

Notice for FinePix 40i users

On Windows XP, "RealJukebox Plug-in for FinPix" is also installed after using the updater. "Audio Downloading Software" is not compatible with Windows XP. So, "RealJukebox Plug-in for FinPix" must be used for downloading MP3 files into SmartMedia with ID. Since the procedure for downloading MP3 files with "RealJukebox Plug-in for FinPix" is different from that with "Audio Downloading Software", please refer to the following procedure.

Cf. On Windows 98/98SE/Me/2000, both "Audio Downloading Software" and "RealJukebox Plug-in for FinPix" can be used.

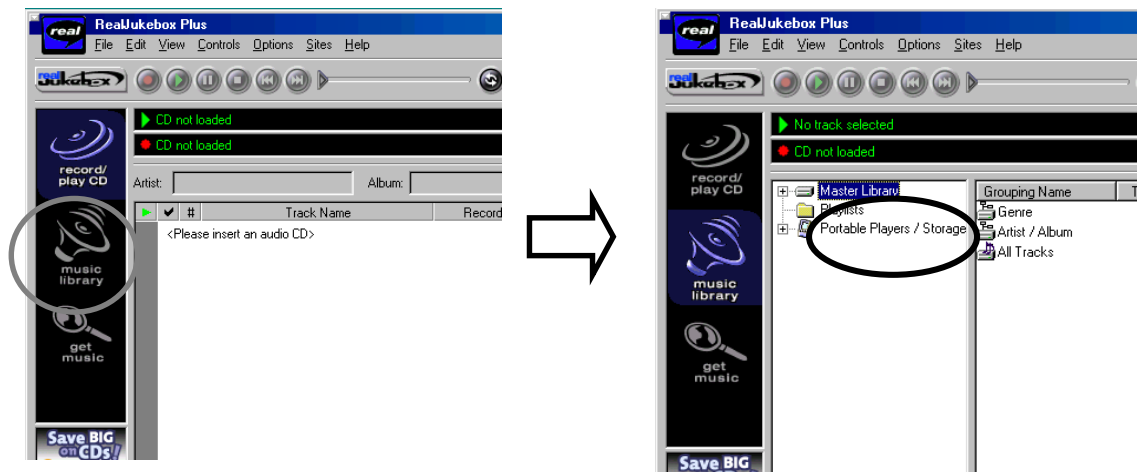

[How to download MP3 files using "RealJukebox Plug-in for FinPix"]

<<Preparation of PC>>

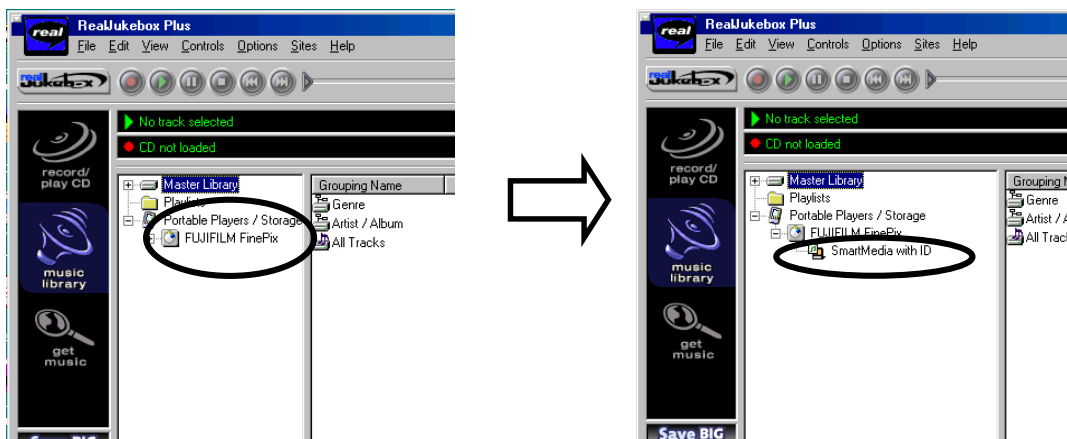

1. Install the software included on the CD-ROM enclosed with FinePix 40i, i.e. Exif Viewer, Audio Downloading Software and RealJukebox Plus.
2. Execute the FinePixViewer updater for Windows XP.

