## For Your Safety

### Be sure to read this notes before using

**Safety Notes**

- Make sure that you use your camera correctly. Read these Safety Notes and your Owner's Manual carefully before use.
- After reading these Safety Notes, store them in a safe place.

### About the Icons

The icons shown below are used in this document to indicate the severity of the injury or damage that can result if the information indicated by the icon is ignored and the product is used incorrectly as a result.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="warning_icon.png" alt="WARNING" /></td>
<td>This icon indicates that death or serious injury can result if the information is ignored.</td>
</tr>
<tr>
<td><img src="caution_icon.png" alt="CAUTION" /></td>
<td>This icon indicates that personal injury or material damage can result if the information is ignored.</td>
</tr>
</tbody>
</table>

The icons shown below are used to indicate the nature of the information which is to be observed.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>

<tr>
<td><img src="warning_icon.png" alt="WARNING" /></td>
<td>Filled circles with an exclamation mark tell you an action that must be performed (&quot;Required&quot;).</td>
</tr>
</tbody>
</table>

### WARNING

- **Do not allow water or foreign objects to enter the camera.**
  - If water or foreign objects get inside the camera, turn the camera off, remove the battery and disconnect and unplug the AC power adapter.
  - Continued use of the camera can cause a fire or electric shock.
  - **Contact your FUJIFILM dealer.**

- **Do not use the camera in the bathroom or shower.**
  - This can cause a fire or electric shock.

- **Never attempt to disassemble or modify (never open the case).**
  - Failure to observe this precaution can cause fire or electric shock.

- **Should the case break open as the result of a fall or other accident, do not touch the exposed parts.**
  - Failure to observe this precaution could result in electric shock or in injury from touching the damaged parts.
  - Remove the battery immediately, taking care to avoid injury or electric shock, and take the product to the point of purchase for consultation.

- **Do not change, heat or unduly twist or pull the connection cord and do not place heavy objects on the connection cord.**
  - These actions could damage the cord and cause a fire or electric shock.
  - **If the cord is damaged, contact your FUJIFILM dealer.**

- **Do not place the camera on an unstable surface.**
  - This can cause the camera to fall or tip over and cause injury.

- **Never attempt to take pictures while in motion.**
  - Do not use the camera while you are walking or driving a vehicle. This can result in you falling down or being involved in a traffic accident.

- **Do not touch any metal parts of the camera during a thunderstorm.**
  - This can cause an electric shock due to induced current from the lightning discharge.

- **Do not use the battery except as specified.**
  - Load the battery as aligned with the indicator.

- **Unplug from power socket.**
  - Continued use of the camera when it is emitting smoke, is emitting any unusual odor, or is in any other abnormal state can cause a fire or electric shock.
  - **Contact your FUJIFILM dealer.**
### WARNING

- **Do not heat, change or take apart the battery.** Do not drop or subject the battery to impacts. Do not store the battery with metallic products. Do not use chargers other than the specified model to charge the battery.
- Any of these actions can cause the battery to burst or leak and cause fire or injury as a result.

- **Use only the battery or AC power adapters specified for use with this camera.** Do not use voltages other than the power supply voltage shown.
- The use of other power sources can cause a fire.

- **If the battery leaks and fluid gets in contact with your eyes, skin or clothing.** Flush the affected area with clean water and seek medical attention or call an emergency number right away.

- **Do not use the charger to charge batteries other than those specified here.** The supplied battery charger is for use only with the type of battery supplied with the camera. Using the charger to charge conventional batteries or other types of rechargeable batteries can cause the battery to leak fluid, overheat or burst.

- **Danger of explosion if battery is incorrectly replaced. Replace only with the same.**

- **Do not use in the presence of flammable objects, explosive gases, or dust.**

- **When carrying the battery, install it in a digital camera or keep it in the hard case.** When storing the battery, keep it in the hard case. When discarding, cover the battery terminals with insulation tape.
- Contact with other metallic objects or battery could cause the battery to ignite or burst.

- **Keep Memory Cards out of the reach of small children.** Because Memory Cards are small, they can be swallowed by children. Be sure to store Memory Cards out of the reach of small children. If a child swallows a Memory Card, seek medical attention or call an emergency number.

### CAUTION

- **Do not leave this camera in places subject to extremely high temperatures.** Do not leave the camera in locations such as a sealed vehicle or in direct sunlight. This can cause a fire.

- **Keep out of the reach of small children.** This product could cause injury in the hands of a child.

- **Do not place heavy objects on the camera.** This can cause the heavy object to tip over or fall and cause injury.

- **Do not move the camera while the AC power adapter is still connected.** Do not pull on the connection cord to disconnect the AC power adapter.
- This can damage the power cord or cables and cause a fire or electric shock.

- **Do not use the AC power adapter when the plug is damaged or the plug socket connection is loose.**
- This could cause a fire or electric shock.

- **Do not cover or wrap the camera or the AC power adapter in a cloth or blanket.** This can cause heat to build up and distort the casing or cause a fire.

- **When you are cleaning the camera or you do not plan to use the camera for an extended period, remove the battery and disconnect and unplug the AC power adapter.** Failure to do so can cause a fire or electric shock.

- **When charging ends, unplug the charger from the power socket.**
- Leaving the charger plugged into the power socket can cause a fire.

- **Using a flash too close to a person’s eyes may temporarily affect the eyesight.**
- Take particular care when photographing infants and young children.

- **When a memory card is removed, the card could come out of the slot too quickly.** Use your finger to hold it and gently release the card.
- Injury could result to those struck by the ejected card.

- **Request regular internal testing and cleaning for your camera.**
- Build-up of dust in your camera can cause a fire or electric shock.
  - Contact your FUJIFILM dealer to request internal cleaning every 2 years.
  - Please note this is not a free of charge service.

- **Remove your fingers from the flash window before the flash fires.** Failure to observe this precaution could result in burns.

- **Keep the flash window clean and do not use the flash if the window is obstructed.**
- Failure to observe these precautions could cause smoke or discoloration.
For Your Safety

Power Supply and Battery
* Confirm your battery type before reading the following descriptions.

The following explains proper use of batteries and how to prolong their life. Incorrect use of batteries can cause shorter battery life, as well as leakage, excessive heat, fire or explosion.

1 Camera uses the Rechargeable Lithium-ion Battery
* When shipped, the battery is not fully charged. Always charge the battery before using it.
* When carrying the battery, install it in a digital camera or keep it in the soft case.

Battery Features
- The battery gradually loses its charge even when not used. Use a battery that has been charged recently (in the last day or two) to take pictures.
- To maximize the life of the battery, turn the camera off as quickly as possible when it is not being used.
- The number of available frames will be lower in cold locations or at low temperatures. Take along a spare fully charged battery. You can also increase the amount of power produced by putting the battery in your pocket or another warm place to heat it and then loading it into the camera just before you take a picture.
- If you are using a heating pad, take care not to place the battery directly against the pad. The camera may not operate if you use a depleted battery in cold conditions.

Charging the Battery
- Charging times will increase at ambient temperatures below +10°C (+50°F) or above +35°C (+95°F). Do not attempt to charge the battery at temperatures above 40°C (+104°F); at temperatures below 0°C (+32°F), the battery will not charge.
- The Rechargeable Lithium-ion Battery does not need to be fully discharged or exhausted flat before being charged.
- The battery may feel warm after it has been charged or immediately after being used. This is perfectly normal.
- Do not recharge a fully charged battery.

Battery Life
At normal temperatures, the battery can be used at least 300 times. If the time for which the battery provides power shortens markedly, this indicates that the battery has reached the end of its effective life and should be replaced.

Notes on storage
- If a battery is stored for long periods while charged, the performance of the battery can be impaired. If the battery will not be used for some time, run the battery out before storing it.
- If you do not intend to use the camera for a long period of time, remove the battery from the camera.
- Store the battery in a cool place.
- The battery should be stored in a dry location with an ambient temperature between +15°C and +25°C (+59°F and +77°F).
- Do not leave the battery in hot or extremely cold places.

Battery Features
- Do not store batteries in hot places. Also, if you use the battery for a long period, the camera body and the battery itself will become warm. This is normal. Use the AC power adapter if you are taking pictures or viewing images for a long period of time.

Camera uses AA Alkaline, Rechargeable Ni-MH (nickel-metal hydride) or AA lithium batteries
* For details on the batteries that you can use, refer to the Owner’s Manual of your camera.

Cautions for Using Battery
- Do not heat the batteries or throw them into a fire.
- Do not carry or store batteries with metal objects such as necklaces or hairpins.
- Do not expose the batteries to water, and keep batteries from getting wet or stored in moist locations.
- Do not attempt to take apart or change the batteries, including battery casings.
- Do not subject the batteries to strong impacts.
- Do not use batteries that are leaking, deformed, discolored.
- Do not store batteries in warm or humid places.
- Keep the batteries out of reach of babies and small children.
- Make sure that the battery polarity (⁺ and ⁻) is correct.
For Your Safety

- Do not use new with used batteries. Do not use charged and discharged batteries together.
- Do not use different types or brands of batteries at the same time.
- If you do not intend to use the camera for a long period of time, remove the batteries from the camera. Note if the camera is left with the batteries removed, the time and date settings are cleared.
- The batteries feel warm right after being used. Before removing the batteries, turn the camera off and wait for the batteries to cool down.
- Since batteries do not work well in cold weather or locations, warm the batteries by placing them inside your garments before use. Batteries do not work well when cold. They will work again when the temperature returns to normal.
- Soil (such as fingerprints) on the battery terminals makes the batteries charge less reducing the number of images. Carefully wipe the battery terminals with a soft dry cloth before loading.

If any liquid at all leaks from the batteries, wipe the battery compartment thoroughly and then load new batteries.

If any battery fluid comes into contact with your hands or clothing, flush the area thoroughly with water. Note that battery fluid can cause loss of eyesight if it gets into your eyes. If this occurs, do not rub your eyes. Flush the fluid out with clean water and contact your physician for treatment.

■ Using the AA-size Ni-MH batteries correctly
- Ni-MH batteries left unused in storage for long periods can become “deactivated”. Also, repeatedly charging Ni-MH batteries that are only partially discharged can cause them to suffer from the “memory effect”. Ni-MH batteries that are “deactivated” or affected by “memory” suffer from the problem of only providing power for a short time after being charged. To prevent this problem, discharge and recharge them several times using the camera’s “Discharging rechargeable batteries” function. Deactivation and memory are specific to Ni-MH batteries and are not in fact battery faults. See Owner's Manual for the procedure for “Discharging rechargeable batteries”.

■ CAUTION
- Do not use the “Discharging rechargeable batteries” function when alkaline batteries being used.
- To charge Ni-MH batteries, use the quick battery charger (sold separately). Refer to the instructions supplied with the charger to make sure that the charger is used correctly.
- Do not use the battery charger to charge other batteries.
- Note that the batteries feel warm after being charged.
- Due to the way the camera is constructed, a small amount of current is used even when the camera is turned off. Note in particular that leaving Ni-MH batteries in the camera for a long period will over-discharge the batteries and may render them unusable even after recharging.
- Ni-MH batteries will self-discharge even when not used, and the time for which they can be used may be shortened as a result.
- Ni-MH batteries will deteriorate rapidly if over-discharged (e.g. by discharging the batteries in a flashlight). Use the “Discharging rechargeable batteries” function provided in the camera to discharge the batteries.
- Ni-MH batteries have a limited service life. If a battery can only be used for a short time even after repeated discharge-charge cycles, it may have reached the end of its service life.

■ Disposing of Batteries
CAUTION: When disposing of batteries, do so in accordance with your local waste disposal regulations.

