This manual will show you how to use your FUJIFILM DIGITAL CAMERA FinePix J10 / FinePix J12 correctly. Please follow the instructions carefully.
Warning

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

For customers in the U.S.A.

Tested To Comply
With FCC Standards
FOR HOME OR OFFICE USE

FCC Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.
You are cautioned that any changes or modifications not expressly approved in this manual could void the user’s authority to operate the equipment.

Notes on the Grant:
To comply with Part 15 of the FCC Rules, this product must be used with a Fujifilm-specified ferrite-core A/V cable, USB cable, and DC supply cord.

For customers in Canada

CAUTION
This Class B digital apparatus complies with Canadian ICES-003.

Please read the Safety Notes (separate note “Notes and Cautions”) and make sure you understand them before using the camera.

Perchlorate Material-special handling may apply, See http://www.dtsc.ca.gov/hazardouswaste/perchlorate.
IMPORTANT

NOTICE
BEFORE OPENING THE CD-ROM PROVIDED BY FUJIFILM Corporation, PLEASE READ THIS END USER LICENSE AGREEMENT CAREFULLY. ONLY IF YOU AGREE WITH THIS AGREEMENT, SHOULD YOU USE THE SOFTWARE RECORDED ON THE CD-ROM. BY OPENING THE PACKAGE, YOU ACCEPT AND AGREE TO BE BOUND BY THIS AGREEMENT.

End User License Agreement

This End User License Agreement (“Agreement”) is an agreement between FUJIFILM Corporation (“FUJIFILM”) and you, which sets forth the terms and conditions of the license granted for you to use the software provided by FUJIFILM.

1. Definitions.
   (a) “Media” means the CD-ROM titled “Software for FinePix”- which is provided to you together with this Agreement.
   (b) “Software” means the software which is recorded on Media.
   (c) “Documentation” means the operation manuals of Software and other related written materials which are provided to you together with Media.
   (d) “Product” means Media (including Software) and Documentation collectively.

2. Use of Software.
   FUJIFILM grants to you a nontransferable, nonexclusive license:
   (a) to install one copy of Software onto one computer in binary machine executable form;
   (b) to use Software on the computer onto which Software is installed; and
   (c) to make one backup copy of Software.

   3.1 You shall not distribute, rent, lease or otherwise transfer all or any part of Software, Media or Documentation to any third party without FUJIFILM’s prior written consent. You also shall not sublicense, assign or otherwise transfer all or any part of the rights granted to you by FUJIFILM under this Agreement without FUJIFILM’s prior written consent.
   3.2 Except as expressly granted by FUJIFILM hereunder, you shall not copy or reproduce all or any part of Software or Documentation.
   3.3 You shall not modify, adapt or translate Software or Documentation. You also shall not alter or remove copyright and other proprietary notices that appear on or in Software or Documentation.
   3.4 You shall not, or shall not have any third party, reverse-engineer, decompile, or disassemble Software.

4. Ownership.
   All copyrights and other proprietary rights to Software and Documentation are owned and retained by FUJIFILM or the third party suppliers as indicated on or in Software or Documentation. Nothing contained herein shall be construed, expressly or implicitly, as transferring or granting any right, license, or title to you other than those explicitly granted under this Agreement.

5. Limited Warranty.
   FUJIFILM warrants to you that Media is free from any defect in material and workmanship under normal use for ninety (90) days from the date of your receipt of Media. Should Media not meet the foregoing warranty, FUJIFILM shall replace such defective Media with another Media bearing no defect. FUJIFILM’s entire liability and your sole and exclusive remedy with regard to any defect in Media shall be expressly limited to such FUJIFILM’s replacement of Media as provided herein.

6. DISCLAIMER OF WARRANTY.
   EXCEPT AS PROVIDED IN SECTION 5 HEREIN, FUJIFILM PROVIDES PRODUCT “AS IS” AND WITHOUT WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED. FUJIFILM SHALL MAKE NO WARRANTY, EXPRESS, IMPLIED OR STATUTORY, AS TO ANY OTHER MATTERS, INCLUDING, BUT NOT LIMITED TO NON-INFRINGEMENT OF ANY COPYRIGHT, PATENT, TRADE SECRET, OR ANY OTHER PROPRIETARY RIGHTS OF ANY THIRD PARTY, MERCHANTABILITY, OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. LIMITATION OF LIABILITY.
   IN NO EVENT SHALL FUJIFILM HAVE ANY LIABILITY FOR ANY GENERAL, SPECIAL, DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, OR OTHER DAMAGES (INCLUDING DAMAGES FOR LOSS OF PROFITS OR LOST SAVINGS) INCURRED FROM THE USE OF OR INABILITY TO USE PRODUCT EVEN IF FUJIFILM HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

8. No export.
   You acknowledge that neither Software nor any part thereof, will be transferred, or exported to any country or used in any manner in violation of any export control laws and regulations to which Software is subject.

   In case you breach any of the terms and conditions hereof, FUJIFILM may immediately terminate this Agreement without any notice.

10. Term.
    This Agreement is effective until the date when you cease to use Software, unless earlier terminated in accordance with Section 9 hereof.

11. Obligation upon termination.
    Upon termination or expiration of this Agreement, you shall, at your own responsibility and expense, delete or destroy immediately all Software (including its copies), Media and Documentation.

    This Agreement shall be governed by and construed in accordance with laws of Japan.
EC Declaration of Conformity

We

This product comes with batteries. When these are empty, you shouldn't throw them away but deliver them as domestic chemical refuse.
Disposal of Electric and Electronic Equipment in Private Households

Disposal of used Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product, or in the manual and in the warranty, and/or on its packaging indicates that this product shall not be treated as household waste. Instead it should be taken to an applicable collection point for the recycling of electrical and electronic equipment.

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

If your equipment contains easy removable batteries or accumulators please dispose these separately according to your local requirements.

The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you have purchased the product.

In Countries outside the EU:

If you wish to discard this product, please contact your local authorities and ask for the correct way of disposal.

Usable Memory Cards

You can use the xD-Picture Card, the SD Memory Card and
the SDHC Memory Card with the FinePix J10 / FinePix J12. In
this Owner's Manual, these cards are expressed as “Memory
Card”.
About this Manual

■ About marks

⚠️ CAUTION
This mark denotes issues that may affect the camera’s operation.

✔️ CHECK
This mark denotes points to notice in the camera’s operation.

>{$}$ MEMO
This mark denotes additional topics that complement the basic operating procedures.

■ Usable Memory Cards
You can use the xD-Picture Card, the SD Memory Card and the SDHC Memory Card with the FinePix J10 / FinePix J12. In this Owner’s Manual, these cards are expressed as “Memory Card”.

■ About illustration
Up, down, left, and right are indicated by black triangles in the Owner’s Manual. Up or down is shown as ▲ or ▼, and left or right is shown as ◄ or ►.

About cables
The cables used for FinePix J10 / FinePix J12 are following:
• A/V cable for FinePix J10 / FinePix J12
• USB cable for FinePix J10 / FinePix J12
In this manual, these cables are expressed as “A/V cable” and “USB cable”.

■ Note
In this manual, the menu names and messages displayed on the LCD monitor of the camera or PC screen appear in square brackets ([ ]).
Accessories Included

Make sure that all the below accessories are included. Note that accessories may vary depending on model.

- **Rechargeable Battery NP-45 (1)**

- **Strap (1)**

- **Battery Charger BC-45A (1 set)**

- **A/V cable (1)**

- **USB cable (1)**

- **CD-ROM (1)**
  Software for FinePix

- **Owner’s Manual (this manual) (1)**
- **Notes and Cautions (1)**

**Attaching the strap**

Attach the strap as shown in 1 and 2. When attaching the strap, move the fastener to adjust the length and slightly away from the end of the strap, as shown in figure 1.

---

FinePix J10 / FinePix J12 has internal memory that can store images without Memory Card. **IN** appears on the LCD monitor when the internal memory is active.
Charging the Battery

The battery is not fully charged at shipment and must be fully charged before being used.

**Compatible battery**
Rechargeable Battery NP-45 (1)

**CAUTION**
- The battery is not fully charged at shipment and must be fully charged before being used.
- Do not stick labels onto the battery as this could cause the battery to become jammed inside the camera.
- Any contact between the battery terminals could cause the battery to short circuit and overheat.
- See “Notes and Cautions” for information on the battery.
- Always use the Rechargeable Battery NP-45 (included). The use of other brands of rechargeable battery could cause faults or damage to the camera.
- Do not split or peel outer labels of the battery.

1. **Load the battery into the battery charger BC-45A.**

Set the battery correctly as indicated by the polarity icon.

**<Wall type>**

**<Cord type>**
2 Plug the battery charger into a power outlet.

The charging indicator lights orange and charging begins. When charging is completed, the indicator turns off. Charging completes after about 100 minutes.

**<Wall type>**

<td>Unplug the battery charger and remove the battery from the battery charger.</td>
</tr>
</tbody>
</table>

**CAUTION**

- Unplug the battery charger from the power outlet when it is not in use.
- If the terminals of battery are soiled, it may not be possible to charge it. Clean the battery terminals and battery charger terminals with a clean, dry cloth.
- Charging times increase at low temperatures.
- The NP-45 gradually loses its charge even when not used. Charge a NP-45 just before taking pictures (in the last day or two).
Battery is required to operate the digital camera. At first, load the battery in the camera.

1 **Open the battery cover.**

- **CHECK**
  Check that the camera is turned off before opening the battery cover.

- **CAUTION**
  - Do not open the battery cover while the camera is on. This could damage the Memory Card or ruin the image files on the Memory Card.
  - Do not apply force to the battery cover.

2 **Load the battery.**

While pushing the battery release catch aside, load the battery by aligning the indicator (① orange) and the battery indicator (② orange). Check that the battery is firmly held in place.
CAUTION

- Load the battery in the correct direction.
- If the battery is loaded with the arrow pointing toward opposite direction from the camera, or the indicators are not aligned, it may become jammed and damaged. Use the battery carefully to avoid overheating, igniting or exploding. If the battery is loaded incorrectly, contact a FUJIFILM dealer. Do not use excessive force to remove the battery from the camera.

3 Close the battery cover.

To remove the battery

Open the battery cover, and unlock the battery release catch with your finger.

CAUTION

Make sure the camera is turned off before removing the battery.
Loading the Memory Card

Although you can store pictures in the camera’s internal memory, you can store many more images on the Memory Card (sold separately). You can use the xD-Picture Card and the SD Memory Card with the FinePix J10 / FinePix J12. In this Owner’s Manual, these cards are expressed as “Memory Card”.

SD Memory Cards/SDHC Memory Cards
They are operation-checked at FUJIFILM Corporation. Maker: SanDisk

MEMO
- Compatible Memory Cards will be updated in our website: http://www.fujifilm.com/products/digital_cameras/index.html
- Depending on the SD Memory Card, recording of movies may be interrupted. Use of above mentioned SD Memory Cards are recommended.
- The camera is not compatible with multimedia cards.

