This manual will show you how to use your FUJIFILM DIGITAL CAMERA FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 correctly. Please follow the instructions carefully.
Warning

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

For customers in the U.S.A.

Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

FCC Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.
You are cautioned that any changes or modifications not expressly approved in this manual could void the user’s authority to operate the equipment.

Notes on the Grant:
To comply with Part 15 of the FCC Rules, this product must be used with a Fujifilm-specified ferrite-core A/V cable, USB cable, and DC supply cord.

For customers in Canada

CAUTION
This Class B digital apparatus complies with Canadian ICES-003.

Please read the Safety Notes (→p.158) and make sure you understand them before using the camera.
BEFORE OPENING THE CD-ROM PROVIDED BY FUJIFILM Corporation, PLEASE READ THIS END USER LICENSE AGREEMENT CAREFULLY. ONLY IF YOU AGREE WITH THIS AGREEMENT, SHOULD YOU USE THE SOFTWARE RECORD ON THE CD-ROM. BY OPENING THE PACKAGE, YOU ACCEPT AND AGREE TO BE BOUND BY THIS AGREEMENT.

End User License Agreement

This End User License Agreement ("Agreement") is an agreement between FUJIFILM Corporation ("FUJIFILM") and you, which sets forth the terms and conditions of the license granted for you to use the software provided by FUJIFILM.

The CD-ROM contains third party software. In case a separate agreement is provided by a third party supplier for its software, the provisions of such separate agreement shall apply to the use of such third party software, prevailing over those of this Agreement.

1. Definitions.
   (a) "Media" means the CD-ROM titled "Software for FinePix KA"- which is provided to you together with this Agreement.
   (b) "Software" means the software which is recorded on Media.
   (c) "Documentation" means the operation manuals of Software and other related written materials which are provided to you together with Media.
   (d) "Product" means Media (including Software) and Documentation collectively.

2. Use of Software.
   FUJIFILM grants to you a nontransferable, nonexclusive license:
   (a) to install one copy of Software onto one computer in binary machine executable form;
   (b) to use Software on the computer onto which Software is installed; and
   (c) to make one backup copy of Software.

   3.1 You shall not distribute, rent, lease or otherwise transfer all or any part of Software, Media or Documentation to any third party without FUJIFILM’s prior written consent. You also shall not sublicense, assign or otherwise transfer all or any part of the rights granted to you by FUJIFILM under this Agreement without FUJIFILM’s prior written consent.
   3.2 Except as expressly granted by FUJIFILM hereunder, you shall not copy or reproduce all or any part of Software or Documentation.
   3.3 You shall not modify, adapt or translate Software or Documentation. You also shall not alter or remove copyright and other proprietary notices that appear on or in Software or Documentation.
   3.4 You shall not, or shall not have any third party, reverse-engineer, decompile, or disassemble Software.

4. Ownership.
   All copyrights and other proprietary rights to Software and Documentation are owned and retained by FUJIFILM or the third party suppliers as indicated on or in Software or Documentation. Nothing contained herein shall be construed, expressly or implicitly, as transferring or granting any right, license, or title to you other than those explicitly granted under this Agreement.

5. Limited Warranty.
   FUJIFILM warrants to you that Media is free from any defect in material and workmanship under normal use for ninety (90) days from the date of your receipt of Media. Should Media not meet the foregoing warranty, FUJIFILM shall replace such defective Media with other Media bearing no defect. FUJIFILM’s entire liability and your sole and exclusive remedy with regard to any defect in Media shall be expressly limited to such FUJIFILM’s replacement of Media as provided herein.

6. DISCLAIMER OF WARRANTY.
   EXCEPT AS PROVIDED IN SECTION 5 HEREIN, FUJIFILM PROVIDES PRODUCT “AS IS” AND WITHOUT WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED. FUJIFILM SHALL MAKE NO WARRANTY, EXPRESS, IMPLIED OR STATUTORY, AS TO ANY OTHER MATTERS, INCLUDING, BUT NOT LIMITED TO NON-INFRINGEMENT OF ANY COPYRIGHT, PATENT, TRADE SECRET, OR ANY OTHER PROPRIETARY RIGHTS OF ANY THIRD PARTY, MERCHANTABILITY, OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. LIMITATION OF LIABILITY.
   IN NO EVENT SHALL FUJIFILM HAVE ANY LIABILITY FOR ANY GENERAL, SPECIAL, DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, OR OTHER DAMAGES (INCLUDING DAMAGES FOR LOSS OF PROFITS OR LOST SAVINGS) INCURRED FROM THE USE OR INABILITY TO USE PRODUCT EVEN IF FUJIFILM HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

8. No export.
   You acknowledge that neither Software nor any part thereof, will be transferred, or exported to any country or used in any manner in violation of any export control laws and regulations to which Software is subject.

   In case you breach any of the terms and conditions hereof, FUJIFILM may immediately terminate this Agreement without any notice.

10. Term.
   This Agreement is effective until the date when you cease to use Software, unless earlier terminated in accordance with Section 9 hereof.

11. Obligation upon termination.
   Upon termination or expiration of this Agreement, you shall, at your own responsibility and expense, delete or destroy immediately all Software (including its copies), Media and Documentation.

   This Agreement shall be governed by and construed in accordance with laws of Japan.
EC Declaration of Conformity

We
Name: FUJIFILM Europe GmbH

Place Date Signature/Managing Director

This product comes with batteries. When these are empty, you shouldn’t throw them away but deliver them as domestic chemical refuse.
Disposal of Electric and Electronic Equipment in Private Households

Disposal of used Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product, or in the manual and in the warranty, and/or on its packaging indicates that this product shall not be treated as household waste. Instead it should be taken to an applicable collection point for the recycling of electrical and electronic equipment.

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

If your equipment contains easy removable batteries or accumulators please dispose these separately according to your local requirements.

The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you have purchased the product.

In Countries outside the EU:
If you wish to discard this product, please contact your local authorities and ask for the correct way of disposal.

Usable Memory Cards
   You can use the xD-Picture Card and the SD Memory Card
      with the FinePix A900, FinePix A825, FinePix A820, FinePix
      A610, and FinePix A800. In this Owner’s Manual, these cards
      are expressed as “Memory Card”.

Test Shots Prior to Photography
For important photographs (such as weddings and overseas trips), always take a test shot and view the image to make sure that the camera is working normally.
- FUJIFILM Corporation cannot accept liability for any incidental losses (such as the costs of photography or the loss of income from photography) incurred as a result of faults with this product.

Notes on Copyright
Images recorded using your digital camera system cannot be used in ways that infringe copyright laws without the consent of the owner, unless intended only for personal use. Note that some restrictions apply to the photographing of stage performances, entertainments and exhibits, even when intended purely for personal use. Users are also asked to note that the transfer of Memory Card containing images or data protected under copyright laws is only permissible within the restrictions imposed by those copyright laws.

Handling Your Digital Camera
This camera contains precision electronic components. To ensure that images are recorded correctly, do not subject the camera to impact or shock while an image is being recorded.

Liquid Crystal
If the LCD monitor is damaged, take particular care with the liquid crystal in the monitor. If any of the following situations arise, take the urgent action indicated.
- If liquid crystal comes in contact with your skin
  Wipe the area with a cloth and then wash thoroughly with soap and running water.
- If liquid crystal gets into your eye
  Flush the affected eye with clean water for at least 15 minutes and then seek medical assistance.
- If liquid crystal is swallowed
  Flush your mouth thoroughly with water. Drink large quantities of water and induce vomiting. Then seek medical assistance.

Trademark Information
- xD and xD-Picture Card™ are trademarks of FUJIFILM Corporation.
- IBM PC/AT is a registered trademark of International Business Machines Corp. of the U.S.A.
- Macintosh, Power Macintosh, iMac, PowerBook, iBook and Mac OS are trademarks of Apple Inc., registered in the U.S. and other countries.
- Microsoft, Windows, the Windows logo, Windows Vista and the Windows Vista logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries. Windows is an abbreviated term referring to the Microsoft® Windows® Operating System.
- The “Designed for Microsoft® Windows® XP” logo refers to the camera and the driver only.
- IrSimple™ Trademark is owned by the Infrared Data Association®.
- IrSS™ Trademark or IrSimpleShot™ Trademark is owned by the Infrared Data Association®.
- SD logo is a trademark.

Notes on Electrical Interference
If the camera is to be used in hospitals or aircrafts, please note that this camera may cause interference to other equipment in the hospital or aircraft. For details, please check with the applicable regulations.

Explanation of Color Television System
NTSC: National Television System Committee, color television telecasting specifications adopted mainly in the U.S.A., Canada and Japan.
PAL: Phase Alternation by Line, a color television system adopted mainly by European countries and China.

Exif Print (Exif ver. 2.2)
Exif Print Format is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.

* See “Using Your Camera Correctly” (➔p.118) for more information.
About this Manual

Icons indicate the modes that are available.

### CAUTION

This mark denotes issues that may affect the camera’s operation.

### CHECK

This mark denotes points to notice in the camera’s operation.

MEMO

This mark denotes additional topics that complement the basic operating procedures.

### Usable Memory Cards

You can use the xD-Picture Card and the SD Memory Card with the FinePix A900, FinePix A825, FinePix A820, FinePix A610, and FinePix A800. In this Owner’s Manual, these cards are expressed as “Memory Card”.

### About illustration

Illustrations in the Owner’s manual show the FinePix A800 as an example (FinePix A900, FinePix A825, FinePix A820, and FinePix A610 operate similarly).

Up, down, left, and right are indicated by black triangles in the Owner’s Manual. Up or down is shown as ▲ or ▼, and left or right is shown as ◄ or ►.

The description of functions available only on certain models has a title as below.

Indicating the model has this function.
Accessories Included

Make sure that all the below accessories are included. Note that accessories may vary depending on model.

- AA-size Alkaline Batteries (LR6) (2)

- Strap (1)

- Video cable (1) (FinePix A610 only)

- A/V cable (1) (FinePix A900/FinePix A825/FinePix A820/FinePix A800 only)

- USB cable (mini-B) (1)

- CD-ROM (1)
  Software for FinePix KA

- Owner’s Manual (this manual) (1)

**Attaching the strap**

Attach the strap as shown in 1 and 2. When attaching the strap, move the fastener to adjust the length and slightly away from the end of the strap, as shown in figure 1.
Camera Parts and Features (FinePix A610)

- Refer to the pages in parentheses for information on using the camera parts or features.

1. Shutter button
2. Zoom switch (p.28, 35)
3. Lens (Lens cover)
4. POWER button

FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 has internal memory that can store images without Memory Card. "IN" appears on the LCD monitor when the internal memory is active.
Loading the Batteries

Batteries are required to operate the digital camera. At first, load the batteries in the camera.

### Compatible batteries

AA-size alkaline batteries (2) or AA-size Ni-MH rechargeable batteries (2) (sold separately)

---

**CAUTION**

- Never use the following types of batteries, as they could cause serious problems such as battery fluid leakage or overheating:
  1. Batteries with split or peeling outer casings
  2. Combinations of different types of batteries or new and used batteries together
- Do not use manganese, Ni-Cd or lithium batteries.
- Use the same brand and grade AA-size alkaline batteries as those supplied with the camera.

---

1. **Open the battery cover.**

2. **CHECK**

   Check that the camera is turned off before opening the battery cover.

3. **CAUTION**

   - Do not open the battery cover while the camera is on. This could damage the Memory Card or ruin the image files on the Memory Card.
   - Do not apply force to the battery cover.
2 Load the batteries correctly as indicated by the polarity icons.

⚠️ **CAUTION**
Match the polarity icons (+ and −) of the batteries to those on the inside of the battery cover.

3 Close the battery cover.
Loading the Batteries

Checking the battery charge

Turn the camera on and check the battery level indicator on the LCD monitor.

1. There is ample battery charge. (Not displayed)
2. There is insufficient charge left in the batteries. The batteries will soon run out. Have a new set of batteries ready. (Lit red)
3. The batteries are depleted. The display will shortly go blank and the camera will stop working. Replace or recharge the batteries. (Blinking red)

CAUTION

- Soil, such as fingermarks on the poles of the batteries, can shorten time for which the batteries can be used.
- The time for which AA-size alkaline batteries (referred to hereafter simply as alkaline batteries) can be used varies depending on the brand. Some brands of alkaline batteries may stop providing power more quickly than those supplied with the camera. Note also that due to their nature, the time for which alkaline batteries can be used decreases in cold conditions (0°C to +10°C/+32°F to +50°F). For this reason, it is better to use AA-size Ni-MH batteries.
- Due to the nature of the battery, the battery level indicator (, or ) may appear early when the camera is used in cold locations. Try warming the battery in your pocket or a similar location before use.
- Depending on the battery type and the level of charge in the batteries, the camera may run out of power without first displaying a battery level warning. This is particularly likely to happen when batteries that have run out of charge once are re-used.
- Depending on the camera mode, the transition from to may occur more quickly.
- See p.119-120 for information on the batteries.
- When first purchased or if left unused for a long period, the amount of time which AA-size Ni-MH batteries can be used may be short. See p.120 for more information.
- Battery power consumption varies greatly depending on use. When you change to Playback mode from Photography mode, may not occur, however, may suddenly blink red and the camera may stop operation.
Loading the Memory Card

Although you can store pictures in the camera’s internal memory, you can store many more images on the Memory Card (sold separately). You can use the xD-Picture Card and the SD Memory Card with the FinePix A900, FinePix A825, FinePix A820, FinePix A610, and FinePix A800. In this Owner’s Manual, these cards are expressed as “Memory Card”.

SD Memory Cards
Use of the SD Memory Cards listed below is recommended. They are operation-checked at FUJIFILM Corporation.
Maker: SanDisk
Model: Extreme
-512MB, 1GB, 2GB

MEMO
- Compatible Memory Cards will be updated in our website: http://www.fujifilm.com/products/digital/
- Depending on the SD Memory Card, recording of movies may be interrupted. Use of above mentioned SD Memory Cards are recommended.
- The camera is not compatible with multimedia cards.

1 Open the battery cover.

2 Insert a Memory Card.

(xD-Picture Card)

Align the gold marking with the gold contact area, then insert an xD-Picture Card completely.

(SD Memory Card)

Align the gold marking with the gold contact area, then insert an SD Memory Card completely.

