OWNER’S MANUAL

This manual will show you how to use your FUJIFILM DIGITAL CAMERA FinePix Z5fd correctly. Please follow the instructions carefully.
WARNING

To reduce the risk of fire or electric shock, do not expose the AC power adapter to rain or moisture. The AC power adapter should not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, should be placed on the AC power adapter.

IMPORTANT SAFETY INSTRUCTIONS

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Clean only with dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

For customers in the U.S.A.

Tested To Comply
With FCC Standards
FOR HOME OR OFFICE USE

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void the user’s authority to operate the equipment.

NOTES ON THE GRANT:

To comply with Part 15 of the FCC Rules, this product must be used with a Fujifilm-specified ferrite-core A/V cable, USB cable, and DC supply cord.

FOR CUSTOMERS IN CANADA

CAUTION

This Class B digital apparatus complies with Canadian ICES-003.

Please read the Safety Notes (→ p.157) and make sure you understand them before using the camera.
IMPORTANT

NOTICE

BEFORE OPENING THE CD-ROM PROVIDED BY FUJIFILM CORPORATION. PLEASE READ THIS END USER LICENSE AGREEMENT CAREFULLY. ONLY IF YOU AGREE WITH THIS AGREEMENT, SHOULD YOU USE THE SOFTWARE RECORDED ON THE CD-ROM. BY OPENING THE PACKAGE, YOU ACCEPT AND AGREE TO BE BOUND BY THIS AGREEMENT.

End User License Agreement

This End User License Agreement ("Agreement") is an agreement between FUJIFILM Corporation ("FUJIFILM") and you, which sets forth the terms and conditions of the license granted for you to use the software provided by FUJIFILM.

The CD-ROM contains third party software. In case a separate agreement is provided by a third party supplier for its software, the provisions of such separate agreement shall apply to the use of such third party software, prevailing over those of this Agreement.

1. Definitions.
   (a) "Media" means the CD-ROM titled “Software for FinePix CX” - which is provided to you together with this Agreement.
   (b) "Software" means the software which is recorded on Media.
   (c) "Documentation" means the operation manuals of Software and other related written materials which are provided to you together with Media.
   (d) "Product" means Media (including Software) and Documentation collectively.

2. Use of Software.
   FUJIFILM grants to you a nontransferable, nonexclusive license:
   (a) to install one copy of Software onto one computer in binary machine executable form;
   (b) to use Software on the computer onto which Software is installed; and
   (c) to make one backup copy of Software.

   3.1 You shall not distribute, rent, lease or otherwise transfer all or any part of Software, Media or Documentation to any third party without FUJIFILM’s prior written consent. You also shall not sublicense, assign or otherwise transfer all or any part of the rights granted to you by FUJIFILM under this Agreement without FUJIFILM’s prior written consent.
   3.2 Except as expressly granted by FUJIFILM hereunder, you shall not copy or reproduce all or any part of Software or Documentation.
   3.3 You shall not modify, adapt or translate Software or Documentation.
   3.4 You shall not, or shall not have any third party, reverse-engineer, decompile, or disassemble Software.

4. Ownership.
   All copyrights and other proprietary rights to Software and Documentation are owned and retained by FUJIFILM or the third party suppliers as indicated on or in Software or Documentation. Nothing contained herein shall be construed, expressly or implicitly, as transferring or granting any right, license, or title to you other than those explicitly granted under this Agreement.

5. Limited Warranty.
   FUJIFILM warrants to you that Media is free from any defect in material and workmanship under normal use for ninety (90) days from the date of your receipt of Media. Should Media not meet the foregoing warranty, FUJIFILM shall replace such defective Media with other Media bearing no defect. FUJIFILM’s entire liability and your sole and exclusive remedy with regard to any defect in Media shall be expressly limited to such FUJIFILM’s replacement of Media as provided herein.

6. DISCLAIMER OF WARRANTY.
   EXCEPT AS PROVIDED IN SECTION 5 HEREIN, FUJIFILM PROVIDES PRODUCT “AS IS" AND WITHOUT WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED. FUJIFILM SHALL MAKE NO WARRANTY, EXPRESS, IMPLIED OR STATUTORY, AS TO ANY OTHER MATTERS, INCLUDING, BUT NOT LIMITED TO NON-INFRINGEMENT OF ANY COPYRIGHT, PATENT, TRADE SECRET, OR ANY OTHER PROPRIETARY RIGHTS OF ANY THIRD PARTY, MERCHANTABILITY, OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. LIMITATION OF LIABILITY.
   IN NO EVENT SHALL FUJIFILM HAVE ANY LIABILITY FOR ANY GENERAL, SPECIAL, DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, OR OTHER DAMAGES (INCLUDING DAMAGES FOR LOSS OF PROFITS OR LOST SAVINGS) INCURRED FROM THE USE OF OR INABILITY TO USE PRODUCT EVEN IF FUJIFILM HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

8. No export.
   You acknowledge that neither Software nor any part thereof, will be transferred, or exported to any country or used in any manner in violation of any export control laws and regulations to which Software is subject.

   In case you breach any of the terms and conditions hereof, FUJIFILM may immediately terminate this Agreement without any notice.

10. Term.
    This Agreement is effective until the date when you cease to use Software, unless earlier terminated in accordance with Section 9 hereof.

11. Obligation upon termination.
    Upon termination or expiration of this Agreement, you shall, at your own responsibility and expense, delete or destroy immediately all Software (including its copies), Media and Documentation.

    This Agreement shall be governed by and construed in accordance with laws of Japan.

This product comes with batteries. When these are empty, you shouldn’t throw them
away but deliver them as domestic chemical refuse.
Disposal of Electric and Electronic Equipment in Private Households

Disposal of used Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product, or in the manual and in the warranty, and/or on its packaging indicates that this product shall not be treated as household waste. Instead it should be taken to an applicable collection point for the recycling of electrical and electronic equipment.

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

If your equipment contains easy removable batteries or accumulators please dispose these separately according to your local requirements.

The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you have purchased the product.

In Countries outside the EU:
If you wish to discard this product, please contact your local authorities and ask for the correct way of disposal.

Preface

Test Shots Prior to Photography
For important photographs (such as weddings and overseas trips), always take a test shot and view the image to make sure that the camera is working normally.
- FUJIFILM Corporation cannot accept liability for any incidental losses (such as the costs of photography or the loss of income from photography) incurred as a result of faults with this product.

Notes on Copyright
Images recorded using your digital camera system cannot be used in ways that infringe copyright laws without the consent of the owner, unless intended only for personal use. Note that some restrictions apply to the photographing of stage performances, entertainments and exhibits, even when intended purely for personal use. Users are also asked to note that the transfer of xD-Picture Card containing images or data protected under copyright laws is only permissible within the restrictions imposed by those copyright laws.

Handling Your Digital Camera
This camera contains precision electronic components. To ensure that images are recorded correctly, do not subject the camera to impact or shock while an image is being recorded.

Liquid Crystal
If the LCD monitor is damaged, take particular care with the liquid crystal in the monitor. If any of the following situations arise, take the urgent action indicated.
- If liquid crystal comes in contact with your skin
  Wipe the area with a cloth and then wash thoroughly with soap and running water.
- If liquid crystal gets into your eye
  Flush the affected eye with clean water for at least 15 minutes and then seek medical assistance.
- If liquid crystal is swallowed
  Flush your mouth thoroughly with water. Drink large quantities of water and induce vomiting. Then seek medical assistance.

Trademark Information
- and xD-Picture Card™ are trademarks of FUJIFILM Corporation.
- IBM PC/AT is a registered trademark of International Business Machines Corp. of the U.S.A.
- Macintosh, Power Macintosh, iMac, PowerBook, iBook and Mac OS are trademarks of Apple Computer, Inc., registered in the U.S. and other countries.
- Microsoft, Windows, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries. Windows is an abbreviated term referring to the Microsoft® Windows® Operating System.
  * The “Designed for Microsoft® Windows® XP” logo refers to the camera and the driver only.
- IrSimple™ Trademark is owned by the Inferfared Data Association®.
- Other company or product names are trademarks or registered trademarks of the respective companies.
Notes on Electrical Interference
If the camera is to be used in hospitals or aircrafts, please note that this camera may cause interference to other equipment in the hospital or aircraft. For details, please check with the applicable regulations.

Explanation of Color Television System
NTSC: National Television System Committee, color television telecasting specifications adopted mainly in the U.S.A., Canada and Japan.
PAL: Phase Alternation by Line, a color television system adopted mainly by European countries and China.

Exif Print (Exif ver. 2.2)
Exif Print Format is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.

* See “Using Your Camera Correctly” (→p.125) for more information.
About this Manual

Macro (Close-up)

Use this mode to take close-up shots.

Available Shooting modes: AUTO,  

Press \( \uparrow \) to select Macro mode. 
Press \( \downarrow \) again to cancel Macro mode.

\( \uparrow \) appears on the LCD monitor indicating that you can take close-up shots.

CHECK
- Focal range 
  Wide angle: 
  Approx. 8 cm to 80 cm (3.1 in. to 2.6 ft.) 
  Telephoto: 
  Approx. 45 cm to 80 cm (1.5 ft. to 2.6 ft.) 
- Effective flash range 
  Approx. 30 cm to 80 cm (1.0 ft. to 2.6 ft.)

