For Your Safety

IMPORTANT SAFETY INSTRUCTIONS

- Read Instructions: All the safety and operating instructions should be read before the appliance is operated.
- Retain Instructions: The safety and operating instructions should be retained for future reference.
- Heed Warnings: All warnings on the appliance and in the operating instructions should be adhered to.
- Follow Instructions: All operating and use instructions should be followed.

Installation

Power Sources: This video product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your appliance dealer or local power company. For video products intended to operate from battery power, or other sources, refer to the operating instructions.

Grounding or Polarization: This video product is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

Alternate Warnings: This video product is equipped with a three-wire grounding-type plug, a plug having a third (grounding) pin. This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding type plug.

Overloading: Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.

Ventilation: Slots and openings in the cabinet are provided for ventilation, to ensure reliable operation of the video product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the video product on a bed, sofa, rug, or other similar surface.

This video product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to. This video product should never be placed near or over a radiator or heat register.

Attachments: Do not use attachments not recommended by the video product manufacturer as they may cause hazards.

Water and Moisture: Do not use this video product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.

Power-Cord Protection: Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.

Accessories: Do not place this video product on an unstable cart, stand, tripod, bracket, or table. The video product may fall, causing serious injury to a child or adult, and serious damage to the appliance. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the video product. Any mounting of the appliance should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Antennas

Outdoor Antenna Grounding: If an outside antenna or cable system is connected to the video product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No. 70, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

EXAMPLE OF ANTENNA GROUNDING AS PER NATIONAL ELECTRICAL CODE

Power Lines: An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits,
or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

Use

Cleaning: Unplug this video product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

Object and Liquid Entry: Never push objects of any kind into this video product through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the video product.

Lightning: For added protection for this video product receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the video product due to lightning and power-line surges.

Service

Servicing: Do not attempt to service this video product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Damage Requiring Service: Unplug this video product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

• When the power-supply cord or plug is damaged.
• If liquid has been spilled, or objects have fallen into the video product.
• If the video product has been exposed to rain or water.
• If the video product has been dropped or the cabinet has been damaged.

If the video product does not operate normally follow the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the video product to its normal operation.

When the video product exhibits a distinct change in performance—this indicates a need for service.

Replacement Parts: When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

Safety Check: Upon completion of any service or repairs to this video product, ask the service technician to perform safety checks to determine that the video product is in proper operating condition.

Be sure to read these notes before use

Safety Notes

• Make sure that you use your camera correctly. Read these safety notes and your Owner’s Manual carefully before use.
• After reading these safety notes, store them in a safe place.

About the Icons

The icons shown below are used in this document to indicate the severity of the injury or damage that can result if the information indicated by the icon is ignored and the product is used incorrectly as a result.

**WARNING**
This icon indicates that death or serious injury can result if the information is ignored.

**CAUTION**
This icon indicates that personal injury or material damage can result if the information is ignored.

The icons shown below are used to indicate the nature of the instructions which are to be observed.

![Triangular icon](image)
Triangular icons tell you that this information requires attention (“Important”).

![Circular icon](image)
Circular icons with a diagonal bar tell you that the action indicated is prohibited (“Prohibited”).

![Filled circle](image)
Filled circles with an exclamation mark indicate an action that must be performed (“Required”).

**WARNING**
*If a problem arises, turn the camera off, remove the batteries, and disconnect and unplug the AC power adapter.* Continued use of the camera when it is emitting smoke, is emitting any unusual odor, or is in any other abnormal state can cause a fire or electric shock. Contact your FUJIFILM dealer.

**WARNING**
*Do not allow water or foreign objects to enter the camera.* If water or foreign objects get inside the camera, turn the camera off, remove the batteries, and disconnect and unplug the AC power adapter. Continued use of the camera can cause a fire or electric shock. Contact your FUJIFILM dealer.
For Your Safety

### WARNING

- **Do not use the camera in the bathroom or shower.** This can cause a fire or electric shock.
- **Never attempt to change or take apart the camera. (Never open the casing.)** *Do not use the camera when it has been dropped or the casing is damaged.* This can cause a fire or electric shock. Contact your FUJIFILM dealer.
- **Do not change, heat or unduly twist or pull the connection cord and do not place heavy objects on the connection cord.** These actions could damage the cord and cause a fire or electric shock. If the cord is damaged, contact your FUJIFILM dealer.
- **Do not place the camera on an unstable surface.** This can cause the camera to fall or tip over and cause injury.
- **Never attempt to take pictures while in motion.** Do not use the camera while you are walking or driving a vehicle. This can result in you falling down or being involved in a traffic accident.
- **Do not touch any metal parts of the camera during a thunderstorm.** This can cause an electric shock due to induced current from the lightning discharge.
- **Do not use the batteries except as specified.** Load the batteries as shown by the indicator.
- **Do not heat, change or take apart the batteries. Do not drop or subject the batteries to impacts. Do not store the batteries with metallic products.** Any of these actions can cause the batteries to burst or leak and cause fire or injury as a result.
- **Use only the batteries or AC power adapters specified for use with this camera. Do not use voltages other than the power supply voltage shown.** The use of other power sources can cause a fire.
- **If the batteries leak and fluid gets in contact with your eyes, skin or clothing, flush the affected area with clean water and seek medical attention or call an emergency number right away.**
- **When carrying the batteries, install them in a digital camera or keep them in the hard case. When storing the batteries, keep them in the hard case. When discarding, cover the battery terminals with insulation tape.** Contact with other metallic objects or batteries could cause the batteries to ignite or burst.
- **Keep memory cards out of the reach of small children.** Because memory cards are small, they can be swallowed by children. Be sure to store memory cards out of the reach of small children. If a child swallows a memory card, seek medical attention or call an emergency number.

### CAUTION

- **Do not use this camera in locations affected by oil fumes, steam, humidity or dust.** This can cause a fire or electric shock.
- **Do not leave this camera in places subject to extremely high temperatures.** Do not leave the camera in locations such as a sealed vehicle or in direct sunlight. This can cause a fire.
- **Keep out of the reach of small children.** This product could cause injury in the hands of a child.
- **Do not place heavy objects on the camera.** This can cause the heavy object to tip over or fall and cause injury.
- **Do not move the camera while the AC power adapter is still connected. Do not pull on the connection cord to disconnect the AC power adapter.** This can damage the power cord or cables and cause a fire or electric shock.
- **Do not cover or wrap the camera or the AC power adapter in a cloth or blanket.** This can cause heat to build up and distort the casing or cause a fire.
- **When you are cleaning the camera or you do not plan to use the camera for an extended period, remove the batteries and disconnect and unplug the AC power adapter.** Failure to do so can cause a fire or electric shock.
- **When charging ends, unplug the charger from the power socket.** Leaving the charger plugged into the power socket can cause a fire.
- **Using a flash too close to a person’s eyes may temporarily affect the eyesight.** Take particular care when photographing infants and young children.
- **When a memory card is removed, the card could come out of the slot too quickly.** Use your finger to hold it and gently release the card.
- **Request regular internal testing and cleaning for your camera.** Build-up of dust in your camera can cause a fire or electric shock. Contact your FUJIFILM dealer to request internal cleaning every two years. Please note that this service is not free of charge.

### Using Batteries

The following describes the proper use of batteries and how to prolong their life. Incorrect use can shorten battery life or cause leakage, overheating, fire, or explosion.

### Compatible Batteries

The camera takes AA alkaline, rechargeable Ni-MH (nickel-metal hydride), or UL-certified lithium batteries. Do not use manganese, nickel-cadmium (Ni-Cd), or non-UL certified lithium batteries, as the heat generated by these batteries could damage the camera or cause malfunction.
Battery capacity varies with make and storage conditions. Some commercially-available batteries may have less capacity than the batteries provided with the camera.

Cautions: Handling Batteries
- Do not use batteries that are leaking, deformed, or discolored. Warning: If the batteries leak, clean the battery compartment thoroughly before inserting new batteries. If fluid from the battery comes into contact with skin or clothing, flush the affected area with water. If fluid enters your eyes, immediately flush the affected area with water and seek medical attention. Do not rub your eyes. Failure to observe this precaution could result in loss of eyesight.
- Do not transport or store with metal objects such as necklaces or hairpins.
- Do not disassemble or modify the batteries or battery casing.
- Do not expose to strong physical shocks.
- Do not expose to water, flame, or heat, or store in warm or humid conditions.
- Keep out of reach of infants and small children.
- Insert in the correct orientation.
- Do not mix old and new batteries, batteries with different charge levels, or batteries of different types.
- If the camera will not be used for an extended period, remove the batteries. Note that the camera clock will be reset (pg. 14).
- The batteries may be warm to the touch immediately after use. Turn the camera off and allow the batteries to cool before handling.
- Battery capacity tends to decrease at low temperatures. Keep spare batteries in a pocket or other warm place and exchange as necessary. Cold batteries may recover some of their charge when warmed.
- Fingerprints and other foreign matter on the battery terminals can reduce battery performance. Thoroughly clean the terminals with a soft, dry cloth before inserting the batteries in the camera.

Ni-MH Batteries
The capacity of Ni-MH batteries may be temporarily reduced when new, after long periods of disuse, or if they are repeatedly recharged before being fully discharged. This is normal and does not indicate a malfunction. Capacity can be increased by repeatedly discharging the batteries using the DISCHARGE option in the camera setup menu (pg. 100) and recharging them using a battery charger (sold separately). Do not use this option with alkaline batteries.

The camera draws a small amount of current even when off. Ni-MH batteries that have been left in the camera for an extended period may be drawn down to the point that they no longer hold a charge. Battery performance may also drop if the batteries are run down in a device such as a flashlight. Use the DISCHARGE option in the camera setup menu to discharge Ni-MH batteries. Batteries that no longer hold a charge even after repeatedly being discharged and recharged have reached the end of their service life and must be replaced.

Ni-MH batteries can be recharged in a battery charger (sold separately). Batteries may become warm to the touch after charging. Refer to the instructions provided with the charger for more information. Use the charger with compatible batteries only.

Ni-MH batteries gradually lose their charge when not in use.

Disposal
Dispose of used batteries in accordance with local regulations.

AC Power Adapters (Available Separately)
Use only FUJIFILM AC power adapters designated for use with this camera. Other adapters could damage the camera.
- The adapter is for indoor use only.
- Be sure the DC plug is securely connected to the camera.
- Turn the camera off before disconnecting the adapter. Disconnect the adapter by the plug, not the cable.
- Do not use with other devices.
- Do not disassemble.
- Do not expose to high heat and humidity.
- Do not subject to strong physical shocks.
- The adapter may hum or become hot to the touch during use. This is normal.
- If the adapter causes radio interference, reorient or relocate the receiving antenna.

For Your Safety

Using the Camera
To ensure that images are recorded correctly, do not subject the camera to impact or physical shocks while images are being recorded.

Electrical Interference
This camera may interfere with hospital or aviation equipment. Consult with hospital or airline staff before using the camera in a hospital or on an aircraft.

Liquid Crystal
In the event that the monitor or electronic viewfinder is damaged, care should be taken to avoid contact with liquid crystal. Take the urgent action indicated should any of the following situations arise:
- If liquid crystal comes in contact with your skin, clean the area with a cloth and then wash thoroughly with soap and running water.
- If liquid crystal enters your eyes, flush the affected eye with clean water for at least 15 minutes and then seek medical assistance.
- If liquid crystal is swallowed, rinse your mouth thoroughly with water. Drink large quantities of water and induce vomiting, then seek medical assistance.

Take Test Shots
Before taking photographs on important occasions (such as at weddings or before taking the camera on a trip), take a test shot and view the result to ensure that the camera is functioning normally. FUJIFILM Corporation cannot accept liability for damages or lost profits incurred as a result of product malfunction.
NOTICES

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

Please read the “Safety Notes” (pages iii–v) and make sure you understand them before using the camera.

Perchlorate Material—special handling may apply. See http://www.dtsc.ca.gov/hazardouswaste/perchlorate.

For Customers in the U.S.A.
Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

FCC Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void the user's authority to operate the equipment.

Notes on the Grant
To comply with Part 15 of the FCC Rules, this product must be used with a FUJIFILM-specified ferrite-core A/V cable, USB cable, and DC supply cord.

For Customers in Canada
CAUTION: This Class B digital apparatus complies with Canadian ICES-003.

**Disposal of Electrical and Electronic Equipment in Private Households**

**Disposal of Used Electrical and Electronic Equipment (Applicable in the European Union, Norway, Iceland and Liechtenstein)**

This symbol on the product, or in the manual and in the warranty, and/or on its packaging indicates that this product shall not be treated as household waste.