Continued ➞
CAUTION
Be sure to unlock the protection of the SD Memory Card before inserting it. If it is locked, recording/deleting images, as well as formatting are not available. To unlock the protection, slide the switch back, and the SD Memory Card will work normally.

CAUTION
- A new SD Memory Card or a card previously used on a PC or any device other than the camera should be formatted (→ p.93) on the camera before use.
- Do not use a miniSD adaptor or a microSD adaptor which have exposed contact areas on the back. Use of these adaptors may cause a malfunction or damage due to the improper contacts.

3 Close the battery cover.

How to replace the Memory Card

Push the Memory Card into the slot and then slowly remove your finger. The lock is released and the Memory Card is pushed out.
CAUTION

- When storing Memory Cards, make sure that they are kept out of the reach of children. A Memory Card could be swallowed and cause suffocation. If a child swallows a Memory Card, seek medical attention or call emergency number right away.
- If the Memory Card is oriented incorrectly, it will not go all the way into the slot. Do not apply force when inserting a Memory Card.
- Note that the Memory Card may spring out if you release your finger quickly from the card immediately after the lock is released.
- Operation of this camera is only guaranteed when it is used with FUJIFILM xD-Picture Card and operation-checked SD Memory Card (→p.19).
- See p.124 for information on the xD-Picture Card, SD Memory Card and the internal memory.

MEMO

- The size of an image file varies depending on the subject. For this reason, the number recorded may not represent the actual number of frames.
- See p.144-146 for information on the standard number of available frames.

About internal memory

FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 has internal memory that can store images without Memory Card. appears on the LCD monitor when internal memory is active.

When a Memory Card (sold separately) is inserted
[Record images]: Record images to a Memory Card.
[Playback images]: Playback images in a Memory Card.

When a Memory Card (sold separately) is not inserted
[Record images]: Record images to internal memory.
[Playback images]: Playback images in internal memory.

About images in the internal memory

Images held in the camera’s internal memory may be corrupted or erased due to problems such as camera faults. Save your important data to another media (i.e., DVD-R, CD-R, CD-RW, hard disk, etc.). It is possible to transfer saved images on the internal memory to a Memory Card (→p.76).
Turning On and Off

Turning the camera on in Photography mode

Press POWER down fully to turn the camera on. Press POWER again to turn the camera off.

MEMO
Changes between Photography mode and Playback mode

Press \( \text{w} \) during shooting to change to Playback mode. Press the shutter button down halfway to return to Photography mode.

**CAUTION**

- The lens moves and the lens cover opens when turning the camera on in Photography mode. Take care not to obstruct the lens.
- Take care not to get fingerprints on the camera lens as this will result in impaired image quality in your shots.

Turning the camera on in Playback mode

Press \( \text{w} \) for about 1 second to turn the camera on in Playback mode. Press \( \text{w} \) during playback to turn the camera off.

MEMO
To change to Photography mode, press the shutter button down halfway.
Setting the language, date, and time

When using the camera for the first time after purchasing, the language, date, and time are cleared. Set the language, date, and time.

1. 言語/LANG. screen appears when turning the camera on.

   ① Press ▲, ▼, ◀, or ▶ to select the language.

   ② Press MENU/OK to confirm the setting.

2. Set the date and time.

   ① Press ◀ or ▶ to select Year, Month, Day, Hour, or Minute.

   ② Press ▲ or ▼ to correct the setting.

MEMO

- Holding down ▲ or ▼ changes the numbers continuously.
- When the time displayed passes “12”, the AM/PM setting changes.

Continued ➔
3 Change the date format.

1. Press ← or → to select the date format.
2. Press ▲ or ▼ to set the format.
3. Always press MENU/OK after the settings are completed.

Date format
ex. April 26, 2007
YY.MM.DD: 2007.4.26
DD.MM.YY: 26.4.2007

MEMO
START MENU screen also appears when the batteries have been removed and the camera has been left for a long period. Once the AC power adapter has been connected or the batteries have been installed for 2 hours or more, the camera settings will be retained for roughly 6 hours even if both sources of power are removed.

Auto power off function
When the Auto power off function is active, if the camera is left unused for 2 or 5 minutes, this function turns the camera off (→p.94). To turn the camera back on, press POWER. To play back images, hold down [►] for about 1 second.
Correcting the Date and Time

1 Open the SET-UP menu.

   ① Press MENU/OK to open the menu.

   ② Press ▲ or ▼ to select SET-UP.

   ③ Press ◄.

2 Display the DATE/TIME screen.

   ① Press ◄ or ► to select SET-UP.

   ② Press ▼ to move to menu item.

   ③ Press ▲ or ▼ to select DATE/TIME.

   ④ Press ◄.

See “2 Set the date and time.” (→p.23).
**Selecting the Language**

1. **Open the SET-UP menu.**

   - Press MENU/OK to open the menu.
   - Press ▲ or ▼ to select SET-UP.
   - Press ►.

2. **Display the 语言/LANG. screen.**

   - Press ◀ or ► to select 2 (Select 1 on the FinePix A610).
   - Press ▼ to move to menu item.
   - Press ▲ or ▼ to select 语言/LANG..
   - Press ►.

   See "1 语言/LANG. screen appears when turning the camera on." (→p.23).
Taking Pictures (AUTO Mode)

This section describes the basic operations.

1 Turn the camera on.

① Press POWER down fully to turn the camera on.

② Set the Mode dial to (FinePix A900/FinePix A825/ FinePix A820/FinePix A800 only).

CAUTION

Step ② is only for FinePix A900/FinePix A825/FinePix A820/FinePix A800. Since there is no mode dial on FinePix A610, ignore step ② when using that model.

Holding the camera correctly

Brace your elbows against your sides and hold the camera with both hands.

Do not cover the lens or flash with your fingers.

CAUTION

- Moving the camera while shooting gives a blurred picture (camera shake). Hold the camera steadily with both hands.
- If the lens or flash is obscured by your fingers or the strap, subjects may be out of focus or the brightness (exposure) of your shot may be incorrect.
- Check that the lens is clean. If it is dirty (getting fingerprints on the lens etc.), clean the lens as informed on p.118.

Continued
Taking Pictures (AUTO Mode)

2 Check the composition on the LCD monitor. To adjust zoom scale using the Zoom switch:

- Wide zoom (Zoom out)
- Tele zoom (Zoom in)

<FinePix A900/FinePix A825/FinePix A820>
- Focal range
  Approx. 60 cm (2.0 ft.) to infinity
- Optical zoom focal length (35 mm camera equivalent)
  Approx. 39 mm to 156 mm
- Max. zoom scale
  4x

Memory
- Select ⌘ Macro mode to take close-up shots (→p.51).
- Use digital zoom when you want to shoot the subject closer (→p.46, 91).

<FinePix A610>
- Focal range
  Approx. 60 cm (2.0 ft.) to infinity
- Optical zoom focal length (35 mm camera equivalent)
  Approx. 39 mm to 117 mm
- Max. zoom scale
  3x

<FinePix A800>
- Focal range
  Approx. 50 cm (1.6 ft.) to infinity
- Optical zoom focal length (35 mm camera equivalent)
  Approx. 36 mm to 108 mm
- Max. zoom scale
  3x
3 Focus on the main subject in the AF frame and press the shutter button down halfway.

**CHECK**
- **Focus on the subject**
  - Double beep is heard
  - Indicator lamp lit green
- **Not focus on the subject**
  - No sound
  - AF indicated
  - Indicator lamp blinking green

**MEMO**
The shutter button has a halfway point at which focus and exposure are automatically optimized before taking the picture by pressing fully down.

**CAUTION**
When pressing the shutter button halfway, a lens operation sound may be heard.

4 Press the shutter button fully.

**CAUTION**
When taking a picture using the flash, the image may disappear and go dark briefly due to flash charging. The indicator lamp blinks orange during charging.

**CHECK**
When using FinePix A610, the camera makes a beep sound and takes the picture when you press the shutter button down fully.

**MEMO**
- When the subject is not in the AF frame, use AF/AE lock to take the picture (p.31).
- When pressing the shutter button down fully in one motion, the camera takes the picture without the AF frame changing.
Taking Pictures (AUTO Mode)

**Flash**

When pressing the shutter button down halfway, the flash icon appears on the LCD monitor before the flash fires.

Change the flash mode when you want to take pictures without flash. See p.52 for information on flash.

---

**CAUTION**

- The image shown on the LCD monitor before the picture is taken may differ in brightness, color, etc. from the image actually recorded. Play back the recorded image to check it (→p.34).
- When selecting a slow shutter speed that will cause camera shake, the shake icon appears on the LCD monitor. Use flash or a tripod.
- See p.125-129 for information on Warning displays. See “Troubleshooting” (→p.130-135) for more information.

---

**Indicator lamp display**

The indicator lamp lights or blinks when pressing the shutter button, etc. The indicator lamp shows the camera status.

<table>
<thead>
<tr>
<th>Display</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lit green</td>
<td>Locking the focus</td>
</tr>
<tr>
<td>Blinking green</td>
<td>Camera shake warning, AF warning, or AE warning (ready to shoot)</td>
</tr>
<tr>
<td>Blinking green and orange alternately</td>
<td>Recording to Memory Card or internal memory (ready to shoot)</td>
</tr>
<tr>
<td>Lit orange</td>
<td>Recording to Memory Card or internal memory (not ready)</td>
</tr>
<tr>
<td>Blinking orange</td>
<td>Charging flash (flash will not fire)</td>
</tr>
<tr>
<td>Blinking red</td>
<td>Warnings for Memory Card and internal memory Card not formatted, incorrect format, memory full, Memory Card or internal memory error</td>
</tr>
<tr>
<td></td>
<td>Lens operation error</td>
</tr>
</tbody>
</table>

**MEMO**

Detailed warning messages appear on the LCD monitor (→p.125-129).
Using the Camera

Taking pictures with the focus and exposure locked

In the above composition, the subjects (two people in this case) are not in the AF frame. Pressing the shutter button halfway at this point will result in the subjects being out of focus.

AF/AE lock is useful:
Use AF/AE lock to guarantee best result when shooting a subject that is not suited to autofocusing (→p.32).

Using AF/AE lock

1 Move the camera slightly so that one of the subjects is in the AF frame.

2 Press the shutter button down halfway to focus on the subject.

Continued ➔
3 Continue to hold the shutter button down halfway. Move the camera back to the original image and press the shutter button fully.

CHECK
When using FinePix A610, the camera makes a beep sound and takes the picture when you press the shutter button down fully.

MEMO
- AF/AE lock can be applied repeatedly before the shutter is released.
- Use AF/AE lock in all Photography modes to guarantee excellent results.
- On FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800, pressing the shutter button down halfway locks the focus and exposure settings (AF and AE lock).

Subjects not suitable for autofocus
FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 uses a high-precision autofocusing mechanism. However, it may have difficulty focusing on the following:

- Subjects photographed through glass
- Subjects that do not reflect well, such as hair or fur
- Subjects with no substance, such as smoke or flames
- Dark subjects
- Subjects with little or no contrast between the subject and the background (such as subjects dressed in the same color as the background)
- Shots where another high-contrast object (not the subject) is close to the AF frame and is either closer or further away than your subject (such as a shot of someone against a background with strongly contrasting elements)
For such subjects use AF/AE lock (→ p.31).

Very shiny subjects such as a mirror or car body
Fast moving subjects
Adjusting the shot composition

Select the LCD monitor display.
Press DISP/BACK to change the LCD monitor display.

Position the main subject at the intersection of two lines in this frame or align one of the horizontal lines with the horizon. Use this frame as a guide to the subject’s size and the balance of the shot while composing a shot.

MEMO
Always use AF/AE lock when composing a shot. The image may be out of focus if AF/AE lock is not used.

Best framing

Position the main subject at the intersection of two lines in this frame or align one of the horizontal lines with the horizon. Use this frame as a guide to the subject’s size and the balance of the shot while composing a shot.

MEMO
Always use AF/AE lock when composing a shot. The image may be out of focus if AF/AE lock is not used.
Viewing the Images

Play back your images to check them. For important photographs, always take a test shot and view the image to make sure that the camera is working normally.

Setting the camera to Playback mode

Press \( \text{w} \) during shooting to change to Playback mode.

When the camera is off, press \( \text{w} \) for about 1 second to turn the camera on in Playback mode.

MEMO

- When pressing \( \text{w} \), the last image shot appears on the LCD monitor.
- When playing back images shot with a camera other than FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800, a present icon appears on the LCD monitor.

CAUTION

Still images viewable on FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800

This camera will display still images recorded on FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 or still images (excluding some uncompressed images) recorded on any FUJIFILM digital camera that supports \textit{xD-Picture Cards} or SD Memory Cards. Clear playback or playback zooming may not be possible for still images shot on cameras other than FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800.

Select the LCD monitor display.

Press DISP/BACK during Playback mode to change the LCD monitor display.

Select the LCD monitor display.

Press DISP/BACK during Playback mode to change the LCD monitor display.

**MEMO**

Pressing DISP/BACK cancels playback zoom.

---

**Multi-frame playback**

Multi-frame playback screen (9 frames) appears on the LCD monitor. Select required frame from the 9 frames.

1. Press ▲, ▼, ◀, or ► to move the cursor (colored frame) to the selecting frame. Press ▲ or ▼ repeatedly to jump to the next page.

2. Press MENU/OK to enlarge the image.
Sorting by date

In sorting by date mode, you can view all images taken on the same day.

1 Press ▲, ▼, ◀, or ◁ to move the cursor (colored frame) to the selecting frame.

2 Press MENU/OK to enlarge the image.

Selecting the date

1 Press ▲, ▼, ◀, or ◁ to move the cursor (colored frame) to ◁ on the upper left frame.

2 Press ◀ to display the selecting date.

3 Press ▲ or ▼ to move the cursor (colored frame) to select the date. Press ▲ or ▼ repeatedly to jump to the next page.

4 Press ◁.
Erasing the Images/Movies

Use this mode to erase unnecessary images or movies to have ample free space on the Memory Card or internal memory. Your camera calls images “frames”.

Using the erase button (Trash can)

Pressing Trash can (✓) erases images easily.

1 Press \ or ▶ to select the erasing image.
2 Press Trash can (✓).
3 Press \ or ▶ to select OK.
4 Press MENU/OK to erase the displayed image.