MEMO
- We recommend using a tripod to prevent camera shake in Macro mode.
- Any of the following cancels Macro mode: 
  - Changing the Shooting mode setting 
  - Turning the camera off 
  - Even if the AF MODE is set to MULTI (p.64), the camera focuses near the center of the LCD monitor.

CAUTION
This mark denotes issues that may affect the camera’s operation.

CHECK
This mark denotes points to notice in the camera’s operation.

MEMO
This mark denotes additional topics that complement the basic operating procedures.

4-direction (\( \uparrow \updownarrow \leftrightarrow \rightarrow \)) button

Up, down, left, and right are indicated by black triangles in the Owner’s Manual. Up or down is shown as \( \uparrow \) or \( \downarrow \), and left or right is shown as \( \leftrightarrow \) or \( \rightarrow \).

When pressing \( \rightarrow \):

When pressing DISP/BACK:

Icons indicate the modes that are available.
Accessories Included

- Rechargeable Battery NP-40 (1)
  Soft case included

- Strap (1)

- AC Power Adapter AC-5VZ (1 set)

- A/V cable (1)

- USB cable (1)

- CD-ROM (1)
  Software for FinePix CX

- Owner’s Manual (this manual) (1)

**Attaching the strap**

Attach the strap as shown in 1 and 2. When attaching the strap, move the fastener to adjust the length and slightly away from the end of the strap, as shown in figure 1.

19. Photo mode (F) button (p.54)
20. Infrared port (p.66)
21. Strap mount
22. MENU/OK button
23. Picture stabilization (Anti-blur)/
   "Natural & " button (p.42)
24. DISP (Display)/BACK button (p.32, 33)
25. xD-Picture Card slot (p.18)
26. Battery release catch (p.15)
27. Battery compartment (p.15)
FinePix Z5fd has internal memory that can store images without xD-Picture Card. \( \mathbb{N} \) appears on the LCD monitor when the internal memory is active.
Battery is required to operate the digital camera. At first, load the battery in the camera.

**Compatible battery**
Rechargeable Battery NP-40 (1)

⚠️ **CAUTION**
- The battery is not fully charged at shipment and must be fully charged before being used.
- Do not stick labels onto the battery as this could cause the battery to become jammed inside the camera.
- Any contact between the battery terminals could cause the battery to short circuit and overheat.
- See p.126-127 for information on the battery.
- Always use the Rechargeable Battery NP-40 (included). The use of other brands of rechargeable battery could cause faults or damage to the camera.

1. **Open the battery cover.**

- **CHECK**
  Check that the camera is turned off before opening the battery cover.

- **CAUTION**
  - Do not apply force to the battery cover.
2 Load the battery.

Make sure that the indicators are aligned. Push the battery release catch down while loading the battery. Check that the battery is firmly held in place.

⚠️ CAUTION
Load the battery in the correct direction.

3 Close the battery cover.

To remove the battery

Open the battery cover, and unlock the battery release catch with your finger.

⚠️ CAUTION
Make sure the camera is turned off before removing the battery.
Charging the Battery

The battery is not fully charged at shipment and must be fully charged before being used.

Connecting the AC power adapter to the camera

1. Connect the AC power adapter to the camera.
2. Plug the connecting cable into the AC power adapter.
3. Plug the connecting cable into the power outlet.

CHECK
Loading the Battery (→p.14)

CAUTION
- Always check that the camera is turned off.
- Make sure the AC power adapter is fully and securely inserted into the multi-connector adapter connection socket.

Using the AC power adapter
You can take pictures and play back images without worrying about depleting the battery.

CAUTION
- Always use the FUJIFILM AC Power Adapter AC-5VZ (included).
- See p.128 for notes on using the AC power adapter.
- Only connect and disconnect the AC power adapter when the camera is off. Connecting or disconnecting the AC power adapter while the camera is on temporarily interrupts the power supply to the camera, which will stop the recording of images or movies being shot. Failing to turn the camera off before connecting/disconnecting can also result in damage to the xD-Picture Card or malfunctions during PC connection.
- The power outlet should be nearby the equipment and easily accessible.
- The shape of the plug and power outlet depends on the country of use.
Camera operation during charging

When connection is completed, battery charging begins. Charging ends after about 2 hours.

CHECK Indicator lamp
- [During charging] Lit red
- [Charging completed] Off
- [Charging error] Blinking red (→p.136)

Battery protection function
When you try to charge the battery immediately after the camera has been used continuously for a long period, charging may not begin soon (the indicator lamp does not turn red).
This is not a camera fault, but is for protecting the battery from being charged while it is warm. Battery may degrade when charged at high temperatures.
Leave the camera connected to the AC power adapter, and charging will automatically begin within 30 minutes.

CAUTION Notes on charging the battery
- Turning the camera on during charging interrupts the charging.
- Charging times increase at low temperatures.

Checking the battery charge

Turn the camera on and check the battery level indicator on the LCD monitor.

1. There is ample battery charge. (Lit white)
2. The battery is almost half charged. (Lit white)
3. There is insufficient charge left in the battery. The battery will soon run out. Have a charged battery ready. (Lit red)
4. The battery is depleted. The display will shortly go blank and the camera will stop working. Replace or recharge the battery. (Blinking red)

CAUTION
- Due to the nature of the battery, the battery level indicator ( , , or ) may appear early when the camera is used in cold locations. Try warming the battery in your pocket or a similar location before use.
- Battery with no remaining charge ( blinking red) may cause camera faults. Always load a fully charged battery.
- Depending on the camera mode, the transition from to may occur more quickly.
Although you can store pictures in the camera’s internal memory, you can store many more images on the xD-Picture Card (sold separately). There is a slot for the xD-Picture Card inside the battery compartment.

1 Open the battery cover.

2 Insert an xD-Picture Card.

3 Close the battery cover.

How to replace the xD-Picture Card

Push the xD-Picture Card into the slot and then slowly remove your finger. The lock is released and the xD-Picture Card is pushed out.

Align the gold marking with the gold contact area, and insert the card firmly into place.
CAUTION

- When storing xD-Picture Cards, make sure that they are kept out of the reach of children. An xD-Picture Card could be swallowed and cause suffocation. If a child swallows an xD-Picture Card, seek medical attention or call emergency number right away.
- If the xD-Picture Card is oriented incorrectly, it will not go all the way into the slot. Do not apply force when inserting an xD-Picture Card.
- Note that the xD-Picture Card may spring out if you release your finger quickly from the card immediately after the lock is released.
- Operation of this camera is only guaranteed when it is used with FUJIFILM xD-Picture Card.
- See p.129 for information on the xD-Picture Card and the internal memory.

MEMO

- The size of an image file varies depending on the subject. For this reason, the number recorded may not represent the actual number of frames.
- See p.147 for information on the standard number of available frames.

About internal memory

FinePix Z5fd has internal memory that can store images without xD-Picture Card. IN appears on the LCD monitor when internal memory is active.

When an xD-Picture Card (sold separately) is inserted

[Record images]: Record images to an xD-Picture Card.

[Playback images]: Playback images in an xD-Picture Card.

When an xD-Picture Card (sold separately) is not inserted

[Record images]: Record images to internal memory.

[Playback images]: Playback images in internal memory.

About images in the internal memory

Images held in the camera’s internal memory may be corrupted or erased due to problems such as camera faults. Save your important data to another media (i.e., CD-R, CD-RW, DVD-R, hard disk, etc.). It is possible to transfer saved images on the internal memory to an xD-Picture Card (→p.80).
Turning On and Off

Turning the camera on in Shooting mode
Open the lens cover completely to turn the camera on. Close the lens cover until it stops to turn the camera off.

• Power-ON

• Power-OFF

MEMO
Changes between Shooting mode and Playback mode
Press \(\text{ }\) during shooting to change to Playback mode. Press the shutter button down halfway to return to Shooting mode.

CAUTION
Take care not to get fingerprints on the camera lens as this will result in impaired image quality in your shots.

Turning the camera on in Playback mode

1 Leave the lens cover closed.

• Close the lens cover

2 Press \(\text{ }\) for about 1 second to turn the camera on in Playback mode. Press \(\text{ }\) during playback to turn the camera off.

CAUTION
When the lens cover is open, even if you press \(\text{ }\), the power cannot be turned off. Follow the instructions on the LCD monitor.

MEMO
To change to Shooting mode, open the lens cover completely so that it will not move further.
Setting the language, date, and time

When using the camera for the first time after purchasing, the language, date, and time are cleared. Set the language, date, and time.

1. 言語/LANG. screen appears when turning the camera on.

   ① Press ▲, ▼, ◀, or ▶ to select the language.

   ② Press MENU/OK to confirm the setting.

2. Set the date and time.

   ① Press ▲ or ▶ to select Year, Month, Day, Hour, or Minute.

   ② Press ▲ or ▼ to correct the setting.

MEMO

- Holding down ▲ or ▼ changes the numbers continuously.
- When the time displayed passes “12”, the AM/PM setting changes.