1 Open the battery cover.

2 Insert a Memory Card.
   (xD-Picture Card)

   (SD Memory Card)
CAUTION
Be sure to unlock the protection of the SD Memory Card before inserting it. If it is locked, recording/deleting images, as well as formatting are not available. To unlock the protection, slide the switch back, and the SD Memory Card will work normally.

CAUTION
- A new SD Memory Card or a card previously used on a PC or any device other than the camera should be formatted (p.84) on the camera before use.
- Do not use a miniSD adaptor or a microSD adaptor which have exposed contact areas on the back. Use of these adaptors may cause a malfunction or damage due to the improper contacts.
A miniSD adaptor or microSD adaptor bigger than SD Memory Card standard size may become stuck. Pulling out forcefully may cause a malfunction. In that case, contact your FUJIFILM dealer.

3 Close the battery cover.

How to replace the Memory Card

Push the Memory Card into the slot and then slowly remove your finger. The lock is released and the Memory Card is pushed out.

Continued ➔
Loading the Memory Card

⚠️ CAUTION

- When storing Memory Cards, make sure that they are kept out of the reach of children. A Memory Card could be swallowed and cause suffocation. If a child swallows a Memory Card, seek medical attention or call emergency number right away.
- If the Memory Card is oriented incorrectly, it will not go all the way into the slot. Do not apply force when inserting a Memory Card.
- Note that the Memory Card may spring out if you release your finger quickly from the card immediately after the lock is released.
- Operation of this camera is only guaranteed when it is used with FUJIFILM xD-Picture Card and operation-checked SD Memory Card (→p.16).
- See p.106 for information on the xD-Picture Card, SD Memory Card and the internal memory.

MEMO

- The size of an image file varies depending on the subject. For this reason, the number recorded may not represent the actual number of frames.
- See p.122 for information on the standard number of available frames.

■ About internal memory

FinePix J10 / FinePix J12 has internal memory that can store images without Memory Card. IN appears on the LCD monitor when internal memory is active.

When a Memory Card (sold separately) is inserted
- [Record images]: Record images to a Memory Card.
- [Playback images]: Playback images in a Memory Card.

When a Memory Card (sold separately) is not inserted
- [Record images]: Record images to internal memory.
- [Playback images]: Playback images in internal memory.

■ About images in the internal memory

Images held in the camera’s internal memory may be corrupted or erased due to problems such as camera faults. Save your important data to another media (i.e., DVD-R, CD-R, CD-RW, hard disk, etc.). It is possible to transfer saved images on the internal memory to a Memory Card (→p.67).

⚠️ CAUTION

Erase the unnecessary images in the internal memory. (→p.36)
## Turning On and Off

### Turning the camera on in Shooting mode

Press ON/OFF down fully to turn the camera on. Press ON/OFF again to turn the camera off.

- **MEMO**
  - Changes between Shooting mode and Playback mode
  
  Press  during shooting to change to Playback mode. Press the shutter button down halfway to return to Shooting mode.

- **CAUTION**
  - The lens moves and the lens cover opens when turning the camera on in Shooting mode. Take care not to obstruct the lens.
  - Take care not to get fingerprints on the camera lens as this will result in impaired image quality in your shots.
  - The ON/OFF button does not completely disconnect the camera from its power supply.

### Turning the camera on in Playback mode

Press  for about 1 second to turn the camera on in Playback mode. Press  during playback to turn the camera off.

- **MEMO**
  - To change to Shooting mode, press the shutter button down halfway.
Setting the language, date, and time

When using the camera for the first time after purchasing, the language, date, and time are cleared. Set the language, date, and time.

1 [言語/LANG.] screen appears when turning the camera on.

- Press ▲, ▼, ◀, or ► to select the language.
- Press MENU/OK to confirm the setting.

2 Set the date and time.

- Press ◀ or ► to select Year, Month, Day, Hour, or Minute.
- Press ▲ or ▼ to correct the setting.

MEMO
- Holding down ▲ or ▼ changes the numbers continuously.
- When the time displayed passes “12”, the AM/PM setting changes.
3 Change the date format.

1. Press or to select the date format.

2. Press or to set the format.

3. Always press MENU/OK after the settings are completed.

Date format
ex. December 1, 2008
[YY.MM.DD]: [2008.12.1]
[MM/DD/YY]: [12/1/2008]
[DD.MM.YY]: [1.12.2008]

MEMO

[START MENU] screen also appears when the batteries have been removed and the camera has been left for a long period. Once the batteries have been installed for 30 minutes or more, the camera settings will be retained for roughly 2 hours even if a source of power is removed.

Auto power off function

When the Auto power off function is active, if the camera is left unused for 2 or 5 minutes, this function turns the camera off (→ p.85). To turn the camera back on, press ON/OFF. To play back images, hold down for about 1 second.
Checking the battery charge

Turn the camera on and check the battery level indicator on the LCD monitor.

1. There is ample battery charge. (Lit white)
2. The battery is almost half charged. (Lit white)
3. There is insufficient charge left in the battery. The battery will soon run out. Have a charged battery ready. (Lit red)
4. The battery is depleted. The display will shortly go blank and the camera will stop working. Replace the battery. (Blinking red)

CAUTION

- Due to the nature of the battery, the battery level indicator ( , , or ) may appear early when the camera is used in cold locations. Try warming the battery in your pocket or a similar location before use.
- Battery with no remaining charge ( blinking red) may cause camera faults such as the camera turning itself off without retracting the lens. Always load a fully charged battery.
- Depending on the camera mode, the transition from to may occur more quickly.
Correcting the Date and Time

1 Open the [SET-UP] menu.

   ① Press MENU/OK to open the menu.

   ② Press ▲ or ▼ to select [ SET-UP].

   ③ Press ►.

2 Display the [DATE/TIME] screen.

   ① Press ◄ or ► to select 📌.

   ② Press ▼ to move to menu item.

   ③ Press ▲ or ▼ to select [ DATE/TIME].

   ④ Press ►.

See “2 Set the date and time.” (→p.20).
Selecting the Language

1 Open the [SET-UP] menu.

   ① Press MENU/OK to open the menu.

   ② Press ▲ or ▼ to select [SET-UP].

   ③ Press ►.

2 Display the [言語/LANG.] screen.

   ① Press ◀ or ▶ to select ②.

   ② Press ▼ to move to menu item.

   ③ Press ▲ or ▼ to select [言語/LANG.].

   ④ Press ►.

   See “① [言語/LANG.] screen appears when turning the camera on.” (→p.20).
Taking Pictures (AUTO Mode)

This section describes the basic operations.

1 Turn the camera on.
Press ON/OFF down fully to turn the camera on.

Holding the camera correctly

Brace your elbows against your sides and hold the camera with both hands.

Do not cover the lens or flash with your fingers.

⚠️ CAUTION
- Moving the camera while shooting gives a blurred picture (camera shake). Hold the camera steadily with both hands.
- If the lens or flash is obscured by your fingers or the strap, subjects may be out of focus or the brightness (exposure) of your shot may be incorrect.

Continued ➤
2 Check the composition on the LCD monitor. To adjust zoom scale using the Zoom button:

**MEMO**
- Select Macro mode to take close-up shots (→p.47).
- Use digital zoom when you want to shoot the subject closer (→p.82).

3 Focus on the main subject in the AF frame and press the shutter button down halfway.

**CHECK**
- Focus on the subject
  Double beep is heard
  Indicator lamp lit green
- Not focus on the subject
  No sound
  !AF indicated
  Indicator lamp blinking green

**MEMO**
The shutter button has a halfway point at which focus and exposure are automatically optimized before taking the picture by pressing fully down.
Using the Camera

**CAUTION**
When pressing the shutter button halfway, a lens operation sound may be heard.

4. Press the shutter button fully.

![Click](image1)

**CAUTION**
When taking a picture using the flash, the image may disappear and go dark briefly due to flash charging. The indicator lamp blinks orange during charging.

**MEMO**
- When the subject is not in the AF frame, use AF/AE lock to take the picture (→ p.29).
- When pressing the shutter button down fully in one motion, the camera takes the picture without the AF frame changing.

**Flash**

When pressing the shutter button down halfway, a sound appears on the LCD monitor before the flash fires.

Change the flash mode when you want to take pictures without flash. See p.48 for information on flash.

**CAUTION**
- The image shown on the LCD monitor before the picture is taken may differ in brightness, color, etc. from the image actually recorded. Play back the recorded image to check it (→ p.32).
- When selecting a slow shutter speed that will cause camera shake, a symbol appears on the LCD monitor. Use flash or a tripod.
- See p.107-110 for information on Warning displays. See “Troubleshooting” (→ p.111-116) for more information.

**Continued**
Taking Pictures (AUTO Mode)

### Indicator lamp display
The indicator lamp lights or blinks when pressing the shutter button, etc. The indicator lamp shows the camera status.

MEMO
Detailed warning messages appear on the LCD monitor (→p.107-110).
Taking pictures with the focus and exposure locked

In the above composition, the subjects (two people in this case) are not in the AF frame. Pressing the shutter button halfway at this point will result in the subjects being out of focus.

**AF/AE lock is useful:**
Use AF/AE lock to guarantee best result when shooting a subject that is not suited to autofocusing (→ p.30).

<table>
<thead>
<tr>
<th>Using AF/AE lock</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1</strong> Move the camera slightly so that one of the subjects is in the AF frame.</td>
</tr>
<tr>
<td><strong>2</strong> Press the shutter button down halfway to focus on the subject.</td>
</tr>
</tbody>
</table>

*Continued*
Taking Pictures (AUTO Mode)

3 Continue to hold the shutter button down halfway. Move the camera back to the original image and press the shutter button fully.

MEMO
- AF/AE lock can be applied repeatedly before the shutter is released.
- Use AF/AE lock in all Shooting modes to guarantee excellent results.
- On FinePix J10 / FinePix J12, pressing the shutter button down halfway locks the focus and exposure settings (AF and AE lock).

Subjects not suitable for autofocus
FinePix J10 / FinePix J12 uses a high-precision autofocus mechanism. However, it may have difficulty focusing on the following:

- Subjects photographed through glass
- Subjects that do not reflect well, such as hair or fur
- Subjects with no substance, such as smoke or flames
- Dark subjects
- Subjects with little or no contrast between the subject and the background (such as subjects dressed in the same color as the background)
- Shots where another high-contrast object (not the subject) is close to the AF frame and is either closer or further away than your subject (such as a shot of someone against a background with strongly contrasting elements)

For such subjects use AF/AE lock (→p.29).
Adjusting the shot composition

Select the LCD monitor display.
Press DISP/BACK to change the LCD monitor display.

Position the main subject at the intersection of two lines in this frame or align one of the horizontal lines with the horizon. Use this frame as a guide to the subject’s size and the balance of the shot while composing a shot.

MEMO
Always use AF/AE lock when composing a shot. The image may be out of focus if AF/AE lock is not used.

Best framing

Position the main subject at the intersection of two lines in this frame or align one of the horizontal lines with the horizon. Use this frame as a guide to the subject’s size and the balance of the shot while composing a shot.

MEMO
Always use AF/AE lock when composing a shot. The image may be out of focus if AF/AE lock is not used.
Viewing the Images

Play back your images to check them. For important photographs, always take a test shot and view the image to make sure that the camera is working normally.