■ Notes on both models

■ AC Power Adapter
Always use the AC Power Adapter with the camera. The use of an AC Power adapter other than FUJIFILM AC Power Adapter can be damaged to your digital camera. For details on the AC power adapter, refer to the Owner’s Manual of your camera.
- Use the AC power adapter for indoor use only.
- Plug the connection cord plug securely into the DC input terminal.
- Turn off the FUJIFILM Digital camera before disconnecting the cord from the DC input terminal. To disconnect, pull out the plug gently. Do not pull on the cord.
- Do not use the AC power adapter with any device other than your camera.
- During use, the AC power adapter will become hot to the touch. This is normal.
For Your Safety

• Do not take apart the AC power adapter. Doing so could be dangerous.
• Do not use the AC power adapter in a hot and humid place.
• Do not subject the AC power adapter to strong shocks.
• The AC power adapter may emit a humming. This is normal.
• If used near a radio, the AC power adapter may cause static. If this happens, move the camera away from the radio.

Before Using the Camera

Do not aim the camera at extremely bright light sources, such as the sun in a cloudless sky. Failure to observe this precaution could damage the camera image sensor.

Test Shots Prior to Photography

For important photographs (such as weddings and overseas trips), always take a test shot and view the image to make sure that the camera is working normally.

FUJIFILM Corporation cannot accept liability for any incidental losses (such as the costs of photography or the loss of income from photography) incurred as a result of faults with this product.

Notes on Copyright

Images recorded using your digital camera system cannot be used in ways that infringe copyright laws without the consent of the owner, unless intended only for personal use. Note that some restrictions apply to the photographing of stage performances, entertainments and exhibits, even when intended purely for personal use. Users are also asked to note that the transfer of Memory Card containing images or data protected under copyright laws is only permissible within the restrictions imposed by those copyright laws.

Handling Your Digital Camera

To ensure that images are recorded correctly, do not subject the camera to impact or shock while an image is being recorded.

Liquid Crystal

If the LCD monitor is damaged, take particular care with the liquid crystal in the monitor. If any of the following situations arise, take the urgent action indicated.
• If liquid crystal comes in contact with your skin:
  Wipe the area with a cloth and then wash thoroughly with soap and running water.
• If liquid crystal gets into your eye:
  Flush the affected eye with clean water for at least 15 minutes and then seek medical assistance.
• If liquid crystal is swallowed:
  Flush your mouth thoroughly with water. Drink large quantities of water and induce vomiting. Then seek medical assistance.

Although the LCD panel is produced with highly sophisticated technologies, there may be black spots or permanently lit spots. This is not a malfunction, and does not affect recorded images.

Trademark Information

xD-Picture Card and SD are trademarks of FUJIFILM Corporation. The typefaces included herein are solely developed by DynaComware Taiwan Inc. Macintosh, QuickTime, and Mac OS are trademarks of Apple Inc. in the U.S.A. and other countries.

Windows 8, Windows 7, Windows Vista, and the Windows logo are trademarks of the Microsoft group of companies. Adobe and Adobe Reader are either trademarks or registered trademarks of Adobe Systems Incorporated in the U.S.A. and/or other countries. The SDHC and SDXC logos are trademarks of SD-3C LLC. Notes on Electrical Interference

If the camera is to be used in hospitals or aircrafts, please note that this camera may cause interference to other equipment in the hospital or aircraft. For details, please check with the applicable regulations.

Exif Print (Exif ver. 2.3)

Exif Print Format is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.

IMPORTANT NOTICE: Read Before Using the Software

Direct or indirect export, in whole or in part, of licensed software without the permission of the applicable governing bodies is prohibited.
About This Manual

Before using the camera, read this manual and the warnings on pages ii–vi. For information on specific topics, consult the sources below.

✔ Table of Contents .................................................. viii
The “Table of Contents” gives an overview of the entire manual. The principal camera operations are listed here.

Introduction

**Symbols and Conventions**

The following symbols are used in this manual:

- **Caution**: This information should be read before use to ensure correct operation.
- **Note**: Points to note when using the camera.
- **Tip**: Additional information that may be helpful when using the camera.
- **P**: Other pages in this manual on which related information may be found.

Menus and other text in the camera monitor are shown in bold. In the illustrations in this manual, the monitor display may be simplified for explanatory purposes.

**Supplied Accessories**

The following items are included with the camera:

- AA alkaline (LR6) batteries (×3)
- Lens cap
- Strap

- *Basic Manual*

* A USB cable is not included. Use a Mini USB cable (available from third-party suppliers) that is no longer than 60 cm (1.9 ft.).
Parts of the Camera

- Protected image
- DPOF print indicator
- Photobook assist indicator
- Mark for upload to
- Frame number
- Rating
The Mode Dial
To select a shooting mode, align the mode icon with the mark next to the mode dial.

**SR AUTO (SCENE RECOGNITION):** A “point-and-shoot” mode in which the camera automatically adjusts settings to suit the scene (p. 14).

**AUTO:** A simple “point-and-shoot” mode recommended for first-time users of digital cameras (p. 20).

**CONTINUOUS SHOOTING:** The camera takes photographs while the shutter button is pressed (p. 20).

**P, S, M:** Select for full control over camera settings, including aperture (M) and/or shutter speed (M and S) (p. 27).

**PANORAMA (MOTION PANORAMA):** Take a series of photographs and combine them to form a panorama (p. 25).

**SP1/SP2 (SCENE POSITION):** Choose a scene suited to the subject or shooting conditions and let the camera do the rest (p. 24).

**Adv. (ADVANCED):** Sophisticated techniques made easy (p. 21).
The Strap and Lens Cap

Attaching the Strap
Attach the strap to the two strap eyelets as shown below.

⚠️ Caution
To avoid dropping the camera, be sure the strap is correctly secured.

The Lens Cap
Attach the lens cap as shown.

To avoid losing the lens cap, pass the supplied string through the eyelet (1) and secure the lens cap to the strap (2).
Inserting the Batteries

The camera takes three AA alkaline, lithium, or rechargeable Ni-MH batteries. A set of three alkaline batteries is supplied with the camera. Insert the batteries in the camera as described below.

1 Open the battery-chamber cover.
Slide the battery-chamber latch in the direction shown and open the battery-chamber cover.

⚠ Note
Be sure the camera is off before opening the battery-chamber cover.

⚠ Cautions
• Do not open the battery-chamber cover when the camera is on. Failure to observe this precaution could result in damage to image files or memory cards.
• Do not use excessive force when handling the battery-chamber cover.

2 Insert the batteries.
Insert the batteries in the orientation shown by the “+” and “−” marks inside the battery chamber.

⚠ Cautions
• Insert the batteries in the correct orientation.
• Never use batteries with peeling or damaged casing or mix old and new batteries, batteries with different charge levels, or batteries of different types. Failure to observe these precautions could result in the batteries leaking or overheating.
• Never use manganese or Ni-Cd batteries.
• The capacity of alkaline batteries varies with the manufacturer and drops at temperatures below 10 °C/50 °F; Ni-MH batteries are recommended.
• Fingerprints and other soil on the battery terminals can shorten battery life.
3 Close the battery-chamber cover. Close the battery-chamber cover and slide it in until the latch clicks into place.

⚠️ Caution
Do not use force. If the battery-chamber cover does not close, check that the batteries are in the correct orientation and try again.

💡 Tip: Using an AC Power Adapter
The camera can be powered by an optional AC power adapter and DC coupler (sold separately).

Choosing the Battery Type
After replacing the batteries with batteries of a different type, select the battery type using the BATTERY TYPE option in the setup menu (P 89) to ensure that the battery level is displayed correctly and the camera does not turn off unexpectedly.
Inserting a Memory Card

The camera can store pictures on SD, SDHC, and SDXC memory cards (sold separately).

**Compatible Memory Cards**

FUJIFILM and SanDisk SD, SDHC, and SDXC memory cards have been approved for use in the camera. A complete list of approved memory cards is available at [http://www.fujifilm.com/products/digital_cameras/index.html](http://www.fujifilm.com/products/digital_cameras/index.html). Operation is not guaranteed with other cards. The camera can not be used with xD-Picture Cards or MultiMediaCard (MMC) devices.

**Caution**

Memory cards can be locked, making it impossible to format the card or to record or delete images. Before inserting a memory card, slide the write-protect switch to the unlocked position.
Inserting a Memory Card

1 Open the battery-chamber cover.

Note
Be sure the camera is off before opening the battery-chamber cover.

2 Insert the memory card.
Holding the memory card in the orientation shown below, slide it in until it clicks into place at the back of the slot.

Click
Be sure card is in correct orientation; do not insert at an angle or use force.

3 Close the battery-chamber cover.
Close the battery-chamber cover and slide it in until the latch clicks into place.

Removing Memory Cards
After confirming that the camera is off, press the card in and then release it slowly. The card can now be removed by hand.

Cautions
- The memory card may spring out if you remove your finger immediately after pushing the card in.
- Memory cards may be warm to the touch after being removed from the camera. This is normal and does not indicate a malfunction.
Cautions

- Do not turn the camera off or remove the memory card while the memory card is being formatted or data are being recorded to or deleted from the card. Failure to observe this precaution could damage the card.
- Format SD/SDHC/SDXC memory cards before first use, and be sure to reformat all memory cards after using them in a computer or other device. For more information on formatting memory cards, see page 91.
- Memory cards are small and can be swallowed; keep out of reach of children. If a child swallows a memory card, seek medical assistance immediately.
- miniSD or microSD adapters that are larger or smaller than the standard dimensions of an SD/SDHC/SDXC card may not eject normally; if the card does not eject, take the camera to an authorized service representative. Do not forcibly remove the card.
- Do not affix labels to memory cards. Peeling labels can cause camera malfunction.
- Movie recording may be interrupted with some types of SD/SDHC/SDXC memory card. Use a Class 4 card or better when shooting HD movies.
- Formatting a memory card in the camera creates a folder in which pictures are stored. Do not rename or delete this folder or use a computer or other device to edit, delete, or rename image files. Always use the camera to delete pictures from memory cards; before editing or renaming files, copy them to a computer and edit or rename the copies, not the originals.
Turning the Camera On and Off

**Shooting Mode**
Press the ON/OFF button to turn the camera on. The lens will extend automatically.

Press ON/OFF again to turn the camera off.

**Tip: Switching to Playback Mode**
Press the button to start playback. Press the shutter button halfway to return to shooting mode.

**Cautions**
- Be sure that the lens cap is removed before turning the camera on.
- Forcibly preventing the lens from extending could cause damage or product malfunction.
- Pictures can be affected by fingerprints and other marks on the lens. Keep the lens clean.
- The ON/OFF button does not completely disconnect the camera from its power supply.

**Tip: Auto Power Off**
The camera will turn off automatically if no operations are performed for the length of time selected in the AUTO POWER OFF menu (see page 93).

**Playback Mode**
To turn the camera on and begin playback, press the button for about a second.

Press the button again or press the ON/OFF button to turn the camera off.

**Tip: Switching to Shooting Mode**
To exit to shooting mode, press the shutter button halfway. Press the button to return to playback.
Basic Setup

A language-selection dialog is displayed the first time the camera is turned on. Set up the camera as described below (for information on resetting the clock or changing languages, see page 88).

1 Choose a language.

1.1 Press the selector up or down to highlight a language.

1.2 Press MENU/OK.

2 Set the date and time.

2.1 Press the selector left or right to highlight the year, month, day, hour, or minute and press up or down to change. To change the order in which the year, month, and day are displayed, highlight the date format and press the selector up or down.

2.2 Press MENU/OK. A battery type message will be displayed; if the type differs from the type inserted in the camera, use the setup menu BATTERY TYPE option (89) to specify the correct type.