Continued ➤
3 Change the date format.

1. Press ◀ or ▶ to select the date format.

2. Press ▲ or ▼ to set the format.

3. Always press MENU/OK after the settings are completed.

Date format
ex. November 24, 2006
YY.MM.DD: 2006.11.24
DD.MM.YY: 24.11.2006

MEMO
START MENU screen also appears when the battery has been removed and the camera has been left for a long period. Once the AC power adapter has been connected or the battery has been installed for 2 hours or more, the camera settings will be retained for roughly 6 hours even if both sources of power are removed.

Auto power off function
When the Auto power off function is active, if the camera is left unused for 2 or 5 minutes, this function turns the camera off (→p.102). To restore power to the camera to take pictures, briefly close the lens cover completely and then reopen it. To play back images, hold down ► for about 1 second.
Correcting the Date and Time

1 Open the SET-UP menu.

   ① Press MENU/OK to open the menu.

   ② Press ▲ or ▼ to select SET SETUP.

   ③ Press ▶.

2 Display the DATE/TIME screen.

   ① Press ◄ or ► to select 1.

   ② Press ▼ to move to menu item.

   ③ Press ▲ or ▼ to select DATE/TIME.

   ④ Press ▶.

   See “2 Set the date and time.” (→p.21).
Selecting the Language

1 Open the SET-UP menu.

1 Press MENU/OK to open the menu.
2 Press ▲ or ▼ to select SET UP.
3 Press ►.

2 Display the 语言/LANG. screen.

1 Press ◀ or ▶ to select 2.
2 Press ▼ to move to menu item.
3 Press ▲ or ▼ to select 语言/LANG.
4 Press ►.

See “1 语言/LANG. screen appears when turning the camera on.” (→p.21).
Taking Pictures (AUTO Mode)

This section describes the basic operations.

1 Turn the camera on.
   ① Open the lens cover completely so that it will not move further.
     • Power-ON

② Set the Mode switch to .

Holding the camera correctly

Brace your elbows against your sides and hold the camera with both hands.

Do not cover the lens or flash with your fingers.

CAUTION

• Moving the camera while shooting gives a blurred picture (camera shake). Hold the camera steadily with both hands.
• If the lens or flash is obscured by your fingers or the strap, subjects may be out of focus or the brightness (exposure) of your shot may be incorrect.
• Check that the lens is clean. If it is dirty (getting fingerprints on the lens etc.), clean the lens as informed on p.125.

Continued ➤
Taking Pictures (AUTO Mode)

2 Check the composition on the LCD monitor. To adjust zoom scale using the Zoom button:

- **Focal range**
  - Approx. 60 cm (2.0 ft.) to infinity
- **Optical zoom focal length (35 mm camera equivalent)**
  - Approx. 36 mm to 108 mm
  - (Max: Approx. 38 mm to 114 mm)
- **Max. zoom scale**
  - 3x

MEMO
- Select Macro mode to take close-up shots (→p.48).
- Use digital zoom when you want to shoot the subject closer (→p.99).

3 Focus on the main subject in the AF frame and press the shutter button down halfway.

CHECK
- **Focus on the subject**
  - Double beep is heard
  - Indicator lamp lit green
- **Not focus on the subject**
  - No sound
  - !AF indicated
  - Indicator lamp blinking green

MEMO
- The shutter button has a halfway point at which focus and exposure are automatically optimized before taking the picture by pressing fully down.

CAUTION
- When the shutter button is pressed halfway, the movement of the lens will emit a sound.
4 Press the shutter button fully.

![Double beep - Click]

Halfway pressed  Fully pressed

**CAUTION**
When taking a picture using the flash, the image may disappear and go dark briefly due to flash charging. The indicator lamp blinks orange during charging.

**MEMO**
- When the subject is not in the AF frame, use AF/AE lock to take the picture (p.30).
- When pressing the shutter button down fully in one motion, the camera takes the picture without the AF frame changing.
- When a picture is taken, the illumination lamp on the front of the camera lights to indicate that shooting is complete.

### Flash

When pressing the shutter button down halfway, \( \) appears on the LCD monitor before the flash fires.

Change the flash mode when you want to take pictures without flash. See p.49 for information on flash.

**CAUTION**
- The image shown on the LCD monitor before the picture is taken may differ in brightness, color, etc. from the image actually recorded. Play back the recorded image to check it (p.33).
- When selecting a slow shutter speed that will cause camera shake, \( \) appears on the LCD monitor. Use flash or a tripod.
- See p.131-134 for information on Warning displays. See “Troubleshooting” (p.135-142) for more information.

Continued ➔
**Taking Pictures (AUTO Mode)**

- **Indicator lamp display**
  The indicator lamp lights or blinks when pressing the shutter button, etc. The indicator lamp shows the camera status.

![Indicator lamp display](image)

**MEMO**
Only the slip stopper on the left side lights as the indicator lamp. The other two slip stoppers are for holding the camera only and do not light.

<table>

                          • Lens operation error |

**MEMO**
Detailed warning messages appear on the LCD monitor (p.131-134).

- **Using Intelligent Face Detection when taking pictures**
  Intelligent Face Detection allows you to focus on and adjust the brightness of people’s faces. Intelligent Face Detection is effective with the camera held horizontally or vertically.

**Available Shooting modes:** AUTO, ISO, , , , , , , , Off, ,

1. To activate Intelligent Face Detection, press  once. To turn Intelligent Face Detection off, press  again.

![Using Intelligent Face Detection](image)

When there are multiple people in the frame, Intelligent Face Detection will set a green frame around the face nearest to the center of the picture. This face has focusing priority.
**CAUTION**

- If the camera or subject moves as the picture is taken, the subject's face may move out of the Intelligent Face Detection frame.
- When the camera is detecting multiple faces, the green frame is set around the face near the center. If you want to focus on another subject, move the camera so that the new subject is in the center of the LCD monitor. If focus is still not achieved, press (Intelligent Face Detection) to turn off the function, and take the picture using AF/AE lock (p.30).
- Intelligent Face Detection can focus on a face in a white frame providing the subjects in the green and white frame are of the same focal length.
- When the shutter button is pressed halfway with Intelligent Face Detection off, the focus will be on the center of the LCD monitor.
- When the shooting mode is set to or , the image will be focused with respect to faces, but because the exposure will be controlled by the shooting mode, faces will not be adjusted for optimal exposure.

② Press the shutter button down fully to take pictures.

---

**Subjects not suitable for Intelligent Face Detection**

Intelligent Face Detection automatically focuses on a face(s) turned towards the camera. However, difficulties will occur with the Intelligent Face Detection mode in the following situations:

- The face is obscured by glasses, sunglasses, a hat, or hair.
- A person turned sideways, or who has their head tilted.
- The subject is too far away to recognize a face.

Intelligent Face Detection will not work in cases where the subject is standing on his/her head, is not a person (pet or other animal), or if the camera is not held correctly.

---

Continued ➤
Taking Pictures (AUTO Mode)

Taking pictures with the focus and exposure locked

In the above composition, the subjects (two people in this case) are not in the AF frame. Pressing the shutter button halfway at this point will result in the subjects being out of focus.

AF/AE lock is useful:
Use AF/AE lock to guarantee best result when shooting a subject that is not suited to autofocusing (→p.31).

⚠️ CAUTION
When shooting with the AF/AE lock function, turn off 📱 Intelligent Face Detection.

Using AF/AE lock

1 Move the camera slightly so that one of the subjects is in the AF frame.

2 Press the shutter button down halfway to focus on the subject.
3 Continue to hold the shutter button down halfway. Move the camera back to the original image and press the shutter button fully.

MEMO
- AF/AE lock can be applied repeatedly before the shutter is released.
- On FinePix Z5fd, pressing the shutter button down halfway locks the focus and exposure settings (AF and AE lock).

Subjects not suitable for autofocus
FinePix Z5fd uses a high-precision autofocusing mechanism. However, it may have difficulty focusing on the following:

- Very shiny subjects such as a mirror or car body
- Fast moving subjects
- Subjects photographed through glass
- Subjects that do not reflect well, such as hair or fur
- Subjects with no substance, such as smoke or flames
- Dark subjects
- Subjects with little or no contrast between the subject and the background (such as subjects dressed in the same color as the background)
- Shots where another high-contrast object (not the subject) is close to the AF frame and is either closer or further away than your subject (such as a shot of someone against a background with strongly contrasting elements)

For such subjects use AF/AE lock (→p.30).
**Taking Pictures (AUTO Mode)**

**Adjusting the shot composition**

Select the LCD monitor display.
Press DISP/BACK to change the LCD monitor display.

![Image](image_url)

Position the main subject at the intersection of two lines in this frame or align one of the horizontal lines with the horizon. Use this frame as a guide to the subject’s size and the balance of the shot while composing a shot.

**MEMO**
Always use AF/AE lock when composing a shot. The image may be out of focus if AF/AE lock is not used.

**Best framing**

Position the main subject at the intersection of two lines in this frame or align one of the horizontal lines with the horizon. Use this frame as a guide to the subject’s size and the balance of the shot while composing a shot.

