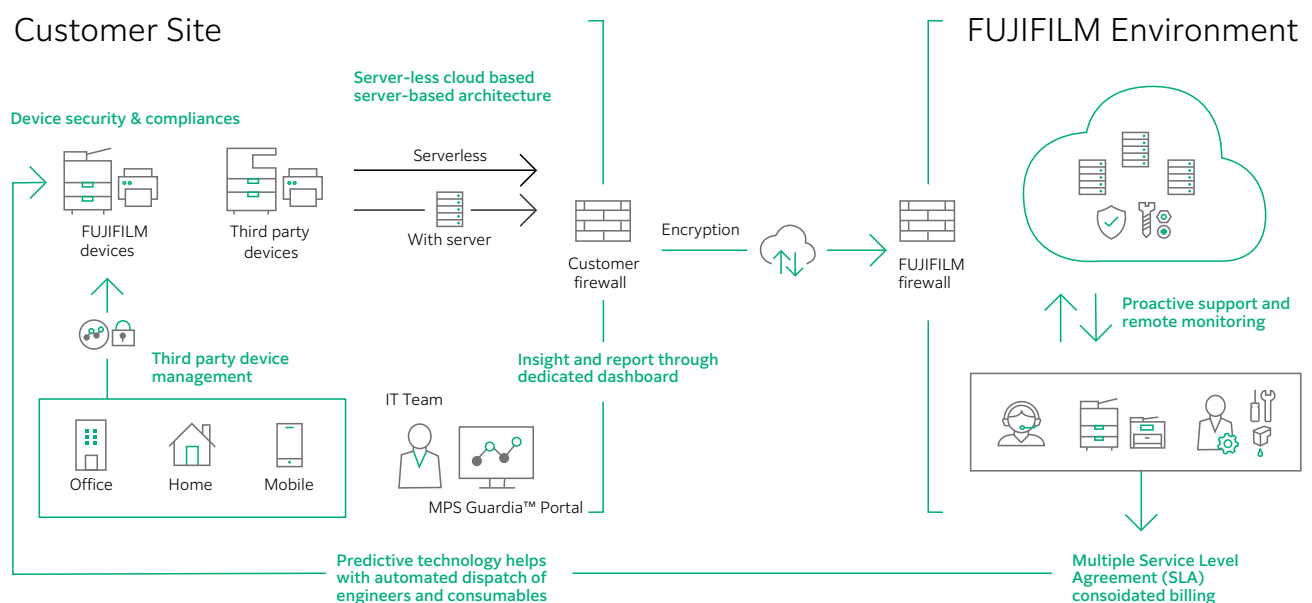

With 68% of Australian businesses having been targeted at least once, and 38% multiple times,[^] the loss of customers and mission-critical data is the number one security concern, followed by the overall tech security challenge and associated costs. Treating cyber security as a theoretical threat is no longer tenable. It's here, now, and affecting the majority of businesses in Australia.

A company's printer fleet, often consisting of many different devices across several locations, can be a crucial weak point when it comes to cyber security. MPS Guardia™ is a managed print service that offers the control, security, and automation you need for your entire fleet of print devices.

Designed to offer maximum protection, MPS Guardia™ is also extremely flexible. It can work with FUJIFILM and third-party devices, online or offline, and with or without server infrastructure.

Notably, MPS Guardia™ operates without any back channel into a client's firewall-protected environment. All reporting and oversight is accessed via an external MPS Guardia™ portal, preserving maximum security at all times.

MPS Guardia™ will keep your devices secure, your documents secure and your data secure, which in the long run will make sure your reputation is secure.

[^]'Securing Your Apps in the Borderless Cloud report' commissioned by Barracuda and conducted by independent market researcher Vanson Bourne (<https://itbrief.com.au/story/barracuda-survey-reveals-top-security-concerns-for-australian-businesses>)

All that's good about MPS Guardia™

MPS Guardia™ takes a holistic approach to printer fleet management and protection, with end-to-end layered security. From the devices themselves to documents and data, it offers the latest protection against ever-increasing cyber threats. And it's more than a powerful security solution. It delivers seamless control, improved uptime and enhanced productivity in one trusted package.

Print environment security

MPS Guardia™ gives you superior device security, document security and data security. And, with MPS Guardia™ Plus, you can be confident your workplace is compliant with the latest industry security standards.

Ensuring total peace of mind, FUJIFILM Business Innovation's range of devices is packed with products granted ISO/IEC 15408 certification. It's the only international standard customers can rely on for independent, objective assessment of an IT product's reliability, quality, and trustworthiness.

Visibility and control

As an authorised customer you can access your individualised dashboard on the MPS Guardia™ portal via your internet browser. This lets you see your entire Multi

Functional Device (MFD) fleet status and your subscribed portal access gives numerous implementation options. These can include managing, adding or expiring devices across your network, monitoring and reporting device faults, installing updates and switching security settings. The portal also enables direct communication with your FUJIFILM Business Innovation (FUJIFILM BI) support team and delivers effective control of reporting and billing.

Predictive support

MPS Guardia™ delivers predictive support to ensure continuous performance and availability. It constantly communicates with every connected Fujifilm and selected third-party print devices in your network, monitoring and using trend analysis to prevent service-impacting events or incidents.

Not only can these predictive features for your MFD configuration address issues before they manifest themselves. Where feasible and practical, MPS Guardia™ proactively attempts to eliminate causes and mitigate contributory factors, within the scope of the defined support contract.

Options to suit all businesses

Importantly, MPS Guardia™ is not a one-size-fits-all solution. Businesses of different size and operating models have differing monitoring needs, MPS Guardia™ offers flexible options to suit your fleet. That's why we developed three levels of MPS Guardia™: Lite, Essentials and Enterprise Plus.

MPS Guardia™ coverage to suit your business needs

		MPS Guardia™ Lite	MPS Guardia™ Essentials	MPS Guardia™ Enterprise Plus