Tip: The Camera Clock

If the batteries are removed for an extended period, the camera clock and battery type will be reset and the language-selection dialog will be displayed when the camera is turned on. If the batteries are left in the camera for about 10 hours, the battery can be removed for about 24 hours without resetting the clock, language, or battery type.
Taking Pictures in **SR AUTO** (Scene Recognition) Mode

This section describes how to take pictures in **SR AUTO** mode.

1. **Turn the camera on.**
   Press the **ON/OFF** button to turn the camera on.

2. **Select **SR AUTO** mode.**
   Rotate the mode dial to **SR AUTO**.

---

In this mode, the camera automatically analyzes the composition and selects a scene according to shooting conditions and the type of subject:
- **PORTRAIT**: Human portrait subject.
- **LANDSCAPE**: Man-made or natural landscape.
- **NIGHT**: Poorly-lit landscape.
- **MACRO**: Subject close to camera.
- **NIGHT PORTRAIT**: Poorly-lit portrait subject.
- **BACKLIT PORTRAIT**: Back-lit portrait subject.
- **AUTO**: (AUTO) is selected if none of the above are detected.
3  Check the battery level.
   Check the battery level in the display.

   ![Battery Level Indicator]

   **Indicator** | **Description**
   --- | ---
   NO ICON | Batteries are partially discharged.
   ① ![Battery](red) | Batteries are low. Replace as soon as possible.
   ② ![Battery](blinks red) | Batteries are exhausted. Turn camera off and replace batteries.

**Note**
A battery warning may not be displayed before the camera turns off, particularly if batteries are reused after having once been exhausted. Power consumption varies greatly from mode to mode; the low battery warning (①) may not be displayed or may be displayed only briefly before the camera turns off in some modes or when switching from shooting to playback mode.

4  Frame the picture.
   Use the zoom control to frame the picture in the display.

   ![Zoom Indicator]

   **Tip: Focus Lock**
   Use focus lock (32) to focus on subjects that are not in the focus frame.
Holding the Camera
Hold the camera steady with both hands and brace your elbows against your sides. Shaking or unsteady hands can blur your shots.

To prevent pictures that are out of focus or too dark (underexposed), keep your fingers and other objects away from the lens and flash.

Avoiding Blurred Pictures
If the subject is poorly lit, blurring caused by camera shake can be reduced using the IS MODE option in the setup menu (89). Note that blurring may still occur depending on the scene.

Note
Choose OFF to turn image stabilization off when using a tripod.

Shooting Information
To choose the shooting information and guides displayed, press the DISP/BACK button.

Indicators displayed/indicators hidden/best framing/HD framing/histogram
To use best framing, position the main subject at the intersection of two lines or align one of the horizontal lines with the horizon. When HD framing is used, 16:9 aspect ratio guide lines are displayed to make it easy to frame HD shots. Use focus lock (32) to focus on subjects that will not be in the center of the frame in the final photograph.
## Focus.
Press the shutter button halfway to focus.

**Note**
The lens may make a noise when the camera focuses; this is normal. In **SR AUTO** mode, the camera continuously adjusts focus, increasing the drain on the batteries.

If the camera is able to focus, it will beep twice and the indicator lamp will glow green.

If the camera is unable to focus, the focus frame will turn red, ![AF] will be displayed, and the indicator lamp will blink green. Change the composition or use focus lock (32).

## Shoot.
Smoothly press the shutter button the rest of the way down to take the picture.

**Tip: The Shutter Button**
The shutter button has two positions. Pressing the shutter button halfway (①) sets focus and exposure; to shoot, press the shutter button the rest of the way down (②).

**Note**
If the subject is poorly lit, the AF-assist illuminator may light to assist focus (33). For information on using the flash when lighting is poor, see page 35.
### The Indicator Lamp

The indicator lamp shows camera status as follows:

<table>
<thead>
<tr>
<th>Indicator lamp</th>
<th>Camera status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glows green</td>
<td>Focus locked.</td>
</tr>
<tr>
<td>Blinks green</td>
<td>Blur, focus, or exposure warning. Picture can be taken.</td>
</tr>
<tr>
<td>Blinks green and orange</td>
<td>Recording pictures. Additional pictures can be taken.</td>
</tr>
<tr>
<td>Gows orange</td>
<td>Recording pictures. No additional pictures can be taken at this time.</td>
</tr>
<tr>
<td>Blinks orange</td>
<td>Flash charging; flash will not fire when picture is taken.</td>
</tr>
<tr>
<td>Blinks red</td>
<td>Lens or memory error (memory card full or not formatted, format error, or other memory error).</td>
</tr>
</tbody>
</table>

**Tip: Warnings**

Detailed warnings appear in the display. See pages 107–110 for more information.
Viewing Pictures

Pictures can be viewed in the monitor. When taking important photographs, take a test shot and check the results.

1 Press the ▶ button.

The most recent picture will be displayed in the monitor.

2 View additional pictures.
Press the selector right to view pictures in the order recorded, left to view pictures in reverse order.

Press the shutter button to exit to shooting mode.

Deleting Pictures

To delete the picture currently displayed in the monitor, press the selector up (↑). The following dialog will be displayed.

- Select FRAME and press MENU/OK.

- To delete the picture, press MENU/OK.

To exit without deleting the picture, press DISP/BACK.

Tip: The Playback Menu
Pictures can also be deleted from the playback menu (77).
Shooting Mode

Choose a shooting mode according to the scene or type of subject. To choose a shooting mode, rotate the mode dial to the desired setting (5). The following modes are available:

**SCENE RECOGNITION**

The camera automatically analyzes the composition and selects the appropriate scene mode according to the subject and shooting conditions (14).

**AUTO**

Choose for crisp, clear snapshots. This mode is recommended in most situations.

**CONTINUOUS SHOOTING**

Capture motion in a series of pictures. Use the CONTINUOUS option in the shooting menu to choose a continuous mode.

- **Cautions**
  - Focus and exposure are determined by the first frame in each series. The flash turns off automatically; the previously-selected flash mode is restored when the shooting mode is changed.
  - Frame rate varies with shutter speed, shooting conditions, and the number of pictures in each burst.
  - The number of pictures that can be taken in a single burst varies with the scene and camera settings. The number of pictures that can be recorded depends on the memory available.
  - If the self-timer is used when and are selected, only one picture will be taken when the shutter button is pressed.
  - At a setting of, white lines may appear in bright areas of the image; these can be avoided by choosing mode.
■ **AE BKT**
Each time the shutter button is pressed, the camera takes three shots: one using the metered value for exposure, the second overexposed by the amount selected for **AE BKT EV STEPS** in the shooting menu (76), and the third underexposed by the same amount (the camera may not be able to use the selected bracketing increment if the amount of over- or under-exposure exceeds the limits of the exposure metering system).

■ **LONG PERIOD**
The camera takes pictures while the shutter button is pressed. Shooting ends when the shutter button is released or memory is full.

■ **FINAL**
The camera takes up to 40 pictures while the shutter button is pressed, but only the last 5 frames are recorded.

■ **CONTINUOUS/CONTINUOUS/CONTINUOUS**
The camera takes photographs while the shutter button is pressed.

---

**Adv. ADVANCED**
This mode combines “point-and-shoot” simplicity with sophisticated photographic techniques. The **Adv. MODE** option in the shooting menu can be used to choose from the following advanced modes:
**ADVANCED FILTER**

Take photos with filter effects. Select a filter effect and press **MENU/OK**.

**Note**
Depending on the subject and camera settings, images may in some cases be grainy or vary in brightness and hue.

<table>
<thead>
<tr>
<th>Filter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOY CAMERA</td>
<td>Choose for a retro toy camera effect.</td>
</tr>
<tr>
<td>MINIATURE</td>
<td>The tops and bottoms of pictures are blurred for a diorama effect.</td>
</tr>
<tr>
<td>POP COLOR</td>
<td>Create high-contrast images with saturated colors.</td>
</tr>
<tr>
<td>HIGH-KEY</td>
<td>Create bright, low-contrast images.</td>
</tr>
<tr>
<td>LOW-KEY</td>
<td>Create uniformly dark tones with few areas of emphasized highlights.</td>
</tr>
<tr>
<td>DYNAMIC TONE</td>
<td>Dynamic tone expression is used for a fantasy effect.</td>
</tr>
<tr>
<td>FISH-EYE</td>
<td>Create a distorting effect of a fisheye lens.</td>
</tr>
<tr>
<td>SOFT FOCUS</td>
<td>Create a look that is evenly soft throughout the whole image.</td>
</tr>
<tr>
<td>CROSS SCREEN</td>
<td>Create a star pattern where lines radiate out from bright objects.</td>
</tr>
<tr>
<td>PARTIAL COLOR (RED)</td>
<td>Areas of the image that are the selected color are recorded in that color. All others areas of the image are recorded in black-and-white.</td>
</tr>
</tbody>
</table>

* To check the effect, play the picture after shooting.
This mode helps ensure good results with back-lit subjects and in other situations with difficult lighting. Before shooting, raise the flash; pictures can only be taken when the flash is raised. Each time the shutter button is pressed, the camera takes two shots: one shot without the flash to preserve natural lighting, followed immediately by a second shot with the flash. Do not move the camera until shooting is complete.

**Notes**
- Do not use where flash photography is prohibited.
- Only available if memory remains for two pictures.

**Zoom Bracketing**
Each time the shutter button is pressed, the camera takes three pictures: one at the current zoom ratio with an image size of L, a second zoomed in 1.4× and cropped to M, and a third zoomed in 2× and cropped to S (pictures will only be taken if there is enough memory for three images). Two frames are displayed to show the areas that will be included in the second and third pictures; the outer frame shows the area that will be recorded at 1.4× zoom, the inner frame the area that will be recorded at 2× zoom.

**Note**
Digital zoom can not be used. If digital zoom is active when **Zoom** mode is selected, zoom will be set to the maximum optical zoom position.
SP SCENE POSITION

The camera offers a choice of “scenes,” each adapted to particular shooting conditions or a specific type of subject. Use the SCENE POSITION option in the shooting menu to choose the scene assigned to the SP1/SP2 position on the mode dial.

<table>
<thead>
<tr>
<th>Scene</th>

<td>🌊 BEACH</td>
<td>Choose for crisp, clear shots that capture the brightness of sunlit beaches.</td>
</tr>
<tr>
<td>🎉 PARTY</td>
<td>Capture indoor background lighting under low-light conditions.</td>
</tr>
<tr>
<td>🌺 FLOWER</td>
<td>Choose for vivid close-ups of flowers. The camera focuses in the macro range.</td>
</tr>
<tr>
<td>✍️ TEXT</td>
<td>Take clear pictures of text or drawings in print. The camera focuses in the macro range.</td>
</tr>
</tbody>
</table>
**MOTION PANORAMA**

In this mode, you can take up to three pictures and join them together to form a panorama. Use of a tripod is recommended to assist in composing overlapping shots.

---

**Note**

Operations are described in the factory settings (AUTO).

1. Rotate the mode dial to **PANORAMA**.

2. Press the selector up to select a frame. Press the selector left or right to highlight a pan direction and press **MENU/OK**.

3. Take a photograph. Exposure and white balance for the panorama are set with the first shot.

   **Note**

   The camera zooms all the way out and zoom remains fixed at the widest angle until shooting is complete.

4. Frame the next shot to overlap with the previous picture by superimposing + on + so that they form a solid circle (●). The camera will release the shutter automatically.

   **Pan direction**

   ![Display after 1st shot](image1)

   ![Shutter released](image2)

5. Take the last shot as described in Step 4.

   **Note**

   To end shooting and create a panorama after the first or second shot, press the multi selector up after completing Step 3 or Step 4 and proceed to Step 6.
6 Press **MENU/OK** to save the picture.