Instead it should be taken to an applicable collection point for the recycling of electrical and electronic equipment.

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

This symbol on the batteries or accumulators indicates that those batteries shall not be treated as household waste.

If your equipment contains easy removable batteries or accumulators please dispose these separately according to your local requirements.

The recycling of materials will help to conserve natural resources. For more detailed information about recycling this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

**In Countries Outside the European Union, Norway, Iceland and Liechtenstein**

If you wish to discard this product, including the batteries or accumulators, please contact your local authorities and ask for the correct way of disposal.

**Notes on Copyright**

Unless intended solely for personal use, images recorded using your digital camera system cannot be used in ways that infringe copyright laws without the consent of the owner. Note that some restrictions apply to the photographing of stage performances, entertainments, and exhibits, even when intended purely for personal use. Users are also asked to note that the transfer of memory cards containing images or data protected under copyright laws is only permissible within the restrictions imposed by those copyright laws.

**Trademark Information**

Macintosh, Power Macintosh, Power Mac, PowerBook, QuickTime, and Mac OS are trademarks of Apple Inc. in the U.S.A. and other countries. Microsoft, Windows, the Windows logo, Windows Vista and the Windows Vista logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries. “Windows” is an abbreviation used in reference to the Microsoft Windows operating system. Introduction

Symbols and Conventions
The following symbols are used in this manual:

⚠️ Caution: This information should be read before use to ensure correct operation.
👉 Note: Points to note when using the camera.
💡 Tip: Additional information that may be helpful when using the camera.

Menus and other text in the camera monitor are shown in bold. In the illustrations in this manual, the monitor display may be simplified for explanatory purposes.

Supplied Accessories
The following items are included with the camera:

- AA alkaline (LR6) batteries (×4)
- USB-A/V cable
- Strap
- Lens cap
- FinePix CD
  - Basic Manual
**Parts of the Camera**

For more information, refer to the page listed to the right of each item.
Introduction

- **Electronic viewfinder** .................. 5
- **Selector button (see below)** 
- **Monitor** ........................................ 4
- **DISP (display)/BACK** button....... 17, 46
- **(exposure compensation/photo info)**
  button ........................................... 33, 48
- **Tripod mount**

- **HDMI connector** ....................... 55

---

**Tip: Monitor Brightness**

Pressing the **button** briefly increases monitor brightness, making the display easier to see in bright light. Normal brightness is restored when a photograph is taken.
Camera Displays

The following indicators may appear during shooting and playback. The indicators displayed vary with camera settings.

**Shooting**

1. Image quality.............................72
2. Image size.................................71

22. Focus frame.................................18
23. Internal memory indicator*.............10
24. Exposure compensation
   indicator.........................................33
25. Exposure indicator.......................44

* **IN**: indicates that no memory card is inserted and that pictures will be stored in the camera’s internal memory (pg. 10).

**Playback**

1. Protected image............................86
2. DPOF print indicator......................58
3. Red-eye removal indicator..............21, 84
4. Intelligent Face Detection
   indicator.......................................21
5. Silent mode indicator....................18
6. Playback mode indicator.................20, 46
7. Voice memo indicator.....................89
8. Gift image....................................46
9. Frame number...............................96
The Electronic Viewfinder (EVF)

The electronic viewfinder provides the same information as the monitor, and can be used when bright lighting conditions make the display in the monitor difficult to see. To switch between the monitor and electronic viewfinder, press the **EVF/LCD** button (your selection remains in effect when the camera is turned off or the mode dial is rotated to another setting).
The Mode Dial
To select a shooting mode, align the mode icon with the mark next to the mode dial.

- **(AUTO):** A simple “point-and-shoot” mode recommended for first-time users of digital cameras (pg. 15).

- **SR AUTO (SCENE RECOGNITION):** A “point-and-shoot” mode in which the camera automatically adjusts settings to suit the scene (pg. 35).

- **SP (SCENE POSITION):** Choose a scene suited to the subject or shooting conditions and let the camera do the rest (pg. 35).

- **P, S, A, M:** Select for full control over camera settings, including aperture (M and A) and/or shutter speed (M and S; pg. 40).

- **C (CUSTOM):** Recall stored settings for modes P, S, A, and M (pg. 45).

- **MOVIE:** Record movies with sound (pg. 52).

- **(PANORAMA):** Take a series of photographs and combine them to form a panorama (pg. 39).
**The Strap and Lens Cap**

**Attaching the Strap**
Attach the strap to the two strap eyelets as shown below.

1. [Diagram of camera with strap attached]
2. [Diagram of camera with strap attached]
3. [Diagram of camera with strap and lens cap]

**Caution**
To avoid dropping the camera, be sure the strap is correctly secured.

**The Lens Cap**
Attach the lens cap as shown.

1. [Diagram of camera with lens cap]
2. [Diagram of camera with lens cap and strap]

To avoid losing the lens cap, pass the supplied string through the eyelet (1) and secure the lens cap to the strap (2).
Inserting the Batteries

The camera takes four AA alkaline, lithium, or rechargeable Ni-MH batteries. A set of four alkaline batteries is supplied with the camera. Insert the batteries in the camera as described below.

1 Open the battery-chamber cover.
   Slide the battery-chamber latch in the direction shown and open the battery-chamber cover.

   ➤ Note
   Be sure the camera is off before opening the battery-chamber cover.

   ▶ Cautions
   • Do not open the battery-chamber cover when the camera is on. Failure to observe this precaution could result in damage to image files or memory cards.
   • Do not use excessive force when handling the battery-chamber cover.

2 Insert the batteries.
   Insert the batteries in the orientation shown by the “+” and “−” marks inside the battery chamber.

   ▶ Cautions
   • Insert the batteries in the correct orientation.
   • Never use batteries with peeling or damaged casing or mix old and new batteries, batteries with different charge levels, or batteries of different types. Failure to observe these precautions could result in the batteries leaking or overheating.
   • Never use manganese or Ni-Cd batteries.
   • The capacity of alkaline batteries varies with the manufacturer and drops at temperatures below 10 °C/32 °F; Ni-MH batteries are recommended.
   • Fingerprints and other soil on the battery terminals can shorten battery life.
3 Close the battery-chamber cover.
Close the battery-chamber cover and slide it in until the latch clicks into place.

⚠️ Caution
Do not use force. If the battery-chamber cover does not close, check that the batteries are in the correct orientation and try again.

💡 Tip: Using an AC Adapter
The camera can be powered by an optional AC adapter and DC coupler (sold separately).

Choosing the Battery Type
After replacing the batteries with batteries of a different type, select the battery type using the 📲 BATTERY TYPE option in the setup menu (pg. 94) to ensure that the battery level is displayed correctly and the camera does not turn off unexpectedly.
Inserting a Memory Card

Although the camera can store pictures in internal memory, SD memory cards (sold separately) can be used to store additional pictures.

When no memory card is inserted,  appears in the monitor and internal memory is used for recording and playback. Note that because camera malfunction could cause internal memory to become corrupted, the pictures in internal memory should periodically be transferred to a computer and saved on the computer hard disk or on removable media such as CDs or DVDs. The pictures in internal memory can also be copied to a memory card (see page 87). To prevent internal memory from becoming full, be sure to delete pictures when they are no longer needed.

When a memory card is inserted as described below, the card will be used for recording and playback.

Compatible Memory Cards
SanDisk SD and SDHC memory cards have been approved for use in the camera. A complete list of approved memory cards is available at http://www.fujifilm.com/products/digital_cameras/index.html. Operation is not guaranteed with other cards. The camera can not be used with xD-Picture Cards or MultiMediaCard (MMC) devices.

Caution
Memory cards can be locked, making it impossible to format the card or to record or delete images. Before inserting a memory card, slide the write-protect switch to the unlocked position.
Inserting a Memory Card

1. Open the battery-chamber cover.

   **Note**
   Be sure the camera is off before opening the battery-chamber cover.

2. Insert the memory card.
   Holding the memory card in the orientation shown below, slide it in until it clicks into place at the back of the slot.

   Be sure card is in correct orientation; do not insert at an angle or use force. If the memory card is not correctly inserted, pictures will be recorded to internal memory.

3. Close the battery-chamber cover.
   Close the battery-chamber cover and slide it in until the latch clicks into place.

   **Removing Memory Cards**
   After confirming that the camera is off, press the card in and then release it slowly. The card can now be removed by hand.

   **Cautions**
   - The memory card may spring out if you remove your finger immediately after pushing the card in.
   - Memory cards may be warm to the touch after being removed from the camera. This is normal and does not indicate a malfunction.
Cautions

- **Do not turn the camera off or remove the memory card while the memory card is being formatted or data are being recorded to or deleted from the card.** Failure to observe this precaution could damage the card.
- Format memory cards before first use, and be sure to reformat all memory cards after using them in a computer or other device. For more information on formatting memory cards, see page 98.
- Memory cards are small and can be swallowed; keep out of reach of children. If a child swallows a memory card, seek medical assistance immediately.
- miniSD or microSD adapters that are larger or smaller than the standard dimensions of an SD card may not eject normally; if the card does not eject, take the camera to an authorized service representative. Do not forcibly remove the card.
- Do not affix labels to memory cards. Peeling labels can cause camera malfunction.
- Movie recording may be interrupted with some types of memory card. Use a card with a class 4 write speed (4 MB/s) or better when shooting HD movies.
- The data in internal memory may be erased or corrupted when the camera is repaired. Please note that the repairer will be able to view pictures in internal memory.
- Formatting a memory card or internal memory in the camera creates a folder in which pictures are stored. Do not rename or delete this folder or use a computer or other device to edit, delete, or rename image files. Always use the camera to delete pictures from memory cards and internal memory; before editing or renaming files, copy them to a computer and edit or rename the copies, not the originals.
**Turning the Camera on and Off**

**Shooting Mode**
Slide the ON/OFF switch in the direction shown below. The lens will extend automatically.

Slide the ON/OFF switch to turn the camera off.

**Tip: Switching to Playback Mode**
Press the button to start playback. Press the shutter button halfway to return to shooting mode.

**Cautions**
- Forcibly preventing the lens from extending could cause damage or product malfunction.
- Pictures can be affected by fingerprints and other marks on the lens. Keep the lens clean.
- The ON/OFF button does not completely disconnect the camera from its power supply.

**Tip: Auto Power Off**
The camera will turn off automatically if no operations are performed for the length of time selected in the AUTO POWER OFF menu (see page 98). To turn the camera on, use the ON/OFF switch or press the button for about a second.

**Playback Mode**
To turn the camera on and begin playback, press the button for about a second.

Press the button again or slide the ON/OFF switch to turn the camera off.

**Tip: Switching to Shooting Mode**
To exit to shooting mode, press the shutter button halfway. Press the button to return to playback.
Basic Setup

A language-selection dialog is displayed the first time the camera is turned on. Set up the camera as described below (for information on resetting the clock or changing languages, see page 94).

1 Choose a language.

1.1 Press the selector up, down, left, or right to highlight a language.

1.2 Press MENU/OK.

2 Set the date and time.

2.1 Press the selector left or right to highlight the year, month, day, hour, or minute and press up or down to change. To change the order in which the year, month, and day are displayed, highlight the date format and press the selector up or down.

2.2 Press MENU/OK. A battery type message will be displayed; if the type differs from the type inserted in the camera, use the setup menu BATTERY TYPE option (pg. 94) to specify the correct type.

Tip: The Camera Clock

If the batteries are removed for an extended period, the camera clock and battery type will be reset and the language-selection dialog will be displayed when the camera is turned on. If the batteries are left in the camera for about 10 hours, the battery can be removed for about 24 hours without resetting the clock, language, or battery type.
Taking Pictures in 📷 (Auto) Mode

This section describes how to take pictures in 📷 (auto) mode.

1. **Turn the camera on.**
   Slide the **ON/OFF** switch to turn the camera on.

2. **Select 📷 mode.**
   Rotate the mode dial to 📷.

3. **Check the battery level.**
   Check the battery level in the display.

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>NO ICON</td>
<td>Batteries are partially discharged.</td>
</tr>
<tr>
<td>① 📷 (red)</td>
<td>Batteries are low. Replace as soon as possible.</td>
</tr>
<tr>
<td>② 📷 (blinks red)</td>
<td>Batteries are exhausted. Turn camera off and replace batteries.</td>
</tr>
</tbody>
</table>

**Note**
A battery warning may not be displayed before the camera turns off, particularly if batteries are reused after having once been exhausted. Power consumption varies greatly from mode to mode; the low battery warning (①) may not be displayed or may be displayed only briefly before the camera turns off in some modes or when switching from shooting to playback mode.
Taking Pictures in 📸 (Auto) Mode

4 Frame the picture. Position the main subject in the focus frame and use the zoom control to frame the picture in the display.