<<Procedure for downloading the MP3 files into SmartMedia with ID>>

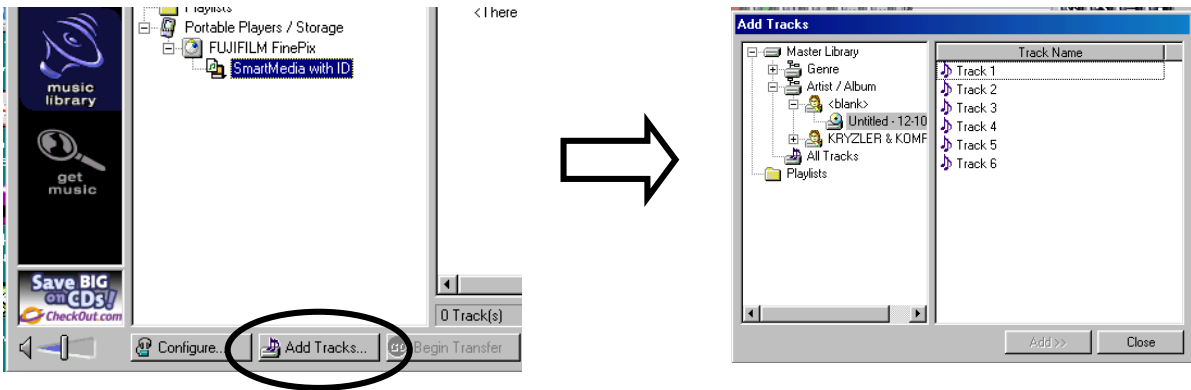

1. Set the SmartMedia with ID to FinePix 40i.
2. Turn on the camera and connect it to the PC in "DSC" mode.
*If FinePixViewer automatically starts up, exit FinePixViewer.
3. Start "RealJukebox Plus"
4. Create MP3 files from Music CDs or download them from CDDB as usual.
5. Click the "Music library" menu, and the portable sound player will be displayed.

6. Double-click the "Portable Players / Storage " icon, and the "FUJIFILM FinePix" icon will be displayed. Then, double-click the "FUJIFILM FinePix" icon, and the "SmartMedia with ID" icon will be displayed.

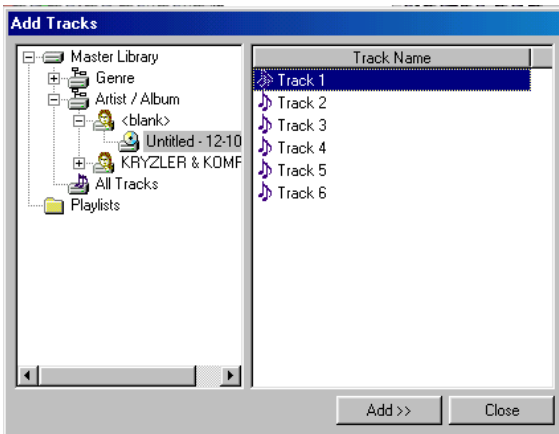

7. Click the “Add tracks...” button at the bottom of the “RealJukebox” screen, and the “Add tracks” window will be displayed.

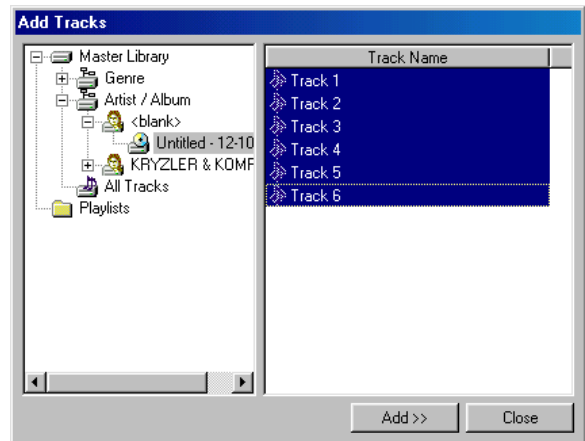

8. Select the tracks to be downloaded.
 If you want to select multiple tracks, click the tracks while pressing the SHIFT key or CTRL key.