**Cautions**
- Panoramas are created from multiple frames. The camera may in some cases be unable to stitch the frames together perfectly.
- The desired results may not be achieved with moving subjects, subjects close to the camera, unvarying subjects such as the sky or a field of grass, subjects that are in constant motion, such as waves and waterfalls, or subjects that undergo marked changes in brightness. Panoramas may be blurred if the subject is poorly lit.

**For Best Results**
For best results, be careful not to tilt the camera backward or forward or to either side and try not to move the camera while the frames are aligned to form a solid circle.

---

**Framing Panoramas Manually**
Follow the steps below if the desired results are not achieved with **AUTO** selected for **PANORAMA MODE**:

1. Select **MANUAL** for **PANORAMA MODE** in the shooting menu.
2. Select a frame and take the first shot.
3. Press **MENU/OK** to display a guide showing an edge of the picture you have just taken. Take the next shot, framing it to overlap with the previous picture.

**Guide**

![Display after 1st shot](image1)

![Frame next shot](image2)

4. Repeat Step 3 to take the third shot and then press **MENU/OK** to display the completed panorama.
5. Press **MENU/OK** to save the picture.
P: PROGRAM AE

In this mode, the camera sets exposure automatically. If desired, you can choose different combinations of shutter speed and aperture that will produce the same exposure (program shift).

Caution

If the subject is outside the metering range of the camera, the shutter speed and aperture displays will show “---”. Press the shutter button halfway to measure exposure again.

Program Shift

Press the selector up (▲) to choose the desired combination of shutter speed and aperture. Values that differ from those automatically selected by the camera are shown in yellow. The default values can be restored by raising the flash or turning the camera off. Program shift is not available when the flash is raised.
**S: SHUTTER PRIORITY AE**

In this mode, you choose the shutter speed while the camera adjusts aperture for optimal exposure.

1. Rotate the mode dial to **S**.

2. Press the selector up (↑). Shutter speed and aperture will be displayed.

3. Press the selector up or down to choose the shutter speed.

4. Press the **MENU/OK** button to exit to shooting mode.

5. Take pictures. If the correct exposure can not be achieved at the selected shutter speed, aperture will be displayed in red when the shutter button is pressed halfway. Adjust shutter speed until the correct exposure can be achieved.

⚠️ **Caution**

If the subject is outside the metering range of the camera, the aperture display will show "---". Press the shutter button halfway to measure exposure again.
**M: MANUAL**

In this mode, you choose both shutter speed and aperture. If desired, exposure can be altered from the value suggested by the camera.

1. Rotate the mode dial to **M**.

2. Press the selector up (↑). Shutter speed and aperture will be displayed.

3. Press the selector up or down to choose the shutter speed.

4. Press the selector left or right to choose the aperture.

5. Press the **MENU/OK** button to exit to shooting mode.

6. Take pictures.

---

**The Exposure Indicator**

The amount the picture will be under- or over-exposed at current settings is shown by the exposure indicator. Pictures taken with the indicator to the left of center (“−”) will be underexposed, pictures taken with the indicator is to the right of center (“+”), overexposed.
Intelligent Face Detection

Intelligent Face Detection allows the camera to automatically detect human faces and set focus and exposure for a face anywhere in the frame for shots that emphasize portrait subjects. Choose for group portraits (in horizontal or vertical orientations) to prevent the camera from focusing on the background.

1 **Turn Intelligent Face Detection on.**
   To use Intelligent Face Detection, press MENU/OK to display the shooting menu and select **ON** for **FACE DETECTION** (P 69).

   - If a face is detected, it will be indicated by a green border.
   - If there is more than one face in the frame, the camera will select the face closest to the center; other faces are indicated by white borders.

2 **Cautions**
   - If no face is detected when the shutter button is pressed halfway (P 101), the camera will focus on the subject at the center of the display and red-eye will not be removed.
   - If the subject moves as the shutter button is pressed, their face may not be in the area indicated by the green border when the picture is taken. If the number of faces is large, additional time may be required for processing.
Intelligent Face Detection

Intelligent Face Detection is recommended when using the self-timer for group- or self-portraits (P 37).

When a picture taken with Intelligent Face Detection is displayed, the camera can automatically select faces for red-eye removal (P 81), playback zoom (P 45), slide shows (P 80), image search (P 51), image disp. (P 91), printing (P 60), and cropping (P 83).
Focus Lock

To compose photographs with off-center subjects:

1. **Position the subject in the focus frame.**

2. **Focus.**
   Press the shutter button halfway to set focus and exposure. Focus and exposure will remain locked while the shutter button is pressed halfway (AF/AE lock).

3. **Recompose the picture.**
   Keeping the shutter button pressed halfway, recompose the picture.

4. **Shoot.**
   Press the shutter-release button the rest of the way down to take the picture.

Repeat steps 1 and 2 as desired to refocus before taking the picture.
**Autofocus**

Although the camera boasts a high-precision autofocus system, it may be unable to focus on the subjects listed below. If the camera is unable to focus using autofocus, use focus lock (P 32) to focus on another subject at the same distance and then recompose the photograph.

- Very shiny subjects such as mirrors or car bodies.
- Fast-moving subjects.
- Subjects photographed through a window or other reflective object.
- Dark subjects and subjects that absorb rather than reflect light, such as hair or fur.
- Insubstantial subjects, such as smoke or flame.
- Subjects that show little contrast with the background (for example, subjects in clothing that is the same color as the background).
- Subjects positioned in front of or behind a high-contrast object that is also in the focus frame (for example, a subject photographed against a backdrop of highly contrasting elements).

**The AF-Assist Illuminator**

If the subject is poorly lit, the AF-assist illuminator will light to assist the focus operation when the shutter button is pressed halfway.

**Notes**

- Avoid shining the AF-assist illuminator directly into your subject’s eyes.
- The camera may be unable to focus using the AF-assist illuminator in some cases. If the camera is unable to focus in macro mode (P 34), try increasing the distance to the subject.
Macro and Super Macro Modes (Close-ups)

For close-ups, press the selector left ( widescreen) to choose from the macro options shown below.

Choose from (macro mode), (super macro mode), or OFF (macro mode off)

When macro mode is in effect, the camera focuses on subjects near the center of the frame. Use the zoom control to compose pictures. In super macro mode, optical zoom can not be adjusted and the flash can not be used.

Notes
• Use of a tripod is recommended to prevent blur caused by camera shake.
• Flash compensation may be required when using the flash (76).
• Using the flash at close range may cast a lens shadow. Zoom a little or have more distance from the subject.
Using the Flash (Intelligent Flash)

When the flash is used, the camera’s *Intelligent Flash* system instantly analyzes the scene based on such factors as the brightness of the subject, its position in the frame, and its distance from the camera. Flash output and sensitivity are adjusted to ensure that the main subject is correctly exposed while preserving the effects of ambient background lighting, even in dimly-lit indoor scenes. Use the flash when lighting is poor, for example when shooting at night or indoors under low light.

1. **Raise the flash.**
   Press the flash pop-up button to raise the flash.

   **Turning the Flash Off**
   Lower the flash where flash photography is prohibited or to capture natural lighting under dim light. At slow shutter speeds, ![ ] will be displayed to warn that pictures may be blurred; use of a tripod is recommended.

2. **Choose a flash mode.**
   Press the selector right ( ). The flash mode changes each time the selector is pressed.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO/K (AUTO FLASH)</td>
<td>The flash fires when required. Recommended in most situations.</td>
</tr>
<tr>
<td>⏰/ ⏰ (FORCED FLASH)</td>
<td>The flash fires whenever a picture is taken. Use for backlit subjects or for natural coloration when shooting in bright light.</td>
</tr>
<tr>
<td>⏰/ ⏰ (SLOW SYNCHRO)</td>
<td>Capture both the main subject and the background under low light (note that brightly lit scenes may be overexposed).</td>
</tr>
</tbody>
</table>
3 Focus.
Press the shutter button halfway to focus. If the flash will fire, 
will be displayed when the shutter button is pressed halfway. At slow shutter speeds, 
will appear in the display to warn that pictures may be blurred; use of a tripod is recommended.

4 Shoot.
Press the shutter button the rest of the way down to shoot.

Caution
The flash may fire several times with each shot. Do not move the camera until shooting is complete.

Note
The peripheral part of an image may be dark when using the flash.

Red-Eye Removal
When Intelligent Face Detection is active (30), and ON is selected for RED EYE REMOVAL in the setup menu (81), red-eye removal is available in AUTO, 
, and 
. Red-eye removal minimizes “red-eye” caused when light from the flash is reflected from the subject’s retinas as shown in the illustration at right.
Using the Self-Timer

The camera offers a ten-second timer that allows photographers to appear in their own photographs, and a two-second timer that can be used to avoid blur caused by the camera moving when the shutter button is pressed.

1 Set the timer.
Press the selector down ( ), and then press the selector left or right to highlight an option and press MENU/OK.

2 Focus.
Press the shutter button halfway to focus.

Caution
Stand behind the camera when using the shutter button. Standing in front of the lens can interfere with focus and exposure.

3 Start the timer.
Press the shutter button the rest of the way down to start the timer. The display shows the number of seconds remaining until the shutter is released. To stop the timer before the picture is taken, press DISP/BACK.
Using the Self-Timer

The self-timer lamp on the front of the camera will blink immediately before the picture is taken. If the two-second timer is selected, the self-timer lamp will blink as the timer counts down.

Intelligent Face Detection

Because it ensures that the faces of portrait subjects will be in focus, Intelligent Face Detection (P30) is recommended when using the self-timer for group portraits or self-portraits. To use the self-timer with Intelligent Face Detection, select 10 SEC or 2 SEC in the self-timer menu and then press the shutter button all the way down to start the timer. The camera will detect faces while the timer is counting down and adjust focus and exposure immediately before the shutter is released. Be careful not to move until the picture has been recorded.

Note

The self-timer turns off automatically when the picture is taken, a different shooting mode is selected, playback mode is selected, or the camera is turned off.
INSTANT ZOOM

In instant zoom, the area surrounding the frame is visible in the display. Use to frame erratically moving subjects such as children, pets, and athletes at sporting events.

1 Position the subject in the focus frame.
   Use the zoom control to frame the subject in the center of the display.

2 Select INSTANT ZOOM in the shooting menu (69).
   An Instant Zoom setting screen is displayed.

3 Select a framed area to enlarge by pressing ▲ or ▼, and then press the MENU/OK button.
   The frame is displayed as shown at right.

4 Focus and shoot.
   The framed area will be enlarged to create a full-sized picture.
**INTELLIGENT DIGITAL ZOOM**

1. Enable digital zoom. Select **ON** for the **INTELLIGENT DIGITAL ZOOM** option in the setup menu (p. 93).

2. Choose a subject. Frame the subject in the center of the display using intelligent digital zoom.

3. Select **INSTANT ZOOM** in the shooting menu (p. 69). An Instant Zoom setting screen is displayed.

4. Select a framed area to enlarge by pressing ▲ or ▼, and then press the **MENU/OK** button. The camera will zoom to the maximum optical zoom position with the area that will be recorded using intelligent digital zoom indicated by a frame at the center of the display.
5 Frame the picture.
Use the zoom control to choose the area that will be included in the final photograph.

6 Focus and shoot.
The framed area will be enlarged to create a full-sized picture.

**Tip: Intelligent Face Detection**
Intelligent Face Detection will not detect faces outside the selected frame.

**Cautions**
- Pictures taken using the instant zoom are lower quality than pictures taken using normal zoom.
- Only horizontal (landscape-orientation) framing is available in continuous shooting mode.
Exposure Compensation

Use exposure compensation when photographing very bright, very dark, or high-contrast subjects.