Erasing the images using Playback menu

1 Press MENU/OK to open the PLAYBACK MENU.
2 Press ▲ or ▼ to select \ ERASE.
3 Press ◀.
Using the Camera

MEMO

To erase another frame (file), repeat above steps. When erasing frames (files) is completed, press DISP/ BACK.

CAUTION

Pressing MENU/OK repeatedly erases consecutive frames (files). Take care not to erase a frame (file) by mistake.

Continued ➤
Erasing all frames (ALL FRAMES)

Press MENU/OK to erase all the frames (files).

MEMO
Press DISP/BACK to cancel erasing of all the frames (files). Some unprotected frames (files) will be left unerased.

MEMO
- When using a Memory Card, the images in the Memory Card are erased. When not using a Memory Card, the images in the internal memory are erased.
- Selecting BACK returns to single-frame playback without erasing any frames (files).
- Protected frames (files) cannot be erased. Unprotect the frames (files) before erasing them (→p.75).
- If “DPOF SPECIFIED. ERASE OK?” or “DPOF SPECIFIED. ERASE ALL OK?” appears, press MENU/OK again to erase the frames (files).

CAUTION
Erased frames (files) cannot be recovered. Back up important frames (files) onto your PC or another media.
Using the Photography Functions — Procedure of Setting

Specify the camera settings for taking pictures to get the best result. A general guide is given below.

1 Select the Photography mode.

Set the Photography mode.
The camera settings are tailored to the scene being shot.
Note that the availability of a shooting mode and its setting method may vary depending on the mode you wish to use.

**<FinePix A610>**
Set the photography mode in the shooting menu. See p.43 for information on setting shooting mode.

**<FinePix A900/FinePix A825/FinePix A820/FinePix A800>**
Set the photography mode using the mode dial. See p.44 for information on setting shooting mode.

| AUTO | This is the easiest mode for taking pictures (→p.46). |
|      | Select the best Shooting mode for the scene being shot (→p.46-47). |
| SP( / / / / / / / / ) | Select the best shooting mode for the scene being shot from SCENE POSITION in the SHOOTING MENU (→p.47-50). |

This mode provides detailed settings that are impossible to set in AUTO mode (→p.50).

**<FinePix A610>**
This is the easiest mode for taking pictures (→p.46).

Select the best Shooting mode for the scene being shot (→p.46-50).

Continued ➔
2 Specify the photography settings.
Pressing buttons or selecting menu allows you to specify photography functions. You can obtain the best result for shooting.

### Specifying functions using buttons

<table>
<thead>
<tr>
<th>Button</th>
<th>Function Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🌻 Macro</td>
<td>Used for close-up shots (→ p.51).</td>
</tr>
<tr>
<td>⚡ Flash</td>
<td>Used for shots in dark locations or for backlit subjects, etc. (→ p.52).</td>
</tr>
<tr>
<td>⌚ Self-timer</td>
<td>Used in situations such as group shots where the photographer is included in the shot (→ p.54).</td>
</tr>
</tbody>
</table>

- **ISO** Use to specify required sensitivity setting (→ p.61).
- **QUALITY** Use to specify required image size (→ p.62).
- **EXP. COMPENSATION** Use this setting to obtain the correct exposure (only 🌻) (→ p.64).
- **WHITE BALANCE** Use to adjust the color tone (only 🌻) (→ p.65).

*FinePix A800*
Setting the Shooting Mode (FinePix A610)

You can select the most suitable setting according to the subject by selecting one of the Shooting modes. See p.41 for information on available shooting mode.

☑ CHECK
- See p.53 for information on the available flash modes.
- When anything other than  in the SHOOTING MODE is selected, only AUTO can be selected for the ISO (sensitivity) setting.

1. Press MENU/OK to open the menu.

2. Press ▲ or ▼ to select the SHOOTING MODE.

3. Press ▶.

4. Press ▲ or ▼ to select the setting.

5. Press MENU/OK to confirm the setting.
Setting the Shooting Mode (except FinePix A610)

You can select the most suitable setting according to the subject by selecting one of the Shooting modes.

Turn the mode dial and select the shooting mode.

Photography functions:
* AUTO (→p.46)
* BABY MODE (→p.46)
* PICTURE STABILIZATION (→p.46)
* RED EYE REDUCTION (→p.46)
* DIGITAL ZOOM (→p.46)
* PORTRAIT (→p.47)
* SP Scene Position

**CHECK**
- See p.53 for information on available flash modes.
- When anything other than in the SHOOTING MODE is selected, only AUTO can be selected for the ISO (sensitivity) setting.

---

Selecting Scene position setting (SP Scene Position)

You can choose from various types (▲, ▼, ◀, ◁, ◐, ◲, ◳, ●, ◼, ◽, ◼, ◽, ◼) of scene.

Select the scene position setting in the SCENE POSITION in the SHOOTING MENU.

See p.41 for information on the available .

1. Set the Mode dial to SP.
2. Press MENU/OK to open the menu.

3. Press ▲ or ▼ to select SCENE POSITION.

4. Press ►.

5. Press ▲ or ▼ to select the setting.

6. Press MENU/OK to confirm the setting.
This section describes the available shooting modes. Note that the availability of a shooting mode and its setting method may vary depending on the mode you wish to use. (→p.43, 44)

**AUTO**

This is the easiest mode for providing crisp and clear shots. Use this mode for ordinary photography. Camera specifies EXP. COMPENSATION and WHITE BALANCE settings automatically.

**BABY MODE**

This function is suitable for taking pictures of young children. This mode suppresses the flash so that you can take their picture with a natural ambience.

**CHECK**

Flash cannot be used in the Baby mode.

**PICTURE STABILIZATION**  
(Except FinePix A610)

This function is suitable for taking pictures of moving subjects such as children or pets. Use this mode to select a fast shutter speed that reduces camera shake and moving-subject blurring.

**RED EYE REDUCTION**  
(Except FinePix A610)

This mode is suitable for shooting portraits in low-light conditions. Use this mode to minimize red-eye (eyes appear in red in the finished photo).

**CAUTION**

Flash fires automatically. Do not use this mode at situations where the flash cannot be used.

**MEMO**

When using the flash to take a picture of people in low-light conditions, eyes may sometimes appear red in the picture. This is caused by the light of the flash reflecting off the inside of the eye.

**DIGITAL ZOOM**  
(Except FinePix A610)

Using this mode allows you to enlarge your subject automatically 3x and to shoot an enlarged image quickly. Further zoom is available by adjusting the zoom switch to activate optical zoom.

**Zoom bar display**

FinePix A800

- W
- T
- Digital zoom: 3x
- Optical zoom: 3x
- Max. zoom scale: 9x

FinePix A900/FinePix A825/FinePix A820

- W
- T
- Digital zoom: 3x
- Optical zoom: 4x
- Max. zoom scale: 12x
CAUTION

- Using the DIGITAL ZOOM allows you to enlarge your subject and shoot it. However, it will lower your image quality. Set the DIGITAL ZOOM when requiring it.
- When using DIGITAL ZOOM, an increasing ‘speckling’ effect might be observed in the LCD monitor.
- DIGITAL ZOOM is different from DIGITAL ZOOM (→p.91) selected in SET-UP menu. With DIGITAL ZOOM, optical zoom adjustment is available but digital zoom adjustment is not available.

PORTRAIT

Use this mode for photography to get beautiful skin tones and soft overall tone.

LANDSCAPE

Use this mode for shooting scenery in daylight and provides crisp, clear shots of scenery such as buildings and mountains.

CHECK

Flash cannot be used in the Landscape mode.

SPORT

Use this mode to take pictures of a moving subject. It gives priority to faster shutter speeds.

NIGHT

Use this mode for shooting evening and night scenes.

A picture is taken with a slow shutter of up to 3 seconds.

CHECK

Use a tripod to prevent camera shake, because a picture is taken with a slow shutter.

Continued
Shooting Mode

NATURAL LIGHT (except FinePix A610)

This mode produces beautiful images that retain the natural ambience when shots are taken in low-light conditions. This mode is also ideal for shooting indoor or situations where the flash cannot be used.

Camera sets the high-sensitivity setting when selecting the Natural light mode. This mode is effective for reducing camera shake and moving-subject blurring when taking pictures in low-light conditions.

CHECK
Flash cannot be used in the Natural light mode.

BEACH

Use this mode to prevent darkening images and provide crisp, clear shots, when shooting at beach under strong sunlight.

SNOW

Use this mode to prevent darkening images and provide crisp, clear shots, when shooting at snowy scene where the whole screen appears white.

CHECK
Flash cannot be used in the Natural light mode.

FIREWORKS

Use this mode to shoot fireworks. It is effective for taking more vivid shots of fireworks with a slow shutter.

CHECK
- Flash cannot be used in the Fireworks mode.
- Shutter speed setting: 1/2 sec. to 4 sec.
- Use a tripod to prevent camera shake in the Fireworks mode.

Selecting the exposure time setting

Press ◀ or ▶ to select the exposure time.
**SUNSET**

Use this mode to shoot sunset, making the colors more vivid.

**UNDERWATER**

Use this mode for shooting with a waterproof case. It is effective for taking more vivid shots of ocean blue.

**FLOWER**

Use this mode to take clear close-up shots when zooming up a flower. It is effective for taking more vivid shots of flower petal.

**CHECK**

- Flash cannot be used in the Flower mode.
- Focal range
  - <FinePix A900/FinePix A825/FinePix A820>
    - Wide angle: Approx. 10 cm to 2 m (3.9 in. to 6.6 ft.)
    - Telephoto: Approx. 26 cm to 2 m (10.2 in. to 6.6 ft.)
  - <FinePix A610/FinePix A800>
    - Wide angle: Approx. 10 cm to 2 m (3.9 in. to 6.6 ft.)
    - Telephoto: Approx. 35 cm to 2 m (13.8 in. to 6.6 ft.)

**PARTY**

Use this mode for shooting at indoor wedding and party. This mode produces beautiful images that retain the natural ambience when shots are taken in low-light conditions.

*Continued*
Shooting Mode

MUSEUM

Use this mode for taking pictures in places such as museum where the use of flash and making an operation sound and a shutter sound are restricted. Flash mode is forcibly set to Suppressed flash and operation sound, shutter sound and the self-timer lamp are off.

MEMO

Check whether photography is permitted before using this mode.

TEXT

Use this mode to shoot documents and white board. It is effective for taking clearer shots of letters.

CHECK

Focal range

<FinePix A900/FinePix A825/FinePix A820>
- Wide angle: Approx. 10 cm to 2 m (3.9 in. to 6.6 ft.)
- Telephoto: Approx. 26 cm to 2 m (10.2 in. to 6.6 ft.)

<FinePix A610/FinePix A800>
- Wide angle: Approx. 10 cm to 2 m (3.9 in. to 6.6 ft.)
- Telephoto: Approx. 35 cm to 2 m (13.8 in. to 6.6 ft.)

MANUAL

Set the Photography functions to manual to easily control yourself.

Photography functions:
- EXP. COMPENSATION (p.64)
- WHITE BALANCE (p.65)
Macro (Close-up)

Use this mode to take close-up shots.
Available Photography modes: 📷, AUTO, 📷, 📷, 📷, 📷, 📷, 📷, 📷, 📷 (→p.46, 48, 49, 50)

Press 📷 (.cycle) to select Macro mode.
Press 📷 (cycle) again to cancel Macro mode.

CAUTION 📷, 📷, and 📷 are not available on the FinePix A610.

CHECK
- Focal range
  <FinePix A900/FinePix A825/FinePix A820>
    Wide angle:
    Approx. 10 cm to 80 cm (3.9 in. to 2.6 ft.)
    Telephoto:
    Approx. 26 cm to 80 cm (10.2 in. to 2.6 ft.)
  <FinePix A610/FinePix A800>
    Wide angle:
    Approx. 10 cm to 80 cm (3.9 in. to 2.6 ft.)
    Telephoto:
    Approx. 35 cm to 80 cm (1.1 ft. to 2.6 ft.)
- Effective flash range
  Approx. 30 cm to 80 cm (1.0 ft. to 2.6 ft.)

MEMO
- When setting 🌹 or 📷 mode, the camera sets to 📷 Macro mode automatically.
- Use a tripod to prevent camera shake in Macro mode.
- Any of the following cancels Macro mode:
  - Changing the Shooting mode setting
  - Turning the camera off
Setting the Flash (Intelligent Flash)

Flash photography is useful for taking pictures at night or indoor dark locations. Choose from 6 flash modes according to the type of shot. See p.53 for information on the available Photography modes.

**MEMO**
By calculating subject distance and brightness, the camera automatically adjusts the flash amount to suit shooting conditions. This maintains consistent balance of bright/dark areas across the image in low-light conditions (dimly-lit room, etc). The Intelligent Flash feature guarantees consistent results when using the flash.

![Camera with flash settings](image)

The flash setting changes each time you press the shutter button down halfway.

**AUTO AUTO FLASH (not displayed)**
Use this mode for ordinary photography. The flash fires as required by the shooting conditions.

**RED EYE REDUCTION**
This mode is suitable for shooting portraits in low-light conditions. Use this mode to minimize red-eye (eyes appear in red in the finished photo). On the FinePix A900/FinePix A825/FinePix A820/FinePix A800, you can set this mode as a shooting mode (p.46).

**MEMO Red-eye effect**
When using the flash to take a picture of people in low-light conditions, eyes may sometimes appear red in the picture. This is caused by the light of the flash reflecting off the inside of the eye.

**FORCED FLASH**
Use this mode in backlit scenes, or to get the correct colors when taking a picture under bright lighting. In this mode, the flash fires in bright as well as dark conditions.

**SUPPRESSED FLASH**
This mode is suitable for situations where the flash cannot be used. Use a tripod to prevent camera shake when shooting in Suppressed flash mode in the dark condition. Any time, flash does not fire.

**SLOW SYNCHRO, RED EYE & SLOW**
This mode allows you to take pictures of people at night that clearly show both your subjects and the night time backdrop. To prevent camera shake, always use a tripod. Using synchronizes Red-eye reduction mode. Using selects slow shutter speeds of up to 3 seconds.
**CAUTION**
In bright scenes, overexposure may occur.

**CHECK**
Effective flash range (Flash: AUTO)

<FinePix A900/FinePix A825/FinePix A820>
- Wide-angle: Approx. 60 cm to 3.9 m (2.0 ft. to 12.8 ft.)
- Telephoto: Approx. 60 cm to 1.8 m (2.0 ft. to 5.9 ft.)