Setting the camera to Playback mode

Press \( \text{DISP} \) during shooting to change to Playback mode.

When the camera is off, press \( \text{DISP} \) for about 1 second to turn the camera on in Playback mode.

MEMO

- When pressing \( \text{DISP} \), the last image shot appears on the LCD monitor.
- When playing back images shot with a camera other than FinePix J10 / FinePix J12, a present icon \( \text{ present } \) appears on the LCD monitor.

CAUTION

Still images viewable on FinePix J10 / FinePix J12

This camera will display still images recorded on FinePix J10 / FinePix J12 or still images (excluding some uncompressed images) recorded on any FUJIFILM digital camera that supports xD-Picture Cards or SD Memory Cards. Clear playback or playback zooming may not be possible for still images shot on cameras other than FinePix J10 / FinePix J12.

Select the LCD monitor display.

Press DISP/BACK during Playback mode to change the LCD monitor display.

Select the LCD monitor display.

Press DISP/BACK during Playback mode to change the LCD monitor display.

<td>Approx. 2.5x</td>
</tr>
</tbody>
</table>

MEMO

Pressing DISP/BACK cancels playback zoom.

Multi-frame playback

Multi-frame playback screen (9 frames) appears on the LCD monitor. Select required frame from the 9 frames.

1. Press ▲, ▼, ◀, or ▶ to move the cursor (colored frame) to the selecting frame. Press ▲ or ▼ repeatedly to jump to the next page.

2. Press MENU/OK to enlarge the image.
**Sorting by date**

In sorting by date mode, you can view all images taken on the same day.

1. Press ▲, ▼, ◀, or ▶ to move the cursor (colored frame) to the selecting frame.

2. Press MENU/OK to enlarge the image.

---

**Selecting the date**

1. Press ▲, ▼, ◀, or ▶ to move the cursor (colored frame) to ◀ on the upper left frame.

2. Press ◀ to display the selecting date.

3. Press ▲ or ▼ to move the cursor (colored frame) to select the date. Press ▲ or ▼ repeatedly to jump to the next page.

4. Press ▶.
Erasing the Images/Movies

Use this mode to erase unnecessary images or movies to have ample free space on the Memory Card or internal memory. Your camera calls images “frames”.

Using the erase button (Trash / ▲)

Pressing Trash (▲) erases images easily.

1 Press ◄ or ► to select the erasing image.
2 Press Trash (▲).
3 Press ◄ or ► to select [OK].
4 Press MENU/OK to erase the displayed image.

Erasing the images using [PLAYBACK MENU]

1 Press MENU/OK to open the [PLAYBACK MENU].
2 Press ▲ or ◄ to select [Trash ERASE].
3 Press ►.
Erasing one frame at a time ([FRAME])

1. Press ◀ or ▶ to select the erasing frame (file).
2. Press MENU/OK to erase the currently displayed frame (file).

MEMO
To erase another frame (file), repeat above steps. When erasing frames (files) is completed, press DISP/BACK.

CAUTION
Pressing MENU/OK repeatedly erases consecutive frames (files). Take care not to erase a frame (file) by mistake.

Continued ➔
Erasing the Images/Movies

When using a Memory Card, the images in the Memory Card are erased. When not using a Memory Card, the images in the internal memory are erased.

- Selecting [BACK] returns to single-frame playback without erasing any frames (files).
- Protected frames (files) cannot be erased. Unprotect the frames (files) before erasing them (→ p.66).
- If [DPOF SPECIFIED. ERASE OK?] or [DPOF SPECIFIED. ERASE ALL OK?] appears, press MENU/OK again to erase the frames (files).

CAUTION
Erased frames (files) cannot be recovered. Back up important frames (files) onto your PC or another media.

Erasing all frames ([ALL FRAMES])

Press MENU/OK to erase all the frames (files).

MEMO
Press DISP/BACK to cancel erasing of all the frames (files). Some unprotected frames (files) will be left unerased.

MEMO
- When using a Memory Card, the images in the Memory Card are erased. When not using a Memory Card, the images in the internal memory are erased.
- Selecting [BACK] returns to single-frame playback without erasing any frames (files).
- Protected frames (files) cannot be erased. Unprotect the frames (files) before erasing them (→ p.66).
- If [DPOF SPECIFIED. ERASE OK?] or [DPOF SPECIFIED. ERASE ALL OK?] appears, press MENU/OK again to erase the frames (files).

CAUTION
Erased frames (files) cannot be recovered. Back up important frames (files) onto your PC or another media.
Using the Photography Functions — Procedure of Setting

Specify the camera settings for taking pictures to get the best result. A general guide is given below.

1 Select the Shooting mode.

Set the Shooting mode. The camera settings are tailored to the scene being shot.

- **AUTO**
  - This is the easiest mode for taking pictures (→p.42).
  - Select the best Shooting mode for the scene being shot (→p.42-46).
  - This mode provides detailed settings that are impossible to set in AUTO mode (→p.46).

2 Specify the photography settings.

Pressing buttons or selecting menu allows you to specify photography functions. You can obtain the best result for shooting.

### Specifying functions using buttons

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="macro.png" alt="" /></td>
<td>Macro button</td>
</tr>
<tr>
<td><img src="flash.png" alt="" /></td>

<td>[EXP. COMPENSATION]</td>
<td>Use this setting to obtain the correct exposure (only (\text{M})) (→p.58).</td>
</tr>
<tr>
<td>[WHITE BALANCE]</td>
<td>Use to adjust the color tone (only (\text{M})) (→p.59).</td>
</tr>
</tbody>
</table>

![Image of camera and menu screen]
Setting the Shooting Mode

You can select the most suitable setting according to the subject by selecting one of the Shooting modes.

CHECK
- See p.49 for information on available flash modes.
- When anything other than AUTO in the [SHOOTING MODE] is selected, only AUTO can be selected for the [ISO] (sensitivity) setting.

1. Press MENU/OK to open the menu.

2. Press ▲ or ▼ to select [SHOOTING MODE].

3. Press ▶.

4. Press ▲ or ▼ to select the setting.

5. Press MENU/OK to confirm the setting.
Shooting Mode

This section describes the available shooting modes.

[AUTO]
This is the easiest mode for providing crisp and clear shots.
Use this mode for ordinary photography.
Camera specifies [ EXP. COMPENSATION] and [ WHITE BALANCE] settings automatically.

[BABY MODE]
This function is suitable for taking pictures of young children.
This mode suppresses the flash so that you can take their picture with a natural ambience.

CHECK
Flash cannot be used in the Baby mode.

[ANTI-BLUR] (Picture stabilization)
This function is suitable for taking a pictures of moving subjects such as children or pets.
Use this mode to select a fast shutter speed that reduces camera shake and moving-subject blurring.

[PORTRAIT]
Use this mode for photography to get beautiful skin tones and soft overall tone.

[LANDSCAPE]
Use this mode for shooting scenery in daylight and provides crisp, clear shots of scenery such as buildings and mountains.

CHECK
Flash cannot be used in the Landscape mode.
**[SPORT]**
Use this mode to take pictures of a moving subject.
It gives priority to faster shutter speeds.

**[NIGHT]**
Use this mode for shooting evening and night scenes.
A picture is taken with a slow shutter of up to 4 seconds.

☑ CHECK
Use a tripod to prevent camera shake, because a picture is taken with a slow shutter.

**[NATURAL LIGHT]**
This mode produces beautiful images that retain the natural ambience when shots are taken in low-light conditions. This mode is also ideal for shooting indoor or situations where the flash cannot be used.
Camera sets the high-sensitivity setting when selecting the Natural light mode. This mode is effective for reducing camera shake and moving-subject blurring when taking pictures in low-light conditions.

☑ CHECK
Flash cannot be used in the Natural light mode.

**[BEACH]**
Use this mode to prevent darkening images and provide crisp, clear shots, when shooting at beach under strong sunlight.

Continued ➡
**[❄ SNOW]**

Use this mode to prevent darkening images and provide crisp, clear shots, when shooting at snowy scene where the whole screen appears white.

![Snow Image]

**[🎇 FIREWORKS]**

Use this mode to shoot fireworks. It is effective for taking more vivid shots of fireworks with a slow shutter.

![Fireworks Image]

**CHECK**

- Flash cannot be used in the Fireworks mode.
- Shutter speed setting: 1/2 sec. to 8 sec.
- Use a tripod to prevent camera shake in the Fireworks mode.

**[🌅 SUNSET]**

Use this mode to shoot sunset, making the colors more vivid.

![Sunset Image]

**Selecting the exposure time setting**

Press ◀ or ▶ to select the exposure time.

![Exposure Time Setting]

Setting the mode (→ p.41)
[✿ FLOWER]
Use this mode to take clear close-up shots when zooming up a flower. It is effective for taking more vivid shots of flower petal.

☑ CHECK
- Flash cannot be used in the Flower mode.
- Focal range
  Wide angle: Approx. 15 cm (5.9 in.) to infinity
  Telephoto: Approx. 40 cm (1.3 ft.) to infinity

[✓ PARTY]
Use this mode for shooting at indoor wedding and party. This mode produces beautiful images that retain the natural ambience when shots are taken in low-light conditions.

[++]= MUSEUM
Use this mode for taking pictures in places such as museum where the use of flash and making an operation sound and a shutter sound are restricted. Flash mode is forcibly set to Suppressed flash and operation sound, shutter sound and the self-timer lamp are off.

MEMO
Check whether photography is permitted before using this mode.

Continued ➔
Use this mode to shoot documents and white board. It is effective for taking clearer shots of letters.

☑️ CHECK
Focal range
- Wide angle: Approx. 15 cm (5.9 in.) to infinity
- Telephoto: Approx. 40 cm (1.3 ft.) to infinity

Set the Photography functions to manual to easily control yourself.
Photography functions:
- [ISO] (→p.56)
- [EXP. COMPENSATION] (→p.58)
- [WHITE BALANCE] (→p.59)
Macro (Close-up)

Use this mode to take close-up shots.

**Available Shooting modes**: AUTO, , , , ,
(→p.42, 43, 45, 46)

Press 
 to select Macro mode.
Press 
 again to cancel Macro mode.

✔ CHECK

- **Focal range**
  - Wide angle: Approx. 15 cm (5.9 in.) to infinity
  - Telephoto: Approx. 40 cm (1.3 ft.) to infinity
- **Effective flash range**
  - Approx. 30 cm to 80 cm (11.8 in. to 2.6 ft.)

MEMO

- **When setting ** or ** mode, the camera sets to ** Macro mode automatically.**
- **Use a tripod to prevent camera shake in Macro mode.**
- **Any of the following cancels Macro mode:**
  - Changing the Shooting mode setting
  - Turning the camera off

Appears on the LCD monitor indicating that you can take close-up shots.
Setting the Flash

Flash photography is useful for taking pictures at night or indoor dark locations. Choose from 6 flash modes according to the type of shot. See p.49 for information on the available Shooting modes.

MEMO
When pressing the shutter button down halfway,  appears on the LCD monitor before the flash fires.

[ AUTO AUTO FLASH] (not displayed)
Use this mode for ordinary photography. The flash fires as required by the shooting conditions.