1. Press the selector up (△). The exposure indicator will be displayed.

2. Choose a value. Press the selector left or right. The effect is visible in the display.

3. Return to shooting mode. Press the MENU/OK button to return to shooting mode.

4. Take pictures.

Note
A icon and exposure indicator are displayed at settings other than ±0. Exposure compensation is not reset when the camera is turned off; to restore normal exposure control, choose a value of ±0.
Choosing an Exposure Compensation Value

- **Backlit subjects**: choose values from $+\frac{2}{3}$ EV to $+1\frac{2}{3}$ EV

- **Highly reflective subjects or very bright scenes** (e.g., snowfields): +1 EV

- **Scenes that are mostly sky**: +1 EV
- **Spotlit subjects** (particularly if photographed against dark backgrounds): $-\frac{2}{3}$ EV
- **Subjects with low reflectivity** (pine trees or dark-colored foliage): $-\frac{3}{3}$ EV
More on Playback

Playback Options

To view the most recent picture in the monitor, press the ▶ button.

Press the selector right to view pictures in the order recorded, left to view pictures in reverse order. Keep the selector pressed to scroll rapidly to the desired frame.

Choosing a Display Format

Press the DISP/BACK button to cycle through playback display formats as shown below.

- Information on
- Information off
- Photo info (p. 46)
- Favorites (p. 45)

Note

Pictures taken using other cameras are indicated by a book (“gift image”) icon during playback.
Playback Options

Playback Zoom
Select T to zoom in on pictures displayed in single-frame playback; select W to zoom out. When the picture is zoomed in, the selector can be used to view areas of the image not currently visible in the display.

Press DISP/BACK to exit zoom.

Note
The maximum zoom ratio varies with image size. Playback zoom is not available with copies resized or cropped to a size of 640 or smaller.

Intelligent Face Detection
Pictures taken with Intelligent Face Detection (30) are indicated by a icon. Press the button to zoom in on the subject selected with Intelligent Face Detection. You can then use the zoom control to zoom in and out.

★ Favorites: Rating Pictures
To rate the picture currently displayed in full-frame playback, press DISP/BACK and press the selector up and down to select from zero to five stars.

Tip: Favorites
Ratings can be used for image search (51).
Viewing Photo Information

To view or hide the photo information listed below in single-frame playback, press DISP/BACK a few times.

Histograms

Histograms show the distribution of tones in the image. Brightness is shown by the horizontal axis, the number of pixels by the vertical axis.

Optimal exposure: Pixels are distributed in an even curve throughout the tone range.

Overexposed: Pixels are clustered at the right side of the graph.

Underexposed: Pixels are clustered at the left side of the graph.
**Multi-Frame Playback**

To change the number of images displayed during playback, select W.

Select W to increase the number of pictures displayed to two, nine, or one hundred.

Select T to reduce the number of images displayed.

Use the selector to highlight images and press **MENU/OK** to view the highlighted image full frame. In the nine- and hundred-frame displays, press the selector up or down to view more pictures.

**Tip: Two-Frame Display**

Two-frame display can be used to compare pictures taken in **C** mode.
Viewing Panoramas

To view a panorama, display in single-frame view and press the selector down.

The following operations can be performed during playback:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start/pause playback</td>
<td>Press the selector down</td>
<td>to start playback. Press again to pause.</td>
</tr>
<tr>
<td>End playback</td>
<td>Press the selector up</td>
<td>to end playback.</td>
</tr>
</tbody>
</table>
Create books from your favorite photos.

**Creating a PhotoBook**

1. Select `PHOTOBOOK ASSIST` in the playback menu.

2. Highlight `NEW BOOK`.

   - `SELECT FROM ALL`: Choose from all the pictures available.
   - `SELECT BY IMAGE SEARCH`: Choose from pictures matching selected search conditions (51).

   **Note**
   Neither photographs 840 or smaller nor movies can be selected for photobooks.

5. Scroll through the images and press the selector up to select or deselect the current image for inclusion in the book. To display the current image on the cover, press the selector down.

   **Note**
   The first picture selected automatically becomes the cover image. Press the selector down to select a different picture for the cover.

6. Press `MENU/OK` to exit when the book is complete.

7. Highlight `COMPLETE PHOTOBOOK`.

   **Note**
   Choose `SELECT ALL` to select all photos, or all photos matching the specified search conditions, for the book.
Press **MENU/OK**. The new book will be added to the list in the photobook assist menu.

**Cautions**
- Photobooks can contain up to 300 pictures.
- Books that contain no photos are automatically deleted.

**PhotoBooks**
Photobooks can be copied to a computer using the MyFinePix Studio software (63).

---

**Viewing PhotoBooks**
Highlight a book in the photobook assist menu and press **MENU/OK** to display the book, then press the selector left and right to scroll through the pictures. Press **DISP/BACK** to return to the photobook assist menu.

**Editing and Deleting PhotoBooks**

1. Display the photobook and press **MENU/OK** to view book edit options.

2. Choose from the following options:
   - **EDIT**: Edit the book as described in “Creating a PhotoBook” on page 49.
   - **ERASE**: Delete the current photobook.

3. Follow the on-screen instructions.
Image Search

Search for pictures by date, subject, scene, file type, and rating.

1. Select IMAGE SEARCH in the playback menu.

2. Highlight one of the following options and press MENU/OK:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BY DATE</td>
<td>Find all pictures taken on a selected date.</td>
</tr>
<tr>
<td>BY FACE</td>
<td>Find all pictures containing faces.</td>
</tr>
<tr>
<td>BY ★ FAVORITES</td>
<td>Find all pictures with a specified rating (P 45).</td>
</tr>
<tr>
<td>BY SCENE</td>
<td>Find all pictures that match a selected scene.</td>
</tr>
<tr>
<td>BY TYPE OF DATA</td>
<td>Find all still pictures or all movies.</td>
</tr>
<tr>
<td>BY UPLOAD MARK</td>
<td>Find all pictures selected for upload to a specified destination (P 78).</td>
</tr>
</tbody>
</table>

3. Select a search condition. Only pictures that match the search condition will be displayed. To delete or protect selected pictures or to view the selected pictures in a slide show, press MENU/OK and choose from the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>See page</th>
</tr>
</thead>
<tbody>
<tr>
<td>ERASE</td>
<td>52</td>
</tr>
<tr>
<td>PROTECT</td>
<td>82</td>
</tr>
<tr>
<td>SLIDE SHOW</td>
<td>80</td>
</tr>
</tbody>
</table>

4. To end the search, select EXIT SEARCH.
Deleting Pictures

To delete individual pictures, multiple selected pictures, or all pictures, press the selector up (▲), and choose from the options below. Note that deleted pictures can not be recovered. Copy important pictures to a computer or other storage device before proceeding.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FRAME</td>
<td>Press the selector left or right to scroll through pictures and press MENU/OK to delete the current picture (a confirmation dialog is not displayed).</td>
</tr>
<tr>
<td>SELECTED FRAMES</td>
<td>Highlight pictures and press MENU/OK to select or deselect (pictures that are protected or in a print order are shown by S). When the operation is complete, press DISP/BACK to display a confirmation dialog, then highlight OK and press MENU/OK to delete the selected pictures.</td>
</tr>
<tr>
<td>ALL FRAMES</td>
<td>A confirmation dialog will be displayed; highlight OK and press MENU/OK to delete all unprotected pictures. Pressing DISP/BACK cancels deletion; note that any pictures deleted before the button was pressed can not be recovered.</td>
</tr>
</tbody>
</table>

Notes

• Protected pictures can not be deleted. Remove protection from any pictures you wish to delete (82).
• Pictures can also be deleted by ERASE from playback menu.
• If a message appears stating that the selected images are part of a DPOF print order, press MENU/OK to delete the pictures.
Recording Movies

Press ● to shoot a movie. During recording, the following indicators will be displayed and sound will be recorded via the built-in microphone (be careful not to cover the microphone during recording).

![REC icon](image)

To end recording, press the ● button again. Recording ends automatically when the movie reaches maximum length or memory is full.

**Notes**

- If the subject is poorly lit, the AF-assist lamp may light to assist the focus operation. To turn the AF-assist lamp off, select OFF for **AF ILLUMINATOR** in the setup menu (Page 89).
- Exposure and white balance are adjusted automatically throughout recording. The color and brightness of the image may vary from that displayed before recording begins.
- Sounds made by the camera may be recorded.
Cautions

- The indicator lamp lights while movies are being recorded. Do not open the battery chamber during shooting or while the indicator lamp is lit. Failure to observe this precaution could prevent the movie from being played back.
- Vertical or horizontal streaks may appear in movies containing very bright subjects. This is normal and does not indicate a malfunction.
- The temperature of the camera may rise if it is used to record movies for an extended period or if the ambient temperature is high. This is normal and does not indicate a malfunction.
- Optical zoom can not be adjusted when shooting movies in super macro mode (34).

Zooming While Recording a Movie

The zoom can be used while recording a movie. In the setup menu, select  
DIGITAL or OPTICAL  (89).

DIGITAL: Image quality may deteriorate when the zoom is used.

OPTICAL: The sound of the camera zooming may be heard when playing movie.

Movie Frame Size

Before recording, select a frame size using the MOVIE MODE option in the shooting menu.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HD 1280×720</td>
<td>High Definition.</td>
</tr>
<tr>
<td>640×480</td>
<td>Standard definition.</td>
</tr>
<tr>
<td>320×240</td>
<td>Longer movie.</td>
</tr>
</tbody>
</table>
### Viewing Movies

During playback (44), movies are displayed in the monitor as shown at right. The following operations can be performed while a movie is displayed:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start/pause playback</td>
<td>Press the selector <strong>down</strong> to start playback. Press again to pause.</td>
</tr>
<tr>
<td>End playback/delete</td>
<td>Press the selector <strong>up</strong> to end playback. If playback is not in progress, pressing the selector up will delete the current movie.</td>
</tr>
<tr>
<td>Advance/rewind</td>
<td>Press the selector <strong>right</strong> to advance, <strong>left</strong> to rewind. If playback is paused, the movie will advance or rewind one frame each time the selector is pressed.</td>
</tr>
<tr>
<td>Adjust volume</td>
<td>Press <strong>MENU/OK</strong> to pause playback and display volume controls. Press the selector up or down to adjust the volume; press <strong>MENU/OK</strong> again to set the volume.</td>
</tr>
</tbody>
</table>

Progress is shown in the monitor during playback.

Tip: Viewing Movies on a Computer
Copy movies to the computer before viewing.

Caution
Do not cover the speaker during playback.
Viewing Pictures on TV

Connecting the Camera to High Definition (HD) TVs
When an HDMI cable (available from third-party suppliers) is connected, pictures and sound are played back on the TV.

1. Turn the camera off and connect an HDMI cable available from third party suppliers.

![Diagram of HDMI connection]

**Notes**
- The USB cable cannot be used while an HDMI cable is connected.
- Use an HDMI cable no more than 1.5 m (4.9 ft.) long.
- When an HDMI cable is connected, pictures and sound are played back on the TV.

2. Tune the television to the HDMI input channel. See the documentation supplied with the television for details.

3. Press the ▶️ button for about a second to turn the camera on. The camera monitor turns off and pictures and movies are played back on the TV. Note that the camera volume controls have no effect on sounds played on the TV; use the television volume controls to adjust the volume.

**Caution**
When connecting the cable, be sure the connectors are fully inserted.
Printing Pictures via USB

If the printer supports PictBridge, the camera can be connected directly to the printer and pictures can be printed without first being copied to a computer. Note that depending on the printer, not all the functions described below may be supported.

**Connecting the Camera**

1. Connect a USB cable (available from third-party suppliers) as shown and turn the printer on.

2. Press the  button for about a second to turn the camera on.  **USB** will be displayed in the monitor, followed by the PictBridge display shown below at right.