![Image](image_url)
Viewing the Images

Play back your images to check them. For important photographs, always take a test shot and view the image to make sure that the camera is working normally.

Setting the camera to Playback mode

Press \( \text{ DISP } \) during shooting to change to Playback mode.

When the camera is off, press \( \text{ DISP } \) for about 1 second to turn the camera on in Playback mode.

MEMO

- When pressing \( \text{ DISP } \), the last image shot appears on the LCD monitor.
- When playing back images shot with a camera other than FinePix Z5fd, “ ” (present icon) appears on the LCD monitor.

CAUTION Still images viewable on FinePix Z5fd

This camera will display still images recorded on FinePix Z5fd or still images (excluding some uncompressed images) recorded on any FUJIFILM digital camera that supports xD-Picture Cards. Clear playback or playback zooming may not be possible for still images shot on cameras other than FinePix Z5fd.

Select the LCD monitor display.

Press DISP/BACK during Playback mode to change the LCD monitor display.

Select the LCD monitor display.
Press DISP/BACK during Playback mode to change the LCD monitor display.
Viewing the Images

**Single-frame playback**

To select the required image:
- Press "<" for last image
- Press ">" for next image

**Intelligent Face Detection**

When playing back images taken with Intelligent Face Detection (→p.28) ( appears on the LCD monitor), press (Intelligent Face Detection). A frame appears around the faces that were detected by FinePix Z5fd. Press (Intelligent Face Detection) to alternate the detected face. For images shot with a camera other than FinePix Z5fd, the frame does not appear.

**Selecting images**

To select images on the thumbnail lists screen, hold down "<" or ">" for 1 second during playback. When releasing "<" or ">", camera returns to single-frame playback.

**Playback zoom**

1. **Zoom in / Zoom out.**
   - To zoom in an image during single-frame playback:
     - W button (Zoom out)
     - T button (Zoom in)

2. **Display another part of the image.**
   - Press W or T to zoom in or out on an image.
   - Press ▲, ▼, ◀, or ▶ to display another part of the image.
Zoom scales

<table>
<thead>
<tr>
<th>Quality mode</th>
<th>Max. zoom scale</th>
</tr>
</thead>
<tbody>
<tr>
<td>6M (2848 × 2136 pixels)</td>
<td>Approx. 4.5x</td>
</tr>
<tr>
<td>3:2 (3024 × 2016 pixels)</td>
<td>Approx. 4.7x</td>
</tr>
<tr>
<td>3M (2048 × 1536 pixels)</td>
<td>Approx. 3.2x</td>
</tr>
<tr>
<td>2M (1600 × 1200 pixels)</td>
<td>Approx. 2.5x</td>
</tr>
</tbody>
</table>

MEMO
Pressing DISP/BACK cancels playback zoom.

Intelligent Face Detection

For images taken with Intelligent Face Detection (→p.28) (_faces appear on the LCD monitor), the displayed face switches each time you press 🗳 (Intelligent Face Detection). Press the W button (zoom out) or T button (zoom in) to display the selected face zoomed in or out. Press ▲, ▼, ◀, or ▶ to display another part of the image.

Multi-frame playback

Multi-frame playback screen (9 frames) appears on the LCD monitor. Select required frame from the 9 frames.

1. Press ▲, ▼, ◀, or ▶ to move the cursor (colored frame) to the selecting frame. Press ▲ or ▼ repeatedly to jump to the next page.

2. Press MENU/OK to enlarge the image.

Continued ➔
Viewing the Images

**Sorting by date**

In sorting by date mode, you can view all images taken on the same day.

1. Press ▲, ▼, ◀, or ▶ to move the cursor (colored frame) to the selecting frame.

2. Press MENU/OK to enlarge the image.

---

**Selecting the date**

1. Press ▲, ▼, ◀, or ▶ to move the cursor (colored frame) to ◀ on the upper left frame.

2. Press ◀ to display the selecting date.

3. Press ▲ or ▼ to move the cursor (colored frame) to select the date. Press ▲ or ▼ repeatedly to jump to the next page.

4. Press ▶.
Erasing the Images/Movies

Use this mode to erase unnecessary images or movies to have ample free space on the xD-Picture Card or internal memory. Your camera calls images “frames”.

Using the erase button (onDelete) / 

Pressing (onDelete) erases images easily.

1. Press ◀ or ▶ to select the erasing image.
2. Press onDelete (▲).
3. Press ◀ or ▶ to select OK.
4. Press MENU/OK to erase the displayed image.

Erasing from the PLAYBACK MENU

1. Press MENU/OK to open the PLAYBACK MENU.
2. Press ▲ or ▼ to select onDelete ERASE.
3. Press ▶.

Continued ➔
Erasing the Images/Movies

To erase another frame (file), repeat above steps.

When erasing frames (files) is completed, press DISP/BACK.

CAUTION
Pressing MENU/OK repeatedly erases consecutive frames (files). Take care not to erase a frame (file) by mistake.

Erasing one frame at a time (FRAME)

1. Press ◀ or ▶ to select the erasing frame (file).
2. Press MENU/OK to erase the currently displayed frame (file).

MEMO
To erase another frame (file), repeat above steps. When erasing frames (files) is completed, press DISP/BACK.

CAUTION
Pressing MENU/OK repeatedly erases consecutive frames (files). Take care not to erase a frame (file) by mistake.
Erasing all frames (ALL FRAMES)

Press MENU/OK to erase all the frames (files).

MEMO

Press DISP/BACK to cancel erasing of all the frames (files). Some unprotected frames (files) will be left unerased.

MEMO

- When using an xD-Picture Card, the images in the xD-Picture Card are erased. When not using an xD-Picture Card, the images in the internal memory are erased.
- Protected frames (files) cannot be erased. Unprotect the frames (files) before erasing them (→p.79).
- If “DPOF SPECIFIED. ERASE OK?” or “DPOF SPECIFIED. ERASE ALL OK?” appears, press MENU/OK again to erase the frames (files).

CAUTION

Erased frames (files) cannot be recovered. Back up important frames (files) onto your PC or another media.
Using the Shooting Functions — Procedure of Setting

Specify the camera settings for taking pictures to get the best result. A general guide is given below.

1 Select the Shooting mode.
Set the Shooting mode from the menu. The camera settings are tailored to the scene being shot.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>This is the easiest mode for taking pictures (→p.44).</td>
</tr>
<tr>
<td>/ / / / / / / / OFF / TEXT</td>
<td>Select the best Shooting mode for the scene being shot (→p.44-47).</td>
</tr>
<tr>
<td></td>
<td>Used for selecting a fast shutter speed that reduces camera shake and moving-subject blurring (→p.47).</td>
</tr>
</tbody>
</table>

2 Specify the photography settings.
Pressing buttons or selecting menu allows you to specify photography functions. You can obtain the best result for shooting.

<table>
<thead>
<tr>
<th>Specifying functions using buttons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intelligent Face Detection</td>
</tr>
<tr>
<td>Macro</td>
</tr>
<tr>
<td>Flash</td>
</tr>
<tr>
<td>Self-timer</td>
</tr>
<tr>
<td>Picture stabilization (Anti-blur)</td>
</tr>
<tr>
<td>Natural &amp;</td>
</tr>
</tbody>
</table>

Intelligent Face Detection button
Macro button
Flash button
Self-timer button
Picture stabilization (Anti-blur)/Natural &
Specifying functions using \textit{F}-MODE MENU (\textit{F} button)

<table>
<thead>
<tr>
<th>ISO</th>
<th>Use to specify required sensitivity setting (\textit{\textbullet\textendash p.57}).</th>
</tr>
</thead>
<tbody>
<tr>
<td>QUALITY</td>
<td>Use to specify required image size (\textit{\textbullet\textendash p.58}).</td>
</tr>
<tr>
<td>FinePix COLOR</td>
<td>Use to specify required color tone (\textit{\textbullet\textendash p.59}).</td>
</tr>
</tbody>
</table>

Specifying functions using SHOOTING MENU (MENU/OK button)

| EXP. COMPENSATION | Use this setting to obtain the correct exposure (only \textbullet) (\textit{\textbullet\textendash p.60}). |
| WB WHITE BALANCE | Use to adjust the color tone (only \textbullet) (\textit{\textbullet\textendash p.61}). |
| HIGH-SPEED SHOOTING | Use to focus the shot quickly (\textit{\textbullet\textendash p.61}). |
| CONTINUOUS | Use to take pictures continuously (\textit{\textbullet\textendash p.62}). |
| AF MODE | Use to specify focusing mode (only \textbullet) (\textit{\textbullet\textendash p.64}). |
Setting the Shooting Mode

You can select the most suitable setting according to the subject by selecting one of the Shooting modes.

**Setting  Picture stabilization (Anti-blur) and NATURAL & 🌅**

Press the “ ” ( ) button to set  Picture stabilization (Anti-blur) or NATURAL & 🌅.

The setting switches with each press of the button.

You can select  Picture stabilization (Anti-blur) and NATURAL & 🌅 from the Shooting modes on the shooting menu ( ➔ p.43)

When  Picture stabilization (Anti-blur) or NATURAL & 🌅 is selected on the shooting menu, pressing the “ ” ( ) button switches between these two modes.