<FinePix A610>
- Wide-angle: Approx. 60 cm to 3.5 m (2.0 ft. to 11.5 ft.)
- Telephoto: Approx. 60 cm to 1.9 m (2.0 ft. to 6.2 ft.)

<FinePix A800>
- Wide-angle: Approx. 50 cm to 3.8 m (1.6 ft. to 12.5 ft.)
- Telephoto: Approx. 60 cm to 2.0 m (2.0 ft. to 6.6 ft.)

If you take pictures outside of the effective flash range, the image may appear dark even if the flash is used.

**CAUTION Notes on using flash**
- If pressing the shutter button while the flash is charging (indicator lamp blinking orange), the picture will be taken without the flash (when using AUTO and [Flash]).
- The flash charging time may increase when the batteries are low on charge.
- When taking a picture using the flash, the image may disappear and go dark briefly due to flash charging. The indicator lamp blinks orange during charging.
- The flash fires several times (pre-flashes and the main flash). Do not move the camera until the picture is taken.

**CHECK**
List of available flash modes in each Photography mode ([Flash], [Flash], and [Flash] are not available on the FinePix A610).

53
The self-timer is used in situations where the photographer is included in the shot. When photographer is away from the camera, use a tripod to prevent camera fall.

Available Photography modes: All (p.46-50)

**Setting self-timer**

The self-timer setting changes each time you press (▼).

The last displayed setting is the selected mode.

- : The picture is taken after 10 seconds.
- : The picture is taken after 2 seconds.

**Taking pictures using self-timer**

1. Press the shutter button down halfway to focus on the subject and press the shutter button fully.

   - Halfway pressed
   - Fully pressed

Pressing the shutter button down halfway that focuses on the subject. Without releasing the shutter button, press the button all the way down (fully pressed) to start the self-timer.
2 Take pictures in selected time.

A picture is taken after the self-timer lamp changes from lit to blinking (only blinks with the 2-second self-timer).

A countdown appears on the LCD monitor indicating the time remaining until the picture is taken.

**Using the 2-second self-timer**

This is useful when you worry about camera shake even if attaching the camera on a tripod.

**MEMO**

- To stop the self-timer, once it has started running, press DISP/BACK.
- Any of the following cancels the self-timer setting:
  - Completing the shooting
  - Changing the Photography mode setting
  - Setting the camera to Playback mode
  - Turning the camera off
- Take care not to stand in front of the lens when pressing the shutter button as this can prevent the correct focus or brightness (exposure) from being achieved.
Increasing Monitor Brightness

Use this function to increase the brightness of the LCD monitor temporarily when you have difficulty seeing the monitor in low-light conditions or in daylight.

Increasing the LCD monitor brightness

Press * (▲) to display the LCD monitor brightly. Press * (▲) again to return to normal LCD monitor brightness.

MEMO

- This function is automatically canceled after each shot.
- When this function is active, it will increase the amount of speckling in images on the LCD monitor. This is normal and does not affect the photographed image.
- This function is purely for checking the composition of your shot. It does not increase the brightness of the image.
- Even if you increase the brightness in low-light conditions, you cannot check the subject.
- The color tones may vary depending on the subjects.
Using SHOOTING MENU

Use the SHOOTING MENU to adjust image quality. You can take pictures in a wide range of conditions.

Setting the SHOOTING MENU

1. Press MENU/OK to open the SHOOTING MENU.
2. Press ▲ or ▼ to select the menu.
3. Press ▶.
4. Press ▲ or ▼ to change the setting.
5. Press MENU/OK to confirm the setting.

* FinePix A800

**Using SHOOTING MENU**

**MEMO**

Note that the shooting menu will vary depending on the selected shooting mode.

- When shooting mode is set to 📸, 🎨, 📜, 📝, 📝.

![Shooting Menu](image1)

- When shooting mode is set to 📚, 📚, 📚, 📚, 📚, ☹️, ☹️, ☹️, ☹️, ☹️, ☹️, ☹️, ☹️ (mode dial set to SP).

![Shooting Menu](image2)

- When shooting mode is set to 📸 (mode dial set to SP).

![Shooting Menu](image3)
Changing the sensitivity setting

Use this menu to specify required sensitivity setting of the ambient light around the subject. The larger value of the sensitivity, the higher sensitivity is obtained. The higher sensitivity settings will allow you to take pictures in darker locations.

CHECK

Settings

- <FinePix A610>
  AUTO/400/200/100
- <FinePix A900/FinePix A825/FinePix A820/FinePix A800>
  AUTO/800/400/200/100

Selecting AUTO as the sensitivity setting, the camera selects the best sensitivity setting for the subject’s brightness.

MEMO

When anything other than MANUAL in the Photography mode is selected, only AUTO can be selected for the ISO (sensitivity) setting.

CAUTION

Although higher sensitivity settings will allow you to take pictures in darker locations, they will also increase the amount of speckling in your images. Choose the sensitivity setting that best suits the conditions.

The selected sensitivity setting appears on the LCD monitor when the sensitivity setting is set to another setting excluding AUTO.
Changing the Quality Setting

Use this menu to specify the image size (number of recorded pixels).

Select the quality setting for the scene being shot.

### Quality settings in Photography mode (FinePix A900)

<table>
<thead>
<tr>
<th>Quality mode</th>

</tbody>
</table>
Area shot and quality setting

Area shot excluding 3:2

Area shot with 3:2

Normal shooting provides an aspect ratio of 4:3 and 3:2 shooting provides an aspect ratio of 3:2 (same aspect ratio as 35 mm film and post card).

MEMO

- The bigger the number of recorded pixels, the better the image quality becomes. As the number of recorded pixels becomes smaller, you will be able to record more frames to a Memory Card.
- The quality setting is retained even when the camera is turned off or the mode setting is changed.
- When changing the quality setting, the number of available frames also changes (→p.144-146). The numbers to the right of setting show the number of available frames.
**Adjusting exposure compensation (EXP. COMPENSATION)**

**Available Photography mode:**  
Adjusting exposure compensation is available in the following modes:  
- **s** (→p.50)

Use this menu for shots to get the correct brightness (exposure), such as shots with extremely high contrast between the subject and the background.

**CHECK**
- Compensation range: –2 EV to +2 EV  
- (13 steps in 1/3 EV increments)  
- Explanation of Terms “EV” (→p.149)  
- The LCD monitor brightness will increase or decrease depending on the exposure compensation setting.

**Guide to compensation**

- Backlit portraits:  
  +2/3 EV to +1 2/3 EV

- Very bright scenes (such as snowfields) and highly reflective subjects: +1 EV

- Shots made up predominantly of sky: +1 EV

- Spotlit subjects, particularly against dark backgrounds: –2/3 EV

- Scenes with low reflectivity, such as shots of pine trees or dark foliage: –2/3 EV

**MEMO**

- This setting is retained when the camera is turned off (icon appears). Set the exposure compensation to “±0 EV” unless compensation is required.
- Any of the following disables exposure compensation:  
  - Using the flash in AUTO or mode
  - Shooting dark scenes in mode
Adjusting color balance

( WHITE BALANCE)

Available Photography mode: \( \text{CAM} \)  \( \rightarrow \text{p.50} \)

Adjust the color balance based on white to suit the color of the ambient light around the subject.

AUTO: Automatic adjustment

• : Shooting outdoors in good weather

: Shooting in shade

: Shooting under Daylight fluorescent lamps

: Shooting under Warm White fluorescent lamps

: Shooting under Cool White fluorescent lamps

: Shooting in incandescent light

MEMO

• In AUTO mode, the correct white balance may not be achieved for subjects such as close-ups of people's faces and pictures taken under a special light source. Select the correct white balance for the light source.

• When the flash fires, the white balance setting for the flash is used. Consequently, to achieve a particular effect, the flash mode should be set to \( \text{SUPPRESSED FLASH} \)  \( \rightarrow \text{p.52} \).

• The color tones may vary depending on the shooting conditions (light source, etc.).

• After taking the picture, check the image color (white balance).

• Explanation of Terms “White Balance”  \( \rightarrow \text{p.149} \)
Using PLAYBACK MENU

Use this menu to play back photographed images.

Setting the PLAYBACK MENU

1. Press \( \rightarrow \) to set the camera to Playback mode (\( \rightarrow \) p.34).

2. Press MENU/OK to open the PLAYBACK MENU.

3. Press \( \uparrow \) or \( \downarrow \) to select the menu.

4. Press \( \Rightarrow \).

5. Press \( \uparrow \) or \( \downarrow \) to change the setting.

6. Press MENU/OK to confirm the setting.

\( ! \) CAUTION

Menu listing will vary depending on model.

* FinePix A800
Sending and receiving images (IR COMMUNICATION) (FinePix A900/FinePix A825/FinePix A820 only)

You can send photographed images to another FUJIFILM digital camera (if it has IR Capability), other devices with high-speed infrared transmission capability, or any other mobile device with the IrSimple function. You can also receive photographed images from a FUJIFILM digital camera, another device with high-speed infrared transmission capability, or another mobile device with the IrSimpleShot™ (IrSS™) function.

Select the menu

1 Press to set the camera to Playback mode (p.34).

2 Press MENU/OK to open the PLAYBACK MENU.

3 Press ▲ or ▼ to select IR COMMUNICATION.

4 Press MENU/OK.

memo

You can specify the infrared transmission setting in the SET-UP menu. See p.87, 89 for information on specifying the infrared transmission setting.

check

Refer to the manual provided with each device for more information.
Sending image data

Sending image data to a FUJIFILM digital camera is shown as an example here. You can send the data to another device in the same way.

1. Turn the camera on.

2. Press ‹ or ‹ to select the sending frame (file).

3. Point the camera’s infrared port towards the front of the camera’s infrared port (→p.14). Transmission distance is about 5 to 20 cm (2 to 7.9 in.) within approx. 15°.

4. Press MENU/OK to begin transmission. When transmission is completed, “TRANSMISSION COMPLETED” will appear on the LCD monitor.

⚠️ CAUTION
- Check that your camera is turned on when transmitting the image data.
- Movie images cannot be transmitted.
- Images photographed with a camera other than FinePix A900/FinePix A825/FinePix A820 may not be printed or transmitted.

☑️ CHECK
Refer to the manual provided with the receiving device for more information.
Receiving the image data

Receiving the image data from a FUJIFILM digital camera is shown as an example here. You can receive data from another device in the same way.

1. Turn the camera on.

2. Press \( \text{↓} \) or \( \text{▲} \) to select the sending frame (file).

3. Point the camera’s infrared port towards the front of the camera’s infrared port (→ p.14). Transmission distance is about 5 to 20 cm (2 to 7.9 in.) within approx. 15°.

4. Press \( \text{↓} \) to begin transmission. When transmission is completed, “DATA RECEIVED” will appear on the LCD monitor.

Continued →
CAUTION

- Movie images cannot be transmitted.
- If the QUALITY of sending image data is over \(3\), QUALITY of the image will be set to \(3\).
- If “COMMUNICATION ERROR”, “CANNOT BE TRANSMITTED”, or “CANNOT BE RECEIVED” appears, press MENU/OK or \(\downarrow\) to retransmit the image data, or press DISP/BACK to cancel transmitting.
- Do not place anything between the transmitting and receiving device.
- Leaving the camera in direct sunlight or directly under fluorescent lighting may prevent successful data transfer.
- Successful transfer may not be possible when transmitting near infrared transmission devices (such as the remote controller of TV or VCR) or devices that generate electrical noise.
- Correctly aim the infrared port towards the front of the device or camera’s infrared port during image data transmission.

MEMO

When playing back an image received from another camera, \(\text{ unfolds}\) will appear in the LCD monitor.
Setting automatic playback (SLIDE SHOW)

Use this mode to play back photographed images continuously. You can select playback interval and type of image transition.

MEMO
- To interrupt SLIDE SHOW, press MENU/OK.
- Press or to advance or go back through the images.
- The Auto power off function (→p.94) does not operate during slide show.
- Movie starts automatically. When the movie ends, the playback function moves it on.
- Press DISP/BACK once during playback to display on-screen help.

DPOF set frame (PRINT ORDER (DPOF))

You can specify the image, number of prints, with or without date of printing with a DPOF-compatible printer.

* FinePix A800

WITH DATE : The date will be imprinted on your prints.
WITHOUT DATE: The date will not be imprinted on your prints.
RESET ALL : All DPOF settings will be canceled.

Continued ➤
WITH DATE / WITHOUT DATE

Selecting WITH DATE [E] appears on the LCD monitor and the date will be imprinted on your prints.

![Print Order (DPOF)]

Total number of prints

Setting for that frame

1. Press ▼ or ► to display the frame (file) for specifying DPOF setting.

2. Press ▲ or ▼ to set a value.
   - Up to 99 sheets are printed.
   - For frames (files) that you do not want printed, set the number of prints to 0 (zero).

To specify more DPOF settings, repeat steps 1 and 2.

3. Always press MENU/OK after the settings are completed.
   - Pressing DISP/BACK cancels those settings.

4. Press MENU/OK again.
   - The total number of prints appears on the LCD monitor.

MEMO Canceling DPOF setting

1. Press MENU/OK to open the PLAYBACK MENU and press ▲ or ▼ to select PRINT ORDER (DPOF).
2. Press ►.
3. Press ▲ or ▼ to select WITH DATE [E] or WITHOUT DATE and press MENU/OK to display the print order screen.
4. Press ▼ or ► to select the frame (file) with the DPOF setting you want to cancel.
5. Press ▼ to set the number of prints to 0 (zero).

To cancel the DPOF setting for another frame (file), repeat steps 4 and 5.

Always press MENU/OK to complete the settings.
- RESET ALL (→ p.73)
MEMO

- When DPOF settings were specified on another camera.

When the data includes a frame (file) with DPOF settings that were specified on another camera, “RESET DPOF OK?” appears. Pressing MENU/OK erases all of the DPOF settings already specified for each frame (file). Specify the DPOF setting for each frame (file) again.
- Prints of up to 999 frames (files) can be ordered on the same Memory Card.
- DPOF settings cannot be specified for movies.