[ RED EYE REDUCTION]
This mode is suitable for shooting portraits in low-light conditions. Use this mode to minimize red-eye (eyes appear in red in the finished photo).

MEMO Red-eye effect
When using the flash to take a picture of people in low-light conditions, eyes may sometimes appear red in the picture. This is caused by the light of the flash reflecting off the inside of the eye.

[ FORCED FLASH]
Use this mode in backlit scenes, or to get the correct colors when taking a picture under bright lighting. In this mode, the flash fires in bright as well as dark conditions.

[ SUPPRESSED FLASH]
This mode is suitable for situations where the flash cannot be used. Use a tripod to prevent camera shake when shooting in Suppressed flash mode in the dark condition. Any time, flash does not fire.
This mode allows you to take pictures of people at night that clearly show both your subjects and the night time backdrop. To prevent camera shake, always use a tripod. Using $\text{S}$ synchronizes Red-eye reduction mode. Using $\text{S}$ selects slow shutter speeds of up to 4 seconds.

⚠️ **CAUTION**

In bright scenes, overexposure may occur.

✅ **CHECK**

Effective flash range (\[AUTO\])

- **Wide-angle:**
  - Approx. 50 cm to 4.0 m (1.6 ft. to 13.1 ft.)
- **Telephoto:**
  - Approx. 50 cm to 2.2 m (1.6 ft. to 7.2 ft.)

If you take pictures outside of the effective flash range, the image may appear dark even if the flash is used.

⚠️ **CAUTION** Notes on using flash

- If pressing the shutter button while the flash is charging (indicator lamp blinking orange), the picture will be taken without the flash (when using AUTO and $\text{S}$).
- The flash charging time may increase when the batteries are low on charge.
- When taking a picture using the flash, the image may disappear and go dark briefly due to flash charging. The indicator lamp blinks orange during charging.
- The flash fires several times (pre-flashes and the main flash). Do not move the camera until the picture is taken.

<table>

Self-Timer

The self-timer is used in situations where the photographer is included in the shot. When photographer is away from the camera, use a tripod to prevent camera fall.

Available Shooting modes: All (→p.42-46)

Setting self-timer

The self-timer setting changes each time you press * (▼).

The last displayed setting is the selected mode.

 nowrap>OFF: The picture is taken after 10 seconds.
 nowrap>10: The picture is taken after 2 seconds.

Taking pictures using self-timer

1 Press the shutter button down halfway to focus on the subject and press the shutter button fully.

Pressing the shutter button down halfway that focuses on the subject. Without releasing the shutter button, press the button all the way down (fully pressed) to start the self-timer.
2 Take pictures in selected time.

A picture is taken after the self-timer lamp changes from lit to blinking (only blinks with the 2-second self-timer).

A countdown appears on the LCD monitor indicating the time remaining until the picture is taken.

Using the 2-second self-timer
This is useful when you worry about camera shake even if attaching the camera on a tripod.

MEMO
- To stop the self-timer, once it has started running, press DISP/BACK.
- Any of the following cancels the self-timer setting:
  - Completing the shooting
  - Changing the Shooting mode setting
  - Setting the camera to Playback mode
  - Turning the camera off
- Take care not to stand in front of the lens when pressing the shutter button as this can prevent the correct focus or brightness (exposure) from being achieved.
Use this function to increase the brightness of the LCD monitor temporarily when you have difficulty seeing the monitor in low-light conditions or in daylight.

**Increasing the LCD monitor brightness**

Press \( \mathord{\star} \) (\( \mathord{\uparrow} \)) to display the LCD monitor brightly. Press \( \mathord{\star} \) (\( \mathord{\uparrow} \)) again to return to normal LCD monitor brightness.

**MEMO**
- This function is automatically canceled after each shot.
- When this function is active, it will increase the amount of speckling in images on the LCD monitor. This is normal and does not affect the photographed image.
- This function is purely for checking the composition of your shot. It does not increase the brightness of the image.
- Even if you increase the brightness in low-light conditions, you cannot check the subject.
- The color tones may vary depending on the subjects.

\( \mathord{\star} \) blinks on the LCD monitor when the function is on.
Using [SHOOTING MENU]

Use the [SHOOTING MENU] to adjust image quality. You can take pictures in a wide range of conditions.

Setting the [SHOOTING MENU]

1. Press MENU/OK to open the [SHOOTING MENU].

2. Press ▲ or ▼ to select the menu.

3. Press ▶.

4. Press ▲ or ▼ to change the setting.

5. Press MENU/OK to confirm the setting.

Continued ➤
### List of [SHOOTING MENU] options

MEMO

Note that the shooting menu will vary depending on the selected shooting mode.

- When shooting mode is set to AUTO, mode.
- When shooting mode is set to m.
Changing the sensitivity setting ([ISO ISO])

Use this menu to specify required sensitivity setting of the ambient light around the subject. The larger value of the sensitivity, the higher sensitivity is obtained. The higher sensitivity settings will allow you to take pictures in darker locations.

**CHECK**

**Settings**
[AUTO]/[1600]/[800]/[400]/[200]/[100]/[64]

Selecting [AUTO] as the sensitivity setting, the camera selects the best sensitivity setting for the subject’s brightness.

The selected sensitivity setting appears on the LCD monitor when the sensitivity setting is set to another setting excluding [AUTO].

**MEMO**

When anything other than [MANUAL] in the Shooting mode is selected, only [AUTO] can be selected for the [ISO] (sensitivity) setting.

**CAUTION**

Although higher sensitivity settings will allow you to take pictures in darker locations, they will also increase the amount of speckling in your images. Choose the sensitivity setting that best suits the conditions.

Changing the quality setting ([QUALITY])

Use this menu to specify the image size (number of recorded pixels). Select the quality setting for the scene being shot.

**Quality settings in Shooting mode**

</tbody>
</table>
Area shot and quality setting

Area shot excluding 3:2  Area shot with 3:2

Normal shooting provides an aspect ratio of 4:3 and 3:2 shooting provides an aspect ratio of 3:2 (same aspect ratio as 35 mm film and post card).

MEMO

- The bigger the number of recorded pixels, the better the image quality becomes. As the number of recorded pixels becomes smaller, you will be able to record more frames to a Memory Card.
- The quality setting is retained even when the camera is turned off or the mode setting is changed.
- When changing the quality setting, the number of available frames also changes (→p.122). The numbers to the right of setting show the number of available frames.
Adjusting exposure compensation
([EXP. COMPENSATION])

Available Shooting mode:  

Use this menu for shots to get the correct brightness (exposure), such as shots with extremely high contrast between the subject and the background.

CHECK

- Compensation range: –2 EV to +2 EV
- (13 steps in 1/3 EV increments)
- Explanation of Terms “EV” (➔p.124)
- The LCD monitor brightness will increase or decrease depending on the exposure compensation setting.

Guide to compensation

- Backlit portraits:
  +2/3 EV to +1 2/3 EV

- Very bright scenes (such as snowfields) and highly reflective subjects: +1 EV

- Shots made up predominantly of sky: +1 EV
- Spotlit subjects, particularly against dark backgrounds: –2/3 EV
- Scenes with low reflectivity, such as shots of pine trees or dark foliage: –2/3 EV

MEMO

- This setting is retained when the camera is turned off (± 0 EV icon appears). Set the exposure compensation to “±0 EV” unless compensation is required.
- Any of the following disables exposure compensation:
  - Using the flash in AUTO or  mode
  - Shooting dark scenes in  mode
**Adjusting color balance ([WHITE BALANCE])**

Available Shooting mode:  

Adjust the color balance based on white to suit the color of the ambient light around the subject.

- [AUTO]: Automatic adjustment
- : Shooting outdoors in good weather
- : Shooting in shade
- : Shooting under Daylight fluorescent lamps
- : Shooting under Warm White fluorescent lamps
- : Shooting under Cool White fluorescent lamps
- : Shooting in incandescent light

**MEMO**

- In [AUTO] mode, the correct white balance may not be achieved for subjects such as close-ups of people's faces and pictures taken under a special light source. Select the correct white balance for the light source.
- When the flash fires, the white balance setting for the flash is used. Consequently, to achieve a particular effect, the flash mode should be set to [SUPPRESSED FLASH] (p.48).
- The color tones may vary depending on the shooting conditions (light source, etc.).
- After taking the picture, check the image color (white balance).
- Explanation of Terms “White Balance” (p.124)
Taking pictures continuously ([ CONTINUOUS])

Available Shooting modes: All (→ p.42-46)

Use this mode to take pictures of a moving subject.

![CONTINUOUS MODE]

CAUTION

- Number of available frames is limited depending on the available space on the Memory Card or internal memory.
- The focus is determined in the first frame and cannot be changed in mid-sequence.
- The exposure is determined in the first frame.
- The speed of continuous shooting varies depending on the shutter speed.
- The flash cannot be used as the flash mode is set to [ SUPPRESSED FLASH] (→ p.48). However, when the mode is changed back to normal photography, the flash setting specified before continuous shooting was selected is restored.
- The results are always displayed after you shoot.

MEMO

The file recording time using the continuous shooting may increase when recording in the xD-Picture Card or internal memory.
Using [PLAYBACK MENU]

Use this menu to play back photographed images.

### Setting the [PLAYBACK MENU]

1. Press \( \text{\textsuperscript{[}} \) to set the camera to Playback mode (\( \rightarrow \text{p.32} \)).

   ![PLAYBACK MENU](image)

2. Press MENU/OK to open the [PLAYBACK MENU].

3. Press \( \text{\textsuperscript{\texttriangleup}} \) or \( \text{\textsuperscript{\texttriangledown}} \) to select the menu.

4. Press \( \text{\textsuperscript{\textdownarrow}} \).

5. Press \( \text{\textsuperscript{\texttriangleup}} \) or \( \text{\textsuperscript{\texttriangledown}} \) to change the setting.

6. Press MENU/OK to confirm the setting.
Setting automatic playback ([SLIDE SHOW])

Use this mode to play back photographed images continuously. You can select playback interval and type of image transition.

MEMO

- To interrupt [SLIDE SHOW], press MENU/OK.
- Press ⬇️ or ⬆️ to advance or go back through the images.
- The Auto power off function (→p.85) does not operate during slide show.
- Movie starts automatically. When the movie ends, the playback function moves it on.
- Press DISP/BACK once during playback to display on-screen help.

DPOF set frame ([PRINT ORDER (DPOF)])

You can specify the image, number of prints, with or without date of printing with a DPOF-compatible printer.

- [WITH DATE] : The date will be imprinted on your prints.
- [WITHOUT DATE] : The date will not be imprinted on your prints.
- [RESET ALL] : All DPOF settings will be canceled.
Selecting [WITH DATE], 

Selecting [WITH DATE], [ appears on the LCD monitor and the date will be imprinted on your prints.

[WITH DATE] / [WITHOUT DATE]

Press MENU/OK to open the [PLAYBACK MENU] and press \ or \ to select [PRINT ORDER (DPOF)].

Press \.

Press \ or \ to select [WITH DATE] or [WITHOUT DATE] and press MENU/OK to display the print order screen.

Press \ or \ to select the frame (file) with the DPOF setting you want to cancel.