**Picture stabilization (Anti-blur)**

This mode can reduce both camera blur and subject blur by increasing the shutter speed.

**NATURAL & 🌅**

This mode shoots 2 images continuously without flash and with flash. Shooting with flash allows you to take a picture of a main subject brightly. Shooting without flash produces beautiful images that retain the natural ambience. This mode is useful for shooting 2 different types of pictures at the same time.

When pressing the shutter button, first picture is taken without flash and next picture is taken with flash. Always 2 pictures are taken per 1 shot. Do not move the camera until the shooting ended.

**MEMO**

This mode helps to avoid failed shots that may occur when using other Shooting modes when taking a picture against the sun, etc.

**CHECK**

Flash fires automatically. Do not use this mode at situations where the flash cannot be used.

**CAUTION**

- When there is insufficient space on the xD-Picture Card or internal memory for 2 shots, this mode cannot be set.
- Continuous shooting is disabled when setting 🌅.
Setting a Shooting mode suited to the scene

1. Set the Mode switch to ".

MEMO
- See p.50 for information on the available flash modes.
- When anything other than AUTO, "", "", and "" in the " SHOOTING MODE is selected, " "-CHROME (→ p.59) cannot be set.
- When anything other than " in the " SHOOTING MODE is selected, only AUTO can be selected for the ISO (sensitivity) setting.

2. Press MENU/OK to open the menu.

3. Press ▲ or ▼ to select the " SHOOTING MODE.

4. Press ▶.

5. Press ▲ or ▼ to select the setting.

6. Press MENU/OK to confirm the setting.

Continued
**AUTO**

This is the easiest mode for providing crisp and clear shots.
Use this mode for ordinary photography.
Camera specifies all setting other than \textit{F-MODE} (Quality and FinePix COLOR) automatically.

**NATURAL LIGHT**

This mode produces beautiful images that retain the natural ambience when shots are taken in low-light conditions.
This mode is also ideal for shooting indoor or situations where the flash cannot be used.
Camera sets the high-sensitivity setting when selecting the Natural light mode. This mode is effective for reducing camera shake and moving-subject blurring when taking pictures in low-light conditions.

\checkmark **CHECK**

Flash cannot be used in the Natural light mode.

**PORTRAIT**

Use this mode for photography to get beautiful skin tones and soft overall tone.

**LANDSCAPE**

Use this mode for shooting scenery in daylight and provides crisp, clear shots of scenery such as buildings and mountains.

\checkmark **CHECK**

Flash cannot be used in the Landscape mode.

**NATURAL & $$\downarrow$$**

Use this mode to shoot the same scene with and without flash.
- You can also select this mode by pressing the "$$\downarrow$$" ($$\downarrow$$) button.
- $$\downarrow$$ Natural & $$\downarrow$$ (\textit{p}.42)
**SPORT**

Use this mode to take pictures of a moving subject. It gives priority to faster shutter speeds.

✔ **CHECK**

When setting SPORT mode, the camera sets to High-speed shooting mode (→ p.61) automatically.

**NIGHT**

Use this mode for shooting evening and night scenes.

A picture is taken with a slow shutter of up to 4 seconds.

✔ **CHECK**

We recommend using a tripod to prevent camera shake. Because a picture is taken with a slow shutter.

**FIREWORKS**

Use this mode to shoot fireworks. It is effective for taking more vivid shots of fireworks with a slow shutter.

✔ **CHECK**

- Flash cannot be used in the Fireworks mode.
- Shutter speed setting: 1/2 sec. to 4 sec.
- We recommend using a tripod to prevent camera shake in the Fireworks mode.

---

**Selecting the exposure time setting**

Press ◄ or ► to select the exposure time.
Setting the Shooting Mode

### SUNSET
Use this mode to shoot sunset, making the colors more vivid.

![Sunset Image]

### SNOW
Use this mode to prevent darkening images and provide crisp, clear shots, when shooting at snowy scene where the whole screen appears white.

![Snow Image]

### BEACH
Use this mode to prevent darkening images and provide crisp, clear shots, when shooting at beach under strong sunlight.

![Beach Image]

### MUSEUM
Use this mode for taking pictures in places such as museum where the use of flash and making an operation sound and a shutter sound are restricted. The flash mode is set to suppressed flash and the operation sound, shutter sound, and illumination lamp are disabled.

#### MEMO
Check whether photography is permitted before using this mode.

### PARTY
Use this mode for shooting at indoor wedding and party. This mode produces beautiful images that retain the natural ambience when shots are taken in low-light conditions.

![Party Image]
FLOWER
Use this mode to take clear close-up shots when zooming up a flower. It is effective for taking more vivid shots of flower petal.

CHECK
- Flash cannot be used in the Flower mode.
- Focal range
  Wide angle:
  Approx. 8 cm to 2 m (3.1 in. to 6.6 ft.)
  Telephoto:
  Approx. 45 cm to 2 m (17.7 in. to 6.6 ft.)

TEXT
Use this mode to shoot documents and white board. It is effective for taking clearer shots of letters.

CHECK
- Focal range
  Wide angle:
  Approx. 8 cm to 2 m (3.1 in. to 6.6 ft.)
  Telephoto:
  Approx. 45 cm to 2 m (17.7 in. to 6.6 ft.)

ANTI-BLUR (Picture stabilization)
Use this mode to select a fast shutter speed that reduces camera shake and moving-subject blurring. You can also select this mode by pressing the “” button (p.42).

MANUAL
Set the Photography functions to manual to easily control yourself.
Photography functions:
- EXP. COMPENSATION (p.60)
- WHITE BALANCE (p.61)
- AF MODE (p.64)
Macro (Close-up)

Use this mode to take close-up shots.

**Available Shooting modes:** Manual, AUTO, 

Press \( \) to select Macro mode.
Press \( \) again to cancel Macro mode.

\( \) appears on the LCD monitor indicating that you can take close-up shots.

**CHECK**

- Focal range
  - Wide angle: Approx. 8 cm to 80 cm (3.1 in. to 2.6 ft.)
  - Telephoto: Approx. 45 cm to 80 cm (1.5 ft. to 2.6 ft.)
- Effective flash range
  - Approx. 30 cm to 80 cm (1.0 ft. to 2.6 ft.)

**MEMO**

- We recommend using a tripod to prevent camera shake in Macro mode.
- Any of the following cancels Macro mode:
  - Changing the Shooting mode setting
  - Turning the camera off
- Even if the \( \) AF MODE is set to \( \) MULTI (→p.64), the camera focuses near the center of the LCD monitor.
Setting the Flash (Intelligent Flash)

Flash photography is useful for taking pictures at night or indoor dark locations. Choose from 6 flash modes according to the type of shot. See p.50 for information on the available Photography modes.

**MEMO What is Intelligent Flash?**
The Intelligent Flash feature instantly determines the subject’s position, distance from the camera, exposure, etc., and automatically adjusts the camera settings to the optimal flash volume and sensitivity for the scene. Even dimly lit indoor scenes can be shot beautifully, just as they appear, without subjects being washed out or losing background details.
The Intelligent Flash feature is always used when shooting with flash.

![Image of camera with flash icon]

**RED EYE REDUCTION**
This mode is suitable for shooting portraits in low-light conditions. Use this mode to minimize red-eye (eyes appear in red in the finished photo).

**MEMO Red-eye effect**
When using the flash to take a picture of people in low-light conditions, their eyes sometimes appear red in the picture. This is caused by the light of the flash reflecting off the inside of the eye.

![Image of person with red eyes]

**FORCED FLASH**
Use this mode in backlit scenes, or to get the correct colors when taking a picture under bright lighting. In this mode, the flash fires in bright as well as dark conditions.

**SUPPRESSED FLASH**
This mode is suitable for situations where the flash cannot be used. In dark conditions, we recommend using a tripod. Any time, flash does not fire.

**AUTO Auto flash (not displayed)**
Use this mode for ordinary photography. The flash fires as required by the shooting conditions.
Setting the Flash (Intelligent Flash)

$\Rightarrow$ SLOW SYNCHRO, RED EYE & SLOW

This mode allows you to take pictures of people at night that clearly show both your subjects and the night time backdrop. Always use a tripod in this mode. Using $\Rightarrow$ synchronizes Red-eye reduction mode. Using $\Rightarrow$ selects slow shutter speeds of up to 4 seconds.

⚠️ CAUTION

In bright scenes, overexposure may occur.

✅ CHECK

Effective flash range (:auto)
Wide-angle:
Approx. 60 cm to 3.5 m (2.0 ft. to 11.5 ft.)
Telephoto:
Approx. 60 cm to 2.8 m (2.0 ft. to 9.2 ft.)
If you take pictures outside of the effective flash range, the image may appear dark even if the flash is used.

⚠️ CAUTION Notes on using flash

- If pressing the shutter button while the flash is charging (indicator lamp blinking orange), the picture will be taken without the flash (when using AUTO and $\Rightarrow$).
- The flash charging time may increase when the battery is low on charge.
- When taking a picture using the flash, the image may disappear and go dark briefly due to flash charging. The indicator lamp blinks orange during charging.
- The flash fires several times (pre-flashes and the main flash). Do not move the camera until the picture is taken.