CAUTION

- Pressing DISP/BACK while choosing settings will cancel all current settings. If there were previous DPOF settings, only the modifications are canceled.
- When selecting the WITH DATE [3] setting, the date is imprinted on your shots using the Print Service or a DPOF-compatible printer (depending on the printer specifications, the date may not be printed in some cases).
- Images photographed with a camera other than FinePix A900/FinePix A825/FinePix A820/FinePix A610/ FinePix A800 may not be specified DPOF settings.

RESET ALL

To cancel all DPOF settings:

Select RESET ALL in the PLAYBACK MENU (→p.71).

Press MENU/OK.

MEMO

appears on the LCD monitor during playback when the image has specified DPOF settings.
DPOF stands for Digital Print Order Format and refers to a format that is used for recording printing specifications for images shot using a digital camera on media such as a Memory Card. The recorded specifications include information on which frames are to be printed.

This section gives a detailed description of how to order your prints with FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800.

* Some printers do not support date and time imprinting or specification of the number of prints.

* The warnings shown below may appear while specifying the prints.

“DPOF SPECIFIED. ERASE OK ?”
“DPOF SPECIFIED. ERASE ALL OK ?” (→p.40)
When erasing the image, the DPOF setting for that image is deleted at the same time.

“.RESET DPOF OK ?” (→p.73)
When inserting a Memory Card that contains images specified for printing by another camera, those print specifications are all reset and replaced by the new print specifications.

[DPOF FILE ERROR] (→p.127)
Up to 999 images can be specified on the same Memory Card.
Protecting the images

(Protect)

Use this mode to prevent frames (files) from being accidentally erased. Your camera calls images “frames”.

FRAME SET / RESET

To protect or unprotect only the selected frame (file):

1. Press \ or \ to select the protecting/unprotecting frame (file).
2. Press MENU/OK to protect/unprotect the currently displayed frame (file).

Unprotected: protecting frame (file)
Protected: reset frame (file)

To protect another frame (file), repeat steps 1 and 2.

When protecting frames (files) is completed, press DISP/BACK.

SET ALL

Press MENU/OK to protect all the frames (files).

RESET ALL

Press MENU/OK to unprotect all the frames (files).
PLAYBACK MENU

MEMO To stop the procedure midway

If the images are very large, protecting or unprotecting all the frames (files) may take some time. If you want to take a picture or record a movie during the procedure, press DISP/BACK.

CAUTION

The Format function erases all the frames (files), including protected frames (files) (→p.93).

Copy the images (COPY)

It is possible to transfer saved images between the internal memory and a Memory Card. Your camera calls images “frames”.

Selecting COPY

1. Press ▲ or ▼ to select ▲ INTERNAL MEMORY ➔ ▲ CARD or ▲ CARD ➔ ▲ INTERNAL MEMORY.
2. Press ▶.
Copy one frame at a time (FRAME)

1. Press ▲ or ▼ to select FRAME.
2. Press MENU/OK.
3. Press ◄ or ► to select the copying frame (file).
4. Press MENU/OK to copy the currently displayed frame (file).

MEMO
To copy another frame (file), repeat steps 3 and 4. When copying frames (files) is completed, press DISP/BACK.
Copying all frames (ALL FRAMES)

1. Press ▲ or ▼ to select ALL FRAMES.

2. Press MENU/OK.

3. Press MENU/OK to copy all the frames (files).

**CAUTION**
- When [MEMORY FULL] or [MEMORY FULL] appears on the LCD monitor, copying the data stops on the way.
- When copying the image that has specified DPOF setting, the DPOF setting is not copied.
Rotating the images
(IMAGE ROTATE)

When shooting in the vertical position, the image appears horizontal on the LCD monitor. Use this mode to rotate an image and to display correct direction.

⚠️ CAUTION

Protected frames (files) cannot be rotated. Unprotect the frames (files) before rotating them (→ p.75).

❗️ MEMO

An image can be rotated only when playing back using FinePix A900/FinePix A825/FinePix A820/FinePix A610/ FinePix A800.

You may not be able to rotate images that were shot with a camera other than FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800.

1. Press ← or → to select the rotating frame (file).
2. Press MENU/OK to open the PLAYBACK MENU.
3. Press ▲ or ▼ to select IMAGE ROTATE.
4. Press MENU/OK.
5. Press ▲ or ▼ to rotate the image.
   ▼: Rotates the image clockwise at a 90 degree angle.
   ▲: Rotates the image counterclockwise at a 90 degree angle.
6. Press MENU/OK to confirm the setting.
   Next time the image is played back, it will be automatically rotated.
   Press DISP/BACK to cancel rotating the image.
Trimming the images
(TRIMMING)
(except FinePix A610)

Use this mode to trim the required part of the photographed image.

1 Select the menu.

   ① Press to set the camera to Playback mode (→p.34).

   ② Press or to select the trimming frame (file).

   ③ Press MENU/OK to open the PLAYBACK MENU.

   ④ Press or to select TRIMMING.

   ⑤ Press .

2 Specify trimming part of image.

   wide zoom
   (Zoom out)

   tele zoom
   (Zoom in)

   Zoom bar

   ① Set the zoom switch to or to zoom in or out of an image.

   Navigation screen
   (Current displayed image)

   ② Press , , or to display another part of the image.
3 Record the image.

Check the saved image size and press MENU/OK.
The trimmed image is added as a separate file in the final frame.

MEMO
- Press DISP/BACK to return to single-frame playback.
- A saved image size varies depending on the zoom scale of step 2. For 0.3 M, YES option appears in yellow.
- Image sizes (FinePix A900)

<td>Printing at up to 4R (10.2 × 15.2 cm/4 × 6 in.) / A6 size</td>
</tr>
</tbody>
</table>

- When quality setting is selected, the image is trimmed to normal size (4:3 aspect ratio).

CAUTION
- trimming is not available on the FinePix A610.
- You may not be able to trim images that were shot with a camera other than FinePix A900/FinePix A825/FinePix A820/FinePix A800.
Recording Movies

Use this mode to record movies. Note that the way to set the Movie mode vary depending on model. See the instructions below and follow the one which applies to your camera.

Set the camera to 🎥 Movie mode (FinePix A610)

1. Press MENU/OK to open the menu.
2. Press ▲ or ▼ to select SHOOTING MODE.
3. Press ►.
4. Press ▲ or ▼ to select MOVIE.
5. Press MENU/OK to confirm the setting.

Set the camera to 🎥 Movie mode (except FinePix A610)

Set the Mode dial to 🎥.

CHECK

The available recording time appears on the LCD monitor.
### Zooming the image
You must zoom beforehand as you cannot zoom during recording.

![Zoom bar](image)

Set the zoom switch to [+] or [-] to zoom in or out of an image.

#### CHECK

**<FinePix A900/FinePix A825/FinePix A820>**
- Optical zoom focal length
  - Approx. 39 mm to 156 mm (35 mm camera equivalent)
  - Max. zoom scale: 4×
- Focal range
  - Approx. 60 cm (2.0 ft.) to infinity

**<FinePix A610>**
- Optical zoom focal length
  - Approx. 39 mm to 117 mm (35 mm camera equivalent)
  - Max. zoom scale: 3×
- Focal range
  - Approx. 60 cm (2.0 ft.) to infinity

**<FinePix A800>**
- Optical zoom focal length
  - Approx. 36 mm to 108 mm (35 mm camera equivalent)
  - Max. zoom scale: 3×
- Focal range
  - Approx. 50 cm (1.6 ft.) to infinity

### Record movies

Press the shutter button down fully to start recording. During recording, [REC] and a counter that shows the remaining time appear on the LCD monitor.

![Fully pressed](image)

Recording ends when pressing the shutter button down halfway during recording or the remaining time runs out.

#### MEMO
There is no need to hold down the shutter button during recording.

*Continued ➔*
CHECK Recording movies

- Specifications: Motion JPEG (→p.149).
  *FinePix A610*
  without sound
  *FinePix A900/FinePix A825/FinePix A820/FinePix A800*
  Monaural sound
- Quality selection method: **320** (320 × 240 pixels)
- Frame rate (→p.149): 30 frames per second (fixed)

MEMO

- The brightness and color of the LCD monitor shown during movie recording may differ from those shown before recording begins.
- Pressing the shutter button down fully fixes the focus, however the exposure and white balance are adjusted to the scene being shot.
- If recording is stopped immediately after it begins, 1 second of the movie is recorded onto the Memory Card or internal memory.
- See p.144-146 for information on recording times per Memory Card or internal memory.

CAUTION

- You may not be able to record a movie with sound when using FinePix A610. Check the “Specifications” in the “CHECK Recording movies” in the left column.
- Because a movie is recorded onto the Memory Card or internal memory as it is saved, it cannot be recorded correctly if the camera suddenly loses power (if the batteries run out or the AC power adapter is disconnected).
- A movie file taken by FinePix A900/FinePix A825/ FinePix A820/FinePix A610/FinePix A800 may not be playable on other cameras.
- When using FinePix A900/FinePix A825/FinePix A820/ FinePix A800, sound is recorded concurrently with the images. So make sure not to cover the microphone with your finger when recording (→p.14).
- When using FinePix A900/FinePix A825/FinePix A820/ FinePix A800, camera operation noises may be recorded during movie shooting.
- If you shoot using the xD-Picture Cards with model numbers containing “M” such as DPC-M1GB, movie recording time may be reduced if you repeatedly record and erase (frame erase) image files. In such a case, erase all frames or format the xD-Picture Card before use. Back up important frames (files) onto your PC or another media.
Playing Back Movies

1. Press ◄ or ► to select the movie file. 🎥 appears on the LCD monitor.

2. Press ▼ to begin playing back movie.

The playback time appears on the LCD monitor along with a progress bar.

<table>
<thead>
<tr>
<th>Control</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playback</td>
<td>Playback begins. Playback stops when the end of the movie is reached.</td>
</tr>
<tr>
<td>Pause / Resume</td>
<td>Pauses the movie during playback. Press ▼ again to resume playback.</td>
</tr>
<tr>
<td>Stop</td>
<td>Stops playback. Press ◄ or ► while playback is stopped to go back to the previous file or advance to the next file respectively.</td>
</tr>
<tr>
<td>Fast forward / Rewind</td>
<td>Press ◄ or ► during playback to skip forwards or backwards through the movie.</td>
</tr>
<tr>
<td>Skip playback</td>
<td>Press ◄ or ► when the movie is paused, the movie advances or goes back one frame. Hold down ◄ or ► to move through the frames quickly.</td>
</tr>
</tbody>
</table>
MEMO

If the subject of the shot is very bright, white vertical streaks or black horizontal streaks may appear in the image during playback. This is normal.

CAUTION

- You may not be able to record movie with sound when using FinePix A610. Check the “Specifications” in the “CHECK Recording movies” on p.84.
- You may not be able to play back some movie files recorded on other cameras.
- To play back movie files on a PC, save the movie file on the Memory Card or internal memory to the PC’s hard disk and then play back the saved file.
- When using FinePix A900/FinePix A825/FinePix A820/ FinePix A800, make sure not to cover the speaker. The sound is difficult to hear.

Adjusting volume of movies (except FinePix A610)

You can adjust the volume of the movie with the FinePix A900/FinePix A825/FinePix A820/FinePix A800.

1. Press MENU/OK while playing back movie.
   The movie is paused during playback.

2. Press ▲ or ▼ to adjust the volume.

3. Press MENU/OK to confirm the setting.
   Camera starts to play back the movie.
Using the SET-UP menu

1 Open the SET-UP menu.

   ○ Press MENU/OK to open the menu.

   ○ Press ▲ or ▼ to select SET-UP.

   ○ Press ▶.

2 Change the page.

   ○ Press ◀ or ▶ to select the page.

   ○ Press ▼ to move to menu item.

3 Change the setting.

   ○ Press ▲ or ▼ to select the menu.

   ○ Press ▶.

   ○ Different type of screen appears depending on selected item.

   ○ Press ▲ or ▼ to change the setting.

   ○ Press MENU/OK to confirm the setting.

CAUTION

Some functions may not be available when using FinePix A610. Check the “SET-UP menu option” on p.88 for more information.
# SET-UP menu option

## CAUTION

Note that the SET-UP menu will vary depending on the camera model. The table below shows the SET-UP menu of the FinePix A900/FinePix A825/FinePix A820/FinePix A800. Note that the SET-UP menu on the FinePix A610 is displayed only on page 90, 1, and 2.

* Formatted Memory Card or internal memory used for both A and B.

CONT. : Pictures are stored beginning from the highest file number stored on the last Memory Card or internal memory used.

RENEW: Pictures are stored on each Memory Card beginning with a file number 0001. Each image will be numbered consecutively from the last number used. So when recorded images in the Memory Card are erased, the number of the erased frame will not be used again.

CHECK

The last 4 digits of the 7-digit number in the top right corner of the LCD monitor are the file numbers, while the first 3 digits show the directory number.

MEMO

- Setting this function to CONT. makes file management easier as it makes sure that file names are not duplicated when images are downloaded to a PC.
- When the camera settings are RESET (p.89), the frame number setting (CONT. or RENEW) is changed to CONT. and the frame number itself does not return to 0001.
- In CONT. setting, images are stored beginning from the highest file number on the current Memory Card when the Memory Card already contains image files with file numbers higher than the highest file number on the last Memory Card.
- The displayed frame number may differ for images photographed on other cameras.
DIGITAL ZOOM

Use this function to shoot enlarged images than maximum optical zoom scale.

Zoom bar display
FinePix A900/FinePix A825/FinePix A820

OFF W [ ] T
Optical zoom: 4x

ON W [ ] T
Optical zoom: 4x Digital zoom: approx. 7.6x

FinePix A610/FinePix A800

OFF W [ ] T
Optical zoom: 3x

ON W [ ] T
Optical zoom: 3x Digital zoom: approx. 6.9x*

The above description is based on using the FinePix A800.
On the FinePix A610, Digital zoom scale is approximately 6.2x.

CAUTION

Using the DIGITAL ZOOM allows you to enlarge your subject and shoot it. However, it will lower your image quality. Set the DIGITAL ZOOM when requiring it.

CHECK

■ FinePix A900/FinePix A825/FinePix A820

  Max. zoom scale: approx. 6.2x

■ FinePix A800

- Optical zoom focal length*
  Approx. 36 mm to 108 mm
- Digital zoom focal length*
  Approx. 108 mm to 746 mm
  Max. zoom scale: approx. 6.9x
- Digital zoom focal length (32)*
  Approx. 111 mm to 766 mm
  Max. zoom scale: approx. 6.9x

* 35 mm camera equivalents
MEMO
When zooming changes between optical and digital, the position of the “■” indicator stops. Turn the Zoom switch to the same direction again to start the “■” indicator moving again.

