AU10V in a ONE STOP TOTAL CLINIC

Cheongdam woori Animal Hospital was established in 2005 with a vision to be a ONE STOP TOTAL CLINIC for pets. This round the clock clinic has been servicing the Kangnam area with their comprehensive on-site and state-of-the-art facilities for both inpatients and outpatients. It has received high trust among its patrons over the years, including famous Korean actors.

Cheongdam woori Animal Hospital has been using AU10V for 3 years now. The chief of the clinic, Dr. Yoon Byung Gook shared to us his insights of the AU10V system.

DATA

Facility name: Cheongdam woori Animal Hospital
Location: Seoul, Korea

AU10V provides timely and accurate diagnosis, suitable for our ONE STOP TOTAL CLINIC.

---Impression on AU10V

Dr. Yoon: We believe that the AU10V is a suitable medical device for our clinic, which aims to be a ONE STOP TOTAL CLINIC. AU10V enables rapid and accurate diagnosis and treatment. The biggest advantage for this system is it provides accurate diagnosis, which the veterinarian and the client want.

I previously requested hormone tests in the external laboratory. Because test results are not real time, the patient misses the ideal timing of treatment. This eventually causes the decrease in the conformity of the clients to acquire veterinary care. There were a lot of shortcomings in the continuity of medical treatment.

The AU10V had a great impact in our clinic. Having this in house immunodiagnostic testing enables us to provide timely treatment for the patients. This is, by far, the greatest advantage of AU10V.

The first important thing for a medical device is the easiness to use in any circumstances. AU10V clears this point. It is easy to operate. In fact, all our veterinary nurses can conduct measurements in the AU10V.

Performance wise, AU10V's accuracy is excellent. The AU10V results coincide with the clinical symptoms of the patient most of the time. Its performance in monitoring the treatment is also satisfactory.

AU10V is rather much more necessary for actual practice in one-man clinics.

---Practicality of AU10V

Dr. Yoon: This device is a must for big hospitals. But I think this is rather much more necessary for actual practice in one-man clinics.

---Service and support from your distributor

Dr. Yoon: They visit us regularly and provide us with preventive measures for troubles. We are extremely satisfied with their service. In case of troubles, they give support and countermeasures the soonest.

AU10V is one of my textbooks.

---Describe AU10V in one sentence.

"AU10V is one of my textbooks."
The tests are applicable to various cases and it provides reliable results for diagnosis. It is a living textbook.