CHECK

Self-Timer

The self-timer is used in situations where the photographer is included in the shot.

Available Shooting modes: All

Setting self-timer

The self-timer setting changes each time you press \( \bigcirc \) (\( \blacktriangleleft \)).

The last displayed setting is the selected mode.

- \( \bigcirc \): The picture is taken after 10 seconds.
- \( \blacktriangleleft \): The picture is taken after 2 seconds.

Intelligent Face Detection

Using Intelligent Face Detection with the self-timer allows the camera to detect the faces of subjects in the picture and automatically bring them into focus, without the need for manual focusing beforehand. This is convenient when taking a self portrait.

Taking pictures using self-timer

1. Press the shutter button down halfway to focus on the subject and press the shutter button fully.

   Halfway pressed

   Fully pressed

Pressing the shutter button down halfway that focuses on the subject. Without releasing the shutter button, press the button all the way down (fully pressed) to start the self-timer.

Continued ➤
2 Take pictures in selected time.

A picture is taken after the self-timer lamp changes from lit to blinking (only blinks with the 2-second self-timer).

A countdown appears on the LCD monitor indicating the time remaining until the picture is taken.

Using the 2-second self-timer

This is useful when you worry about camera shake even if attaching the camera on a tripod.

MEMO

- To stop the self-timer, once it has started running, press DISP/BACK.
- Any of the following cancels the self-timer setting:
  - Completing the shooting
  - Changing the Photography mode setting
  - Setting the camera to Playback mode
  - Turning the camera off
- Take care not to stand in front of the lens when pressing the shutter button as this can prevent the correct focus or brightness (exposure) from being achieved.
Increasing Monitor Brightness

This is useful when checking the shot composition for dimly lit scenes, or bright scenes such as outdoor shots.

**Increasing the LCD monitor brightness**

Press ☀ (▲) to display the LCD monitor brightly. Press ☀ (▲) again to return to normal LCD monitor brightness.

MEMO

- This function is automatically canceled after each shot.
- When this function is active, it will increase the amount of speckling in images on the LCD monitor. This is normal and does not affect the photographed image.
- This function is purely for checking the composition of your shot. It does not increase the brightness of the image.
- Even if you increase the brightness in low-light conditions, you cannot check the subject.
- The color tones may vary depending on the subjects.

* lights up on the LCD monitor when the function is working.
Using $F$-MODE MENU (Shooting)/SHOOTING MENU

Use the $F$-MODE MENU/SHOOTING MENU to adjust image quality or focus. You can take pictures in a wide range of conditions.

Setting the $F$-MODE MENU (Shooting)

1. Press $F$ to open the $F$-MODE MENU.
2. Press ▲ or ▼ to select the menu.
3. Press ►.
4. Press ▲ or ▼ to change the setting.
5. Press MENU/OK to confirm the setting.

Setting the SHOOTING MENU

1. Press MENU/OK to open the SHOOTING MENU.
2. Press ▲ or ▼ to select the menu.
3. Press ►.
4. Press ▲ or ▼ to change the setting.
5. Press MENU/OK to confirm the setting.

</tbody>
</table>
The options available in the SHOOTING MENU vary depending on whether the mode is selected.

- AUTO, 

- FREE
Changing the sensitivity setting (ISO ISO)

Use this menu to specify required sensitivity setting of the ambient light around the subject. The larger value of the sensitivity, the higher sensitivity is obtained. The higher sensitivity settings will allow you to take pictures in darker locations.

☑ CHECK

Settings
AUTO/1600/800/400/200/100
Selecting AUTO as the sensitivity setting, the camera selects the best sensitivity setting for the subject’s brightness.

The selected sensitivity setting appears on the LCD monitor when the sensitivity setting is set to another setting excluding AUTO.

MEMO

When anything other than MANUAL in the Photography mode is selected, only AUTO can be selected for the ISO (sensitivity) setting.

CAUTION

- Although higher sensitivity settings will allow you to take pictures in darker locations, they will also increase the amount of speckling in your images. Choose the sensitivity setting that best suits the conditions.
- Only if the sensitivity setting is set to “1600” and the camera is turned off, the setting is not retained. When turning the camera on again, the setting has been set to AUTO. Select “1600” before taking pictures with “1600” sensitivity setting.

Continued ➔
Changing the quality setting  
(QUALITY)

Use this menu to specify the image size (number of recorded pixels).
Select the quality setting for the scene being shot.

### Quality settings in Photography mode

<table>
<thead>
<tr>
<th>Quality mode</th>
<th>Sample uses</th>
</tr>
</thead>
<tbody>
<tr>
<td>6M F (2848 × 2136)</td>
<td>Printing at up to 10R (25.4 × 30.5 cm/10 × 12 in.) / A4 size</td>
</tr>
<tr>
<td>6M N (2848 × 2136)</td>
<td>For better quality, select 6M F</td>
</tr>
<tr>
<td>3:2 (3024 × 2016)</td>
<td>Printing at up to 6R (15.2 × 20.3 cm/6 × 8 in.) / A5 size</td>
</tr>
<tr>
<td>3M (2048 × 1536)</td>
<td>Printing at up to 4R (10.2 × 15.2 cm/4 × 6 in.) / A6 size</td>
</tr>
<tr>
<td>2M (1600 × 1200)</td>
<td></td>
</tr>
<tr>
<td>8M (640 × 480)</td>
<td>To use for e-mail or web site</td>
</tr>
</tbody>
</table>

Normal shooting provides an aspect ratio of 4:3 and 3:2 shooting provides an aspect ratio of 3:2 (same aspect ratio as 35 mm film and post card).

**MEMO**

- The bigger the number of recorded pixels, the better the image quality becomes. As the number of recorded pixels becomes smaller, you will be able to record more frames to an xD-Picture Card.
- The quality setting is retained even when the camera is turned off or the mode setting is changed.
- When changing the quality setting, the number of available frames also changes (→p.147). The numbers to the right of setting show the number of available frames.
Changing the FinePix COLOR setting (FinePix COLOR)

Use this menu to specify required color tone. It is effective for taking vivid shots or black and white shots.

CHECK

**FinePix COLOR settings**

<table>
<thead>
<tr>
<th><strong>F-STD</strong>-STANDARD</th>
<th>The contrast and color saturation are set to standard. Use this mode for normal photography.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>F-CHROME</strong></td>
<td>The contrast and color saturation are set to high. This mode is effective for taking more vivid shots of subjects such as scenery (blue sky and greenery) and flowers.</td>
</tr>
<tr>
<td><strong>F-B&amp;W</strong></td>
<td>This mode converts the colors in the photographed image to black and white.</td>
</tr>
</tbody>
</table>

When setting **F-CHROME** or **F-B&W**, the icon appears on the LCD monitor.

CAUTION

When anything other than AUTO, MANUAL, NATURAL LIGHT, NATURAL & , and Picture stabilization (Anti-blur) in the SHOOTING MODE is selected, does not appear on the LCD monitor.

MEMO

- The FinePix COLOR setting is retained even when the camera is off or the mode setting is changed.
- **F-CHROME** may have little visible effect with some subjects or the scene being shot. You may not be able to see any difference on the LCD monitor.
Adjusting exposure compensation

Available Shooting mode: \( \text{ modes} \) (\( \Rightarrow \) p.47)

Use this menu for shots to get the correct brightness (exposure), such as shots with extremely high contrast between the subject and the background.

CHECK

- Compensation range: –2 EV to +2 EV (13 steps in 1/3 EV increments)
- Explanation of Terms “EV” (\( \Rightarrow \) p.149)

Guide to compensation

- Backlit portraits: +2/3 EV to +1 2/3 EV
- Very bright scenes (such as snowfields) and highly reflective subjects: +1 EV
- Shots made up predominantly of sky: +1 EV
- Spotlit subjects, particularly against dark backgrounds: –2/3 EV
- Scenes with low reflectivity, such as shots of pine trees or dark foliage: –2/3 EV

MEMO

- The exposure compensation setting is retained when the camera is turned off (\( \text{ icon appears}). Set the exposure value to “±0 EV” unless compensation is required.
- Any of the following disables exposure compensation:
  - Using the flash in AUTO or \( \text{ mode}
  - Shooting dark scenes in \( \text{ mode}
Adjusting color balance
(WB WHITE BALANCE)

Available Shooting mode: 

Adjust the color balance based on white to suit the color of the ambient light around the subject.

AUTO: Automatic adjustment
*: Shooting outdoors in good weather
*: Shooting in shade
*: Shooting under Daylight fluorescent lamps
*: Shooting under Warm White fluorescent lamps
*: Shooting under Cool White fluorescent lamps
*: Shooting in incandescent light

**MEMO**
- In AUTO mode, the correct white balance may not be achieved for subjects such as close-ups of people’s faces and pictures taken under a special light source. Select the correct white balance for the light source.
- When the flash fires, the white balance setting for the flash is used. Consequently, to achieve a particular effect, the flash mode should be set to Suppressed flash.
- The color tones may vary depending on the shooting conditions (light source, etc.).
- We recommend playing back images after shooting to check the color tones (white balance).
- Explanation of Terms “White Balance” (p.149)

Focusing the shot quickly
(HIGH-SPEED SHOOTING)

Available Shooting modes:

Use this mode to reduce the time required for focusing when pressing the shutter button down halfway. It is useful to avoid missing snapshot opportunities.