LCD POWER SAVE
The LCD monitor darkens when camera is not used for 8 seconds. When this function is active, you can save power and get the maximum possible running time from your batteries.

MEMO
Pressing any button wakes the camera up.

CAUTION
The LCD power save function is disabled during Playback mode and Movie mode.

PLAYBACK VOLUME (except FinePix A610)
Use this function to adjust volume while playing back movie.

1 Press ▲ or ▼ to adjust the volume. The larger the number, the larger the volume is emitted. 0 indicates a sound deadening.

2 Press MENU/OK to confirm the setting.

CAUTION
You can not adjust the playback volume of a movie with the FinePix A610.
LCD BRIGHTNESS

Use this function to adjust the LCD monitor brightness.

① Press ▲ or ▼ to adjust the LCD monitor brightness.
The indicator moves to the + to display the LCD monitor brightly or to the – to darken the LCD monitor.

② Press MENU/OK to confirm the setting.

FORMAT

Initialize (format) the Memory Card or internal memory for use with the camera.

① Press ◀ or ▶ to select OK.

② Pressing MENU/OK initializes the Memory Card or internal memory.

⚠️ CAUTION

- The Format function erases all the frames (files), including protected frames (files).
  Back up important frames (files) onto your PC or another media.
- Do not open the battery cover or expose the camera to shock during formatting, as formatting will be interrupted.
AUTO POWER OFF

When this function is active and the camera remains unused for 2 or 5 minutes, it turns camera off. Use this function when you want to get the maximum possible running time from your batteries.

⚠️ CAUTION

The Auto power off function is disabled during slide show (→p.71), discharging rechargeable batteries (→p.121) and when a printer or a PC connection (→p.98, 108) is being used.

.memo

Memo To restore power to the camera
Refer to “Turning On and Off” (→p.22).

TIME DIFFERENCE

Use this function when traveling to destinations in different time zones. This function sets a time difference relative to the date and time currently set. When this setting is enabled, the specified time difference is applied when pictures are taken.

1 Use Time difference function.

* FinePix A800

Press ▲ or ▼ to change between HOME and LOCAL.

To set the time difference, select LOCAL.

HOME: Your home time zone
LOCAL: Your destination time zone
2 Move to TIME DIFFERENCE screen.

* FinePix A800

Press ▶.

3 Set time difference.

1 Press ◀ or ▶ to select +/-, hour, and minute.

2 Press ▲ or ▼ to change the setting.

3 Always press MENU/OK after the settings are completed.

☑ CHECK

Available time setting
-23:45 to +23:45 (in 15-minute increments)

MEMO

In the time difference setting, when you change to the Photography mode, ➤ and the date is displayed for 3 seconds, the date display turns yellow.

☑ CHECK

Upon returning from a trip, always change the time difference setting back to HOME and then check the date and time again.
Connecting to a TV (FinePix A610)

When connecting to a TV, images can be displayed on wider screen. Using slide show function (→ p.71) together, you can have fun with folks.

Plug the Video cable (included) into the VIDEO OUT (Video output) socket of the camera.

Plug the other end of the cable into the Video input socket on the TV.

**CAUTION**
- Plug the Video cable (included) and the AC power adapter (sold separately) correctly and push them in each terminal.
- See p.121 for the information of the AC power adapter (sold separately).

**MEMO**
- When connecting the Video cable (included) to TV, the LCD monitor is turned off.
- The image quality for movie playback is lower than for still images.
- Refer to the instructions provided with your TV for more information on video input for your TV.
- Use the AC-3VX (sold separately) when FinePix A610 is connected to a TV for long periods.
Connecting to a TV (except FinePix A610)

When connecting to a TV, images can be displayed on wider screen. Using slide show function (→p.71) together, you can have fun with folks.

Plug the A/V cable (included) into the A/V OUT (Audio/Visual output) socket of the camera.

MEMO
- When connecting the A/V cable (included) to TV, the LCD monitor is turned off.
- The image quality for movie playback is lower than for still images.
- When connecting to a TV, even if you adjust the volume from the PLAYBACK VOLUME, the TV volume cannot be changed. Refer to the instructions provided with your TV for more information on audio/video input for your TV.
- Use the AC-3VX (sold separately) when FinePix A900/FinePix A825/FinePix A820/FinePix A800 is connected to a TV for long periods.

CAUTION
- Plug the A/V cable (included) and the AC power adapter (sold separately) correctly and push them in each terminal.
- See p.121 for the information of the AC power adapter (sold separately).
When a printer that supports PictBridge is available, images can be printed by connecting the camera directly to the PictBridge-compatible printer without a PC.

### Connecting to a printer

1. Connect the camera to your printer using the USB cable (mini-B).

   ![USB cable connection](image)

   **MEMO**
   
   Use the AC-3VX (sold separately) when FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 is connected to a printer.

2. Connect the camera to a printer and turn the printer on. Press for about 1 second to turn the camera on.

   ![USB connection screen](image)

3. The following screen appears on the LCD monitor after a moment.

   ![Screen with USB, PictBridge, and function options](image)

   **MEMO**
   
   Depending on the printer, some functions are disabled.

   “Specifying images for printing” — p.99
   “Printing with DPOF setting” — p.100
Specifying images for printing (PRINT WITH DATE / PRINT WITHOUT DATE)

1. Press < or > to display the frame (file) for specifying PRINT setting.
2. Press ▲ or ▼ to set a value.
   Up to 99 sheets are printed.

To specify more PRINT settings, repeat steps 1 and 2.

3. Press MENU/OK to display the confirm setting.

MEMO
Even if MENU/OK is pressed with total number of images set at 0 (zero), the screen printing once appears on the LCD monitor. Press MENU/OK again and printing starts.

MEMO Printing with date
Up to 99 sheets are printed.

4. Press MENU/OK again to download the data to the printer and start printing the specified number of prints.

CAUTION
PRINT WITH DATE is not available when the camera is connected to a printer that does not support date printing.
Printing with DPOF setting
(Press PRINT DPOF)

1. Press DISP/BACK to open the menu.

2. Press ▲ or ▼ to select PRINT DPOF.

3. Press MENU/OK to display the confirm setting.

4. Press MENU/OK again to download the data to the printer and start printing the specified frames (files) continuously.

CHECK
To select PRINT DPOF, the DPOF settings must be specified on FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 beforehand (→p.71).

CAUTION
Even when WITH DATE is specified in the DPOF settings (→p.71), the date is not inserted on printers that do not support date printing.
Press DISP/BACK to cancel the printing. Depending on the printer, the printing may not be canceled immediately or printing may stop midway through. When printing stops midway, briefly turn the camera off and then on again.

**Disconnecting the printer**
1. Check that “PRINTING” is not displayed on the camera’s LCD monitor.
2. Turn the camera off. Unplug the USB cable (mini-B).

**MEMO**
DPOF setting can be specified for images on internal memory.

**CAUTION**
- In PictBridge function, images photographed on other than a camera may not be printed.
- The camera cannot be used to specify printer settings such as the paper size and print quality.
- Use internal memory or a Memory Card that was formatted on FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800.
- Movies cannot be printed.
- Images photographed with a camera other than FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 may not be printed.
Installation on a Windows PC

Pre-installation checklist

Hardware and software requirements
To run this software, you must have the hardware and software described below. Check your system before you begin the installation.

Operating System

| Operating System*1 | Windows 98 SE  
|                   | Windows Millennium Edition (Windows Me)  
|                   | Windows 2000 Professional*2  
|                   | Windows XP Home Edition*2  
|                   | Windows XP Professional*2  
|                   | Windows Vista*2 |

CPU

200 MHz Pentium minimum  
(Windows XP/Vista users: 800MHz Pentium 4 or better recommended)

RAM

128 MB minimum (512 MB minimum for Windows Vista)

Hard disk space

Amount required for installation: 450 MB minimum  
Amount required for operation: 800 MB minimum

Display

1024 × 768 pixels or better, 16-bit color or better

Internet connection*3

- To use the FinePix Internet Service or mail attachment function:  
  An Internet connection or e-mail transmission software is needed  
- Connection speed: 56 kbps or better recommended

*1 Models with one of the above operating systems pre-installed.  
*2 When you install the software, login using a system administrator account (e.g. “Administrator”).  
*3 Required to use the FinePix Internet Service. The software can still be installed even if you do not have an Internet connection.

CAUTION

Note that the software to be installed is different depending on the OS. (Windows 98SE/Me: FinePixViewer, Windows 2000 Professional/XP/Vista: FinePixViewer S)

**MEMO**

- Connect the camera directly to the PC using the USB cable (mini-B). The software may not operate correctly when you use an extension cable or connect the camera via a USB hub.
- When your PC has more than one USB port, the camera can be connected to either port.
- Push the USB connector fully into the socket to ensure that it is securely connected. The software may not operate correctly if the connection is faulty.
- Additional USB interface board is not guaranteed.
- Windows 95, Windows NT and Windows 98 cannot be used.
- Operation is not guaranteed on home-built PCs or on PCs running updated operating system software.
- When you reinstall or remove FinePixViewer, the Internet menu and your user ID and password for the FinePix Internet Service are deleted from your PC. Enter your registered user ID and password and download the menu again.
Installation on a Windows PC

Do not connect the camera to your PC until the software installation is completed.

1 Install FinePixViewer as instructed in the Quick start guide.

Launching the installer manually

① Double-click the “My Computer” icon.
   * Windows XP users should click “My Computer” in the “Start” menu.
   Windows Vista users should click “Computer” in the “Start” menu.
② Right-click “FINEPIX” (CD-ROM drive) in the “My Computer” window (Windows Vista users: in the “Computer” window) and select “Open”.
③ Double-click “SETUP” or “SETUP.exe” in the CD-ROM window.

* The way file names are displayed differs as described below depending on your PC settings.
- File extensions (3-letter suffixes indicating the file type) may be shown or hidden. (e.g. Setup.exe or Setup)
- Text may be shown normally or all in uppercase (e.g. Setup or SETUP).

☑ CHECK

For Windows Vista users:
When loading the bundled CD-ROM on your PC, the “AutoPlay” window may appear. In this case, click “SETUP.exe”.
When “User Account Control” window appears, click “Allow”.

Installing other applications

You may see messages for installing Windows Media Player. Install this application as directed by the on-screen instructions.

2 Install DirectX as directed by the on-screen instructions and then restart your PC. If the latest version of DirectX is already installed on your PC, this installation is not performed.

⚠️ CAUTION

- If the latest version is already installed, this window does not appear.
- Do not remove the CD-ROM during this procedure.

3 After restarting the PC, a message appears stating “Installation of the FinePixViewer has been completed”.

Installation on a Mac OS X

Pre-installation checklist

Hardware and software requirements
To run this software, you must have the hardware and software described below. Check your system before you begin the installation.

<table>
<thead>
<tr>
<th>Compatible Mac*1</th>
<th>Power Macintosh G3<em>2, PowerBook G3</em>2, Power Macintosh G4, iMac, iBook, Power Macintosh G4 Cube, PowerBook G4, Power Macintosh G5, MacBook, MacBook Pro or Mac Mini</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating System</td>
<td>Mac OS X (compatible with version 10.3.9 to 10.4.8)</td>
</tr>
<tr>
<td>RAM</td>
<td>256 MB or better recommended</td>
</tr>
</tbody>
</table>
| Hard disk space  | Amount required for installation: 200 MB minimum  
Amount required for operation: 400 MB minimum                                                                                   |
| Display          | 800 x 600 pixels or better, at least 32,000 colors                                                                                |
| Internet connection*3 | • To use the FinePix Internet Service or mail attachment function:  
An Internet connection or e-mail transmission software is needed  
• Connection speed: 56 kbps or better recommended                                                                 |

*1 PowerPC, Intel processor loaded  
*2 Models with a USB port as a standard feature  
*3 Required to use the FinePix Internet Service. The software can still be installed even if you do not have an Internet connection.

⚠️ CAUTION
  • Connect the camera directly to the Macintosh using the USB cable (mini-B). The software may not operate correctly if you use an extension cable or connect the camera via a USB hub.  
  • Push the USB connector fully into the socket to ensure that it is securely connected. The software may not operate correctly if the connection is faulty.  
  • Additional USB interface board is not guaranteed.

Continued ➤
Installation on a Mac OS X

1 Turn your Macintosh on and start up Mac OS X. Do not launch any other applications.

2 When the bundled CD-ROM is loaded into the CD-ROM drive, the “FinePix” icon appears. Double-click the “FinePix” icon to open the “FinePix” volume window.

3 Double-click on “Installer for MacOSX”.

4 The Installer setup dialog appears. Click the [Installing FinePixViewer] button.

5 The “Authenticate” dialog appears. Enter the name and password for the administrator account and then click the [OK] button.*

   * The administrator account is the user account used for Mac OS X installation and you can confirm the user account in the Accounts dialog in the System Preferences.

6 The “License” dialog appears. Read the agreement carefully and then, if you agree to the terms of the Agreement, click the [Accept] button.

7 The “Read me” dialog appears. Click the [Continue] button.

8 The “FinePixInstallOSX” window appears. Click the [Install] button to install FinePixViewer.

9 The “FinePixViewer installation completed” message dialog appears. Then click exit button and close it.

   ! CAUTION
   For more information on what is installed, click the [Read Me First] button and [Using FinePixViewer] button.

   ! CAUTION
   When Safari is used as the Web browser, a message may be displayed and the CD-ROM may not be removed. If this happens, click the Safari icon in the Dock to make Safari the active application and then select “Quit Safari” in the “Safari” menu to shut down Safari.
10 Launch “Image Capture” from the “Applications” folder.

11 Change the Image Capture settings.
   Select “Preferences...” from the “Image Capture” menu.

12 Select “Other...” from “When a camera is connected, open”.

13 Select “FPVBridge” from “FinePixViewer” folder in the “Applications” folder and click the [Open] button.

14 Select “Quit Image Capture” menu in the “Image Capture” menu.
Connecting to a PC

By connecting the camera to a PC, your system can be expanded to fill a wide range of uses. Using “FinePixViewer” performs images saving, browsing and file management etc.

MEMO

If the power cuts out during data transmission, the data will not be transmitted correctly. Always use the AC power adapter when connecting the camera to a PC.