Select W to zoom out

Select T to zoom in

By default setting, the camera uses optical zoom only. If desired, digital zoom (pg. 97) can be used to zoom in closer.

Holding the Camera

Hold the camera steady with both hands and brace your elbows against your sides. Shaking or unsteady hands can blur your shots.

To prevent pictures that are out of focus or too dark (underexposed), keep your fingers and other objects away from the lens and flash.

Tip: Focus Lock

Use focus lock (pg. 24) to focus on subjects that are not in the focus frame.
**Shooting Information**

To choose the shooting information and guides displayed, press the **DISP/BACK** button.

- **Indicators displayed**
- **Indicators hidden**

To use best framing, position the main subject at the intersection of two lines or align one of the horizontal lines with the horizon. Use focus lock (pg. 24) to focus on subjects that will not be in the center of the frame in the final photograph.

**Avoiding Blurred Pictures**

If the subject is poorly lit, blurring caused by camera shake can be reduced using the **[DUAL IS MODE]** option in the setup menu (pg. 94). In **[Auto]** mode, blur caused by subject movement is also reduced (dual IS mode).

Sensitivity is raised when dual IS is in effect. Note that blurring may still occur depending on the scene. We recommend that you turn dual IS off when using a tripod.
Taking Pictures in \( \text{ } \) (Auto) Mode

**Silent Mode**

In situations in which camera sounds or lights may be unwelcome, hold the **DISP/BACK** button down until \( \text{ } \) is displayed (note that silent mode is not available during movie or voice memo playback).

The camera speaker and AF-assist illuminator/self-timer lamp turn off and volume (pg. 94) can not be adjusted (note that the AF-assist illuminator may still light when \( \text{ } \) is selected in scene mode). To restore normal operation, press the **DISP/BACK** button until the \( \text{ } \) icon is no longer displayed.

**Focus.**

Press the shutter button halfway to focus on the main subject in the focus frame.

\[
\text{Focus frame} \quad \text{Press halfway} \quad \text{Camera selects small focus frame and focuses on subject}
\]

**Note**

The lens may make a noise when the camera focuses. This is normal.

If the camera is able to focus, it will beep twice and the indicator lamp will glow green.

If the camera is unable to focus, the focus frame will turn red, \( \downarrow \) **AF** will be displayed, and the indicator lamp will blink green. Change the composition or use focus lock (pg. 24).
6  Shoot.
Smoothly press the shutter button the rest of the way down to take the picture.

Tip: The Shutter Button
The shutter button has two positions. Pressing the shutter button halfway (①) sets focus and exposure; to shoot, press the shutter button the rest of the way down (②).

Note
If the subject is poorly lit, the AF-assist illuminator may light to assist focus (pg. 25). For information on using the flash when lighting is poor, see page 27.

The Indicator Lamp
The indicator lamp shows camera status as follows:

<table>
<thead>
<tr>
<th>Indicator lamp</th>
<th>Camera status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glows green</td>
<td>Focus locked.</td>
</tr>
<tr>
<td>Blinks green</td>
<td>Blur, focus, or exposure warning. Picture can be taken.</td>
</tr>
<tr>
<td>Blinks green and orange</td>
<td>Recording pictures. Additional pictures can be taken.</td>
</tr>
<tr>
<td>Glows orange</td>
<td>Recording pictures. No additional pictures can be taken at this time.</td>
</tr>
<tr>
<td>Blinks orange</td>
<td>Flash charging; flash will not fire when picture is taken.</td>
</tr>
<tr>
<td>Blinks red</td>
<td>Lens or memory error (internal memory or memory card full or not formatted, format error, or other memory error).</td>
</tr>
</tbody>
</table>

Tip: Warnings
Detailed warnings appear in the display. See pages 111–114 for more information.
Viewing Pictures

Pictures can be viewed in the monitor. When taking important photographs, take a test shot and check the results.

1 Press the button.

The most recent picture will be displayed in the monitor.

2 View additional pictures.
Press the selector right to view pictures in the order recorded, left to view pictures in reverse order.

Press the shutter button to exit to shooting mode.

Deleting Pictures
To delete the picture currently displayed in the monitor, press the selector up ( ). The following dialog will be displayed.

To delete the picture, press the selector left to highlight OK and press . To exit without deleting the picture, highlight CANCEL and press .

Tip: The Playback Menu
Pictures can also be deleted from the playback menu (pg. 50).
Intelligent Face Detection and Red-Eye Removal

Intelligent Face Detection allows the camera to automatically detect human faces and set focus and exposure for a face anywhere in the frame for shots that emphasize portrait subjects. Choose for group portraits (in horizontal or vertical orientations) to prevent the camera from focusing on the background. Intelligent Face Detection also offers a blink detection option as well as red-eye removal for removing “red-eye” effects caused by the flash.

1 Turn Intelligent Face Detection on.
Press the button to cycle through settings as shown below.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>📸 OFF</td>
<td>Intelligent Face Detection and red-eye removal off.</td>
</tr>
<tr>
<td>📸 FACE DETECTION 🕵️ REMOVAL ON</td>
<td>Intelligent Face Detection and red-eye removal on. Use with the flash.</td>
</tr>
<tr>
<td>📸 FACE DETECTION 🕵️ REMOVAL OFF</td>
<td>Intelligent Face Detection on; red-eye removal off.</td>
</tr>
</tbody>
</table>

2 Frame the picture.
If a face is detected, it will be indicated by a green border. If there is more than one face in the frame, the camera will select the face closest to the center; other faces are indicated by white borders.
3 Focus.
Press the shutter button halfway to set focus and exposure for the subject in the green border.

⚠️ Caution
If no face is detected when the shutter button is pressed halfway (pg. 106), the camera will focus on the subject at the center of the display and red-eye will not be removed.

4 Shoot.
Press the shutter button all the way down to shoot.

⚠️ Caution
If the subject moves as the shutter button is pressed, their face may not be in the area indicated by the green border when the picture is taken. If the number of faces is large, additional time may be required for processing.

If FACE DETECTION REMOVAL ON is selected, the picture will be processed to reduce red-eye before it is recorded.

Intelligent Face Detection
Intelligent Face Detection is recommended when using the self-timer for group- or self-portraits (pg. 76).

When a picture taken with Intelligent Face Detection is displayed, the camera can automatically select faces for red-eye removal (pg. 84), playback zoom (pg. 47), slide shows (pg. 82), printing (pg. 61), and cropping (pg. 91).
**Blink Detection**

If an option other than OFF is selected for [IMAGE DISP](pg. 95), a warning will be displayed if the camera detects subjects who may have blinked when the picture was taken. If ZOOM (CONTINUOUS) is selected, you can press the button to zoom in on these subjects; a new face is selected each time the button is pressed.

If you are satisfied with the results, press **MENU/OK** to save the picture. If you want to try again, press the selector up to delete the picture and then take another photograph.

**Caution**

Blink detection is not performed if the camera fails to detect a face or when OFF is selected for [IMAGE DISP].
Focus Lock

To compose photographs with off-center subjects:

1 Position the subject in the focus frame.

2 Focus.
Press the shutter button halfway to set focus and exposure. Focus and exposure will remain locked while the shutter button is pressed halfway (AF/AE lock).

3 Recompose the picture.
Keeping the shutter button pressed halfway, recompose the picture.

4 Shoot.
Press the shutter-release button the rest of the way down to take the picture.

Repeat steps 1 and 2 as desired to refocus before taking the picture.
Focus Lock

**Autofocus**
Although the camera boasts a high-precision autofocus system, it may be unable to focus on the subjects listed below. If the camera is unable to focus using autofocus, use focus lock (pg. 24) to focus on another subject at the same distance and then recompose the photograph.

- Very shiny subjects such as mirrors or car bodies.
- Fast-moving subjects.
- Subjects photographed through a window or other reflective object.
- Dark subjects and subjects that absorb rather than reflect light, such as hair or fur.
- Insubstantial subjects, such as smoke or flame.
- Subjects that show little contrast with the background (for example, subjects in clothing that is the same color as the background).
- Subjects positioned in front of or behind a high-contrast object that is also in the focus frame (for example, a subject photographed against a backdrop of highly contrasting elements).

**The AF-Assist Illuminator**
If the subject is poorly lit, the AF-assist illuminator will light to assist the focus operation when the shutter button is pressed halfway.

**Notes**
- Avoid shining the AF-assist illuminator directly into your subject’s eyes. See page 94 for information on disabling the AF-assist illuminator.
- The camera may be unable to focus using the AF-assist illuminator in some cases. If the camera is unable to focus in macro mode (pg. 26), try increasing the distance to the subject.
- The AF-assist illuminator is not available in silent mode.
Macro and Super Macro Modes (Close-ups)

For close-ups, press the selector left (macro) to choose from the macro options shown below.

Choose from (macro mode), (super macro mode), or (macro mode off)

When macro mode is in effect, the camera focuses on subjects near the center of the frame. Use the zoom control to compose pictures. In super macro mode, zoom can not be adjusted and the flash can not be used.

Notes
- Use of a tripod is recommended to prevent blur caused by camera shake.
- Flash compensation may be required when using the flash (pg. 80).
Using the Flash (Intelligent Flash)

When the flash is used, the camera’s *Intelligent Flash* system instantly analyzes the scene based on such factors as the brightness of the subject, its position in the frame, and its distance from the camera. Flash output and sensitivity are adjusted to ensure that the main subject is correctly exposed while preserving the effects of ambient background lighting, even in dimly-lit indoor scenes. Use the flash when lighting is poor, for example when shooting at night or indoors under low light.

1. **Raise the flash.**
   Press the flash pop-up button to raise the flash.

   **Turning the Flash Off**
   Lower the flash where flash photography is prohibited or to capture natural lighting under dim light. At slow shutter speeds, ![ ] will be displayed to warn that pictures may be blurred; use of a tripod is recommended.

2. **Choose a flash mode.**
   Press the selector right ( ). The flash mode changes each time the selector is pressed.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO (AUTO FLASH)</td>
<td>The flash fires when required. Recommended in most situations.</td>
</tr>
<tr>
<td>(FORCED FLASH)</td>
<td>The flash fires whenever a picture is taken. Use for backlit subjects or for natural coloration when shooting in bright light.</td>
</tr>
<tr>
<td>$S$ (SLOW SYNCHRO)</td>
<td>Capture both the main subject and the background under low light (note that brightly lit scenes may be overexposed).</td>
</tr>
</tbody>
</table>
3 Focus.
Press the shutter button halfway to focus. If the flash will fire, 
will be displayed when
the shutter button is pressed halfway. At slow shutter speeds, 
will appear in the
display to warn that pictures may be blurred; use of a tripod is recommended.

4 Shoot.
Press the shutter button the rest of the way down to shoot.

Caution
The flash may fire several times with each shot. Do not move the camera until shooting is com-
plete.

Note
For restrictions on flash settings, see page 41 of the Basic Manual.

Red-Eye Removal
When FACE DETECTION REMOVAL ON is selected for Intelligent Face Detection (pg. 21),
red-eye removal ( ) is available in AUTO ( ), FORCED FLASH ( ), and SLOW SYNCHRO ( )
modes. Red-eye removal minimizes “red-eye” caused when light from the flash is reflected from the
subject’s retinas as shown in the illustration at right.
**Continuous Shooting (Burst Mode)**

Capture motion in a series of pictures.

1. **Choose a continuous shooting mode.**
   Press the button to display continuous shooting options. Press the selector up or down to highlight the desired option and press **MENU/OK**.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="icon" /> (TOP 20)</td>
<td>The camera takes up to 20 pictures while the shutter button is pressed.</td>
</tr>
<tr>
<td><img src="image2" alt="icon" /> (TOP 10)</td>
<td>The camera takes up to 10 pictures while the shutter button is pressed.</td>
</tr>
<tr>
<td><img src="image3" alt="icon" /> (LONG PERIOD)</td>
<td>The camera takes pictures while the shutter button is pressed. Shooting ends when the shutter button is released or memory is full.</td>
</tr>
<tr>
<td><img src="image4" alt="icon" /> (LAST 3)</td>
<td>The camera takes up to 40 pictures while the shutter button is pressed, but only the last three frames are recorded.</td>
</tr>
<tr>
<td><img src="image5" alt="icon" /> (BRACKETING)</td>
<td>Each time the shutter-release button is pressed, the camera takes three shots: one using the metered value for exposure, the second overexposed by the amount selected for <img src="image6" alt="icon" /> BRACKETING in the shooting menu (pg. 80), and the third underexposed by the same amount (the camera may not be able to use the selected bracketing increment if the amount of over- or under-exposure exceeds the limits of the exposure metering system).</td>
</tr>
<tr>
<td><img src="image7" alt="icon" /> (TOP 3)</td>
<td>The camera takes up to three pictures while the shutter button is pressed.</td>
</tr>
<tr>
<td><strong>OFF</strong></td>
<td>Continuous shooting mode off. One picture is taken each time the shutter button is pressed.</td>
</tr>
</tbody>
</table>
2 **Focus.**
Press the shutter button halfway to focus.