**CAUTION**
The LCD MODE function on the SET-UP menu cannot be set in this mode (p.100).

**MEMO**
- The available shooting distance is from about 1 m (3.3 ft.) to infinity.
- When taking pictures while the High-speed shooting mode is set to ON, the battery will run down more quickly.

**CHECK**
When setting Sport mode, the camera sets to High-speed shooting mode automatically.

Continued
Taking pictures continuously (CONTINUOUS)

Use this mode to take pictures of a moving subject.

- **H**: LONG PERIOD continuous shooting
- **A**: FINAL 3 continuous shooting
- **Q**: TOP 3 continuous shooting

**CAUTION**

- As long as the shutter button is held down, the camera will continue to take pictures.
- Number of available frames is limited depending on the available space on the xD-Picture Card or internal memory.
- In TOP 3 and FINAL 3 continuous shooting mode, the focus is determined in the first frame and cannot be changed in mid-sequence.
- The exposure is determined in the first frame, but in LONG PERIOD continuous shooting the exposure is adjusted for the scene being shot.
- The speed of continuous shooting varies depending on the shutter speed.
- The flash cannot be used as the flash mode is set to Suppressed flash (p.49). However, if you switch back to the normal shooting setting, the flash mode resets to what it was before you selected continuous shooting.
- For TOP 3 and FINAL 3 continuous shooting, the results are always displayed after you shoot. Note that pictures taken using LONG PERIOD continuous shooting are recorded without displaying the results.
- Only 1 frame can be shot when using the FINAL 3 or LONG PERIOD continuous shooting mode and Self-timer mode together.
- Continuous shooting cannot be selected in NATURAL & setting.
- Recording times may be longer for files shot with TOP 3 continuous shooting or FINAL 3 continuous shooting.

**TOP 3 continuous shooting**

Available Shooting modes:
All (except for (p.44 – 47)

Shooting continues as long as holding the shutter button down. This mode shoots up to 3 frames (max. 2.2 frames/sec.).
**FINAL 3 continuous shooting**

Available Shooting modes:
All (except for "") (→p.44 – 47)

Shooting continues as long as holding the shutter button down. This mode shoots up to 40 times (max. 2.2 frames/sec.). The camera records the final 3 frames shot when you release the shutter button.

![Diagram of FINAL 3 continuous shooting]

**LONG PERIOD continuous shooting**

Available Shooting modes:
All (except for "") (→p.44 – 47)

Shooting continues as long as holding the shutter button down. This mode shoots up to xD-Picture Card or internal memory end.

![Diagram of LONG PERIOD continuous shooting]

Continued ➔
**Specifying focusing mode (AF MODE)**

**Available Shooting mode:**  
*SHOOTING MENU* (→p.47)  
*(When Intelligent Face Detection is turned OFF)*

Use this mode to specify focusing mode that best suits the subject.

- **CENTER**
  - The camera focuses on the center of the LCD monitor. Use this setting when taking pictures with AF/AE lock (→p.30).

- **MULTI**
  - When pressing the shutter button down halfway, the camera recognizes any strongly contrasting subject near the center of the LCD monitor and displays the AF frame over subject in focus.

  ![Halfway pressed](Image)

  ![AF frame](Image)

**CAUTION**

When taking pictures in Macro mode, the camera focuses on the center of the LCD monitor.

**MEMO**

When the AF frame does not appear in the focusing position, select **CENTER** in the AF mode and use AF/AE lock (→p.30).
Sending and receiving images (IR COMMUNICATION)

You can send photographed images to a FUJIFILM digital camera, other devices with high-speed infrared transmission capability, or any other mobile device with the IrSimple function. You can also receive photographed images from a FUJIFILM digital camera, another device with high-speed infrared transmission capability, or another mobile device with the IrSimpleShot™ (IrSS™) function.

Sending image data

Sending image data to a FUJIFILM digital camera is shown as an example here. You can send the data to another device in the same way.

1. Turn the camera on.
2. Press ◄ or ► to select the sending frame (file).
3. Point the infrared port on the transmitting camera directly at the infrared port on the receiving camera (→p.12). Transmission distance is about 5 to 20 cm (2 to 7.9 in.) within approx. 15°.

F -MODE MENU (Playback)

① Press ▶ to set the camera to Playback mode (→p.33).
② Press F to open the F -MODE MENU.
③ Press ▲ or ▼ to select (IR) COMMUNICATION.
④ Press F.
CAUTION

- Make sure the receiving camera is turned on when transmitting image data.
- Movie images cannot be transmitted.

CHECK

You can send the image data by simply pressing $F$ three times.

Receiving the image data

Receiving the image data from a FUJIFILM digital camera is shown as an example here. You can receive data from another device in the same way.

1. Turn the camera on.
2. Press $<$ or $>$ to select the sending frame (file).
3. Point the camera’s infrared port towards the front of the camera’s infrared port (→p.12). Transmission distance is about 5 to 20 cm (2 to 7.9 in.) within approx. 15°.

Continued ➞
You can receive image data by simply pressing buttons as the order below.

\[ F \rightarrow F \rightarrow \text{MENU/OK} \]

**CHECK**

Press MENU/OK to begin transmission. When transmission is completed, “DATA RECEIVED” will appear on the LCD monitor.

**CAUTION**

- Movie images cannot be transmitted.
- Image data may be compressed when transmitted.
- If “COMMUNICATION ERROR”, “CANNOT BE TRANSMITTED”, or “CANNOT BE RECEIVED” appears, press \( F \) or MENU/OK to retransmit the image data, or press DISP/BACK to cancel transmitting.
- Do not place anything between the transmitting and receiving device.
- Leaving the camera in direct sunlight or directly under fluorescent lighting may prevent successful data transfer.
- Successful transfer may not be possible when transmitting near infrared transmission devices (such as the remote controller of TV or VCR) or devices that generate electrical noise.
- Correctly aim the infrared port towards the front of the device or camera’s infrared port during image data transmission.

**MEMO**

When playing back an image received from another camera, \( \text{present} \) (present icon) will appear in the LCD monitor.
Transmitting and saving blog images

(Blog TRIMMING FOR BLOG)

You can change the pictures you take to a smaller size and then transmit or save them. This function is perfect when you want to post your pictures on a blog or other online forum. It is also possible to trim images before transmitting or saving them.

**MEMO**

The sizes available for blog images are “640 × 480” or “720 × 480” (when shot at 3:2).

![MODE MENU](image)

1. Press to set the camera to Playback mode (p.33).
2. Press to open the MODE MENU.
3. Select TRIMMING FOR BLOG.
4. The Transmit/Save screen appears.

**MEMO Trimming Images**

You can trim out the desired area of an image before transmitting or saving it.
1. Zoom the image in or out with the W button (zoom out) or T button (zoom in).
2. Press ▲▼◄► to move the screen to the area you want to trim out.
3. Press MENU/OK to confirm the setting and return to the Transmit/Save screen.

**Transmitting blog images**

You can resize images to VGA and then transmit them to a device that supports the IrSimple function.

Continued ➤
Saving blog images

① Select the frame (file) to save.

② Press MENU/OK to save the image.

☑ CHECK
- Saved blog images have filenames that start with “BLOG” when they are imported to a PC or similar device.
- When saved blog images are played back, a appears on the screen and the images are surrounded by a black frame.

⚠ CAUTION
Saved blog images cannot be rotated or trimmed.

⚠ MEMO
Images rotated with IMAGE ROTATE are transmitted or saved in their rotated state.

Setting automatic playback (SLIDE SHOW)

Use this mode to play back photographed images continuously. You can select playback interval and type of image transition.

① Press to set the camera to Playback mode (p.33).

② Press to open the MODE MENU.

③ Press or to select SLIDE SHOW.

④ Press .
Advanced Features — Playback

MEMO

- To interrupt SLIDE SHOW, press MENU/OK.
- Press \( \uparrow \) or \( \downarrow \) to advance or go back through the images when selecting NORMAL or FADE-IN.
- The Auto power off function (\( \rightarrow \)p.102) does not operate during a slide show.
- Movie starts automatically. When the movie ends, the playback function moves it on.
- Press DISP/BACK once during playback to display on-screen help.

Intelligent Face Detection

The camera plays back the image taken with Intelligent Face Detection (\( \rightarrow \)p.28) zoomed in on the detected face when NORMAL or FADE-IN is selected.

DPOF set frame

(\( \text{PRINT ORDER (DPOF)} \))

You can specify the image, number of prints, with or without date of printing with a DPOF-compatible printer.

1. Press \( \text{Playback} \) to set the camera to Playback mode (\( \rightarrow \)p.33).

2. Press \( \text{Mode Menu} \) to open the \( \text{Mode Menu} \).

3. Press \( \uparrow \) or \( \downarrow \) to select \( \text{Print Order (DPOF)} \) and press MENU/OK.

4. Press \( \uparrow \).

5. Press \( \uparrow \) or \( \downarrow \) to select WITH DATE, WITHOUT DATE, or RESET ALL.

Continued \( \rightarrow \)
WITH DATE / WITHOUT DATE

Selecting WITH DATE ▶ appears on the LCD monitor and the date will be imprinted on your prints.