**Printing Selected Pictures**

1. Press the selector left or right to display a picture you wish to print.

2. Press the selector up or down to choose the number of copies (up to 99).

3. Repeat steps 1–2 to select additional pictures. Press **MENU/OK** to display a confirmation dialog when settings are complete.

4. Press **MENU/OK** to start printing.
**Tip: Printing the Date of Recording**
To print the date of recording on pictures, press **DISP/BACK** in steps 1–2 to display the PictBridge menu (see “Printing the DPOF Print Order,” below). Press the selector up or down to highlight **PRINT WITH DATE** and press **MENU/OK** to return to the PictBridge display (to print pictures without the date of recording, select **PRINT WITHOUT DATE**).

**Note**
If no pictures are selected when the **MENU/OK** button is pressed, the camera will print one copy of the current picture.

---

**Printing the DPOF Print Order**
To print the print order created with **PRINT ORDER (DPOF)** in the playback menu (60).

1. In the PictBridge display, press **DISP/BACK** to open the PictBridge menu.

2. Press the selector up or down to highlight **PRINT DPOF**.

3. Press **MENU/OK** to display a confirmation dialog.
4 Press **MENU/OK** to start printing.

**During Printing**
The message shown at right is displayed during printing. Press **DISP/BACK** to cancel before all pictures are printed (depending on the printer, printing may end before the current picture has printed).

If printing is interrupted, press **[** to turn the camera off and then on again.

**Disconnecting the Camera**
Confirm that “PRINTING” is not displayed in the monitor and turn the camera off. Disconnect the USB cable.

**Notes**
- Print pictures from a memory card that has been formatted in the camera.
- If the printer does not support date printing, the PRINT WITH DATE option will not be available in the PictBridge menu and the date will not be printed on the pictures in the DPOF print order.
- When pictures are printed via direct USB connection, page size, print quality, and border selections are made using the printer.
**Creating a DPOF Print Order**

The PRINT ORDER (DPOF) option in the playback menu can be used to create a digital “print order” for PictBridge-compatible printers (96) or devices that support DPOF.

DPOF

DPOF (Digital Print Order Format) is standard that allows pictures to be printed from “print orders” stored on a memory card. The information in the order includes the pictures to be printed, date imprint, and the number of copies of each picture.

1. Select playback mode and press MENU/OK to display the playback menu.
2. Highlight PRINT ORDER (DPOF) and press MENU/OK.
3. Highlight one of the following options and press MENU/OK:
   - **WITH DATE**: Print the date of recording on pictures.
   - **WITHOUT DATE**: Do not print the date of recording on pictures.
4. Press the selector left or right to display a picture you wish to include in or remove from the print order.
5 Press the selector up or down to choose the number of copies (up to 99). To remove a picture from the order, press the selector down until the number of copies is 0.

6 Repeat steps 4–5 to complete the print order. Press MENU/OK to save the print order when settings are complete, or DISP/BACK to exit without changing the print order.

7 The total number of prints is displayed in the monitor. Press MENU/OK to exit.

The pictures in the current print order are indicated by a icon during playback.

---

**Tip: Intelligent Face Detection**

If the current picture was created with Intelligent Face Detection, pressing sets the number of copies to the number of faces detected.

**Note**

When pictures are printed via direct USB connection, page size, print quality, and border selections are made using the printer.
Notes

• Print orders can contain a maximum of 999 pictures.
• If a memory card is inserted containing a print order created by another camera, the message shown at right will be displayed. Pressing MENU/OK cancels the print order; a new print order must be created as described above.

### RESET ALL

To cancel the current print order, select **RESET ALL** in the **PRINT ORDER (DPOF)** menu. The confirmation shown at right will be displayed; press **MENU/OK** to remove all pictures from the order.
Viewing Pictures on a Computer

**Copying Pictures to a Computer**

Windows users can use [MyFinePix Studio](#) to copy pictures to a computer, where they can be stored, viewed, organized, and printed.

Mac (Macintosh) users can use a standard application in Mac OS such as Image Capture to import pictures or movies to Mac. Proceed to “Connecting the Camera” (P 66).

**Windows: Downloading and Installing MyFinePix Studio to a Computer**

If CD-ROM is not included in the Supplied Accessories (P 1), download [MyFinePix Studio](#) from the following website:

Double-click the downloaded file “MFPS_Setup.EXE” to start the installer, and follow the on-screen instructions to install MyFinePix Studio.

When installation is complete, proceed to “Connecting the Camera” (P 66).
Windows: Installing MyFinePix Studio

If CD-ROM is included in the Supplied Accessories, install MyFinePix Studio from the supplied CD-ROM.

1 Confirm that the computer meets the following system requirements:

<table>
<thead>
<tr>
<th></th>
<th>Windows 8/Windows 7 (SP 1)/Windows Vista (SP 2)¹</th>
<th>Windows XP (SP 3)¹</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CPU</strong></td>
<td>3 GHz Pentium 4 or better (2.4 GHz Core 2 Duo or better)²</td>
<td>2 GHz Pentium 4 or better (2.4 GHz Core 2 Duo or better)²</td>
</tr>
<tr>
<td><strong>RAM</strong></td>
<td>1 GB or more</td>
<td>512 MB or more (1 GB or more)²</td>
</tr>
<tr>
<td><strong>Free disk space</strong></td>
<td></td>
<td>2 GB or more</td>
</tr>
<tr>
<td><strong>GPU</strong></td>
<td>Supports DirectX 9 or later (recommended)</td>
<td>Supports DirectX 7 or later (required; performance not guaranteed with other GPUs)</td>
</tr>
<tr>
<td><strong>Video</strong></td>
<td>1,024 × 768 pixels or more with 24-bit color or better</td>
<td></td>
</tr>
<tr>
<td><strong>Other</strong></td>
<td>• Built-in USB port recommended. Operation is not guaranteed with other USB ports.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• .NET Framework 3.5 Service Pack 1 required when uploading images or using Map Viewer.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Internet connection (broadband recommended) required to install .NET Framework (if necessary), to use auto update feature, and when performing such tasks as sharing pictures on-line or via e-mail.</td>
<td></td>
</tr>
</tbody>
</table>

¹ Other versions of Windows are not supported. Only pre-installed operating systems are supported; operation is not guaranteed on home-built computers or computers that have been upgraded from earlier versions of Windows.

² Recommended when displaying HD movies.
2 Start the computer. Log in to an account with administrator privileges before proceeding.

3 Exit any applications that may be running and insert the installer CD in a CD-ROM drive.

**Windows 8/Windows 7/Windows Vista**
If an AutoPlay dialog is displayed, click **SETUP.EXE**. A “User Account Control” dialog will then be displayed; click **Yes** (Windows 8/Windows 7) or **Allow** (Windows Vista).

The installer will start automatically; click **Install MyFinePix Studio** and follow the on-screen instructions to install MyFinePix Studio.

**If the Installer Does Not Start Automatically (Windows 7/Windows Vista/Windows XP)**
If the installer does not start automatically, select **Computer** or **My Computer** from the Start menu, then double-click the **FINEPIX** CD icon to open the FINEPIX CD window and double-click **setup** or **SETUP.EXE**.

**If the Installer Does Not Start Automatically (Windows 8)**
1 Select **Desktop** on the Start screen.
2 Select **File Explorer** on the taskbar.
3 Select **Computer** in the navigation pane.
4 Double-click the drive icon inserting the **FINEPIX** CD and follow the on-screen instructions to install.

4 If prompted to install Windows Media Player, DirectX, or .NET Framework, follow the on-screen instructions to complete installation.

5 Remove the installer CD from the CD-ROM drive when installation is complete. Store the installer CD in a dry location out of direct sunlight in case you need to re-install the software. The version number is printed at the top of the CD label for reference when updating the software or contacting customer support.

Installation is now complete. Proceed to “Connecting the Camera” on page 66.
**Windows: Uninstalling MyFinePix Studio**

Only uninstall the software when it is no longer required or before beginning reinstallation.

1. After quitting the software and disconnecting the camera, open the control panel and use “Programs and Features” (Windows 8/Windows 7/Windows Vista) or “Add or Remove Programs” (Windows XP) to uninstall MyFinePix Studio.

2. Under Windows, one or more confirmation dialogs may be displayed; read the contents carefully before clicking **OK**.

---

**Connecting the Camera**

1. If the pictures you wish to copy are stored on a memory card, insert the card into the camera (**10**).

   - **Note**
     Windows users may require the Windows CD when starting the software for the first time.

---

**Caution**

Loss of power during transfer could result in loss of data or damage to the memory card. Insert fresh or fully-charged batteries before connecting the camera.

2. Turn the camera off and connect a USB cable (available from third-party suppliers) as shown, making sure the connectors are fully inserted. Connect the camera directly to the computer; do not use a USB hub or keyboard.

3. Press the **button for about a second to turn the camera on and follow the on-screen instructions to copy pictures to the computer. To exit without copying pictures, click **Cancel**.

---

**Importing pictures or movies to Mac (Macintosh)**

Use a standard application in Mac OS such as Image Capture to import pictures or movies to Mac.
For more information on using the software, start the application and select the appropriate option from the Help menu.

\section*{Cautions}

- If a memory card containing a large number of images is inserted, there may be a delay before the software starts and you may be unable to import or save images. Use a memory card reader to transfer pictures.
- Make sure that the computer does not display a message stating that copying is in progress and that the indicator lamp is out before turning the camera off or disconnecting the USB cable (if the number of images copied is very large, the indicator lamp may remain lit after the message has cleared from the computer display). Failure to observe this precaution could result in loss of data or damage to the memory card.
- Disconnect the camera before inserting or removing memory cards.
- In some cases, it may not be possible to access pictures saved to a network server using the software in the same way as on a standalone computer.
- The user bears all applicable fees charged by the phone company or Internet service provider when using services that require an Internet connection.
Using the Menus: Shooting Mode

**Using the Shooting Menu**

1. Press **MENU/OK** to display the shooting menu.

2. Press the selector up or down to highlight the desired menu item.

3. Press the selector right to display options for the highlighted item.

4. Press the selector up or down to highlight the desired option.

5. Press **MENU/OK** to select the highlighted option.

6. Press **DISP/BACK** to exit from the menu.
### Shooting Menu Options

</tr>
<tr>
<td>FLASH</td>
<td>Adjust flash brightness (76).</td>
<td><img src="#" alt="Options" /></td>
<td><img src="#" alt="Default" /></td>
</tr>
</tbody>
</table>
ISO
Control the camera’s sensitivity to light. Higher values can be used to reduce blur when lighting is poor; note, however, that mottling may appear in pictures taken at high sensitivities. If AUTO, AUTO (800), or AUTO (400) is selected, the camera will adjust sensitivity automatically in response to shooting conditions. The maximum values that will be selected by the camera at settings of AUTO (800) and AUTO (400) are 800 and 400 respectively. Settings other than AUTO are shown by an icon in the display.

Note
Sensitivity is not reset when the camera is turned off or another shooting mode is selected.

IMAGE SIZE
Choose the size and aspect ratio at which still pictures are recorded. Large pictures can be printed at large sizes with no drop in quality; small pictures require less memory, allowing more pictures to be recorded.

The number of pictures that can be taken at the selected setting is shown in the display (4).
**Size Versus Aspect Ratio**

<table>
<thead>
<tr>
<th>Option</th>
<th>Prints at sizes up to</th>
</tr>
</thead>
<tbody>
<tr>
<td>L</td>
<td>34 × 25 cm (13.5 × 10 in.)</td>
</tr>
<tr>
<td>M</td>
<td>24 × 18 cm (9.5 × 7 in.)</td>
</tr>
<tr>
<td>S</td>
<td>17 × 13 cm (7 × 5 in.)</td>
</tr>
</tbody>
</table>

**Aspect ratio**

- **4:3**: Pictures have the same proportions as the camera display.
- **3:2**: Pictures have the same proportions as a frame of 35 mm film.
- **16:9**: Suited for display on High Definition (HD) devices.
- **1:1**: Pictures are square.