Refer to Software Installation (→ p.102, 105) the first time you connect the camera to your PC. Install the software first. Do not connect the camera to the PC before installing all the software.

① Insert the Memory Card with images into the camera (→ p.19).

You can use the xD-Picture Card and the SD Memory Card with the FinePix A900, FinePix A825, FinePix A820, FinePix A610, and FinePix A800. In this Owner’s Manual, these cards are expressed as “Memory Card”.

CAUTION

- Do not format the Memory Card in the camera on the PC.
- Use the Memory Card with images taken by a FUJIFILM Digital camera.
- When connecting to a PC, if the Memory Card contains large image or movie files, connection or transmission may take time or images may not be stored. In these cases, use the Image Memory Card Reader (sold separately), etc. Note that the Image Memory Card Reader DPC-R1 is not compatible with the SD Memory Card.

② Connect the camera to your PC using the USB cable (mini-B).

③ Press  for about 1 second to turn the camera on in Playback mode.
Software Installation

⚠️ CAUTION

- FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 is compatible with PTP (Picture Transfer Protocol)/MTP (Media Transfer Protocol). A PTP/MTP-compatible camera is a camera which can recognize the PC and printer automatically when connected.
- Always use the FUJIFILM AC Power Adapter AC-3VX (sold separately). If the camera suddenly loses power during data exchange, the Memory Card or internal memory could be damaged.
- Do not disconnect the USB cable (mini-B) when the camera is communicating with a PC. If disconnecting the USB cable (mini-B) during communication, the files on the Memory Card or internal memory may cause damage.
- In Mac OS X, you must set the automatic setup when the first time you connect the camera to your PC.
- Make sure that USB cable (mini-B) is connected correctly and pushed in.
- Perform pre-arranged steps to disconnect and turn off the camera (p.111).
- When the camera and PC are exchanging data, the indicator lamp blinks alternately green and orange.
- Auto power off is disabled during PC connection.
- Before replacing the Memory Card, always disconnect the camera from the PC. See p.111 for information on the disconnection procedure.
- The camera and PC may be exchanging data even when “Copying” disappears on your PC screen. Before disconnecting the USB cable (mini-B), always check that the indicator lamp is off.
- When Windows 98 SE is used, the supplied software must be installed first before connecting the camera to a PC using the USB cable. The PC will not recognize the camera if it is connected before the installation.

④ Set a PC.

Windows 98 SE / Me / Macintosh

⚠️ CAUTION

The Windows CD-ROM may also be required during installation. In this event, change CD-ROMs as directed by the on-screen instructions.

- FinePixViewer automatically starts up and the Save Image Wizard window (Save Image dialog box) appears. Follow the instructions provided on screen to save the images. To proceed without saving the images, click the [Cancel] button.

MEMO

- You can only see images saved on a PC. Save images on a PC.
- If you cancel saving by clicking the [Cancel] button, press POWER to turn off the camera and then disconnect it from the PC.
Connecting to a PC

Windows 2000 Professional

⚠️ CAUTION
The Windows CD-ROM may also be required during installation. In this event, change CD-ROMs as directed by the on-screen instructions.

FinePixViewer S automatically starts up and the Load Photos window appears. Follow the instructions provided on screen to save the images. To proceed without saving the images, click the [Cancel] button.

 FileNotFoundError

MEMO
• You can only see images saved on a PC. Save images on a PC.
• If you cancel saving by clicking the [Cancel] button, press POWER to turn off the camera and then disconnect it from the PC.

Windows XP / Vista

1️⃣ The help message appears in the bottom-right corner of your screen. This message will close when the settings are completed. No action is required.

⚠️ CAUTION
This step is not required for subsequent connections.

2️⃣ FinePixViewer S automatically starts up and the Load Photos window appears. Follow the instructions provided on screen to save the images. To proceed without saving the images, click the [Cancel] button.

 FileNotFoundError

MEMO
• You can only see images saved on a PC. Save images on a PC.
• If you cancel saving by clicking the [Cancel] button, press POWER to turn off the camera and then disconnect it from the PC.

Proceed to “Using FinePixViewer” (→p.112).
Disconnecting the camera

1 Windows 98 SE / Me
Once the image has been saved, the window below appears (Save Image Wizard window). To disconnect the camera, click the [Remove] button.

Windows 2000 Professional / XP / Vista
Once the image has been saved, the window below appears.

Macintosh
Once the image has been saved, the window below appears. To disconnect the camera, click the [OK] button.

Continued ➤
Connecting to a PC

2 ① Press POWER to turn the camera off.

② Unplug the USB cable (mini-B) from the camera.

Using FinePixViewer

Mastering FinePixViewer

For all information on FinePixViewer functions, refer to “How to Use FinePixViewer” in the Help menu for details.

- What is explained in “How to Use FinePixViewer”...
  “How to Use FinePixViewer” covers a range of topics, including batch processing and ordering prints.
Uninstalling the software

Only perform this operation when you no longer require the installed software or when the software was not installed correctly.

**Windows**

1. Check that the camera is not connected to the PC.
2. Quit all currently running applications.
3. Open the “My Computer” (Windows XP/Vista users should click “Control Panel” in the “Start” menu.) window. Then open the “Control Panel” (Windows Vista users: open the “Programs”) and double-click on “Add/Remove Programs” (Windows Vista users: “Programs and Features”).

4. The “Add or Remove Programs” (Windows Vista users: “Programs and Features”) window appears. Select the software to be uninstalled (FinePixViewer S, FinePixViewer or the driver) and then click the [Change/Remove] button (Windows Vista users: [Uninstall/Change] button).

Continued
Connecting to a PC

5. When the message appears, click the [OK] button. Check your selection carefully since the process cannot be canceled once you click the [OK] button.

6. Automatic uninstallation begins. When uninstallation ends, click the [OK] button.

Macintosh
Quit FinePixViewer. Then drag the installed FinePixViewer folder to the Trash and select “Empty Trash” in the “Finder” menu.
System Expansion Option

By using FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 together with other optional FUJIFILM products, your system can be expanded to fill a wide range of uses. Accessory availability may vary by country. Please check with your local Fujifilm representative to confirm product availability.

* Sound cannot be recorded with the FinePix A610.
Accessories Guide

Visit the FUJIFILM web site for the latest information on camera accessories.
Accessory availability may vary by country. Please check with your local Fujifilm representative to confirm product availability.

• **xD-Picture Card**
  Use the following xD-Picture Cards:
  16MB/32MB/64MB/128MB/256MB/512MB/1GB/2GB
  There are two types of xD-Picture Card: standard type and Type M (containing “M” in the model number, such as DPC-M2GB).
  FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 is compatible with Type M, however they may not be compatible depending on the device used (Image Memory Card Reader, etc.).

• **AC Power Adapter AC-3VX**
  Use the AC-3VX when taking pictures or play back images for long periods or when FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 is connected to a PC.
  * The shape of the AC power adapter, the plug, and power outlet depend on the country.

• **Soft Case SC-FXA03/Soft Case SC-FXA04**
  This is a special case made of polyurethane that protects the camera against soil, dust, and minor impacts when it is being carried.

</table>
Using Your Camera Correctly

Read this information and the “Safety Notes” (→p.158), to make sure you use your camera correctly.

■ Places to Avoid
Do not store or use the camera in the following types of locations:
- In the rain or in very humid, dirty, or dusty places
- In direct sunlight or in places subject to extreme temperature rises, such as in a closed car in summer
- Extremely cold places
- Places with strong vibration
- Places with smoke or steam
- Places subject to strong electric magnetic fields (such as near broadcasting tower, power lines, radar, motors, transformers, magnets, etc.)
- In contact with chemicals such as pesticides
- Next to rubber or vinyl products

■ Damaged by Water or Sand
FinePix A900/FinePix A825/FinePix A820/FinePix A610/ FinePix A800 can be damaged on the inside and outside by water and sand. When you are at the beach or close to water, make sure that the camera is not damaged by water or sand. Take care not to place the camera on a wet surface.

■ Damaged by Condensation
If the camera is carried from a cold location into a warm place, water droplets (condensation) may form on the inside of the camera or on the lens. When this occurs, turn the camera off and wait an hour before using the camera. Condensation may also form on the Memory Card. In this event, remove the Memory Card and wait a short time.

■ When the Camera is Not Used or is stored Periods of Time
If you do not intend to use the camera for a long period of time, remove the batteries and the Memory Card.

■ Cleaning Your Camera
- Use a blower brush to remove any dust on the lens or LCD monitor, and then gently wipe the camera with a soft, dry cloth. If any soil remains, apply a small amount of lens cleaning liquid to a piece of FUJIFILM lens cleaning paper and wipe gently.
- Do not scratch hard objects against the lens or LCD monitor.
- Clean the body of the camera with a soft, dry cloth. Do not use volatile substances or cleaning products these items can cause damage.

■ Using the Camera When Traveling
When traveling overseas, do not place your camera in the check-in baggage. Baggage can be subjected to violent shocks, and the camera may be damaged inside or outside.
Power Supply and Batteries

Applicable Batteries

- In the camera, use AA-size alkaline or Ni-MH (nickel-metal hydride) rechargeable batteries.
- Do not use AA-size manganese, nickel-cadmium (Ni-Cd) or lithium batteries in your FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 because the heat created by the batteries could damage the camera or cause it not to work.
- The life of alkaline batteries varies between brands. The life of batteries you purchase may be shorter than those provided with the camera.

Notes on the Batteries

Incorrect use of the batteries could cause them to leak, become hot, ignite, or burst. Always observe the precautions given below.
- Do not heat the batteries or throw them into a fire.
- Do not carry or store batteries with metal objects such as necklaces or hairpins.
- Do not expose the batteries to water, and keep batteries from getting wet or stored in moist locations.
- Do not attempt to take apart or change the batteries, including battery casings.
- Do not subject the batteries to strong impacts.
- Do not use batteries that are leaking, deformed, discolored.
- Do not store batteries in warm or humid places.
- Keep the batteries out of reach of babies and small children.
- Make sure that the battery polarity (\(\oplus\) and \(\ominus\)) is correct.
- Do not use new with used batteries. Do not use charged and discharged batteries together.
- Do not use different types or brands of batteries at the same time.

- If you do not intend to use the camera for a long period of time, remove the batteries from the camera. Note if the camera is left with the batteries removed, the time and date settings are cleared.
- The batteries feel warm right after being used. Before removing the batteries, turn the camera off and wait for the batteries to cool down.
- Since batteries do not work well in cold weather or locations, warm the batteries by placing them inside your garments before use. Batteries do not work well when cold. They will work again when the temperature returns to normal.
- Soil (such as fingerprints) on the battery terminals makes the batteries charge less reducing the number of images. Carefully wipe the battery terminals with a soft dry cloth before loading.

⚠️ If any liquid at all leaks from the batteries, wipe the battery compartment thoroughly and then load new batteries.

⚠️ If any battery fluid comes into contact with your hands or clothing, flush the area thoroughly with water. Note that battery fluid can cause loss of eyesight if it gets into your eyes. If this occurs, do not rub your eyes. Flush the fluid out with clean water and contact your physician for treatment.

Continued →
Using the AA-size Ni-MH batteries correctly

- As a power source in digital cameras, AA-size Ni-MH batteries (referred to hereafter as Ni-MH batteries) are superior to alkaline batteries in several ways, such as allowing more shots to be taken with the camera. However, care must be taken with the way Ni-MH batteries are used if their original performance is to be maintained.
- Ni-MH batteries left unused in storage for long periods can become “deactivated”. Also, repeatedly charging Ni-MH batteries that are only partially discharged can cause them to suffer from the “memory effect”. Ni-MH batteries that are “deactivated” or affected by “memory” suffer from the problem of only providing power for a short time after being charged. To prevent this problem, discharge and recharge them several times using the camera’s “Discharging rechargeable batteries” function. By repeating this cycle several times, the temporary reduction in performance caused by “memory” or “deactivation” can be remedied and the batteries can be restored to their original performance levels.
- Deactivation and memory are specific to Ni-MH batteries and are not in fact battery faults. See p.121-123 for the procedure for “Discharging rechargeable batteries”.

⚠️ CAUTION

Do not use the “Discharging rechargeable batteries” function when alkaline batteries being used.

- To charge Ni-MH batteries, use the quick battery charger (sold separately). Refer to the instructions supplied with the charger to make sure that the charger is used correctly.
- Do not use the battery charger to charge other batteries.
- Note that the batteries feel warm after being charged.
- Due to the way the camera is constructed, a small amount of current is used even when the camera is turned off. Note in particular that leaving Ni-MH batteries in the camera for a long period will overdischarge the batteries and may render them unusable even after recharging.
- Ni-MH batteries will self-discharge even when not used, and the time for which they can be used may be shortened as a result.
- Ni-MH batteries will deteriorate rapidly if overdischarged (e.g. by discharging the batteries in a flashlight). Use the “Discharging rechargeable batteries” function provided in the camera to discharge the batteries.
- Ni-MH batteries have a limited service life. If a battery can only be used for a short time even after repeated discharge-charge cycles, it may have reached the end of its service life.

### Disposing of Batteries

When disposing of batteries, do so in accordance with your local waste disposal regulations.
AC Power Adapter

Always use the AC Power Adapter AC-3VX with the camera. The use of an AC power adapter other than AC-3VX can be damaged to your digital camera.

- Use the AC power adapter for indoor use only.
- Plug the connection cord plug securely into the DC input terminal of the FUJIFILM Digital camera.
- Turn off the FUJIFILM Digital camera before disconnecting the cord from the FUJIFILM Digital camera's DC input terminal. To disconnect, pull out the plug gently. Do not pull on the cord.
- Do not use the AC power adapter with any device other than your camera.
- During use, the AC power adapter will become hot to the touch. This is normal.
- Do not take apart the AC power adapter. Doing so could be dangerous.
- Do not use the AC power adapter in a hot and humid place.
- Do not subject the AC power adapter to strong shocks.
- The AC power adapter may emit a humming. This is normal.
- If used near a radio, the AC power adapter may cause static. If this happens, move the camera away from the radio.
- Do not connect the AC power adapter to charge the AA-size Ni-MH (nickel-metal hydride) batteries. Use the optional charger to charge the Ni-MH batteries.