3 **Shoot.**
Pictures will be taken while the shutter button is pressed. Shooting ends when the shutter button is released, memory is full, or the selected number of shots has been taken.

**Notes**
- Focus and exposure are determined by the first frame in each series. The flash turns off automatically (pg. 27); the previously-selected flash mode is restored when continuous shooting is turned off.
- Frame rate varies with shutter speed.
- If the self-timer is used when and are selected, only one picture will be taken when the shutter button is pressed.
- At a setting of , white lines may appear in bright areas of the image; these can be avoided by choosing mode.
- The number of pictures that can be recorded depends on the memory available. Bracketing is only available if there is sufficient memory for three pictures. Additional time may be required to record pictures when shooting ends. In , , and modes, pictures are displayed in the monitor while recording is in progress.
Instant Zoom

In instant zoom, the area surrounding the frame is visible in the display. Use to frame erratically moving subjects such as children, pets, and athletes at sporting events.

1 Position the subject in the focus frame.
Use the zoom control to frame the subject in the center of the display.

2 Choose a frame.
Press the selector down ( ) to cycle through framing options as shown below.

- Horizontal, low zoom
- Horizontal, high zoom
- Vertical, low zoom
- Vertical, high zoom

The frame is displayed as shown at right. The composition can be adjusted using the zoom control.

3 Focus and shoot.
The framed area will be enlarged to create a full-sized picture.

- Intelligent Face Detection
Intelligent Face Detection will not detect faces outside the selected frame.

- Caution
Only horizontal (landscape-orientation) framing is available when , , , or is selected for continuous shooting mode.
Digital Zoom

1 Enable digital zoom.
Select **ON** for the DIGITAL ZOOM option in the setup menu (pg. 97).

2 Choose a subject.
Frame the subject in the center of the display using digital zoom.

3 Press the selector down ( ).
The camera will zoom to the maximum optical zoom position with the area that will be recorded using digital zoom indicated by a frame at the center of the display.

4 Frame the picture.
Use the zoom control to choose the area that will be included in the final photograph.

5 Focus and shoot.
The framed area will be enlarged to create a full-sized picture.

⚠️ Caution
Pictures taken using the instant zoom are lower quality than pictures taken using normal zoom.
Exposure Compensation

Use exposure compensation when photographing very bright, very dark, or high-contrast subjects.

1. Press the button. The exposure indicator will be displayed.

2. Choose a value. Press the selector left or right. The effect is visible in the display.

3. Return to shooting mode. Press the button to return to shooting mode.

4. Take pictures.

Note

A icon and exposure indicator are displayed at settings other than ±0. Exposure compensation is not reset when the camera is turned off; to restore normal exposure control, choose a value of ±0.
Choosing an Exposure Compensation Value

- **Backlit subjects**: choose values from $+\frac{2}{3}$ EV to $+1\frac{2}{3}$ EV (for an explanation of the term “EV”, see the Glossary on page 115)

- **Highly reflective subjects or very bright scenes** (e.g., snowfields): $+1$ EV

- **Scenes that are mostly sky**: $+1$ EV

- **Spotlit subjects** (particularly if photographed against dark backgrounds): $-\frac{2}{3}$ EV

- **Subjects with low reflectivity** (pine trees or dark-colored foliage): $-\frac{3}{2}$ EV
Shooting Mode

Choose a shooting mode according to the scene or type of subject. To choose a shooting mode, rotate the mode dial to the desired setting (pg. 6). The following modes are available:

**AUTO**

Choose for crisp, clear snapshots (pg. 15). This mode is recommended in most situations.

**SCENE RECOGNITION**

In this mode, the camera automatically analyzes the composition and selects the appropriate scene mode according to the subject and shooting conditions. The selected mode is displayed when the shutter button is pressed halfway.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Type of subject or scene detected</th>
</tr>
</thead>
<tbody>
<tr>
<td>Portrait: Human portrait subject.</td>
<td></td>
</tr>
<tr>
<td>Landscape: Man-made or natural landscape.</td>
<td></td>
</tr>
<tr>
<td>Night landscape: Poorly lit landscape.</td>
<td></td>
</tr>
<tr>
<td>Macro: Subject close to camera.</td>
<td></td>
</tr>
<tr>
<td>Night portrait: Poorly lit portrait subject.</td>
<td></td>
</tr>
</tbody>
</table>

*Notes: SRAUTO*

- **(AUTO)** will be selected if the subject does not match the scenes listed above.
- The camera focuses continuously on the faces of portrait subjects or on subjects near the center of the frame. This increases the drain on the battery, and the sound of the camera focusing may be audible.

**SP SCENE POSITION**

The camera offers a choice of “scenes,” each adapted to particular shooting conditions or a specific type of subject, which can be assigned to the SP position on the mode dial:

1. Rotate the mode dial to SP.

2. Press **MENU/OK** to display the shooting menu.
3 Press the selector up or down to highlight **SCENE POSITION**.

4 Press the selector right to display a list of scenes.

5 Press the selector up or down to highlight a scene.

6 Press **MENU/OK** to select the highlighted option.

Until the setting is changed as described above, the chosen scene will be selected whenever the mode dial is rotated to **SP**.

**N Natural Light**

Capture natural light indoors, under low light, or where the flash can not be used. The flash turns off and sensitivity is raised to reduce blur.

**N+N Natural &**

This mode helps ensure good results with backlit subjects and in other situations with difficult lighting. Before shooting, raise the flash; pictures can only be taken when the flash is raised. Each time the shutter button is pressed, the camera takes two shots: one shot without the flash to preserve natural lighting, followed immediately by a second shot with the flash. Do not move the camera until shooting is complete.

**Notes**

- Do not use where flash photography is prohibited.
- Only available if memory remains for two pictures.
- Burst mode is not available.
**Zoom Bracketing**

Each time the shutter button is pressed, the camera takes three pictures: one at the current zoom ratio with an image size of **L**, a second zoomed in 1.4 × and cropped to **M**, and a third zoomed in 2 × and cropped to **S** (pictures will only be taken if there is enough memory for three images). Two frames are displayed to show the areas that will be included in the second and third pictures; the outer frame shows the area that will be recorded at 1.4 × zoom, the inner frame the area that will be recorded at 2 × zoom. Press the selector down to choose from wide and tall crops.

**Notes**

- Digital zoom can not be used. If digital zoom is active when **Zoom** mode is selected, zoom will be set to the maximum optical zoom position.
- Burst shooting options are limited to **Smile** and **OFF**.

### Smile

The shutter is released automatically when Intelligent Face Detection detects a smiling face.

### Portrait

Choose this mode for soft-toned portraits with natural skin tones.

### Landscape

Choose this mode for crisp, clear daylight shots of buildings and landscapes.

### Sport

Choose this mode when photographing moving subjects. **HIGH-SPEED SHOOTING** turns on automatically and priority is given to faster shutter speeds.
Shooting Mode

Night
Choose this mode for poorly lit twilight or night scenes. Sensitivity is automatically raised to reduce blur caused by camera shake.

Night (Tripod)
Choose this mode for slow shutter speeds when shooting at night. Use a tripod to prevent blur.

Fireworks
Slow shutter speeds are used to capture the expanding burst of light from a firework. Press the button to display a shutter-speed selection dialog and press the selector up and down to choose a shutter speed.

Sunset
Choose this mode to record the vivid colors in sunrises and sunsets.

Snow
Choose for crisp, clear shots that capture the brightness of scenes dominated by shining white snow.

Beach
Choose for crisp, clear shots that capture the brightness of sunlit beaches.

Party
Capture indoor background lighting under low-light conditions.

Flower
Choose for vivid close-ups of flowers. The camera focuses in the macro range.

Text
Take clear pictures of text or drawings in print. The camera focuses in the macro range.
PANORAMA MODE
In this mode, you can take up to three pictures and join them together to form a panorama. Use of a tripod is recommended to assist in composing overlapping shots.

1. Rotate the mode dial to **PANORAMA**.

2. Press the selector up to select a frame, and press the selector left or right to highlight a pan direction and press **MENU/OK**.

3. Take a photograph. Exposure and white balance for the panorama are set with the first shot.

4. Press **MENU/OK**. An edge of the picture you have just taken will be displayed at one side of the frame.

5. Frame the next shot to overlap with the previous picture.
6 Take the second shot as described in steps 3–4 (to create a panorama from only two frames, press the selector up after the second shot).

7 Take the last shot, framing it to overlap the second picture. Press **MENU/OK** to complete the panorama (the individual shots are not saved).

8 Press **MENU/OK** to save the picture.

### P, S, A, and M Modes

P, S, A, and M modes provide full access to the shooting and **F**-mode menus. S, A, and M modes also offer control over shutter speed and/or aperture.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P (PROGRAM AE; pg. 41)</td>
<td>The camera sets exposure automatically.</td>
</tr>
<tr>
<td>S (SHUTTER PRIORITY AE; pg. 42)</td>
<td>You choose the shutter speed, letting the camera set aperture for optimal exposure.</td>
</tr>
<tr>
<td>A (APERTURE PRIORITY AE; pg. 43)</td>
<td>You choose the aperture, letting the camera set shutter speed for optimal exposure.</td>
</tr>
<tr>
<td>M (MANUAL; pg. 44)</td>
<td>You choose both shutter speed and aperture.</td>
</tr>
</tbody>
</table>

**Printing Pictures Taken in Panorama Mode**

Depending on the number of photographs they contain, panoramas may not print correctly on some sizes of paper. Part of the image may not be printed or the image may print with unusually wide margins at the top and bottom or left and right.
**P: PROGRAM AE**
In this mode, the camera sets exposure automatically. If desired, you can choose different combinations of shutter speed and aperture that will produce the same exposure (program shift).

![Diagram](image)

**Caution**
If the subject is outside the metering range of the camera, the shutter speed and aperture displays will show “---”. Press the shutter button halfway to measure exposure again.

**Program Shift**
Press the button to choose the desired combination of shutter speed and aperture. Values that differ from those automatically selected by the camera are shown in yellow. The default values can be restored by raising the flash, rotating the mode dial to another setting, turning the camera off, or selecting playback mode. Program shift is not available when the flash is raised.
Shooting Mode

S: SHUTTER PRIORITY AE
In this mode, you choose the shutter speed while the camera adjusts aperture for optimal exposure.

1 Rotate the mode dial to S.

2 Press the button. Shutter speed and aperture will be displayed.

3 Press the selector up or down to choose the shutter speed.

4 Press the button to exit to shooting mode.

5 Take pictures. If the correct exposure cannot be achieved at the selected shutter speed, aperture will be displayed in red when the shutter button is pressed halfway. Adjust shutter speed until the correct exposure can be achieved.

Caution
If the subject is outside the metering range of the camera, the aperture display will show “---”. Press the shutter button halfway to measure exposure again.
A: APERTURE PRIORITY AE

In this mode, you choose the aperture while the camera adjusts shutter speed for optimal exposure.

1. Rotate the mode dial to A.

2. Press the 
   button. Shutter speed and aperture will be displayed.

3. Press the selector up or down to choose the aperture.

4. Press the 
   button to exit to shooting mode.

5. Take pictures. If the correct exposure cannot be achieved at the selected aperture, shutter speed will be displayed in red when the shutter button is pressed halfway. Adjust aperture until the correct exposure can be achieved.

Caution

If the subject is outside the metering range of the camera, the shutter speed display will show “---”. Press the shutter button halfway to measure exposure again.
M: MANUAL

In this mode, you choose both shutter speed and aperture. If desired, exposure can be altered from the value suggested by the camera.

1. Rotate the mode dial to M.

2. Press the button. Shutter speed and aperture will be displayed.

3. Press the selector up or down to choose the shutter speed.

4. Press the selector left or right to choose the aperture.

5. Press the button to exit to shooting mode.

6. Take pictures.

The Exposure Indicator

The amount the picture will be under- or over-exposed at current settings is shown by the exposure indicator. Pictures taken with the indicator to the left of center (“−”) will be underexposed, pictures taken with the indicator is to the right of center (“+”), overexposed.
**C: CUSTOM MODE**

In **P**, **S**, **A**, and **M** modes, the **CUSTOM SET** option in the shooting menu (pg. 74) can be used to save current camera and menu settings. These settings are recalled whenever the mode dial is rotated to **C** (custom mode).