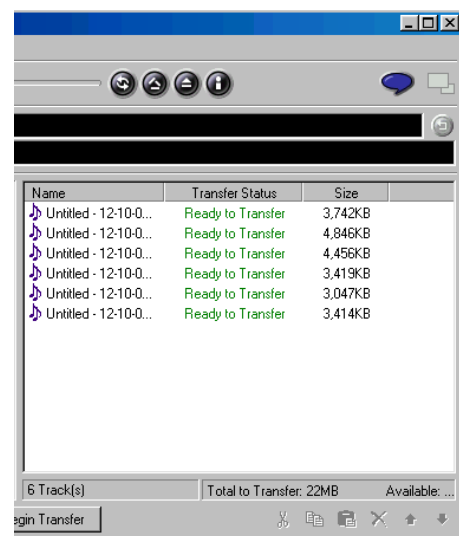

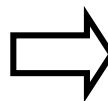

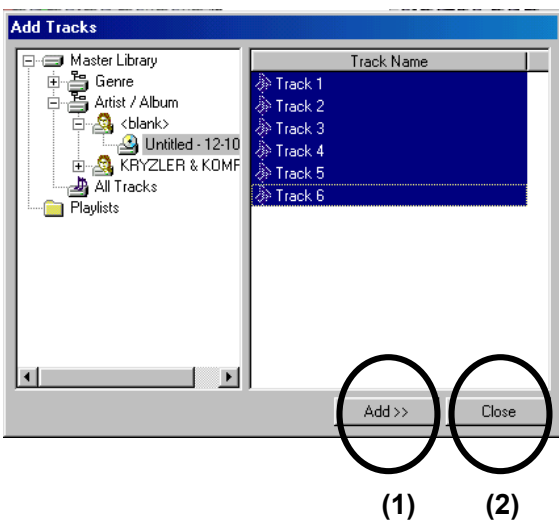

<When you select a single track>

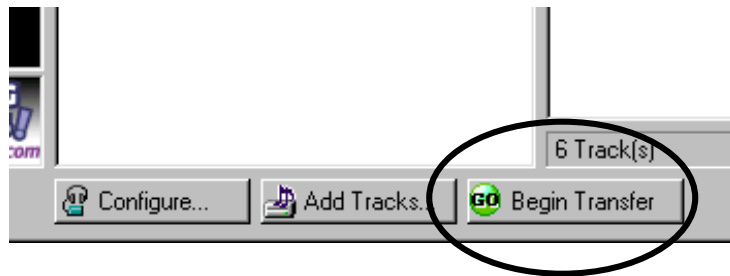

<When you select multiple tracks>

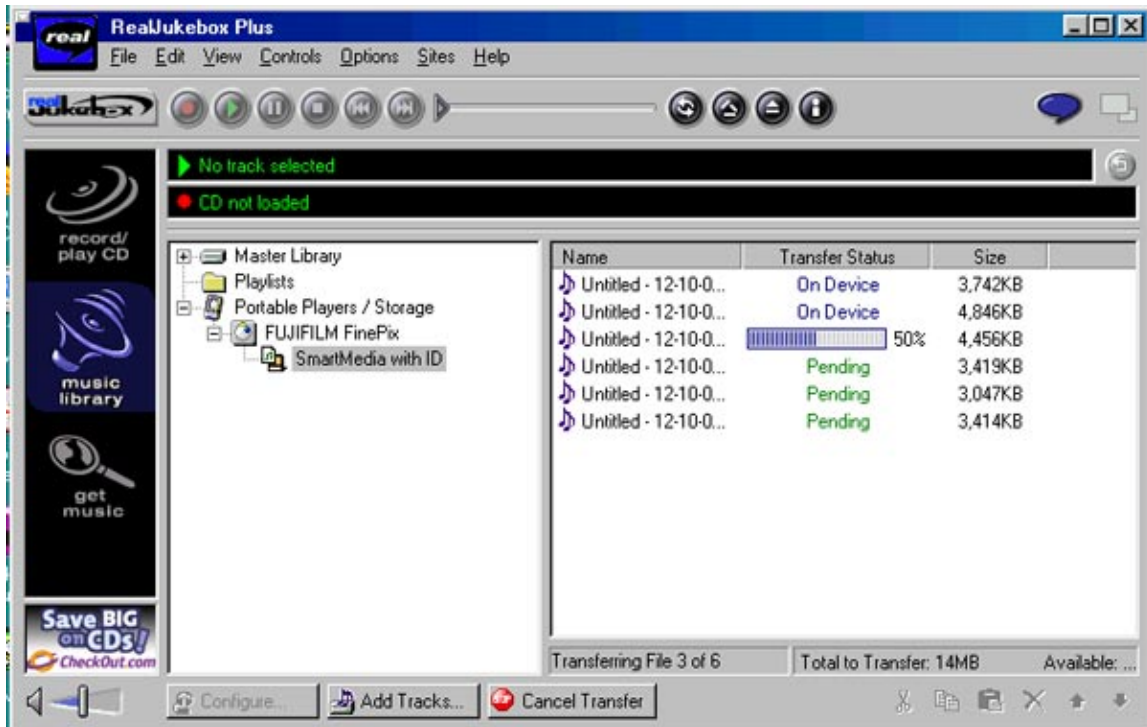

9. After selecting the tracks, click the “ Add >>” button. If you finishing the selection, click “Close” button consecutively. All the selected tracks are reserved for downloading and display “Ready to Transfer” status on the right side of the RealJukebox window.

10. Click the “Begin Transfer” button to start downloading the files.

11. As downloading is being executed, the “Begin Transfer” button is changed into the “Cancel Transfer” button as shown below.

12. When the “Cancel Transfer” button turns gray, the downloading is complete.
