MEDICAL X-RAY FILM

SUPER HR-U30

Easy-to-recycle box for a clean environment
High-quality Super HR-U30 orthochromatic film satisfies the varied demands of diagnostic x-ray imaging. Fujifilm’s Super Thin $\Sigma$ (sigma)-LIC* 30-Grain Technology enables rapid processing of fine-grain images with high resolution. Well-suited for general radiographic applications such as skull, chest, and abdomen as well as extremities and angiography, Super HR-U30 ensures stable, high-resolution images regardless of whether your facility employs super-rapid (45-second), rapid (90-second), low-volume or manual x-ray film processing. Its dramatic improvement in stability makes quality control easier and more efficient even on a daily basis.