<table>

</table>
Playback Options

To view the most recent picture in the monitor, press the ▶ button.

Press the selector right to view pictures in the order recorded, left to view pictures in reverse order. Keep the selector pressed to scroll rapidly to the desired frame.

Choosing a Display Format

Press the DISP/BACK button to cycle through playback display formats as shown below.

Indicators displayed

Indicators hidden

Sort by date

Note

Pictures taken using other cameras are indicated by a "gift image" icon during playback.
Playback Zoom

Select T to zoom in on pictures displayed in single-frame playback; select W to zoom out. When the picture is zoomed in, the selector can be used to view areas of the image not currently visible in the display.

Press DISP/BACK to exit zoom.

Note
The maximum zoom ratio varies with image size. Playback zoom is not available with resized copies or copies cropped to a size of 640.
**Viewing Photo Information**

To view or hide the photo information listed below in single-frame playback, press  

![Image]

1. Image quality and size,  
2. Sensitivity,  
3. Shutter speed/aperture,  
4. FinePix color,  
5. Flash mode,  
6. White balance,  
7. Exposure compensation,  
8. Frame number,  
9. Picture (overexposed areas blink on and off),  
10. Histogram

**Histograms**

Histograms show the distribution of tones in the image. Brightness is shown by the horizontal axis, the number of pixels by the vertical axis.

**Optimal exposure:** Pixels are distributed in an even curve throughout the tone range.

**Overexposed:** Pixels are clustered at the right side of the graph.

**Underexposed:** Pixels are clustered at the left side of the graph.
**Multi-Frame Playback**

To change the number of images displayed during playback, select \( W \).

Select \( W \) to increase the number of pictures displayed to two, nine, or a hundred.

Select \( T \) to reduce the number of images displayed.

Use the selector to highlight images and press MENU/OK to view the highlighted image full frame. In the nine- and hundred-frame displays, press the selector up or down to view more pictures.

**Tip: Two-Frame Display**

Two-frame display can be used to compare pictures taken in \( \text{ recall } \) mode.

---

**Sort by Date**

Choose sort-by-date mode to view pictures taken on a selected date.

1. Press DISP/BACK until the sort-by-date screen is displayed.

2. Use the selector up or down to highlight a date. Keep the selector pressed to scroll rapidly to the desired date.

3. Press the selector left or right to scroll through the pictures taken on the highlighted date. Keep the selector pressed to scroll rapidly to the desired frame.
Deleting Pictures

The ERASE option in the playback menu can be used to delete still pictures and movies, increasing the amount of space available on the memory card or in internal memory (for information on deleting pictures in single-frame playback, see page 20). *Note that deleted pictures can not be recovered. Copy important pictures to a computer or other storage device before proceeding.*

1. Press MENU/OK to display the playback menu.

2. Press the selector up or down to highlight ERASE.

3. Press the selector right to display delete options.

4. Press the selector up or down to highlight FRAME or ALL FRAMES.

5. Press MENU/OK to display options for the selected item (see following page).

**Tips: Deleting Pictures**

- When a memory card is inserted, pictures will be deleted from the memory card; otherwise, pictures will be deleted from internal memory.
- Protected pictures can not be deleted. Remove protection from any pictures you wish to delete (pg. 86).
- If a message appears stating that the selected images are part of a DPOF print order, press MENU/OK to delete the pictures.
■ FRAME: Deleting Selected Images
Selecting FRAME displays the dialog shown at right.

Press the selector left or right to scroll through pictures and press MENU/OK to delete the current picture (the picture is deleted immediately; be careful not delete the wrong picture).

Press DISP/BACK to exit when all the desired pictures have been deleted.

■ ALL FRAMES: Deleting All Images
Selecting ALL FRAMES displays the confirmation shown at right.

Highlight OK and press MENU/OK to delete all unprotected pictures.

The dialog shown at right is displayed during deletion. Press DISP/BACK to cancel before all pictures have been deleted (any pictures deleted before the button was pressed cannot be recovered).
Recording Movies

Shoot short movies at 30 frames per second. Sound is recorded via the built-in microphone; do not cover the microphone during recording.

1. Rotate the mode dial to 🎥 (movie mode).

2. Press the 🅱️ button and select a frame size from the 📌 QUALITY menu. Choose **1280 HD** (1280 × 720 pixels) for an aspect ratio of 16:9 (High Definition), **640** (640 × 480 pixels) for high-quality standard definition movies, or **320** (320 × 240 pixels) for longer movies. Press MENU/OK to exit to movie mode.

3. Press MENU/OK to display the shooting menu and select the type of zoom available in movie mode from the MOVIE ZOOM TYPE menu. Choose **Opt OPTICAL** to enable optical zoom (note that sounds made by the camera during zoom may be recorded). Choose **Dig DIGITAL** to enable digital zoom (note that digital zoom may produce lower quality images than optical zoom). Press MENU/OK exit to movie mode.
Avoiding Blurred Pictures

If the subject is poorly lit, blurring caused by camera shake can be reduced using the DUAL IS MODE option in the setup menu (pg. 94). In mode, blur caused by subject movement is also reduced (dual IS mode).

Sensitivity is raised when dual IS is in effect. Note that blurring may still occur depending on the scene. We recommend that you turn dual IS off when using a tripod.

4 Press the shutter button all the way down to start recording.

Note

Exposure and white balance are adjusted automatically throughout recording. The color and brightness of the image may vary from that displayed before recording begins.

Tip

There is no need to keep the shutter button pressed during recording.

5 Press the shutter button halfway to end recording. Recording ends automatically when the movie reaches maximum length or memory is full.

Caution

The indicator lamp lights while movies are being recorded. Do not open the battery chamber during shooting or while the indicator lamp is lit. Failure to observe this precaution could prevent the movie from being played back.

Notes

- Vertical or horizontal streaks may appear in movies containing very bright subjects. This is normal and does not indicate a malfunction.
- The EVF/LCD MODE option in the setup menu is fixed at 30fps in movie mode.
### Viewing Movies

During playback (pg. 46), movies are displayed in the monitor as shown at right. The following operations can be performed while a movie is displayed:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start/pause playback</td>
<td>Press the selector down to start playback. Press again to pause.</td>
</tr>
<tr>
<td>End playback/delete</td>
<td>Press the selector up to end playback. If playback is not in progress, pressing the selector up will delete the current movie.</td>
</tr>
<tr>
<td>Advance/rewind</td>
<td>Press the selector right to advance, left to rewind. If playback is paused, the movie will advance or rewind one frame each time the selector is pressed.</td>
</tr>
<tr>
<td>Adjust volume</td>
<td>Press MENU/OK to pause playback and display volume controls. Press the selector up or down to adjust the volume; press MENU/OK again to set the volume.</td>
</tr>
</tbody>
</table>

Progress is shown in the monitor during playback.

Tip: Viewing Movies on a Computer
Copy movies to the computer before viewing.

Caution
Do not cover the speaker during playback.
Viewing Pictures on TV

1. Connect the camera to a TV and tune the television to the video channel to show pictures to a group. The supplied USB-A/V cable connects as shown below. Turn the camera off before connecting the cable.

- Connect yellow plug to video-in jack
- Connect white plug to audio-in jack
- Insert into USB-A/V cable connector

**HDMI (S2500HD/S2700HD series Only)**

An HDMI cable (available from third-party suppliers; pg. 101, 115) can be used to connect S2500HD/S2700HD-series cameras to High Definition (HD) devices (playback only). The USB cable can not be used while an HDMI cable is connected.

- Insert into HDMI connector
- Insert into HDMI connector
2 Press ♩ for about a second to turn the camera on. The camera monitor turns off and pictures and movies are played back on the TV. Note that the camera volume controls have no effect on sounds played on the TV; use the television volume controls to adjust the volume.

Notes
- Image quality drops during movie playback.
- An optional accessory is required to view HD movies recorded with S1600/S1700-series and S1800/S1900-series cameras on an HD device. Visit the following website for more information:

Caution
When connecting the cable, be sure the connectors are fully inserted.
Printing Pictures via USB

If the printer supports PictBridge, the camera can be connected directly to the printer and pictures can be printed without first being copied to a computer. Note that depending on the printer, not all the functions described below may be supported.

**Connecting the Camera**

1. Connect the supplied USB-A/V cable as shown and turn the printer on.

2. Press the button for about a second to turn the camera on. **USB** will be displayed in the monitor, followed by the PictBridge display shown below at right.

**Printing Selected Pictures**

1. Press the selector left or right to display a picture you wish to print.

2. Press the selector up or down to choose the number of copies (up to 99).

3. Repeat steps 1–2 to select additional pictures. Press **MENU/OK** to display a confirmation dialog when settings are complete.

4. Press **MENU/OK** to start printing.
Tip: Printing the Date of Recording
To print the date of recording on pictures, press DISP/BACK in steps 1–2 to display the PictBridge menu (see “Printing the DPOF Print Order,” below). Press the selector up or down to highlight PRINT WITH DATE and press MENU/OK to return to the PictBridge display (to print pictures without the date of recording, select PRINT WITHOUT DATE). To ensure that the date is correct, set the camera clock before taking pictures.

Note
If no pictures are selected when the MENU/OK button is pressed, the camera will print one copy of the current picture.

Printing the DPOF Print Order
To print the print order created with PRINT ORDER (DPOF) in the playback F-mode menu (pg. 82):

1 In the PictBridge display, press DISP/BACK to open the PictBridge menu.

2 Press the selector up or down to highlight PRINT DPOF.

3 Press MENU/OK to display a confirmation dialog.
4 Press **MENU/OK** to start printing.

**During Printing**
The message shown at right is displayed during printing. Press **DISP/BACK** to cancel before all pictures are printed (depending on the printer, printing may end before the current picture has printed).

If printing is interrupted, press † to turn the camera off and then on again.

**Disconnecting the Camera**
Confirm that “PRINTING” is not displayed in the monitor and turn the camera off. Disconnect the USB cable.

**Notes**
- Print pictures from internal memory or a memory card that has been formatted in the camera.
- If the printer does not support date printing, the PRINT WITH DATE option will not be available in the PictBridge menu and the date will not be printed on the pictures in the DPOF print order.
- When pictures are printed via direct USB connection, page size, print quality, and border selections are made using the printer.
Creating a DPOF Print Order

The PRINT ORDER (DPOF) option in the playback mode menu can be used to create a digital “print order” for PictBridge-compatible printers (pg. 57) or devices that support DPOF.

DPOF

DPOF (Digital Print Order Format) is standard that allows pictures to be printed from “print orders” stored in internal memory or on a memory card. The information in the order includes the pictures to be printed, date imprint, and the number of copies of each picture.

WITH DATE / WITHOUT DATE

To modify the DPOF print order, select PRINT ORDER (DPOF) in the playback mode menu and press the selector up or down to highlight WITH DATE or WITHOUT DATE.

WITH DATE: Print date of recording on pictures.
WITHOUT DATE: Print pictures without date.

Press MENU/OK and follow the steps below.

1 Press the selector left or right to display a picture you wish to include in or remove from the print order.
2 Press the selector up or down to choose the number of copies (up to 99). To remove a picture from the order, press the selector down until the number of copies is 0.

![Image of print order settings](image)

**Tip: Intelligent Face Detection**
If the current picture was created with Intelligent Face Detection, pressing sets the number of copies to the number of faces detected.

**Note**
When pictures are printed via direct USB connection, page size, print quality, and border selections are made using the printer.

3 Repeat steps 1–2 to complete the print order. Press **MENU/OK** to save the print order when settings are complete, or **DISP/BACK** to exit without changing the print order.

4 The total number of prints is displayed in the monitor. Press **MENU/OK** to exit.

The pictures in the current print order are indicated by a icon during playback.
Notes

• Remove the memory card to create or modify a print order for the pictures in internal memory.
• Print orders can contain a maximum of 999 pictures.
• If a memory card is inserted containing a print order created by another camera, the message shown at right will be displayed. Pressing MENU/OK cancels the print order; a new print order must be created as described above.

RESET ALL
To cancel the current print order, select RESET ALL in the PRINT ORDER (DPOF) menu. The confirmation shown at right will be displayed; press MENU/OK to remove all pictures from the order.
Viewing Pictures on a Computer

The supplied FinePixViewer software can be used to copy pictures to a computer, where they can be stored, viewed, organized, and printed. Before proceeding, install FinePixViewer as described below. Do not connect the camera to the computer until installation is complete.