Press \ to set the number of prints to 0 (zero).

To cancel the DPOF setting for another frame (file), repeat steps 1 and 2.

Always press MENU/OK after the settings are completed.

Pressing DISP/BACK cancels those settings.

Press MENU/OK again.

The total number of prints appears on the LCD monitor.

MEMO Canceling DPOF setting

1. Press MENU/OK to open the [PLAYBACK MENU] and press \ or \ to select [PRINT ORDER (DPOF)].
2. Press \.
3. Press \ or \ to select [WITH DATE] or [WITHOUT DATE] and press MENU/OK to display the print order screen.
4. Press \ or \ to select the frame (file) with the DPOF setting you want to cancel.
5. Press \ to set the number of prints to 0 (zero).

To cancel the DPOF setting for another frame (file), repeat steps 4 and 5.

Always press MENU/OK to complete the settings.

• [RESET ALL] (p.64)

Continued ➤
MEMO

- When DPOF settings were specified on another camera.

When the data includes a frame (file) with DPOF settings that were specified on another camera, [RESET DPOF OK?] appears. Pressing MENU/OK erases all of the DPOF settings already specified for each frame (file). Specify the DPOF setting for each frame (file) again.
- Prints of up to 999 frames (files) can be ordered on the same Memory Card.
- DPOF settings cannot be specified for movies.

CAUTION

- Pressing DISP/BACK while choosing settings will cancel all current settings. If there were previous DPOF settings, only the modifications are canceled.
- When selecting the [WITH DATE] setting, the date is imprinted on your shots using the Print Service or a DPOF-compatible printer (depending on the printer specifications, the date may not be printed in some cases).
- Images photographed with a camera other than FinePix J10 / FinePix J12 may not be specified DPOF settings.

[RESET ALL]

To cancel all DPOF settings:

Select [RESET ALL] in the [PLAYBACK MENU] (p.62).

MEMO

appears on the LCD monitor during playback when the image has specified DPOF settings.
PRINT ORDER (DPOF)

DPOF stands for Digital Print Order Format and refers to a format that is used for recording printing specifications for images shot using a digital camera on media such as a Memory Card. The recorded specifications include information on which frames are to be printed.

This section gives a detailed description of how to order your prints with FinePix J10 / FinePix J12.

* Some printers do not support date and time imprinting or specification of the number of prints.
* The warnings shown below may appear while specifying the prints.

[DPOF SPECIFIED. ERASE OK ?]
[DPOF SPECIFIED. ERASE ALL OK ?] (→p.38)
When erasing the image, the DPOF setting for that image is deleted at the same time.

[RESET DPOF OK ?] (→p.64)
When inserting a Memory Card that contains images specified for printing by another camera, those print specifications are all reset and replaced by the new print specifications.

[DPOF FILE ERROR] (→p.109)
Up to 999 images can be specified on the same Memory Card.
Protecting the images
([PROTECT])

Use this mode to prevent frames (files) from being accidentally erased. Your camera calls images “frames”.

[FRAME] (set or reset a frame)

To protect or unprotect only the selected frame (file):

1. Press \ or \ to select the protecting/unprotecting frame (file).
2. Press MENU/OK to protect/unprotect the currently displayed frame (file).
   - Unprotected: protecting frame (file)
   - Protected: reset frame (file)

To protect another frame (file), repeat steps 1 and 2. When protecting frames (files) is completed, press DISP/BACK.

[SET ALL]

Press MENU/OK to protect all the frames (files).

[RESET ALL]

Press MENU/OK to unprotected all the frames (files).
MEMO To stop the procedure midway

If the images are very large, protecting or unprotecting all the frames (files) may take some time.
If you want to take a picture or record a movie during the procedure, press DISP/BACK.

CAUTION

The Format function erases all the frames (files), including protected frames (files) (p.84).

Copying the images

It is possible to transfer saved images between the internal memory and a Memory Card. Your camera calls images “frames”.

Selecting COPY

1. Press ▲ or ▼ to select [INTERNAL MEMORY ➔ CARD] or [CARD ➔ INTERNAL MEMORY].
2. Press ▶.

Continued ➔
MEMO

To copy another frame (file), repeat steps 3 and 4. When copying frames (files) is completed, press DISP/BACK.
Copying all frames ([ALL FRAMES])

1. Press ▲ or ▼ to select [ALL FRAMES].
2. Press MENU/OK.
3. Press MENU/OK to copy all the frames (files).

CAUTION
- When [MEMORY FULL] or [MEMORY FULL] appears on the LCD monitor, copying the data stops on the way.
- When copying the image that has specified DPOF setting, the DPOF setting is not copied.
Rotating the images ([ IMAGE ROTATE])

When shooting in the vertical position, the image appears horizontal on the LCD monitor. Use this mode to rotate an image and to display correct direction.

**CAUTION**

Protected frames (files) cannot be rotated. Unprotect the frames (files) before rotating them (→p.66).

**MEMO**

An image can be rotated only when playing back using FinePix J10 / FinePix J12. You may not be able to rotate images that were shot with a camera other than FinePix J10 / FinePix J12.

1. Press  or  to select the rotating frame (file).
2. Press MENU/OK to open the [PLAYBACK MENU].
3. Press  or  to select [ IMAGE ROTATE].
4. Press MENU/OK.
5. Press  or  to rotate the image.
   -  : Rotates the image clockwise at a 90 degree angle.
   -  : Rotates the image counterclockwise at a 90 degree angle.
6. Press MENU/OK to confirm the setting. Next time the image is played back, it will be automatically rotated. Press DISP/BACK to cancel rotating the image.
Trimming the images ([TRIMMING])

Use this mode to trim the required part of the photographed image.

1 Select the menu.

1. Press [ ] to set the camera to Playback mode (→p.32).

2. Press ◀ or ▶ to select the trimming frame (file).

3. Press MENU/OK to open the [PLAYBACK MENU].

4. Press ▲ or ▼ to select [TRIMMING].

5. Press ▶.

2 Specify trimming part of image.

W button (Zoom out)

T button (Zoom in)

Zoom bar

1. Press W or T to zoom in or out on an image.

Navigation screen (Current displayed image)

2. Press ▲, ▼, ◀, or ▶ to display another part of the image.

Continued ➔
3 Record the image.

Check the saved image size and press MENU/OK.
The trimmed image is added as a separate file in the final frame.

MEMO
- Press DISP/BACK to return to single-frame playback.
- A saved image size varies depending on the zoom scale of step 2. For 0.3 M, YES option appears in yellow.
- Image sizes

| 4M | Printing at up to 6R (15.2 × 20.3 cm/6 × 8 in.) / A5 size |
| 2M | Printing at up to 4R (10.2 × 15.2 cm/4 × 6 in.) / A6 size |
| 8M | To use for e-mail or web site |

- When 82 quality setting is selected, the image is trimmed to normal size (4:3 aspect ratio).

CAUTION
You may not be able to trim images that were shot with a camera other than FinePix J10 / FinePix J12.
Recording Movies

Use this mode to record movies.

Set the camera to 🎥 Movie mode

1. Press MENU/OK to open the menu.
2. Press ▲ or ▼ to select [ ○ SHOOTING MODE].
3. Press ▶.
4. Press ▲ or ▼ to select [ 🎥 MOVIE].
5. Press MENU/OK to confirm the setting.

The available recording time appears on the LCD monitor.

Zooming the image

You must zoom beforehand as you cannot zoom during recording.

- Optical zoom focal length
  Approx. 38 mm to 113 mm (35 mm camera equivalent)
  Max. zoom scale: 3x
- Focal range
  Approx. 40 cm (1.3 ft.) to infinity

CHECK

Press W or T to zoom in or out on an image.
Record movies

Press the shutter button down fully to start recording. During recording, [REC] and a counter that shows the remaining time appear on the LCD monitor.

Recording ends when pressing the shutter button down halfway during recording or the remaining time runs out.

MEMO
There is no need to hold down the shutter button during recording.

CHECK Recording movies
- Specifications: Motion JPEG (→p.124)
  Monaural sound
- Quality selection method: 320 (320 × 240 pixels) 640 (640 × 480 pixels)
- Frame rate (→p.124): 30 frames per second (fixed)

CAUTION
- Because a movie is recorded onto the Memory Card or internal memory as it is saved, it cannot be recorded correctly if the camera suddenly loses power (if the batteries run out).
- A movie file taken by FinePix J10 / FinePix J12 may not be playable on other cameras.
- Because sound is recorded concurrently with the images, make sure that you do not cover the microphone with a finger, etc. (→p.10).
- Camera operation noises may be recorded during movie shooting.
- If you shoot using the xD-Picture Cards with model numbers containing “M” such as DPC-M1GB, movie recording time may be reduced if you repeatedly record and erase (frame erase) image files. In such a case, erase all frames or format the xD-Picture Card before use. Back up important frames (files) onto your PC or another media.
- The size of a movie file can be up to 2GB.

MEMO
- The brightness and color of the LCD monitor shown during movie recording may differ from those shown before recording begins.
- Pressing the shutter button down fully fixes the focus, however the exposure and white balance are adjusted to the scene being shot.
- If recording is stopped immediately after it begins, 1 second of the movie is recorded onto the Memory Card or internal memory.
- See p.122 for information on recording times per Memory Card or internal memory.
Changing movie size

Press MENU/OK to open the [SHOOTING MENU].

1 Press ▲ or ▼ to select [ QUALITY].

2 Press ▶.

3 Press ▲ or ▼ to change the setting.

4 Press MENU/OK to confirm the setting.

Quality settings in Movie mode

- **640** (640 × 480 pixels): For better quality
- **320** (320 × 240 pixels): To record longer movies

**MEMO**

- The quality setting is retained even when the camera is turned off or the mode setting is changed.
- In Movie mode, you cannot set the [ ISO] (sensitivity) setting.
Playing Back Movies

Playing back movies

1. Press ◀ or ▶ to select the movie file. 🎥 appears on the LCD monitor.

2. Press ▼ to begin playing back movie.

The playback time appears on the LCD monitor along with a progress bar.

<table>
<thead>
<tr>
<th>Control</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playback</td>
<td>Playback begins. Playback stops when the end of the movie is reached.</td>
</tr>
<tr>
<td>Pause / Resume</td>
<td>Pauses the movie during playback. Press ▼ again to resume playback.</td>
</tr>
<tr>
<td>Stop</td>
<td>Stops playback. Press ◀ or ▶ while playback is stopped to go back to the previous file or advance to the next file respectively.</td>
</tr>
<tr>
<td>Fast forward / Rewind</td>
<td>Press ◀ or ▶ during playback to skip forwards or backwards through the movie.</td>
</tr>
<tr>
<td>Skip playback</td>
<td>Press ◀ or ▶ when the movie is paused, the movie advances or goes back one frame. Hold down ◀ or ▶ to move through the frames quickly.</td>
</tr>
</tbody>
</table>
MEMO
If the subject of the shot is very bright, white vertical streaks or black horizontal streaks may appear in the image during playback. This is normal.