Discharging rechargeable batteries

The Discharging rechargeable batteries function can only be used with Ni-MH batteries. The Discharging rechargeable batteries function should not be used with alkaline batteries as it will completely drain the battery charge.

Use the Discharging rechargeable batteries function in the following situations:

- When the batteries only last for a short time after being charged normally
- When the batteries have not been used for a long period
- When you purchase new Ni-MH batteries

Do not use the Discharging rechargeable batteries function while using the AC power adapter. In these situations, the Ni-MH batteries will not be discharged due to the external power supply.

Continued ➞
Power Supply and Batteries

To discharge rechargeable batteries:

1. Press \ for about 1 second to turn the camera on.
2. Press MENU/OK to open the menu.
3. Press \ or \ to select \ SET-UP.
4. Press \ to open the SET-UP menu.
5. Press \ or \ to select \ DISCHARGE (Select \ on the FinePix A610.).
6. Press \ or \ to select \ DISCHARGE.
7. Press \.
8. Press MENU/OK.

* FinePix A800

DO NOT EXECUTE WITH NON Ni-MH RECHARGEABLE BATTERIES

YES CANCEL

* FinePix A800
9 Press ◀ or ▶ to select OK.

10 The screen changes and discharging begins.
When the battery level indicator blinks red and discharging ends, the camera turns off.

⚠️ **CAUTION**
To cancel discharging, press DISP/BACK.
Notes on the xD-Picture Card™, the SD Memory Card and the Internal Memory

■ Handling Memory Card

- When inserting the Memory Card into the camera, hold the Memory Card straight as you push it in.
- Never remove the Memory Card or turn the camera off during data recording or erasing (Memory Card formatting) as this could be damaged to the Memory Card.
- The use of xD-Picture Cards is recommended with FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800.
- The Memory Card may feel warm when it is removed from the camera after taking pictures. This is normal.
- Do not put labels on the Memory Card. Peeling labels can cause the camera not to work properly.

MEMO Type M and H of xD-Picture Card

- Type M
  - There are two types of xD-Picture Card: standard type and Type M (containing “M” in the model number, such as DPC-M2GB).
  - FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 is compatible with Type M.
- Type H
  - While Type H and M share the same compatibility.
- Usable USB drive
  - Type H cannot be used with xD-Picture Card USB drive DPC-UD1, while Type M can.

■ Internal Memory

- Images held in the camera’s internal memory may be corrupted or erased due to problems such as camera faults. Save your important data to another media (i.e., DVD-R, CD-R, CD-RW, hard disk, etc.).
- Data stored in the camera’s internal memory cannot be guaranteed in the event that the camera is submitted for repairs.
- When the camera is repaired, any data stored in the camera’s internal memory is subject to checking by the repairer.

■ Using Memory Card or Internal Memory with a PC

- When taking pictures using a Memory Card or internal memory that has been used on a PC, reformat the Memory Card using your camera.
- When formatting, a directory (folder) is created. Image data is then recorded in this directory.
- Do not change or delete the directory (folder) or file names on the Memory Card or internal memory because this will make it impossible to use the Memory Card or internal memory in your camera.
- Always use the camera to erase image data.
- To edit image data, copy or transfer the image data to the PC and edit the copied or transferred data.
# Warning Displays

</tr>
</tbody>
</table>

#### Power Supply and Others

**Power supply**

Use one of the following:
- 2×AA-size alkaline batteries
- 2×AA-size Ni-MH (Nickel-Metal Hydride) batteries (sold separately)
- AC power adapter AC-3VX (sold separately)

**Guide to the number of available frames for battery operation**

<table>
<thead>
<tr>
<th>Battery Type</th>

</tr>
</thead>
<tbody>
<tr>
<td>Alkaline batteries</td>
<td>Approx. 100 frames</td>
</tr>
<tr>
<td>Ni-MH batteries 2500 mAh</td>
<td>Approx. 350 frames</td>
</tr>
</tbody>
</table>

According to the CIPA (Camera & Imaging Products Association) standard procedure for measuring digital still camera battery consumption (extract):

- When using alkaline batteries, use the batteries supplied with the camera. You can use Ni-MH batteries also. The storage media should be **xD-Picture Card**.
- Pictures should be taken at a temperature of +23°C (+73°F), with the LCD monitor turned on, the optical zoom moved from full wide-angle to full telephoto (or vice-versa) and back again to its original position every 30 seconds, the flash used at full power every second shot and the camera turned off and then on again once every 10 shots.
- **Note**: Because the number of available shots varies depending on the capacity of alkaline batteries or the level of charge in Ni-MH batteries, the figures shown here for the number of available shots using batteries are not guaranteed. The number of available shots will also decline at low temperatures.

</table>
If you shoot using the **xD-Picture Cards** with model numbers containing “M” such as DPC-M2GB, movie recording time may be reduced if you repeatedly record and erase (frame erase) image files. In such a case, erase all frames or format the **xD-Picture Card** before use. Back up important frames (files) onto your PC or another media.

* These specifications are subject to change without notice. FUJIFILM shall not be held liable for damages resulting from errors in this Owner’s Manual.

* The LCD monitor on your digital camera is manufactured using advanced high-precision technology. Even so, small bright points and anomalous colors (particularly around text) may appear on the monitor. These are normal display characteristics and do not indicate a fault with the monitor. This phenomenon will not appear on the recorded image.

* The operation error may be caused in a digital camera by the strong radio interference (i.e. electric fields, static electricity, line noise, etc.).

* Due to the nature of the lens, the edges of images may appear distorted. This is normal.
Explanation of Terms

Deactivated batteries
Leaving an Ni-MH battery unused in storage for a long period may cause a rise in the level of substances that inhibit current flow inside the battery and result in a dormant battery. A battery in this state is referred to as deactivated. Because current flow is inhibited in a deactivated Ni-MH battery, the battery’s original level of performance cannot be achieved.

EV
A number denotes Exposure Value. The EV is determined by the brightness of the subject and sensitivity (speed) of the film or CCD. The number is larger for bright subjects and smaller for dark subjects. As the brightness of the subject changes, a digital camera maintains the amount of light hitting the CCD at a constant level by adjusting the aperture and shutter speed. When the amount of light striking the CCD doubles, the EV increases by 1. Likewise, when the light is halved, the EV decreases by 1.

Frame rate (fps)
The frame rate refers to the number of images (frames) that are photographed or played back per second. For example, when 10 frames are continuously photographed in a 1-second interval, the frame rate is expressed as 10 fps. For reference, TV images are displayed at 30 fps (NTSC).

JPEG
Joint Photographic Experts Group
A file format used for compressing and saving color images. The higher the compression rate, the greater the loss of quality in the decompressed (restored) image.

Memory effect
If an Ni-MH battery is repeatedly charged without first being fully discharged, its performance may drop below its original level. This is referred to as the “memory effect”.

Motion JPEG
A type of AVI (Audio Video Interleave) file format that handles images and sound as a single file. Images in the file are recorded in JPEG format. Motion JPEG can be played back by QuickTime 3.0 or later.

Smear
A phenomenon specific to CCDs whereby white streaks appear on the image when there is a very strong light source, such as the sun or reflected sunlight, in the photography screen.

White Balance
Whatever the kind of the light, the human eye adapts to it so that a white object still looks white. On the other hand, devices such as digital cameras see a white subject as white by first adjusting the color balance to suit the color of the ambient light around the subject. This adjustment is called matching the white balance.

Exif Print
Exif Print Format is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.
FUJIFILM Digital Camera Worldwide Network

If you have technical questions or if you need repair service, ask the following local distributor. Please present the warranty card and your purchase receipt when you ask for repairs. Refer to the warranty card for conditions of the warranty. There is a case that repair and Technical support cannot be accepted for some models which your local distributor does not deal with. These lists are subject to change without notice.

Safety Notes

- Make sure that you use your FinePix A900/FinePix A825/FinePix A820/FinePix A610/FinePix A800 camera correctly. Read these Safety Notes and your Owner’s Manual carefully before use.
- After reading these Safety Notes, store them in a safe place.

About the Icons

The icons shown below are used in this document to indicate the severity of the injury or damage that can result if the information indicated by the icon is ignored and the product is used incorrectly as a result.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="warning-icon.png" alt="WARNING" /></td>
<td>This icon indicates that death or serious injury can result if the information is ignored.</td>
</tr>
<tr>
<td><img src="caution-icon.png" alt="CAUTION" /></td>
<td>This icon indicates that personal injury or material damage can result if the information is ignored.</td>
</tr>
</tbody>
</table>

The icons shown below are used to indicate the nature of the information which is to be observed.

- Triangular icons tell you that this information requires attention (“important”).
- Circular icons with a diagonal bar tell you that the action indicated is prohibited (“Prohibited”).
- Filled circles with an exclamation mark tell you an action that must be performed (“Required”).

### WARNING

If a problem arises, turn the camera off, remove the batteries, disconnect and unplug the AC power adapter.

- Continued use of the camera when it is emitting smoke, is emitting any unusual odor, or is in any other abnormal state can cause a fire or electric shock.
- Contact your FUJIFILM dealer.

Do not allow water or foreign objects to enter the camera.

- If water or foreign objects get inside the camera, turn the camera off, remove the batteries and disconnect and unplug the AC power adapter.
- Continued use of the camera can cause a fire or electric shock.
- Contact your FUJIFILM dealer.

Do not use the camera in the bathroom or shower.

- This can cause a fire or electric shock.

Never attempt to change or take apart the camera. (Never open the casing.)

- Do not use the camera when it has been dropped or the casing is damaged.
- This can cause a fire or electric shock.
- Contact your FUJIFILM dealer.

Unplug from power socket.
**WARNING**

Do not change, heat or unduly twist or pull the connection cord and do not place heavy objects on the connection cord. These actions could damage the cord and cause a fire or electric shock.
- If the cord is damaged, contact your FUJIFILM dealer.

**Do not place the camera on an unstable surface.**
This can cause the camera to fall or tip over and cause injury.

**Never attempt to take pictures while in motion.**
Do not use the camera while you are walking or driving a vehicle. This can result in you falling down or being involved in a traffic accident.

**Do not touch any metal parts of the camera during a thunderstorm.**
This can cause an electric shock due to induced current from the lightning discharge.

**Do not use the batteries except as specified.**
Load the batteries with the + and - marks.

---

**WARNING**

Do not heat, change or take apart the batteries.
Do not drop or subject the batteries to impacts.
Do not attempt to recharge lithium or alkaline batteries.
Do not store the batteries with metallic products.
Do not use chargers other than the specified model to charge the batteries. Any of these actions can cause the batteries to burst or leak and cause fire or injury as a result.

**Use only the batteries or AC power adapters specified for use with this camera.**
Do not use voltages other than the power supply voltage shown. The use of other power sources can cause a fire.

**If the battery leaks and fluid gets in contact with your eyes, skin or clothing.**
Flush the affected area with clean water and seek medical attention or call an emergency number right away.

**Do not use the charger to charge batteries other than those specified here.**
The charger is designed for Fujifilm HR-AA Ni-MH batteries. Using the charger to charge conventional batteries or other types of rechargeable batteries can cause the battery to leak fluid, overheat or burst.
### Safety Notes

<table>
<thead>
<tr>
<th><strong>WARNING</strong></th>
<th><strong>CAUTION</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When discarding or storing batteries, cover the battery terminals with insulation tape.</strong>&lt;br&gt;Contact with other metallic objects or batteries could cause the batteries to ignite or burst.</td>
<td><strong>Do not use this camera in locations affected by oil fumes, steam, humidity or dust.</strong>&lt;br&gt;This can cause a fire or electric shock.</td>
</tr>
<tr>
<td><strong>Keep Memory Cards out of the reach of small children.</strong>&lt;br&gt;Because Memory Cards are small, they can be swallowed by children. Be sure to store Memory Cards out of the reach of small children. If a child swallows a Memory Card, seek medical attention or call an emergency number.</td>
<td><strong>Do not leave this camera in places subject to extremely high temperatures.</strong>&lt;br&gt;Do not leave the camera in locations such as a sealed vehicle or in direct sunlight. This can cause a fire.</td>
</tr>
<tr>
<td><strong>Keep out of the reach of small children.</strong>&lt;br&gt;This product could cause injury in the hands of a child.</td>
<td><strong>Keep out of the reach of small children.</strong>&lt;br&gt;This product could cause injury in the hands of a child.</td>
</tr>
<tr>
<td><strong>Do not place heavy objects on the camera.</strong>&lt;br&gt;This can cause the heavy object to tip over or fall and cause injury.</td>
<td><strong>Do not move the camera while the AC power adapter is still connected.</strong>&lt;br&gt;Do not pull on the connection cord to disconnect the AC power adapter.&lt;br&gt;This can damage the power cord or cables and cause a fire or electric shock.</td>
</tr>
<tr>
<td><strong>Do not use the AC power adapter when the plug is damaged or the plug socket connection is loose.</strong>&lt;br&gt;This could cause a fire or electric shock.</td>
<td><strong>Do not use the AC power adapter when the plug is damaged or the plug socket connection is loose.</strong>&lt;br&gt;This could cause a fire or electric shock.</td>
</tr>
<tr>
<td><strong>Do not cover or wrap the camera or the AC power adapter in a cloth or blanket.</strong>&lt;br&gt;This can cause heat to build up and distort the casing or cause a fire.</td>
<td><strong>Do not cover or wrap the camera or the AC power adapter in a cloth or blanket.</strong>&lt;br&gt;This can cause heat to build up and distort the casing or cause a fire.</td>
</tr>
<tr>
<td>CAUTION</td>
<td></td>
</tr>
<tr>
<td>------------------</td>
<td></td>
</tr>
<tr>
<td><strong>When you are cleaning the camera or you do not plan to use the camera for an extended period, remove the batteries and disconnect and unplug the AC power adapter.</strong> Failure to do so can cause a fire or electric shock.</td>
<td></td>
</tr>
<tr>
<td><strong>When charging ends, unplug the charger from the power socket.</strong> Leaving the charger plugged into the power socket can cause a fire.</td>
<td></td>
</tr>
<tr>
<td><strong>Using a flash too close to a person’s eyes may temporarily affect the eyesight.</strong> Take particular care when photographing infants and young children.</td>
<td></td>
</tr>
<tr>
<td><strong>When a Memory Card is removed, the card could come out of the slot too quickly. Use your finger to hold it and gently release the card.</strong></td>
<td></td>