Installing FinePixViewer

FinePixViewer is available in Windows and Macintosh versions. Installation instructions for Windows are on pages 63–64, those for the Macintosh on pages 65–66.

Installing FinePixViewer: Windows

1 Confirm that the computer meets the following system requirements:

<table>
<thead>
<tr>
<th>OS</th>
<th>Preinstalled versions of Windows Vista, Windows XP Home Edition (Service Pack 2), Windows XP Professional (Service Pack 2), or Windows 2000 Professional (Service Pack 4)</th>
</tr>
</thead>
</table>
| CPU           | • Windows Vista: 800 MHz Pentium 4 or better (3 GHz Pentium 4 or better recommended)  
|               | • Windows XP: 800 MHz Pentium 4 or better (2 GHz Pentium 4 or better recommended)  
|               | • Windows 2000: 200 MHz Pentium or better |
| RAM           | • Windows Vista: 512 MB or more (1 GB or more recommended)  
|               | • Windows XP: 512 MB or more  
|               | • Windows 2000: 128 MB or more |
| Free disk space | A minimum of 450 MB required for installation with 600 MB available when FinePixViewer is running (15 GB or more recommended under Windows Vista, 2 GB or more recommended under Windows XP) |
| Video         | 800 × 600 pixels or more with 16-bit color or better (1,024 × 768 pixels or more with 32-bit color recommended) |
| Other         | • Built-in USB port recommended. Operation is not guaranteed with other USB ports.  
|               | • Internet connection (56 kbps or faster recommended) required to use FinePix Internet Service; Internet connection and e-mail software required to use e-mail option. |

Caution

For information about Windows 7, visit http://www.fujifilm.com/support/download/camera/software/. Other versions of Windows are not supported. Operation is not guaranteed on home-built computers or computers that have been upgraded from earlier versions of Windows.
2 Start the computer. Log in to an account with administrator privileges before proceeding.

3 Exit any applications that may be running and insert the FinePix CD in a CD-ROM drive.

**Windows Vista**

If an AutoPlay dialog is displayed, click SETUP.exe. A “User Account Control” dialog will then be displayed; click Allow.

The installer will start automatically; click Installing FinePixViewer and follow the on-screen instructions to install FinePixViewer. Note that the Windows CD may be required during installation.

**If the Installer Does Not Start Automatically**

If the installer does not start automatically, select Computer or My Computer from the Start menu (Windows Vista/Windows XP) or double-click the My Computer icon on the desktop (Windows 2000), then double-click the FINEPIX CD icon to open the FINEPIX CD window and double-click SETUP or SETUP.exe.

4 If prompted to install Windows Media Player or DirectX, follow the on-screen instructions to complete installation.

5 When prompted, remove the FinePix CD from the CD-ROM drive and click Restart to restart the computer. Store the FinePix CD in a dry location out of direct sunlight in case you need to re-install the software. The version number is printed at the top of the CD label for reference when updating the software or contacting customer support.

Installation is now complete. Proceed to “Connecting the Camera” on page 67.
Installing FinePixViewer: Macintosh

1 Confirm that the computer meets the following system requirements:

<table>
<thead>
<tr>
<th>CPU</th>
<th>PowerPC or Intel</th>
</tr>
</thead>
<tbody>
<tr>
<td>OS</td>
<td>Pre-installed versions of Mac OS X version 10.3.9–10.5 (for the latest information, visit <a href="http://www.fujifilm.com/">http://www.fujifilm.com/</a>)</td>
</tr>
<tr>
<td>RAM</td>
<td>256 MB or more</td>
</tr>
<tr>
<td>Free disk space</td>
<td>A minimum of 200 MB required for installation with 400 MB available when FinePixViewer is running</td>
</tr>
<tr>
<td>Video</td>
<td>800 × 600 pixels or more with thousands of colors or better</td>
</tr>
</tbody>
</table>
| Other        | • Built-in USB port recommended. Operation is not guaranteed with other USB ports.  
                   • Internet connection (56 kbps or faster recommended) required to use FinePix Internet Service; Internet connection and e-mail software required to use e-mail option. |

2 After starting the computer and quitting any applications that may be running, insert the FinePix CD in a CD-ROM drive. Double-click the FinePix CD icon on the desktop and double-click Installer for Mac OS X.

3 An installer dialog will be displayed; click Installing FinePixViewer to start installation. Enter an administrator name and password when prompted and click OK, then follow the on-screen instructions to install FinePixViewer. Click Exit to quit the installer when installation is complete.
4 Remove the *FinePix* CD from the CD-ROM drive. Note that you may be unable to remove the CD if Safari is running; if necessary, quit Safari before removing the CD. Store the *FinePix* CD in a dry location out of direct sunlight in case you need to re-install the software. The version number is printed at the top of the CD label for reference when updating the software or contacting customer support.

5 Select **Applications** in the Finder **Go** menu to open the applications folder. Double-click the **Image Capture** icon and select **Preferences…** from the Image Capture application menu.

The Image Capture preferences dialog will be displayed. Choose **Other…** in the **When a camera is connected, open** menu, then select **FPVBridge** in the “Applications/FinePixViewer” folder and click **Open**.

Select **Quit Image Capture** from the Image Capture application menu. Installation is now complete. Proceed to “Connecting the Camera” on page 67.
Connecting the Camera

1. If the pictures you wish to copy are stored on a memory card, insert the card into the camera (pg. 11). If no card is inserted, pictures will be copied from internal memory.

   **Caution**
   Loss of power during transfer could result in loss of data or damage to internal memory or the memory card. Charge the battery before connecting the camera.

2. Turn the camera off and connect the supplied USB-A/V cable as shown, making sure the connectors are fully inserted. Connect the camera directly to the computer; do not use a USB hub or keyboard.

   ![Connection Diagram]

3. Press the play button for about a second to turn the camera on. FinePixViewer will start automatically and the “Save Image Wizard” will be displayed. Follow the on-screen instructions to copy pictures to the computer. To exit without copying pictures, click **Cancel**.

   **Caution**
   If FinePixViewer does not start automatically, the software may not be correctly installed. Disconnect the camera and reinstall the software.

For more information on using FinePixViewer, select **How to Use FinePixViewer** in the FinePixViewer Help menu.

**Note**
The camera will not turn off automatically while connected to a computer.
Cautions

• Use only memory cards that have been formatted in the camera and contain pictures taken with the camera. If a memory card containing a large number of images is inserted, there may be a delay before FinePixViewer starts and FinePixViewer may be unable to import or save images. Use a memory card reader to transfer pictures.
• Make sure the indicator lamp is out before turning the camera off or disconnecting the USB cable. Failure to observe this precaution could result in loss of data or damage to internal memory or the memory card.
• Disconnect the camera before inserting or removing memory cards.
• Use FinePixViewer to copy voice memos.
• In some cases, it may not be possible to access pictures saved to a network server using FinePixViewer in the same way as on a standalone computer.
• The user bears all applicable fees charged by the phone company or Internet service provider when using services that require an Internet connection.

Disconnecting the Camera

After confirming that the indicator lamp is out, follow the on-screen instructions to turn the camera off and disconnect the USB cable.

Updating FinePixViewer

The latest version of FinePixViewer can be downloaded from http://www.fujifilm.com/.

Uninstalling FinePixViewer

Only uninstall FinePixViewer before reinstalling the software or when it is no longer required. After quitting FinePixViewer and disconnecting the camera, drag the “FinePixViewer” folder from “Applications” into the Trash and select Empty Trash in the Finder menu (Macintosh), or open the control panel and use “Programs and Features” (Windows Vista) or “Add or Remove Programs” (other versions of Windows) to uninstall FinePixViewer, FinePixResource, and FinePixStudio. Under Windows, one or more confirmation dialogs may be displayed; read the contents carefully before clicking OK.
Using the Menus: Shooting Mode

The F-mode and shooting menus contain settings for a wide range of shooting conditions.

**Using the F-Mode Menu**

1. Press the F button to display the F-mode menu.

2. Press the selector up or down to highlight the desired menu item.

3. Press the selector right to display options for the highlighted item.

4. Press the selector up or down to highlight the desired option.

5. Press MENU/OK to select the highlighted option.
### F-Mode Menu Options

<table>
<thead>
<tr>
<th>Menu item</th>
<th>Description</th>
<th>Options</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO ISO</td>
<td>Adjust ISO sensitivity. Choose higher values when the subject is poorly lit.</td>
<td>AUTO / AUTO (400) / AUTO (800) / 64 / 100 / 200 / 400 / 800 / 1600 / 3200 (S) / 6400 (S)</td>
<td>AUTO</td>
</tr>
<tr>
<td>IMAGE QUALITY</td>
<td>Choose image quality (pg. 72).</td>
<td>F / N</td>
<td>N</td>
</tr>
<tr>
<td>FINEPIX COLOR</td>
<td>Shoot pictures in standard or saturated color or in black-and-white (pg. 72).</td>
<td>STD / CF / BF</td>
<td>STD</td>
</tr>
</tbody>
</table>

### ISO

Control the camera’s sensitivity to light. Higher values can be used to reduce blur when lighting is poor; note, however, that mottling may appear in pictures taken at high sensitivities. If AUTO, AUTO (800), or AUTO (400) is selected, the camera will adjust sensitivity automatically in response to shooting conditions. The maximum values that will be selected by the camera at settings of AUTO (800) and AUTO (400) are 800 and 400 respectively.

Settings other than AUTO are shown by an icon in the display.

**Note**

Sensitivity is not reset when the camera is turned off or another shooting mode is selected.
**IMAGE SIZE**

Choose the size and aspect ratio at which still pictures are recorded. Large pictures can be printed at large sizes with no drop in quality; small pictures require less memory, allowing more pictures to be recorded.

<table>
<thead>
<tr>
<th>Option</th>
<th>Prints at sizes up to</th>
</tr>
</thead>
<tbody>
<tr>
<td>L 4:3 (4,000 × 3,000)</td>
<td>34 × 25 cm (13.5 × 10 in.)</td>
</tr>
<tr>
<td>L 3:2 (4,000 × 2,664)</td>
<td>34 × 23 cm (13.5 × 9 in.)</td>
</tr>
<tr>
<td>L 16:9 (4,000 × 2,248)</td>
<td>34 × 19 cm (13.5 × 7.5 in.)</td>
</tr>
<tr>
<td>M 4:3 (2,816 × 2,112)</td>
<td>24 × 18 cm (9.5 × 7 in.)</td>
</tr>
<tr>
<td>M 3:2 (2,816 × 1,864)</td>
<td>24 × 16 cm (9.5 × 6 in.)</td>
</tr>
<tr>
<td>M 16:9 (2,816 × 1,584)</td>
<td>24 × 13 cm (9.5 × 5.5 in.)</td>
</tr>
<tr>
<td>S 4:3 (2,048 × 1,536)</td>
<td>17 × 13 cm (7 × 5 in.)</td>
</tr>
<tr>
<td>S 3:2 (2,048 × 1,360)</td>
<td>17 × 12 cm (7 × 4.5 in.)</td>
</tr>
<tr>
<td>S 16:9 (1,920 × 1,080)</td>
<td>16 × 9 cm (6.5 × 3.5 in.)</td>
</tr>
</tbody>
</table>

The number of pictures that can be taken at the selected setting is shown at the bottom of the display (pg. 116).

**Aspect Ratio**

Pictures with an aspect ratio of 4:3 have the same proportions as the camera display. Pictures with an aspect ratio of 3:2 have the same proportions as a frame of 35-mm film, while an aspect ratio of 16:9 is suited to display on High Definition (HD) devices.

**Note**

Image size is not reset when the camera is turned off or another shooting mode is selected.
**IMAGE QUALITY**
Choose how much image files are compressed. Select **FINE** (low compression) for higher image quality, **NORMAL** (high compression) to increase the number of pictures that can be stored.

**FINEPIX COLOR**
Enhance contrast and color saturation or take pictures in black and white.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>F-STANDARD</td>
<td>Standard contrast and saturation. Recommended in most situations.</td>
</tr>
<tr>
<td>F-CHROME</td>
<td>Vivid contrast and color. Choose for vivid shots of flowers or enhanced greens and blues in landscapes.</td>
</tr>
<tr>
<td>F-B&amp;W</td>
<td>Take pictures in black and white.</td>
</tr>
</tbody>
</table>

Settings other than **F-STANDARD** are shown by an icon in the display.