CAUTION
- You may not be able to play back some movie files recorded on other cameras.
- To play back movie files on a PC, save the movie file on the Memory Card or internal memory to the PC’s hard disk and then play back the saved file.
- When using FinePix J10 / FinePix J12, make sure not to cover the speaker. The sound is difficult to hear.

Adjusting volume of movies
You can adjust the volume of the movie with FinePix J10 / FinePix J12.

1. Press MENU/OK while playing back movie. The movie is paused during playback.
2. Press ▲ or ▼ to adjust the volume.
3. Press MENU/OK to confirm the setting. Camera starts to play back the movie.
Using the [SET-UP] menu

1 Open the [SET-UP] menu.

   ① Press MENU/OK to open the menu.

   ② Press ▲ or ▼ to select [\SET-UP].

   ③ Press ►.

2 Change the page.

   ① Press ◀ or ► to select the page.

   ② Press ▼ to move to menu item.

3 Change the setting.

   ① Press ▲ or ▼ to select the menu.

   ② Press ►.

   Different type of screen appears depending on selected item.

   ③ Press ▲ or ▼ to change the setting.

   ④ Press MENU/OK to confirm the setting.
## [SET-UP] menu option

</tbody>
</table>
[FRAME NO.]

Use this function to specify whether frame numbers are assigned consecutively from previous numbers or begin again.

| A | <CONT.> | 0001 | 0005 |
| B | <RENEW> | 0006 | 0010 |

* Formatted Memory Card or internal memory used for both A and B.

[CONT.] : Pictures are stored beginning from the highest file number stored on the last Memory Card or internal memory used.

[RENEW] : Pictures are stored on each Memory Card beginning with a file number 0001. Each image will be numbered consecutively from the last number used. So when recorded images in the Memory Card are erased, the number of the erased frame will not be used again.

**CHECK**

The last 4 digits of the 7-digit number in the top right corner of the LCD monitor are the file numbers, while the first 3 digits show the directory number.

**MEMO**

- Setting this function to [CONT.] makes file management easier as it makes sure that file names are not duplicated when images are downloaded to a PC.
- When the camera settings are [RESET] (→ p.80), the frame number setting ([CONT.] or [RENEW]) is changed to [CONT.] and the frame number itself does not return to 0001.
- In [CONT.] setting, images are stored beginning from the highest file number on the current Memory Card when the Memory Card already contains image files with file numbers higher than the highest file number on the last Memory Card.
- The displayed frame number may differ for images photographed on other cameras.
[DIGITAL ZOOM]

Use this function to shoot enlarged images than maximum optical zoom scale.

Zoom bar display

[OFF] W T
Optical zoom: 3×

[ON] W T
Optical zoom: 3× Digital zoom: approx. 5.1×*

CAUTION

Using the [DIGITAL ZOOM] allows you to enlarge your subject and shoot it. However, it will lower your image quality. Set the [DIGITAL ZOOM] when requiring it.

CHECK

- Optical zoom focal length*
  Approx. 38 mm to 113 mm
- Digital zoom focal length*
  Approx. 113 mm to 576 mm
  Max. zoom scale: approx. 5.1×
  * 35 mm camera equivalents

MEMO

When zooming changes between optical and digital, the position of the “■” indicator stops. Press the same Zoom button again to start the “■” indicator moving again.
[LCD POWER SAVE]
The LCD monitor darkens when camera is not used for 8 seconds. When this function is active, you can save power and get the maximum possible running time from your batteries.

MEMO
Pressing any button wakes the camera up.

CAUTION
The LCD power save function is disabled during Playback mode and Movie mode.

[PLAYBACK VOLUME]
Use this function to adjust volume while playing back movie.

1. Press ▲ or ▼ to adjust the volume. The larger the number, the larger the volume is emitted. 0 indicates a sound deadening.
2. Press MENU/OK to confirm the setting.
[LCD BRIGHTNESS]

Use this function to adjust the LCD monitor brightness.

1. Press ▲ or ▼ to adjust the LCD monitor brightness.
   The indicator moves to the + to display the LCD monitor brightly or to the – to darken the LCD monitor.

2. Press MENU/OK to confirm the setting.

[FORMAT]

Initialize (format) the Memory Card or internal memory for use with the camera.

1. Press ◀ or ▶ to select OK.

2. Pressing MENU/OK initializes the Memory Card or internal memory.

⚠️ CAUTION

- The Format function erases all the frames (files), including protected frames (files). Back up important frames (files) onto your PC or another media.
- Do not open the battery cover or expose the camera to shock during formatting, as formatting will be interrupted.
[AUTO POWER OFF]

When this function is active and the camera remains unused for 2 or 5 minutes, it turns camera off. Use this function when you want to get the maximum possible running time from your batteries.

⚠️ CAUTION

The Auto power off function is disabled during slide show (→p.62), and when a printer or a PC connection (→p.88, 97) is being used.

⏰ MEMO To restore power to the camera

Refer to “Turning On and Off” (→p.19).

---

[TIME DIFFERENCE]

Use this function when traveling to destinations in different time zones. This function sets a time difference relative to the date and time currently set. When this setting is enabled, the specified time difference is applied when pictures are taken.

1 Use Time difference function.

- Press ▲ or ▼ to change between [HOME] and [LOCAL].
- To set the time difference, select [LOCAL].
- [HOME]: Your home time zone
- [LOCAL]: Your destination time zone

Continued →
2 Move to [TIME DIFFERENCE] screen.

Press ▶.

3 Set time difference.

① Press ◀ or ▶ to select +/-, hour, and minute.

② Press ▲ or ▼ to change the setting.

③ Always press MENU/OK after the settings are completed.

☑ CHECK
Available time setting
-23:45 to +23:45 (in 15-minute increments)

memo
In the time difference setting, when you change to the Shooting mode,  and the date is displayed for 3 seconds, the date display turns yellow.

☑ CHECK
Upon returning from a trip, always change the time difference setting back to [HOME] and then check the date and time again.
Connecting to a TV

When connecting to a TV, images can be displayed on wider screen. Using slide show function (→p.62) together, you can have fun with folks.

Plug the A/V cable (included) into the A/V OUT (Audio/Visual output) socket of the camera.

Video (yellow)
To terminals
Audio (white)

Plug the other end of the cable into the audio/video input socket on the TV.

CAUTION
Plug the A/V cable (included) correctly in its terminal.

MEMO
- When connecting the A/V cable (included) to TV, the LCD monitor is turned off.
- The image quality for movie playback is lower than for still images.
- When connecting to a TV, even if you adjust the volume from the PLAYBACK VOLUME, the TV volume cannot be changed. Refer to the instructions provided with your TV for more information on audio/video input for your TV.
- Use a fully charged battery when FinePix J10 / FinePix J12 is connected to a TV for long periods.
Connecting Camera Directly to Printer — PictBridge Function

When a printer that supports PictBridge is available, images can be printed by connecting the camera directly to the PictBridge-compatible printer without a PC.

Connecting to a printer

1. Connect the camera to your printer using the USB cable.

2. Connect the camera to a printer and turn the printer on. Press \[\downarrow\] for about 1 second to turn the camera on.

3. The following screen appears on the LCD monitor after a moment.

MEMO

Use a fully charged battery when FinePix J10 / FinePix J12 is connected to a printer.

“Specifying images for printing” ➝ p.89
“Printing with DPOF setting” ➝ p.90

MEMO

Depending on the printer, some functions are disabled.
Specifying images for printing ([PRINT WITH DATE] / [PRINT WITHOUT DATE])

1. Press ▼ or ▲ to display the frame (file) for specifying PRINT setting.

2. Press ▲ or ▼ to set a value. Up to 99 sheets are printed.

To specify more PRINT settings, repeat steps 1 and 2.

3. Press MENU/OK to display the confirm setting.

4. Press MENU/OK again to download the data to the printer and start printing the specified number of prints.

**MEMO**

Even if MENU/OK is pressed with total number of images set at 0 (zero), the screen printing once appears on the LCD monitor. Press MENU/OK again and printing starts.

**MEMO Printing with date**

1. Press DISP/BACK to display the setting display.

2. Press ▲ or ▼ to select [PRINT WITH DATE [E]].

3. Press MENU/OK.

**CAUTION**

[PRINT WITH DATE [E]] is not available when the camera is connected to a printer that does not support date printing.
Printing with DPOF setting ([PRINT DPOF])

1. Press DISP/BACK to open the menu.
2. Press ▲ or ▼ to select [PRINT DPOF].
3. Press MENU/OK to display the confirm setting.
4. Press MENU/OK again to download the data to the printer and start printing the specified frames (files) continuously.

CHECK
To select [PRINT DPOF], the DPOF settings must be specified on FinePix J10 / FinePix J12 beforehand (→p.62).

CAUTION
Even when [WITH DATE] is specified in the DPOF settings (→p.62), the date is not inserted on printers that do not support date printing.
Press DISP/BACK to cancel the printing. Depending on the printer, the printing may not be canceled immediately or printing may stop midway through. When printing stops midway, briefly turn the camera off and then on again.

**Disconnecting the printer**

1. Check that [PRINTING] is not displayed on the camera’s LCD monitor.
2. Turn the camera off. Unplug the USB cable.

**CAUTION**

- In PictBridge function, images photographed on other than a camera may not be printed.
- The camera cannot be used to specify printer settings such as the paper size and print quality.
- Use internal memory or a Memory Card that was formatted on FinePix J10 / FinePix J12.
- Movies cannot be printed.
- Images photographed with a camera other than FinePix J10 / FinePix J12 may not be printed.

**MEMO**

DPOF setting can be specified for images on internal memory.
Installation on a Windows PC

Pre-installation checklist

Hardware (software) requirements and recommended system
To run this software, you must have the hardware and software described below. Check your system before you begin the installation.

*1 Models with one of the above operating systems pre-installed.
*2 When you install the software, login using a system administrator account (e.g. “Administrator”).

⚠️ CAUTION
- Note that the software to be installed is different depending on the OS. (Windows 98SE/Me: FinePixViewer, Windows 2000/XP/Vista: FinePixViewer S)
- Additional USB interface board is not guaranteed.
- Windows 95, Windows NT and Windows 98 cannot be used.
- Operation is not guaranteed on home-built PCs or on PCs running updated operating system software.
Do not connect the camera to your PC until the software installation is completed.

1 Install FinePixViewer as instructed by the on-screen instructions.

Launching the installer manually

① Double-click the [My Computer] icon.
   Windows Vista users should click [Computer] in the [Start] menu.

For Windows Vista users:
When loading the bundled CD-ROM on your PC, the [AutoPlay] window may appear. In this case, click [SETUP.exe].
When [User Account Control] window appears, click [Allow].

2 Install DirectX as directed by the on-screen instructions and then restart your PC. If the latest version of DirectX is already installed on your PC, this installation is not performed.

⚠ CAUTION
- If the latest version of DirectX or Windows Media Player has not been installed, each software will be installed, and then the PC will restart.
- Do not remove the CD-ROM during this procedure.