**IMAGE QUALITY**

Choose how much image files are compressed. Select **FINE** (low compression) for higher image quality, **NORMAL** (high compression) to increase the number of pictures that can be stored.

**Note**

Image size is not reset when the camera is turned off or another shooting mode is selected.
**FINEPIX COLOR**
Enhance contrast and color saturation or take pictures in black and white.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>STANDARD</td>
<td>Standard contrast and saturation. Recommended in most situations.</td>
</tr>
<tr>
<td>CHROME</td>
<td>Vivid contrast and color. Choose for vivid shots of flowers or enhanced greens and blues in landscapes.</td>
</tr>
<tr>
<td>B&amp;W</td>
<td>Take pictures in black and white.</td>
</tr>
</tbody>
</table>

Settings other than **STANDARD** are shown by an icon in the display.

**Notes**
- **FINEPIX COLOR** is not reset when the camera is turned off or another shooting mode is selected.
- The effects of **CHROME** vary from scene to scene and may be difficult to discern with some subjects. Depending on the subject, the effects of **CHROME** may not be visible in the display.

**WHITE BALANCE**
For natural colors, choose a setting that matches the light source.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>White balance adjusted automatically.</td>
</tr>
<tr>
<td>☀️</td>
<td>Measure a value for white balance.</td>
</tr>
<tr>
<td>☀️</td>
<td>For subjects in direct sunlight.</td>
</tr>
<tr>
<td>🌞</td>
<td>For subjects in the shade.</td>
</tr>
<tr>
<td>🌻</td>
<td>Use under “daylight” fluorescent lights.</td>
</tr>
<tr>
<td>🌽</td>
<td>Use under “warm white” fluorescent lights.</td>
</tr>
<tr>
<td>🌼</td>
<td>Use under “cool white” fluorescent lights.</td>
</tr>
<tr>
<td>🕉</td>
<td>Use under incandescent lighting.</td>
</tr>
</tbody>
</table>

If **AUTO** does not produce the desired results (for example, when taking close-ups), select ☀️ and measure a value for white balance or choose the option that matches the light source.

**Notes**
- At settings other than ☀️, auto white balance is used with the flash. Lower the flash (35) to take pictures at other settings.
- Results vary with shooting conditions. Play pictures back after shooting to check colors in the monitor.
Choose 📢 to adjust white balance for unusual lighting conditions. White balance measurement options will be displayed; frame a white object so that it fills the monitor and press the shutter button all the way down to measure white balance.

If “COMPLETED!” is displayed, press MENU/OK to set white balance to the measured value. This value can be reselected by pressing MENU/OK when custom white balance options are displayed.

If “UNDER” is displayed, raise exposure compensation (42) and try again.

If “OVER” is displayed, lower exposure compensation and try again.

Tip
To give a deliberate color cast to your photographs, measure a value for custom white balance using a colored instead of a white object.

PHOTOMETRY
Choose how the camera meters exposure when Intelligent Face Detection is off.

- 📌 MULTI: Automatic scene recognition is used to adjust exposure for a wide range of shooting conditions.
- 📌 SPOT: The camera meters lighting conditions at the center of the frame. Recommended when the background is much brighter or darker than the main subject. Can be used with focus lock (32) to meter off-center subjects.
- 📌 AVERAGE: Exposure is set to the average for the entire frame. Provides consistent exposure across multiple shots with the same lighting, and is particularly effective for landscapes and portraits of subjects dressed in black or white.
**AF MODE**

This option controls how the camera selects the focus area when Intelligent Face Detection is off (30). Regardless of the option selected, the camera will focus on the subject in the center of the monitor when macro mode is on (34).

- **CENTER**: The camera focuses on the subject in the center of the frame. This option can be used with focus lock (32).

- **MULTI**: When the shutter button is pressed halfway, the camera detects high-contrast subjects near the center of the frame and selects the focus area automatically (if the focus frame is not displayed, select **CENTER** and use focus lock; 32).

- **AREA**: The focus position can be chosen manually by pressing the selector up, down, left, or right and pressing **MENU/OK** when the focus brackets are in the desired position. Choose for precise focus when the camera is mounted on a tripod. Note that exposure is set for the subject in the center of the frame; to meter an off-center subject, use AF/AE lock (32).

- **CONTINUOUS**: The camera continually adjusts focus to reflect changes in the distance to the subject even when the shutter button is not pressed (note that this increases the drain on the battery).

- **TRACKING**: Position the subject in the center focus area and press the selector left to select tracking. Focus will track the subject as it moves through the frame.
MOVIE AF MODE
This option controls how the camera selects the focus area for movies.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CENTER</td>
<td>The camera focuses on the subject in the center of the frame.</td>
</tr>
<tr>
<td>CONTINUOUS</td>
<td>The camera continuously adjusts focus to reflect changes in the distance to subjects near the center of the frame.</td>
</tr>
</tbody>
</table>

Note
Note that in CONTINUOUS mode, the camera focuses continuously, increasing the drain on the battery, and that the sound of the camera focusing may be audible.

AE BKT EV STEPS
Choose the size of the exposure bracketing increment used when (AE bracketing) is selected in continuous shooting mode (21). Choose from increments of ±1/3 EV, ±2/3 EV, and ±1 EV.

FLASH
Adjust flash brightness. Choose from values between +2/3 EV and –2/3 EV. The default setting is ±0. Note that the desired results may not be achieved depending on shooting conditions and the distance to the subject.
Using the Menus: Playback Mode

**Using the Playback Menu**

1. Press the button to enter playback mode.

2. Press MENU/OK to display the playback menu.

3. Press the selector up or down to highlight the desired menu item.

4. Press the selector right to display options for the highlighted item.

5. Press the selector up or down to highlight the desired option.

6. Press MENU/OK to select the highlighted option.

**Playback Menu Options**

</table>
MARK FOR UPLOAD TO
You can select images and movies to be queued for upload to YouTube, Facebook and MyFinePix.com. Select MARK FOR UPLOAD TO in the playback menu.

Add/Remove Items in the Upload Queue

1. Select an upload destination.

2. Press MENU/OK.

3. Select items to be added to, or removed from, the upload queue.

4. Press MENU/OK to confirm.
   - Items not in the upload queue will be added to the queue when you select them and press MENU/OK.
   - Items in the upload queue will be removed from the queue when you select them and press MENU/OK.

5. Repeat steps 3 and 4 as necessary and add or remove items. When finished, press DISP/BACK to save the settings.

Tips
- YouTube, Facebook or MyFinePix.com is displayed to indicate items queued for upload.
- Only movies can be selected for upload to YouTube.
- Only photos can be selected for upload to MyFinePix.com.
- During playback, selected pictures are indicated by YouTube, Facebook or MyFinePix.com icons.
Removing All Items From the Upload Queue
You can remove all items from the upload queue.

1. Select **RESET ALL**.
   The screen for removing all items from the upload queue is displayed.

2. Select **OK**.

3. Press **MENU/OK**.
   All items are removed from the upload queue.

- **Note**
  If there are many items in the upload queue when you select to remove all items from the queue, it may take some time to remove them. To cancel, press **DISP/BACK**.

Upload Items
Items added to the upload queue using the camera can be easily uploaded from a computer by using the MyFinePix Studio. Install MyFinePix Studio (§ 63).

- **Note**
  This feature is available only when using a computer running Windows.
Using the Menus: Playback Mode

**SLIDE SHOW**
View pictures in an automated slide show. Choose the type of show and press **MENU/OK** to start. Press **DISP/BACK** at any time during the show to view on-screen help. When a movie is displayed, movie playback will begin automatically, and the slide show will continue when the movie ends. The show can be ended at any time by pressing **MENU/OK**.

<table>
<thead>
<tr>
<th>Option</th>
<th>Displayed in</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>Press selector left or right to go back or skip ahead one frame. Select <strong>FADE-IN</strong> for fade transitions between frames.</td>
</tr>
<tr>
<td>FADE-IN</td>
<td>As above, except that camera automatically zooms in on faces selected with Intelligent Face detection.</td>
</tr>
</tbody>
</table>

**Note**
The camera will not turn off automatically while a slide show is in progress.
RED EYE REMOVAL

If the current picture is marked with a 🧑 icon to indicate that it was taken with Intelligent Face Detection, this option can be used to remove red-eye. The camera will analyze the image; if red-eye is detected, the image will be processed to create a copy with reduced red-eye.

Notes

- Red eye may not be removed if the camera is unable to detect a face or the face is in profile. Results may differ depending on the scene. Red eye can not be removed from pictures that have already been processed using red-eye removal or pictures created with other devices.
- The amount of time needed to process the image varies with the number of faces detected.
- Copies created with 🧑 RED EYE REMOVAL are indicated by a 🧑 icon during playback.
**PROTECT**

Protect pictures from accidental deletion. The following options are available.

- **FRAME**
  
  Protect selected pictures.

  1. Press the selector left or right to display the desired picture.

  ![Picture not protected](image1) ![Protected picture](image2)

  Picture not protected  Protected picture

  2. Press **MENU/OK** to protect the picture. If the picture is already protected, pressing **MENU/OK** will remove protection from the image.

  3. Repeat steps 1–2 to protect additional images. Press **DISP/BACK** to exit when the operation is complete.

- **SET ALL**

  Press **MENU/OK** to protect all pictures, or press **DISP/BACK** to exit without changing picture status.

- **RESET ALL**

  Press **MENU/OK** to remove protection from all pictures, or press **DISP/BACK** to exit without changing picture status.

  If the number of pictures affected is very large, a message will be displayed while the operation is in progress. Press **DISP/BACK** to exit before the operation is complete.

- **Caution**

  Protected pictures will be deleted when the memory card is formatted (91).
**CROP**

To create a cropped copy of a picture, play the picture back and select CROP in the playback menu (77).

1. Use the zoom control to zoom in and out and use the selector to scroll the picture until the desired portion is displayed (to exit to single-frame playback without creating a cropped copy, press DISP/BACK).

   - **Zoom indicator**
   - **Navigation window** shows portion of image currently displayed in monitor

   If the size of the final copy will be 640, YES will be displayed in yellow.

2. Press MENU/OK to view the copy size. Larger crops produce larger copies.

3. Press MENU/OK to save the cropped copy to a separate file.

   - **Tip: Intelligent Face Detection**
     If the picture was shot with Intelligent Face Detection (30), will be displayed in the monitor. Press the ▼ button to zoom in on the selected face.

   - **Note**
     Pictures taken with other cameras can not be cropped.
RESIZE

To create a small copy of a picture, play the picture back and select [RESIZE] in the playback menu (P 77).

1 Highlight a size and press [MENU/OK] to display a confirmation dialog.

2 Press [MENU/OK] to copy the picture at the selected size.
**2 IMAGE ROTATE**

By default, pictures taken in tall orientation are displayed in wide orientation. Use this option to display pictures in the correct orientation in the monitor. It has no effect on pictures displayed on a computer or other device.

**Notes**

- Protected pictures can not be rotated. Remove protection before rotating pictures (82).
- The camera may not be able to rotate pictures created with other devices.

To rotate a picture, play the picture back and select **IMAGE ROTATE** in the playback menu (77).

1. Press the selector down to rotate the picture 90° clockwise, up to rotate the picture 90° counterclockwise.

2. Press **MENU/OK** to confirm the operation (to exit without rotating the picture, press **DISP/BACK**).

The next time the picture is played back, it will automatically be rotated.
**DISP. ASPECT**

Choose how High Definition (HD) devices display pictures with an aspect ratio of 4:3 (this option is available only when an HDMI cable is connected). Select **16:9** to display the image so that it fills the screen with its top and bottom cropped out, **4:3** to display the entire image with black bands at either side.