**Notes**
- **FINEPIX COLOR** is not reset when the camera is turned off or another shooting mode is selected.
- The effects of **F-CHROME** vary from scene to scene and may be difficult to discern with some subjects. Depending on the subject, the effects of **F-CHROME** may not be visible in the display.
Using the Shooting Menu

1. Press **MENU/OK** to display the shooting menu.

2. Press the selector up or down to highlight the desired menu item.

3. Press the selector right to display options for the highlighted item.

4. Press the selector up or down to highlight the desired option.

5. Press **MENU/OK** to select the highlighted option.

<td>Perform basic camera setup such as choosing a language and setting the time and date (pg. 93).</td>
<td>K / 1 / 2 / 3</td>
<td>—</td>
</tr>
</tbody>
</table>
**SELF-TIMER**

Choose the duration for the self-timer. The self-timer is available in all shooting modes.

- **10 SEC**: Choose for self-portraits or for group portraits that include the photographer.
- **2 SEC**: Choose to avoid blur caused by the camera moving when the shutter button is pressed.
- **OFF**: Self-timer off.

To use the self-timer, choose **10 SEC** or **2 SEC** from the self-timer menu and follow the steps below.

1. **Focus.**
   - Press the shutter button halfway to focus.
   
   **Caution**
   
   Stand behind the camera when using the shutter button. Standing in front of the lens can interfere with focus and exposure.

2. **Start the timer.**
   - Press the shutter button the rest of the way down to start the timer. The display shows the number of seconds remaining until the shutter is released. To stop the timer before the picture is taken, press **DISP/BACK**.

   The self-timer lamp on the front of the camera will blink immediately before the picture is taken. If the two-second timer is selected, the self-timer lamp will blink as the timer counts down.
Intelligent Face Detection

Because it ensures that the faces of portrait subjects will be in focus, Intelligent Face Detection (pg. 22) is recommended when using the self-timer for group portraits or self-portraits. To use the self-timer with Intelligent Face Detection, select **10 SEC** or **2 SEC** in the self-timer menu and then press the shutter button all the way down to start the timer. The camera will detect faces while the timer is counting down and adjust focus and exposure immediately before the shutter is released. Be careful not to move until the picture has been recorded.

**Note**

The self-timer turns off automatically when the picture is taken, a different shooting mode is selected, playback mode is selected, or the camera is turned off.

PHOTOMETRY

Choose how the camera meters exposure when Intelligent Face Detection is off.

- **MULTI**: Automatic scene recognition is used to adjust exposure for a wide range of shooting conditions.
- **SPOT**: The camera meters lighting conditions at the center of the frame. Recommended when the background is much brighter or darker than the main subject. Can be used with focus lock (pg. 24) to meter off-center subjects.
- **AVERAGE**: Exposure is set to the average for the entire frame. Provides consistent exposure across multiple shots with the same lighting, and is particularly effective for landscapes and portraits of subjects dressed in black or white.
**WB WHITE BALANCE**

For natural colors, choose a setting that matches the light source (for an explanation of “white balance,” see the Glossary on page 115).

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>White balance adjusted automatically.</td>
</tr>
<tr>
<td>h</td>
<td>Measure a value for white balance.</td>
</tr>
<tr>
<td>✂️</td>
<td>For subjects in direct sunlight.</td>
</tr>
<tr>
<td>◆</td>
<td>For subjects in the shade.</td>
</tr>
<tr>
<td>⚫️</td>
<td>Use under “daylight” fluorescent lights.</td>
</tr>
<tr>
<td>⚫️️</td>
<td>Use under “warm white” fluorescent lights.</td>
</tr>
<tr>
<td>⚫️️️</td>
<td>Use under “cool white” fluorescent lights.</td>
</tr>
<tr>
<td>🕯️</td>
<td>Use under incandescent lighting.</td>
</tr>
</tbody>
</table>

If **AUTO** does not produce the desired results (for example, when taking close-ups), select **h** and measure a value for white balance or choose the option that matches the light source.

**Notes**

- At settings other than **h**, auto white balance is used with the flash. Lower the flash (pg. 27) to take pictures at other settings.
- Results vary with shooting conditions. Play pictures back after shooting to check colors in the monitor.

**Tip**

To give a deliberate color cast to your photographs, measure a value for custom white balance using a colored instead of a white object.

### Custom White Balance

Choose **h** to adjust white balance for unusual lighting conditions. The options at right will be displayed; frame a white object so that it fills the monitor and press the shutter button all the way down to measure white balance.

If “COMPLETED!” is displayed, press **MENU/OK** to set white balance to the measured value. This value can be reselected by pressing **MENU/OK** when custom white balance options are displayed.

If “UNDER” is displayed, raise exposure compensation (pg. 33) and try again.

If “OVER” is displayed, lower exposure compensation and try again.
HIGH-SPEED SHOOTING
Selecting ON reduces focusing time, ensuring a quick shutter response.

Notes
• Choosing ON increases the drain on the battery. Choose OFF to save battery power.
• The EVF/LCD MODE option in the setup menu is automatically set to 60 fps when high-speed shooting is on (pg. 94).

FOCUSING
Choose how the camera focuses.
• CONTINUOUS AF: The camera continually adjusts focus to reflect changes in the distance to the subject even when the shutter button is not pressed (note that this increases the drain on the battery). Intelligent Face Detection turns off automatically and AF MODE is fixed at CENTER. Choose for moving subjects.
• SINGLE AF: Focus locks while the shutter button is pressed halfway. Choose for stationary subjects.
AF AF MODE
This option controls how the camera selects the focus area when Intelligent Face Detection is off (pg. 21). Regardless of the option selected, the camera will focus on the subject in the center of the monitor when macro mode is on (pg. 26).

• CENTER: The camera focuses on the subject in the center of the frame. This option can be used with focus lock.

• MULTI: When the shutter button is pressed halfway, the camera detects high-contrast subjects near the center of the frame and selects the focus area automatically (if the focus frame is not displayed, select CENTER and use focus lock; pg. 24).

• AREA: The focus position can be chosen manually by pressing the selector up, down, left, or right and pressing MENU/OK when the focus brackets are in the desired position. Choose for precise focus when the camera is mounted on a tripod. Note that exposure is set for the subject in the center of the frame; to meter an off-center subject, use AF/AE lock (pg. 24).

• TRACKING: Position the subject in the center focus area and press the shutter button halfway to focus. Keep the shutter button pressed to track the subject as it moves through the frame. Choose for erratically moving subjects.
**SHARPNESS**
Choose whether to sharpen or soften outlines.

- **HARD**: Use for sharp outlines when photographing such subjects as buildings and text.
- **STANDARD**: Standard sharpness. Best choice in most situations.
- **SOFT**: Use for soft outlines in portraits and similar subjects.

**FLASH**
Adjust flash brightness. Choose from values between $+\frac{2}{3}$ EV and $-\frac{2}{3}$ EV. The default setting is ±0. Note that the desired results may not be achieved depending on shooting conditions and the distance to the subject.

**BRACKETING**
Choose the size of the exposure bracketing increment used when (bracketing) is selected in continuous shooting mode (pg. 29). Choose from increments of $\pm\frac{1}{3}$ EV, $\pm\frac{2}{3}$ EV, and $\pm$ 1 EV (for an explanation of the term “EV,” see the Glossary on page 115).
Using the Menus: Playback Mode

The $F$-mode and playback menus are used to manage the pictures in internal memory or on the memory card.

**Using the $F$-Mode Menu**

1. Press the $\rightarrow$ button to enter playback mode.

2. Press the $F$ button to display the $F$-mode menu.

3. Press the selector up or down to highlight the desired menu item.

4. Press the selector right to display options for the highlighted item.

5. Press the selector up or down to highlight the desired option.

6. Press **MENU/OK** to select the highlighted option.
Using the Menus: Playback Mode

F-Mode Menu Options

</tr>
</tbody>
</table>

### RED EYE REMOVAL

If the current picture is marked with a 🐜 icon to indicate that it was taken with Intelligent Face Detection, this option can be used to remove red-eye. The camera will analyze the image; if red-eye is detected, the image will be processed to create a copy with reduced red-eye.

#### Notes

- Red eye may not be removed if the camera is unable to detect a face or the face is in profile. Results may differ depending on the scene. Red eye can not be removed from pictures that have already been processed using red-eye removal or pictures created with other devices.
- The amount of time needed to process the image varies with the number of faces detected.
- Copies created with 🐜 RED EYE REMOVAL are indicated by a 🐜 icon during playback.
2 IMAGE ROTATE
By default, pictures taken in tall orientation are displayed in wide orientation. Use this option to display pictures in the correct orientation in the monitor. It has no effect on pictures displayed on a computer or other device.

Notes
- Protected pictures can not be rotated. Remove protection before rotating pictures (pg. 86).
- The camera may not be able to rotate pictures created with other devices.

To rotate a picture, play the picture back and select 2 IMAGE ROTATE in the playback menu (pg. 83).

1 Press the selector down to rotate the picture 90° clockwise, up to rotate the picture 90° counterclockwise.

2 Press MENU/OK to confirm the operation (to exit without rotating the picture, press DISP/BACK).

The next time the picture is played back, it will automatically be rotated.
**PROTECT**

Protect pictures from accidental deletion. The following options are available.

**FRAME**

Protect selected pictures.

1. Press the selector left or right to display the desired picture.

   ![Picture not protected](image1) ![Protected picture](image2)

2. Press **MENU/OK** to protect the picture. If the picture is already protected, pressing **MENU/OK** will remove protection from the image.

3. Repeat steps 1–2 to protect additional images. Press **DISP/BACK** to exit when the operation is complete.

**SET ALL**

Press **MENU/OK** to protect all pictures, or press **DISP/BACK** to exit without changing picture status.

**RESET ALL**

Press **MENU/OK** to remove protection from all pictures, or press **DISP/BACK** to exit without changing picture status.

If the number of pictures affected is very large, the display at right will appear in the monitor while the operation is in progress. Press **DISP/BACK** to exit before the operation is complete.

**Caution**

Protected pictures will be deleted when the memory card or internal memory is formatted (pg. 98).
COPY

Copy pictures between internal memory and a memory card.

1 Press the selector up or down to highlight INTERNAL MEMORY → SD CARD (copy pictures from internal memory to the memory card) or SD CARD → INTERNAL MEMORY (copy pictures from a memory card to internal memory).

2 Press the selector right to display options for the highlighted item.

3 Press the selector up or down to highlight FRAME or ALL FRAMES.

4 Press MENU/OK.

Tip: Copying Pictures Between Memory Cards
To copy pictures between two memory cards, insert the source card and copy the pictures to internal memory, then remove the source card, insert the destination card, and copy the pictures from internal memory.
■ FRAME
Copy selected frames.

1 Press the selector left or right to display the desired picture.

2 Press MENU/OK to copy the picture.

3 Repeat steps 1–2 to copy additional images. Press DISP/BACK to exit when the operation is complete.

■ ALL FRAMES
Press MENU/OK to copy all pictures, or press DISP/BACK to exit without copying pictures.

⚠️ Cautions
• Copying ends when the destination is full.
• DPOF print information is not copied (pg. 58).
VOICE MEMO
To add a voice memo to a still picture, select VOICE MEMO after displaying the picture in playback mode.

Note
Voice memos can not be added to movies or protected pictures. Remove protection from pictures before recording voice memos (pg. 86).

1 Hold the camera at a distance of about 20 cm (8 in.) and face the microphone.

2 Press MENU/OK to start recording.

3 Press MENU/OK again to end recording. Recording ends automatically after 30 seconds.

Notes
• If a voice memo already exists for the current picture, the options at right will be displayed. Select RE-REC to replace the existing memo.
• Voice memos are recorded as PCM-format WAV files (pg. 115).
Playing Voice Memos
Pictures with voice memos are indicated by a ♦ icon during playback. To play the voice memo, press the selector down. To pause, press the selector down again; to end playback, press the selector up. Press the selector left to rewind, right to fast forward. Volume controls can be displayed by pressing the MENU/OK button; press the selector up or down to adjust the volume, and press MENU/OK again to resume playback.

Note
The camera may not play voice memos recorded with other devices.

Caution
Do not cover the speaker during playback.
**CROP**

To create a cropped copy of a picture, play the picture back and select **CROP** in the playback menu (pg. 83).

1. Use the zoom control to zoom in and out and use the selector to scroll the picture until the desired portion is displayed (to exit to single-frame playback without creating a cropped copy, press **DISP/BACK**).

   **Zoom indicator**

If the size of the final copy will be **S**, **YES** will be displayed in yellow.