3 After restarting the PC, a message appears stating [Installation of the FinePixViewer has been completed]. Remove the CD-ROM from your PC.
Pre-installation checklist

Hardware and software requirements

To run this software, you must have the hardware and software described below. Check your system before you begin the installation.

| Compatible Mac*1 | Power Macintosh G3*2, PowerBook G3*2, Power Macintosh G4, iMac, iBook, Power Macintosh G4 Cube, PowerBook G4, Power Macintosh G5, MacBook, MacBook Pro or Mac Mini |
| Operating System | Mac OS X (compatible with version 10.3.9 to 10.4.10) |
| RAM | 256 MB or better recommended |
| Hard disk space | Amount required for installation: 200 MB minimum  
Amount required for operation: 400 MB minimum |
| Display | 800 x 600 pixels or better, at least 32,000 colors |
| Internet connection*3 | • To use the FinePix Internet Service or mail attachment function:  
An Internet connection or e-mail transmission software is needed  
• Connection speed: 56 kbps or better recommended |

*1 PowerPC, Intel processor loaded  
*2 Models with a USB port as a standard feature  
*3 Required to use the FinePix Internet Service. The software can still be installed even if you do not have an Internet connection.

CAUTION

• Connect the camera directly to the Macintosh using the USB cable. The software may not operate correctly if you use an extension cable or connect the camera via a USB hub.  
• Push the USB connector fully into the socket to ensure that it is securely connected. The software may not operate correctly if the connection is faulty.  
• Additional USB interface board is not guaranteed.
1 Turn your Macintosh on and start up Mac OS X. Do not launch any other applications.

2 When the bundled CD-ROM is loaded into the CD-ROM drive, the [FinePix] icon appears. Double-click the [FinePix] icon to open the [FinePix] volume window.

3 Double-click on [Installer for MacOSX].

4 The Installer setup dialog appears. Click the [Installing FinePixViewer] button.

5 The [Authenticate] dialog appears. Enter the name and password for the administrator account and then click the [OK] button.*

   * The administrator account is the user account used for Mac OS X installation and you can confirm the user account in the Accounts dialog in the System Preferences.

6 Install FinePixViewer as directed by the on-screen instructions.

7 The [FinePixViewer installation completed] message dialog appears. Then click exit button and close it.

8 Launch [Image Capture] from the [Applications] folder.

---

CAUTION

For more information on what is installed, click the [Read Me First] button and [Using FinePixViewer] button.

CAUTION

When Safari is used as the Web browser, a message may be displayed and the CD-ROM may not be removed. If this happens, click the Safari icon in the Dock to make Safari the active application and then select [Quit Safari] in the [Safari] menu to shut down Safari.

Continued ➤
9 Change the Image Capture settings. Select [Preferences...] from the [Image Capture] menu.

10 Select [Other...] from [When a camera is connected, open].

Connecting to a PC

By connecting the camera to a PC, your system can be expanded to fill a wide range of uses. Using “FinePixViewer” performs images saving, browsing and file management etc.

FinePixViewer Overview
Enables importing images, managing files and folders, and ordering prints using the internet (only Windows users).

⚠️ CAUTION
The Windows CD-ROM may also be required during installation. In this event, change CD-ROMs as directed by the on-screen instructions.

Refer to Software Installation (→ p.92, 94) the first time you connect the camera to your PC.
Install the software first. Do not connect the camera to the PC before installing all the software.

1 Insert the Memory Card with images into the camera (→ p.16).
You can use the xD-Picture Card and the SD Memory Card with the FinePix J10 / FinePix J12. In this Owner’s Manual, these cards are expressed as “Memory Card”.

⚠️ CAUTION
- Do not format the Memory Card in the camera on the PC.
- Use the Memory Card with images taken by a FUJIFILM Digital camera.

2 Connect the camera to your PC using the USB cable.

3 Press for about 1 second to turn the camera on in Playback mode.

4 Set your PC.

⚠️ MEMO
In Windows, if FinePixViewer is already installed, the driver will be set automatically. No action is required.

Continued ➔
Connecting to a PC

⚠️ CAUTION

- FinePix J10 / FinePix J12 is compatible with PTP (Picture Transfer Protocol)/MTP (Media Transfer Protocol). A PTP/MTP-compatible camera is a camera that can recognize the PC and printer automatically when connected.
- Do not disconnect the USB cable (included) when the camera is communicating with a PC. If the USB cable (included) is disconnected during communication, the files on the Memory Card or internal memory may be damaged.
- In Mac OS X, you must set automatic setup the first time you connect the camera to your PC.
- When the camera and PC are exchanging data, the indicator lamp blinks alternately green and orange.
- Auto power off is disabled during USB connection.
- Before replacing the Memory Card, always disconnect the camera from the PC.
- The camera and PC may be exchanging data even when [Copying] disappears from your PC screen. Before disconnecting the USB cable (included), always check that the indicator lamp is off.
- Always use FinePixViewer to transfer images with voice memos to a PC.
- The cost of an Internet provider for connecting to the internet is the user's responsibility.
- When using FinePixViewer to save images on a data server (network), FinePixViewer may not run as it would in a standalone PC environment.

⚠️ CAUTION

- Always use a fully charged battery. If the camera suddenly loses power during data exchange, the Memory Card or internal memory could be damaged.
- Make sure that the USB cable (included) is connected correctly and securely.
- Connect the camera directly to the PC using the USB cable (included). The software may not operate correctly when you use an extension cable, or if you connect the camera via a USB hub.
- When your PC has more than one USB port, the camera can be connected to either port.
- When Windows 98 SE is used, the supplied software must be installed first before connecting the camera to a PC using the USB cable. The PC will not recognize the camera if it is connected before installation.
- A memory Card, the internal memory, data in a Memory Card or data in the internal memory could be damaged if any of the following are performed;
  - the USB cable is disconnected
  - power switch or buttons are pressed, or the lens cover is interfered with
The following steps differ depending on the PC’s operating system (Windows 2000/XP/Vista case)

When your PC recognizes the camera automatically, FinePixViewer S automatically starts up and the Load photos window appears. Follow the instructions provided on screen to save the images. To proceed without saving the images, click the [Menu] button.

⚠️ CAUTION
When there are many images stored on a Memory Card, it takes a while to display on the screen of your PC. Also, it may take a while to import images or you may be unable to save images. In this case, use an Image Memory Card Reader.

💡 MEMO
- You can only see images saved on a PC. Save images on a PC.
- If you cancel saving by clicking the [Cancel] button, press ON/OFF to turn off the camera and then disconnect it from the PC.
- When the camera is connected to your PC, FinePixViewer automatically starts up by the function of Exif Launcher, which is installed in FinePixViewer.

Proceed to “Using FinePixViewer” (→p.100).

⚠️ CAUTION (Mac OS X)
If FinePixViewer does not start up automatically, the software may not be installed correctly. Set your PC again after disconnecting the camera and restart.

⚠️ CAUTION (Mac OS X)
Note on disconnecting the camera
- Close all files in the camera, and make sure the camera is not exchanging data.
- The camera and PC may be exchanging data even when [Copying] disappears from your PC screen, especially in the case of copying large data amounts. Do not disconnect the USB cable (included), immediately after this message has disappeared. Always check that the indicator lamp is off first before disconnecting.
Using FinePixViewer

Mastering FinePixViewer

For all information on FinePixViewer functions, refer to [How to Use FinePixViewer] in the Help menu for details.

• What is explained in [How to Use FinePixViewer]...
[How to Use FinePixViewer] covers a range of topics, including batch processing and ordering prints.

Example: Looking up slide shows
① Click [How to Use FinePixViewer] in the FinePixViewer Help menu.
② Click [Basic Operation] and then click [Slide Show] in the menu that appears.
③ The [Slide Show] information appears. Press the [<<<] key to view the previous page or the [>>>] key to view the next page.

Uninstalling the software

Only perform this operation when you no longer require the installed software or when the software was not installed correctly.

Windows

① Check that the camera is not connected to the PC.
② Quit all currently running applications.
③ The steps for uninstalling software differ depending on the operating system. Follow the steps for each operating system to uninstall the software listed below.

The following software is to be uninstalled:
For Windows 98 SE/Me users
• FinePixViewer
• FinePix Resource
For Windows 2000/XP/Vista users
• FinePixViewer S

To remove FinePixViewer

FinePix Viewer S Ver.2.*

To remove the driver software

FUJIFILM USB Driver
When the message appears, click the [OK] button. Check your selection carefully since the process cannot be canceled once you click the [OK] button.

**Macintosh**

System Expansion Option

By using FinePix J10 / FinePix J12 together with other optional FUJIFILM products, your system can be expanded to fill a wide range of uses. Accessory availability may vary by country. Please check with your local Fujifilm representative to confirm product availability.

- **Audio/Visual output***
  - TV monitor (commercially available)
  - Audio/Visual output*

- **Printing**
  - PictBridge-compatible Printer (commercially available)
  - Printer (commercially available)

- **Image input/output to the PC**
  - Personal Computer (commercially available)
  - USB
  - PC Card Adapter DPC-AD
    - (PC card slot)
    - *This will not work with an SD Memory Card.*
  - CompactFlash™ Card Adapter DPC-CF
    - (CF card slot)
    - *This will not work with an SD Memory Card.*
Visit the FUJIFILM web site for the latest information on camera accessories.
Accessory availability may vary by country. Please check with your local Fujifilm representative to confirm product availability.

### xD-Picture Card
Use the following xD-Picture Cards:
- 16MB/32MB/64MB/256MB/512MB/1GB/2GB
There are two types of xD-Picture Card: standard type and Type M (containing “M” in the model number, such as DPC-M2GB).
FinePix J10 / FinePix J12 is compatible with Type M, however they may not be compatible depending on the device used (Image Memory Card Reader, etc.).

### Battery Charger BC-45
Quickly charges the rechargeable battery. The BC-45 reduces charging time to approx. 140 minutes at +23°C (for the NP-45). Use the Battery adapter when the NP-45 is being charged. The battery adapter is supplied with the BC-45.

### Rechargeable Battery NP-45
A Lithium-ion large capacity rechargeable battery.

### PC Card Adapter DPC-AD
The PC Card Adapter allows the xD-Picture Card and SmartMedia to be used as a PC Card Standard ATA-compliant (PCMCIA 2.1) PC card (Type II).
- Compatible with xD-Picture Card of 16 MB to 512 MB, and SmartMedia of 3.3 V, 2 MB to 128 MB.
  This is not compatible with the SD Memory Card.
• **CompactFlash™ Card Adapter DPC-CF**
  Loading an **xD-Picture Card** into this adapter allows you to use the card as a CompactFlash card (Type I).
  - This is not compatible with the SD Memory Card.
Using Your Camera Correctly

Read this information and the “Safety Notes” (→ “Notes and Cautions”), to make sure you use your camera correctly.

■ Places to Avoid
Do not store or use the camera in the following types of locations:
- In the rain or in very humid, dirty, or dusty places
- In direct sunlight or in places subject to extreme temperature rises, such as in a closed car in summer
- Extremely cold places
- Places with strong vibration
- Places with smoke or steam
- Places subject to strong electric magnetic fields (such as near broadcasting tower, power lines, radar, motors, transformers, magnets, etc.)
- In contact with chemicals such as pesticides
- Next to rubber or vinyl products

■ Damaged by Water or Sand
FinePix J10 / FinePix J12 can be damaged on the inside and outside by water and sand. When you are at the beach or close to water, make sure that the camera is not damaged by water or sand. Take care not to place the camera on a wet surface.