<table>
<thead>
<tr>
<th>16:9</th>
<th>4:3</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.png" alt="Image" /></td>
<td><img src="image2.png" alt="Image" /></td>
</tr>
</tbody>
</table>

**Note**

Photographs with an aspect ratio of 16:9 are displayed full screen, those with an aspect ratio of 3:2 in a black frame.
The Setup Menu

Using the Setup Menu

1  Display the setup menu.
   1.1  Press **MENU/OK** to display the menu for the current mode.

   1.2  Press the selector left to highlight a left tab.

   1.3  Press the selector up or down to select  

The setup menu appears.

2  Adjust settings.
   2.1  Press the selector right to activate the setup menu.

   2.2  Press the selector up or down to highlight a menu item.

   2.3  Press the selector right to display options for the highlighted item.

   2.4  Press the selector up or down to highlight an option.

   2.5  Press **MENU/OK** to select the highlighted option.

   2.6  Press **DISP/BACK** to exit from the menu.

</tbody>
</table>
**TIME DIFFERENCE**

When travelling, use this option to switch the camera clock instantly from your home time zone to the local time at your destination.

1 Specify the difference between local time and your home time zone.
   1.1 Press the selector up or down to highlight ☰ LOCAL.
   1.2 Press the selector right to display the time difference.
   1.3 Press the selector left or right to highlight +, –, hours, or minutes; press up or down to edit.
   1.4 Press **MENU/OK** when settings are complete.

2 Switch between local time and your home time zone.
To switch between local time and your home time zone, highlight ☰ LOCAL or ☰ HOME and press **MENU/OK**.
- ☰ HOME: Switch to the time currently selected for ☰ DATE/TIME (P 13).
- ☰ LOCAL: Switch to local time. If this option is selected, ☰ and the time and date will be displayed in yellow for three seconds each time the camera is turned on.

After changing time zones, check that the date and time are correct.
 FORMAT  
Format a memory card. Highlight OK and press MENU/OK to begin formatting.

 Cautions
• All data—including protected pictures—will be deleted. Be sure important files have been copied to a computer or other storage device.
• Do not open the battery cover during formatting.

 IMAGE DISP.
Choose an option other than OFF to display pictures in the monitor after shooting. Pictures can be displayed for 1.5 s (1.5 SEC), 0.5 s (0.5 SEC), or until the MENU/OK button is pressed (ZOOM (CONTINUOUS)). If ZOOM (CONTINUOUS) is selected, photos can be zoomed in to check focus and other fine details (see page 45). Colors may differ slightly from those in the final image.
When the picture is zoomed in, the selector can be used to view areas of the image not currently visible in the display.
When the picture was taken with FACE DETECTION turned on, detected face is zoomed.
When more than one face was detected, you can move to the next face by pressing ▼.
ZOOM (CONTINUOUS) is disabled in the following case:
• is selected in the shooting mode.
**FRAME NO.**

New pictures are stored in image files named using a four-digit file number assigned by adding one to the last file number used. The file number is displayed during playback as shown at right. **FRAME NO.** controls whether file numbering is reset to 0001 when a new memory card is inserted or the current memory card is formatted.

- **CONTINUOUS:** Numbering continues from the last file number used or the first available file number, whichever is higher. Choose this option to reduce the number of pictures with duplicate file names.

- **RENEW:** Numbering is reset to 0001 after formatting or when a new memory card is inserted.

**Notes**

- If the frame number reaches 999-9999, the shutter release will be disabled (P 108).
- Selecting **RESET** (P 88) resets **FRAME NO.** to **CONTINUOUS** but does not reset frame numbering.
- Frame numbers for pictures taken with other cameras may differ.

**PLAYBACK VOLUME**

Press the selector up or down to choose volume for movie playback and press **MENU/OK** to select.

**LCD BRIGHTNESS**

Press the selector up or down to choose display brightness and press **MENU/OK** to select.

**LCD POWER SAVE**

Choose whether to save power to increase battery life. This option does not take effect during playback or recording movies.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>POWER SAVE ON</strong></td>
<td>The display dims to save power if no operations are performed for a few seconds. Normal brightness can be restored by pressing the shutter button halfway.</td>
</tr>
<tr>
<td><strong>POWER SAVE OFF</strong></td>
<td>Automatic dimming off.</td>
</tr>
</tbody>
</table>
**AUTO POWER OFF**
Choose the length of time before the camera turns off automatically when no operations are performed. Shorter times increase battery life; if OFF is selected, the camera must be turned off manually. Note that regardless of the option selected, the camera will not turn off automatically when connected to a printer (57) or computer (66) or when a slide show is in progress (80).

**Tip: Reactivating the Camera**
To reactivate the camera after it has turned off automatically, use the ON/OFF button or press the [ ] button for about a second (12).

**INTELLIGENT DIGITAL ZOOM**
If ON is selected, selecting T at the maximum optical zoom position triggers intelligent digital zoom, further magnifying the image while processing it for sharp, high-resolution results.

**Notes**
- Intelligent digital zoom may end when another mode is selected.
- Intelligent digital zoom may sometimes produce lower quality images than optical zoom.
- The time needed to record images increases.
- Intelligent digital zoom is not available in continuous mode or during movie recording.

![Zoom indicator, INTELLIGENT DIGITAL ZOOM off](image)

![Zoom indicator, INTELLIGENT DIGITAL ZOOM on (except for super macro mode)](image)
DISCHARGE (Ni-MH Batteries Only)
The capacity of rechargeable Ni-MH batteries may be temporarily reduced when new, after long periods of disuse, or if they are repeatedly recharged before being fully discharged. Capacity can be increased by repeatedly discharging the batteries using the DISCHARGE option and recharging them in a battery charger (sold separately). Do not use DISCHARGE with non-rechargeable batteries, and note that the batteries will not discharge if the camera is powered by an optional AC power adapter and DC coupler.

1 Selecting DISCHARGE displays a confirmation dialog. Press MENU/OK.

2 Select OK.

3 Press MENU/OK to begin discharging the batteries. When the batteries are fully discharged, the battery level indicator will blink red and the camera will turn off. To cancel the process before the batteries are fully discharged, press DISP/BACK.
**DATE STAMP**
To add shooting date and time, choose 31 + ②. To add only shooting date, choose 31. When OFF is selected, no information will be added to the pictures.

**Notes**
- Added shooting date and time can not be deleted from the pictures. To take pictures without date and time, select OFF for DATE DATE STAMP.
- When the camera clock is not set, setting dialog will be displayed. Set the date and time (13).
- When using DATE DATE STAMP, selecting WITHOUT DATE for PRINT ORDER (DPOF) is recommended (60).
- Date and time can not be added to the movies and the panoramas.
Optional Accessories

The camera supports a wide range of accessories from FUJIFILM and other manufacturers.

- **Computer Related**
  - USB cable (sold separately)
  - SD card slot or card reader

- **Printing**
  - PictBridge-compatible printer *1

- **Audio/Visual**
  - HDMI cable (sold separately)

- **FINEPIX S8600 Series**

*1 Available separately.

**Accessories from FUJIFILM**

The following optional accessories are available from FUJIFILM. For the latest information on the accessories available in your region, check with your local FUJIFILM representative or visit [http://www.fujifilm.com/products/digital_cameras/index.html](http://www.fujifilm.com/products/digital_cameras/index.html).

Caring for the Camera

To ensure continued enjoyment of the product, observe the following precautions.

Storage and Use
If the camera will not be used for an extended period, remove the battery and memory card. Do not store or use the camera in locations that are:
- exposed to rain, steam, or smoke
- very humid or extremely dusty
- exposed to direct sunlight or very high temperatures, such as in a closed vehicle on a sunny day
- extremely cold
- subject to strong vibration
- exposed to strong magnetic fields, such as near a broadcasting antenna, power line, radar emitter, motor, transformer, or magnet
- in contact with volatile chemicals such as pesticides
- next to rubber or vinyl products

Water and Sand
Exposure to water and sand can also damage the camera and its internal circuitry and mechanisms. When using the camera at the beach or seaside, avoid exposing the camera to water or sand. Do not place the camera on a wet surface.

Condensation
Sudden increases in temperature, such as occur when entering a heated building on a cold day, can cause condensation inside the camera. If this occurs, turn the camera off and wait an hour before turning it on again. If condensation forms on the memory card, remove the card and wait for the condensation to dissipate.

Cleaning
Use a blower to remove dust from the lens and monitor, then gently wipe with a soft, dry cloth. Any remaining stains can be removed by wiping gently with a piece of FUJIFILM lens-cleaning paper to which a small amount of lens-cleaning fluid has been applied. Care should be taken to avoid scratching the lens or monitor. The camera body can be cleaned with a soft, dry cloth. Do not use alcohol, thinner, or other volatile chemicals.

Traveling
Keep the camera in your carry-on baggage. Checked baggage may suffer violent shocks that could damage the camera.

</tbody>
</table>
Memory Card Capacity

The following table shows the recording time or number of pictures available at different image sizes. All figures are approximate; file size varies with the scene recorded, producing wide variations in the number of files that can be stored. The number of exposures or length remaining may not diminish at an even rate.

</table>
Power supply/other

Power sources
- AA alkaline batteries (×3)
- AA lithium batteries (×3; available from third-party suppliers)
- AA rechargeable nickel-metal hydride (Ni-MH) batteries (×3; available from third-party suppliers)
- AC-5VX AC power adapter and CP-04 DC coupler (sold separately)

Battery life (approximate number of frames that can be taken with fresh or fully charged batteries)

<table>

</table>

CIPA standard, measured in 📸 (auto) mode using batteries supplied with camera (alkaline batteries only) and SD memory card.

**Note:** Number of shots that can be taken with battery varies with battery charge level and will decline at low temperatures.

Camera dimensions 121.3 mm × 80.8 mm × 64.6 mm/4.7 in. × 3.1 in. × 2.5 in. (W×H×D), excluding projections

Shooting weight Approx. 450 g/15.8 oz., including batteries and memory card

Camera weight Approx. 380 g/13.4 oz., excluding batteries, accessories, and memory cards

Operating conditions
- **Temperature:** 0 °C – +40 °C/+32 °F – +104 °F
- **Humidity:** 10% – 80% (no condensation)
Notices

- Specifications subject to change without notice. FUJIFILM shall not be held liable for damages resulting from errors in this manual.
- Although the monitor is manufactured using advanced high-precision technology, small bright points and anomalous colors (particularly in the vicinity of text) may appear. This is normal for this type of monitor and does not indicate a malfunction; images recorded with the camera are unaffected.
- Digital cameras may malfunction when exposed to strong radio interference (e.g., electric fields, static electricity, or line noise).
- Due to the type of lens used, some distortion may occur at the periphery of images. This is normal.
### Shooting Mode and Camera Settings

| Option | SPAUTO | | Adv. | | SP1/SP2 | |
|--------|--------|--------|------|--------|--------|--------|--------|--------|--------|
|        |        |        |      |        |        |        |        |        |        |

| Option | SPAUTO | | Adv. | | SP1/SP2 | |
|--------|--------|--------|------|--------|--------|--------|--------|--------|
|        |        |        |      |        |        |        |        |        |

1. Automatically optimized for selected shooting mode.
2. Flash turns off automatically in super macro mode (G).
3. Lower flash to select in modes other than D.
4. Disabled if flash fires when set to AUTO or or if flash is set to or and subject is poorly lit.
5. ON selected automatically.
6. Only horizontal (landscape-orientation) framing is available in continuous shooting mode.
7. Image sizes over are set to .
8. Fixed at when Intelligent Face Detection is on.
9. Aspect ratio fixed at 4:3.