**Tip: Intelligent Face Detection**

If the picture was shot with Intelligent Face Detection (pg. 21), **W** will be displayed in the monitor. Press the **W** button to zoom in on the selected face.

2. Press **MENU/OK**. A confirmation dialog will be displayed.

   **Copy size is shown at the top of the display. Larger crops produce larger copies; all copies have an aspect ratio of 4:3.**

3. Press **MENU/OK** to save the cropped copy to a separate file.

**Note**

Pictures taken with other cameras can not be cropped.
RESIZE
To create a small copy of a picture, play the picture back and select RESIZE in the playback menu (pg. 83).

1 Press the selector up or down to highlight STANDARD or SMALL.

2 Press MENU/OK to select the highlighted option.

3 Press MENU/OK to copy the picture at the selected size.
**The Setup Menu**

**Using the Setup Menu**

1. Display the setup menu.
   1.1 Press **MENU/OK** to display the menu for the current mode.
   1.2 Press the selector up or down to highlight **SET-UP**.
   1.3 Press the selector right to display the setup menu.

2. Choose a page.
   2.1 Press the selector left or right to choose a page.
   2.2 Press the selector down to enter the menu.

3. Adjust settings.
   3.1 Press the selector up or down to highlight a menu item.
   3.2 Press the selector right to display options for the highlighted item.
   3.3 Press the selector up or down to highlight an option.
   3.4 Press **MENU/OK** to select the highlighted option.

**IMAGE DISP.**

Choose an option other than OFF to display pictures in the monitor after shooting. Pictures can be displayed for 1.5 s (1.5 SEC), 3 s (3 SEC), or until the MENU/OK button is pressed (CONTINUOUS and ZOOM (CONTINUOUS)). If CONTINUOUS is selected, the button can be used to check exposure (pg. 48). If ZOOM (CONTINUOUS) is selected, photos can be zoomed in to check focus and other fine details (see page 47). Note that ZOOM (CONTINUOUS) is disabled in continuous shooting mode (pg. 29), and that the colors displayed at settings of 1.5 SEC and 3 SEC may differ from those in the final picture.

**Note**

Pictures taken at continuous shooting modes of , , and are always displayed after shooting. Pictures taken in other continuous shooting modes are recorded without being displayed.

**Blink Detection (pg. 23)**

At settings other than OFF, a warning will be displayed if the camera detects subjects who may have blinked when the picture was taken. If ZOOM (CONTINUOUS) is selected, you can view these subjects using zoom.
**FRAME NO.**

New pictures are stored in image files named using a four-digit file number assigned by adding one to the last file number used. The file number is displayed during playback as shown at right. **FRAME NO.** controls whether file numbering is reset to 0001 when a new memory card is inserted or the current memory card or internal memory is formatted.

- **CONTINUOUS**: Numbering continues from the last file number used or the first available file number, whichever is higher. Choose this option to reduce the number of pictures with duplicate file names.
- **RENEW**: Numbering is reset to 0001 after formatting or when a new memory card is inserted.

**Notes**

- If the frame number reaches 999-9999, the shutter release will be disabled (pg. 113).
- Selecting **RESET** (pg. 95) resets **FRAME NO.** to **CONTINUOUS** but does not reset frame numbering.
- Frame numbers for pictures taken with other cameras may differ.
**DIGITAL ZOOM**

If **ON** is selected, selecting **T** at the maximum optical zoom position will trigger digital zoom, further magnifying the image. To cancel digital zoom, zoom out to the minimum digital zoom position and select **W**.

- **Zoom indicator**
  - **DIGITAL ZOOM off**
  - **DIGITAL ZOOM on**

**Optical zoom**

**Digital zoom**

**Caution**

Digital zoom produces lower quality images than optical zoom.

**PLAYBACK VOLUME**

Press the selector up or down to choose volume for movie and voice memo playback and press **MENU/OK** to select.

**LCD BRIGHTNESS**

Press the selector up or down to choose display brightness and press **MENU/OK** to select.
**FORMAT**
Format internal memory or a memory card. If a memory card is inserted in the camera, SD will be displayed in the dialog shown at right and this option will format the memory card. If no memory card is inserted, IN will be displayed and this option will format internal memory. Press the selector left to highlight OK and press MENU/OK to begin formatting.

**Cautions**
- All data—including protected pictures—will be deleted. Be sure important files have been copied to a computer or other storage device.
- Do not open the battery cover during formatting.

**AUTO POWER OFF**
Choose the length of time before the camera turns off automatically when no operations are performed. Shorter times increase battery life; if OFF is selected, the camera must be turned off manually. Note that regardless of the option selected, the camera will not turn off automatically when connected to a printer (pg. 57) or computer (pg. 67) or when a slide show is in progress (pg. 82).

**Tip: Reactivating the Camera**
To reactivate the camera after it has turned off automatically, use the ON/OFF switch or press the button for about a second (pg. 13).
**TIME DIFFERENCE**

When travelling, use this option to switch the camera clock instantly from your home time zone to the local time at your destination.

1 Specify the difference between local time and your home time zone.
   1.1 Press the selector up or down to highlight → LOCAL.
   1.2 Press the selector right to display the time difference.
   1.3 Press the selector left or right to highlight +, −, hours, or minutes; press up or down to edit. The minimum increment is 15 minutes.
   1.4 Press **MENU/OK** when settings are complete.

2 Switch between local time and your home time zone.
   To set the camera clock to local time, highlight → LOCAL and press **MENU/OK**. To set the clock to the time in your home time zone, select ␣ HOME. If → LOCAL is selected, ← will be displayed in the monitor for three seconds after the camera enters shooting mode, and the date will be displayed in yellow.

After changing time zones, check that the date and time are correct.
DISCHARGE (Ni-MH Batteries Only)
The capacity of rechargeable Ni-MH batteries may be temporarily reduced when new, after long periods of disuse, or if they are repeatedly recharged before being fully discharged. Capacity can be increased by repeatedly discharging the batteries using the DISCHARGE option and recharging them in a battery charger (sold separately). Do not use DISCHARGE with non-rechargeable batteries, and note that the batteries will not discharge if the camera is powered by an optional AC adapter and DC coupler.

1. Selecting DISCHARGE displays the message shown above. Press MENU/OK.

2. Press the selector left or right to highlight OK.

3. Press MENU/OK to begin discharging the batteries. When the batteries are fully discharged, the battery level indicator will blink red and the camera will turn off. To cancel the process before the batteries are fully discharged, press DISP/BACK.
Optional Accessories

The camera supports a wide range of accessories from FUJIFILM and other manufacturers.

**Audio/Visual**

- **Standard TV** (available from third-party suppliers)
  - USB-A/V cable
- **HDTV** (available from third-party suppliers)
  - HDMI cable (S2500HD/S2700HD series only)

**Computer Related**

- **Computer (available from third-party suppliers)**
  - USB-A/V cable

**Printing**

- **PictBridge-compatible printer** (available from third-party suppliers)
- **Printer** (available from third-party suppliers)
  - USB-A/V cable
  - SD card slot or card reader
  - SD/SDHC memory card

**FINEPIX**

- S2500HD/S2700HD series
- S1800/S1900 series
- S1600/S1700 series
## Accessories from FUJIFILM

The following optional accessories are available from FUJIFILM. For the latest information on the accessories available in your region, check with your local FUJIFILM representative or visit [http://www.fujifilm.com/products/digital_cameras/index.html](http://www.fujifilm.com/products/digital_cameras/index.html).

</table>
Caring for the Camera

To ensure continued enjoyment of the product, observe the following precautions.

Storage and Use
If the camera will not be used for an extended period, remove the battery and memory card. Do not store or use the camera in locations that are:
- exposed to rain, steam, or smoke
- very humid or extremely dusty
- exposed to direct sunlight or very high temperatures, such as in a closed vehicle on a sunny day
- extremely cold
- subject to strong vibration
- exposed to strong magnetic fields, such as near a broadcasting antenna, power line, radar emitter, motor, transformer, or magnet
- in contact with volatile chemicals such as pesticides
- next to rubber or vinyl products

■ Water and Sand
Exposure to water and sand can also damage the camera and its internal circuitry and mechanisms. When using the camera at the beach or seaside, avoid exposing the camera to water or sand. Do not place the camera on a wet surface.

■ Condensation
Sudden increases in temperature, such as occur when entering a heated building on a cold day, can cause condensation inside the camera. If this occurs, turn the camera off and wait an hour before turning it on again. If condensation forms on the memory card, remove the card and wait for the condensation to dissipate.

Cleaning
Use a blower to remove dust from the lens and monitor, then gently wipe with a soft, dry cloth. Any remaining stains can be removed by wiping gently with a piece of FUJIFILM lens-cleaning paper to which a small amount of lens-cleaning fluid has been applied. Care should be taken to avoid scratching the lens or monitor. The camera body can be cleaned with a soft, dry cloth. Do not use alcohol, thinner, or other volatile chemicals.

Traveling
Keep the camera in your carry-on baggage. Checked baggage may suffer violent shocks that could damage the camera.

</tbody>
</table>
**Glossary**

**Digital zoom**: Unlike optical zoom, digital zoom does not increase the amount of visible detail. Instead, details visible using optical zoom are simply enlarged, producing a slightly “grainy” image.

**DPOF (Digital Print Order Format)**: A standard that allows pictures to be printed from “print orders” stored in internal memory or on a memory card. The information in the order includes the pictures to be printed and the number of copies of each picture.

**EV (Exposure Value)**: The exposure value is determined by the sensitivity of the image sensor and the amount of light that enters the camera while the image sensor is exposed. Each time the amount of light doubles, EV increases by one; each time the amount of light is halved, EV decreases by one. The amount of light entering the camera can be controlled by adjusting aperture and shutter speed.

**Exif Print**: A standard for storing information with pictures for optimal color reproduction during printing.

**HDMI (High-Definition Multimedia Interface)**: An interface standard for the transmission of images and sound that adds audio input to the DVI interface used to connect computers to displays.

**JPEG (Joint Photographic Experts Group)**: A compressed file format for color images. The higher the compression rate, the greater the loss of information and more noticeable drop in quality when the picture is displayed.

**Motion JPEG**: An AVI (Audio Video Interleave) format that stores sound and JPEG images in a single file. Motion JPEG files can be played in Windows Media Player (requires DirectX 8.0 or later) or QuickTime 3.0 or later.

**Smear**: A phenomenon specific to CCDs which causes white streaks to appear when very bright light sources, such as the sun or reflected sunlight, appear in the frame.

**WAV (Waveform Audio Format)**: A standard Windows audio file format. WAV files have the extension “*.WAV” and may be compressed or uncompressed. The camera uses uncompressed WAV. WAV files can be played using Windows Media Player or QuickTime 3.0 or later.

**White balance**: The human brain automatically adapts to changes in the color of light, with the result that objects that appear white under one light source still appear white when the color of the light source changes. Digital cameras can mimic this adjustment by processing images according to the color of the light source. This process is known as “white balance.”
Internal Memory/Memory Card Capacity

The following table shows the recording time or number of pictures available at different image qualities. All figures are approximate; file size varies with the scene recorded, producing wide variations in the number of files that can be stored. The number of exposures or length remaining may not diminish at an even rate.

CIPA standard, measured in (auto) mode using batteries supplied with camera (alkaline batteries only) and SD memory card.

**Note:** Number of shots that can be taken with battery varies with battery charge level and will decline at low temperatures.

### Camera dimensions

110.2 mm × 73.4 mm × 81.4 mm / 4.3 in. × 2.9 in. × 3.2 in. (W × H × D), excluding projections

### Camera weight

Approx. 337 g / 11.9 oz., excluding batteries, accessories, and memory cards

### Shooting weight

Approx. 432 g / 15.2 oz., including batteries and memory card

### Operating conditions

- **Temperature:** 0°C – +40°C / +32°F – +104°F
- **Humidity:** 80% or less (no condensation)
Color Television Systems

NTSC (National Television System Committee) is a color television telecasting specification adopted mainly in the U.S.A., Canada, and Japan. PAL (Phase Alternation by Line) is a color television system adopted mainly in European countries and China.

Notices

• Specifications subject to change without notice. FUJIFILM shall not be held liable for damages resulting from errors in this manual.
• Although the monitor is manufactured using advanced high-precision technology, small bright points and anomalous colors (particularly in the vicinity of text) may appear. This is normal for this type of monitor and does not indicate a malfunction; images recorded with the camera are unaffected.
• Digital cameras may malfunction when exposed to strong radio interference (e.g., electric fields, static electricity, or line noise).
• Due to the type of lens used, some distortion may occur at the periphery of images. This is normal.