■ Damaged by Condensation
If the camera is carried from a cold location into a warm place, water droplets (condensation) may form on the inside of the camera or on the lens. When this occurs, turn the camera off and wait an hour before using the camera. Condensation may also form on the Memory Card. In this event, remove the Memory Card and wait a short time.

■ When the Camera is Not Used or is stored Periods of Time
If you do not intend to use the camera for a long period of time, remove the battery and the Memory Card.

■ Cleaning Your Camera
- Use a blower brush to remove any dust on the lens or LCD monitor, and then gently wipe the camera with a soft, dry cloth. If any soil remains, apply a small amount of lens cleaning liquid to a piece of FUJIFILM lens cleaning paper and wipe gently.
- Do not scratch hard objects against the lens or LCD monitor.
- Clean the body of the camera with a soft, dry cloth. Do not use volatile substances or cleaning products these items can cause damage.

■ Using the Camera When Traveling
When traveling overseas, do not place your camera in the check-in baggage. Baggage can be subjected to violent shocks, and the camera may be damaged inside or outside.
Handling Memory Card

- When inserting the Memory Card into the camera, hold the Memory Card straight as you push it in.
- Never remove the Memory Card or turn the camera off during data recording or erasing (Memory Card formatting) as this could be damaged to the Memory Card.
- The use of xD-Picture Cards is recommended with FinePix J10 / FinePix J12. The recording quality cannot be guaranteed when xD-Picture Cards other than those manufactured by FUJIFILM are used.
- The Memory Card may feel warm when it is removed from the camera after taking pictures. This is normal.
- Do not put labels on the Memory Card. Peeling labels can cause the camera not to work properly.

MEMO Type M and H of xD-Picture Card

- Type M
  There are two types of Memory Card: standard type and Type M (containing “M” in the model number, such as DPC-M2GB).
  FinePix J10 / FinePix J12 is compatible with Type M.
- Type H
  Type H and M share the same compatibility.
- Usable USB drive
  Type H cannot be used with xD-Picture Card USB drive DPC-UD1, while Type M can.

Internal Memory

- Images held in the camera’s internal memory may be corrupted or erased due to problems such as camera faults. Save your important data to another media (i.e., DVD-R, CD-R, CD-RW, hard disk, etc.).
- Data stored in the camera’s internal memory cannot be guaranteed in the event that the camera is submitted for repairs.
- When the camera is repaired, any data stored in the camera’s internal memory is subject to checking by the repairer.

Using Memory Card or Internal Memory with a PC

- When taking pictures using a Memory Card or internal memory that has been used on a PC, reformat the Memory Card using your camera.
- When formatting, a directory (folder) is created. Image data is then recorded in this directory.
- Do not change or delete the directory (folder) or file names on the Memory Card or internal memory because this will make it impossible to use the Memory Card or internal memory in your camera.
- Always use the camera to erase image data.
- To edit image data, copy or transfer the image data to the PC and edit the copied or transferred data.
## Warning Displays

The table below lists the warnings that are displayed on the LCD monitor.

<table>
<thead>
<tr>
<th>Warning Displayed</th>
<th>Explanation</th>
<th>Remedy</th>

</thead>
<tbody>
<tr>
<td>! (Lit red)</td>
<td>The batteries are low or completely out of charge.</td>
<td>Load new or fully charged batteries.</td>
</tr>
<tr>
<td>! (Blinking red)</td>
<td>There is a strong likelihood of camera shake because the shutter speed is slow.</td>
<td>Use flash photography. A tripod may be recommended, depending on the scene and mode.</td>
</tr>
</tbody>
</table>
| ! AF              | The AF (autofocus) cannot work effectively. | • If the image is too dark, take the picture at a distance of around 2 m (6.6 ft.) from the subject.  
• Use AF lock to take the picture (→ p.29).  
• Select Macro mode when taking close-up shots. |
| ! AE              | The camera cannot shoot the picture at the correct brightness due to too bright or dark shooting condition. | The picture can be taken, but the correct brightness (exposure) will not be obtained. |
| [FOCUS ERROR]     | Camera malfunction or fault. | • Turn the camera on again, taking care not to touch the lens.  
• Turn the camera off and on again. If the message still appears, contact your FUJIFILM dealer. |
| [ZOOM ERROR]      | Memory Card is not inserted when transferring images. | Insert a Memory Card. |
| [NO CARD]         | The Memory Card or internal memory is not formatted.  
The Memory Card was formatted on a PC.  
The Memory Card contact area is soiled.  
Camera fault. | • Format the Memory Card or internal memory on the camera (→ p.84).  
• Format the Memory Card on the camera.  
• Wipe the contact area on the Memory Card with a soft, dry cloth. It may be necessary to format the Memory Card (→ p.84). If the message still appears, replace the Memory Card.  
• Contact your FUJIFILM dealer. |

<tbody>
<tr>
<td>Guide to the number of available frames for battery operation</td>
<td>NP-45</td>
<td>Approx. 150 frames</td>
</tr>
</tbody>
</table>

According to the CIPA (Camera & Imaging Products Association) standard procedure for measuring digital still camera battery consumption (extract):
When using a battery, use the battery supplied with the camera. The storage media should be xD-Picture Card.
Pictures should be taken at a temperature of +23°C (+73°F), with the LCD monitor turned on, the optical zoom moved from full wide-angle to full telephoto (or vice-versa) and back again to its original position every 30 seconds, the flash used at full power every second shot and the camera turned off and then on again once every 10 shots.
• Note: Because the number of available shots varies depending on the level of charge in the battery, the figures shown here for the number of available shots using the battery is not guaranteed. The number of available shots will also decline at low temperatures.

Battery NP-45

Nominal voltage  DC 3.7V
Nominal capacity  740 mAh
Operating temperature  0°C to +40°C (+32°F to +104°F)
Dimensions  31 mm × 39.4 mm × 5.7 mm (1.2 in. × 1.6 in. × 0.2 in.) (W × H × D)
Mass (Weight)  Approx. 15 g (0.5 oz.)

Battery Charger BC-45A

Rated input  110-240 V AC, 50/60 Hz
Input capacity  9.0 VA (100 V)
               10.8 VA (240 V)
Rated output  4.2 V DC, 550 mA
Applicable batteries  Rechargeable Battery NP-45
Charging time  Approx. 100 minutes
Dimensions  Wall type: 101.7 mm × 56 mm × 20 mm (4.0 in. × 2.2 in. × 0.8 in.) (L × W × D)
            Cord type: 85 mm × 54 mm × 20 mm (3.3 in. × 2.1 in. × 0.8 in.) (L × W × D)
Mass (Weight)  Wall type: Approx. 66 g (2.3 oz.) (excluding batteries)
               Cord type: Approx. 56 g (2.0 oz.) (excluding batteries)
Operating temperatures  0°C to +40°C (+32°F to +104°F)

Notes on Using the Battery Charger

Use with the following power supply cord set:
Cord: UL Listed, Type SPT-2, No.18 AWG, rated 300V, 10A, minimum 4 ft (1.2m), maximum 10 ft (3m) long.
One end terminates in a molded-on, parallel-blade, (non-polarized) attachment plug with a 7A, 125V (NEMA 1-15P) configuration.

• The battery and battery charger themselves will become warm due to the power stored inside them. This is normal and does not indicate a fault. Wherever possible, use the battery charger in a well-ventilated location.
• There may be vibration noises from inside the battery charger during use. This is normal and does not indicate a fault.
• Do not use the battery charger to charge batteries other than rechargeable battery NP-45.
• The battery charger could cause interference if placed close to a radio during charging. In this event, move the radio and charger further apart.
• Do not leave the battery charger in the following types of locations:
  • Extremely humidity or high temperatures, such as close to a heating appliance or in direct sunlight
  • Places with strong vibration
  • In very dusty places
• The battery charger accepts input voltages of 110-240 V AC at 50 or 60 Hz and can be used all over the world. However, the shape of the plug and socket-outlet depends on the country of use. Consult your travel agent for details.
### Standard number of available frames/recording time per xD-Picture Card, SD Memory Card and internal memory

The number of available frames and recording time is approximate. The actual number of frames and recording time varies depending on the type of Memory Card or shooting conditions. Also, the number of frames and recording time displayed in the LCD monitor may not decrease regularly.

</table>

* A movie recording will stop automatically when a movie file becomes approx. 2GB. If you want to continue recording, press the shutter button again. The available recording time is displayed based on approx. 2GB.
If you shoot using the **xD-Picture Cards** with model numbers containing “M” such as DPC-M2GB, movie recording time may be reduced if you repeatedly record and erase (frame erase) image files. In such a case, erase all frames or format the **xD-Picture Card** before use. Back up important frames (files) onto your PC or another media.

* These specifications are subject to change without notice. FUJIFILM shall not be held liable for damages resulting from errors in this Owner’s Manual.
* The LCD monitor on your digital camera is manufactured using advanced high-precision technology. Even so, small bright points and anomalous colors (particularly around text) may appear on the monitor. These are normal display characteristics and do not indicate a fault with the monitor. This phenomenon will not appear on the recorded image.
* The operation error may be caused in a digital camera by the strong radio interference (i.e. electric fields, static electricity, line noise, etc.).
* Due to the nature of the lens, the edges of images may appear distorted. This is normal.
**Explanation of Terms**

**EV**
A number denotes Exposure Value. The EV is determined by the brightness of the subject and sensitivity (speed) of the film or CCD. The number is larger for bright subjects and smaller for dark subjects. As the brightness of the subject changes, a digital camera maintains the amount of light hitting the CCD at a constant level by adjusting the aperture and shutter speed. When the amount of light striking the CCD doubles, the EV increases by 1. Likewise, when the light is halved, the EV decreases by 1.

**Frame rate (fps)**
The frame rate refers to the number of images (frames) that are photographed or played back per second. For example, when 10 frames are continuously photographed in a 1-second interval, the frame rate is expressed as 10 fps. For reference, TV images are displayed at 30 fps (NTSC).

**JPEG**
Joint Photographic Experts Group
A file format used for compressing and saving color images. The higher the compression rate, the greater the loss of quality in the decompressed (restored) image.

**Motion JPEG**
A type of AVI (Audio Video Interleave) file format that handles images and sound as a single file. Images in the file are recorded in JPEG format. Motion JPEG can be played back by QuickTime 3.0 or later.

**Smear**
A phenomenon specific to CCDs whereby white streaks appear on the image when there is a very strong light source, such as the sun or reflected sunlight, in the photography screen.

**White Balance**
Whatever the kind of the light, the human eye adapts to it so that a white object still looks white. On the other hand, devices such as digital cameras see a white subject as white by first adjusting the color balance to suit the color of the ambient light around the subject. This adjustment is called matching the white balance.

**Exif Print**
Exif Print Format is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.
If you have technical questions or if you need repair service, ask the following local distributor. Please present the warranty card and your purchase receipt when you ask for repairs. Refer to the warranty card for conditions of the warranty. There is a case that repair and Technical support cannot be accepted for some models which your local distributor does not deal with. These lists are subject to change without notice.
