TO: All Resellers of Fujifilm Image Processing System Hardware and Software

FROM: FUJIFILM Europe GmbH, Imaging Division

RE: IMPORTANT NOTICE

Dear Fujifilm Authorized Reseller:

For the past few years, the Fujifilm IS-mini LUT box and MiniManager software have proven to be highly effective and reliable solutions for color management and professional monitor calibration. We thank you for your efforts and support in helping make them a success.

On September 9, 2016, Fujifilm Corporation will transfer the manufacture, research and development of IS-Mini hardware and MiniManager software to WOWOW, Inc. located in Tokyo, Japan. WOWOW, Inc. will thereafter sell and support IS-Mini hardware and MiniManager software, and will also bring forth new products that build on the existing line-up.

In addition, all distribution and technical support for IS-Mini hardware and MiniManager software in Europe will be assumed by O-Video Ltd. of Teddington, United Kingdom, effective as of September 10, 2016. Fujifilm Europe will cease all sales and support of IS-Mini hardware and MiniManager software at that time.

Contact information for WOWOW and O-Video will be forthcoming in the near future from them directly.

If you have any immediate questions, please contact Tomohiro Nakagawa, Fujifilm Europe, by email at tomohiro_nakagawa@fujifilm.eu or telephone at +49 (0)211 5089 138.