WITH DATE ▶: The date will be imprinted on your prints.

WITHOUT DATE: The date will not be imprinted on your prints.

RESET ALL: All DPOF settings will be canceled.

To specify more DPOF settings, repeat steps 1 and 2.

1. Press ◄ or ► to display the frame (file) for specifying DPOF setting.

2. Press ▲ or ▼ to set a value.
   Up to 99 sheets are printed.
   For frames (files) that you do not want printed, set the number of prints to 0 (zero).

3. Always press MENU/OK after the settings are completed.
   Pressing DISP/BACK cancels those settings.

4. Press MENU/OK again.
   The total number of prints appears on the LCD monitor.

MEMO Canceling DPOF setting

1. Press ► to open the ◄ -MODE MENU and press ▲ or ▼ to select ◄ PRINT ORDER (DPOF).
2. Press ►.
3. Press ▲ or ▼ to select WITH DATE ▶ or WITHOUT DATE and press MENU/OK.
4. Press ▼ or ► to select the frame (file) with the DPOF setting you want to cancel.
5. Press ▼ to set the number of prints to 0 (zero).

To cancel the DPOF setting for another frame (file), repeat steps 4 and 5.
Always press MENU/OK to complete the settings.

RESET ALL (➔p.74)
MEMO

- When DPOF settings were specified on another camera.

When the data includes a frame (file) with DPOF settings that were specified on another camera, “RESET DPOF OK?” appears.
Pressing MENU/OK erases all of the DPOF settings already specified for each frame (file). Specify the DPOF setting for each frame (file) again.
- Prints of up to 999 frames (files) can be ordered on the same xD-Picture Card.
- DPOF settings cannot be specified for movies.

CAUTION

- Pressing DISP/BACK while choosing settings will cancel all current settings. If there were previous DPOF settings, only the modifications are canceled.
- When selecting the WITH DATE setting, the date is imprinted on your shots using the Print Service or a DPOF-compatible printer (depending on the printer specifications, the date may not be printed in some cases).
- Images photographed with a camera other than FinePix Z5fd may not be specified DPOF settings.

Intelligent Face Detection

When setting images taken with Intelligent Face Detection (→p.28) (☆ appears on the LCD monitor), if you press ☆ (Intelligent Face Detection), frames appear around the faces detected by the camera, and the number of frames is set as the number of prints. This allows you to easily prepare the same number of prints as the number of people detected by the camera.
In addition, you can adjust the number of prints by pressing ▲ or ▼. To reset the number of prints to the number of detected faces, press ☆ (Intelligent Face Detection) again.
Make sure to press MENU/OK when your settings are complete.

Continued ➤
RESET ALL

To cancel all DPOF settings:

Select RESET ALL in the F-MODE MENU (→p.71).

Press MENU/OK.

MEMO

appears on the LCD monitor during playback when the image has specified DPOF settings.
PRINT ORDER (DPOF)

DPOF stands for Digital Print Order Format and refers to a format that is used for recording printing specifications for images shot using a digital camera on media such as an xD-Picture Card. The recorded specifications include information on which frames are to be printed. This section gives a detailed description of how to order your prints with FinePix Z5fd.

* Some printers do not support date and time imprinting or specification of the number of prints.
* The warnings shown below may appear while specifying the prints.

“DPOF SPECIFIED. ERASE OK ?”
“DPOF SPECIFIED. ERASE ALL OK ?” (p.39)
When erasing the image, the DPOF setting for that image is deleted at the same time.

“·‑ RESET DPOF OK ?” (p.73)
When inserting an xD-Picture Card that contains images specified for printing by another camera, those print specifications are all reset and replaced by the new print specifications.

[DPOF FILE ERROR] (p.133)
Up to 999 images can be specified on the same xD-Picture Card.
Using PLAYBACK MENU

Use this menu to play back photographed images.

Setting the PLAYBACK MENU

1. Press \( \rightarrow \) to set the camera to Playback mode (→p.33).

2. Press MENU/OK to open the PLAYBACK MENU.

3. Press \( \uparrow \) or \( \downarrow \) to select the menu.

4. Press \( \triangleright \).

5. Press \( \uparrow \) or \( \downarrow \) to change the setting.

6. Press MENU/OK to confirm the setting.
Rotating the images

When shooting in the vertical position, the image appears horizontal on the LCD monitor. Use this mode to rotate an image and to display correct direction.

**CAUTION**
Protected frames (files) cannot be rotated. Unprotect the frames (files) before rotating them (→ p.79).

**MEMO**
An image can be rotated only when playing back using FinePix Z5fd. You may not be able to rotate images that were shot with a camera other than FinePix Z5fd.

1. Select the frame (file) to rotate.
2. Press ▲ or ▼ to rotate the image. ▼: Rotates the image clockwise at a 90 degree angle. ▲: Rotates the image counterclockwise at a 90 degree angle.
3. Press MENU/OK to confirm the setting. Next time the image is played back, it will be automatically rotated. Press DISP/BACK to cancel rotating the image.

**Intelligent Face Detection**
When shooting a person in a vertical position, press [ ] (Intelligent Face Detection) to rotate to display the correct direction.
Protecting the images

Use this mode to prevent frames (files) from being accidentally erased. Your camera calls images “frames”.

FRAME SET / RESET

To protect or unprotect only the selected frame (file):

- Press or to select the protecting/unprotecting frame (file).
- Press MENU/OK to protect/unprotect the currently displayed frame (file).

Unprotected

Protected (appears)

To protect another frame (file), repeat steps 1 and 2.

When protecting frames (files) is completed, press DISP/BACK.

SET ALL

Press MENU/OK to protect all the frames (files).

RESET ALL

Press MENU/OK to unprotect all the frames (files).

Continued ➔
MEMO To stop the procedure midway

If the images are very large, protecting or unprotecting all the frames (files) may take some time.
If you want to take a picture or record a movie during the procedure, press DISP/BACK.

CAUTION
The Format function erases all the frames (files), including protected frames (files) (→p.101).

Copying the images (COPY COPY)

It is possible to transfer saved images between the internal memory and an xD-Picture Card. Your camera calls images “frames”.

Selecting COPY

1. Press ▲ or ▼ to select ▼ INTERNAL MEMORY ➔ ▼ CARD or ▼ CARD ➔ ▼ INTERNAL MEMORY.
2. Press ▶.
Copying one frame at a time (FRAME)

1. Press ▲ or ▼ to select FRAME.
2. Press MENU/OK.

3. Press ◀ or ► to select the copying frame (file).
4. Press MENU/OK to copy the currently displayed frame (file).

MEMO
To copy another frame (file), repeat steps 3 and 4. When copying frames (files) is completed, press DISP/BACK.

Continued ➤
Copying all frames (ALL FRAMES)

1. Press ▲ or ▼ to select ALL FRAMES.

2. Press MENU/OK.

3. Press MENU/OK to copy all the frames (files).

⚠️ CAUTION

- When “_MEMORY FULL” or “MEMORY FULL” appears on the LCD monitor, copying the data stops on the way.
- When copying the image that has specified DPOF setting, the DPOF setting is not copied.
Adding voice memos to the images (VOICE MEMO)

Voice memos of up to 30 seconds can be added to still images.

Recording voice memos

1. Press \( \square \) to set the camera to Playback mode (\( \rightarrow \)p.33)
2. Press \( \downarrow \) or \( \uparrow \) to select the image to add a voice memo.
3. Press MENU/OK to open the menu.
4. Press \( \uparrow \) or \( \downarrow \) to select  VOICE MEMO.
5. Press \( \uparrow \).
6. Press MENU/OK to start recording.

Face the microphone to record your comment. Hold the camera about 20 cm (7.9 in.) away for the best results.

The remaining recording time appears during recording.

Continued
Using PLAYBACK MENU

The voice memo ends when pressing MENU/OK midway or 30 seconds pass.

To record your comment: press MENU/OK.
To rerecord the comment: press DISP/BACK.

MEMO
- When the image already has a voice memo

If you select an image that already has a voice memo, a screen appears in which you can select whether to rerecord the memo.

- When “PROTECTED FRAME” appears, unprotect the frame (→p.79).
- Voice memos cannot be added to movies.

Playing back voice memo

1. Press ◄ or ► to select an image file with a voice memo. ◆ appears on the LCD monitor. (Setting the camera to  ◗ Playback mode (→p.33))

2. Press ▼ to start playing back the voice memo.

The playback time appears on the LCD monitor along with a progress bar.

CAUTION

Uncover the speaker.
The sound may be difficult to hear.
### Playing back voice memos

<table>
<thead>
<tr>
<th>Control</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playback</td>
<td>Playback begins. The voice memo stops when playback ends.</td>
</tr>
<tr>
<td>Pause / Resume</td>
<td>Pauses the voice memo during playback. Press ▼ again to resume playback.</td>
</tr>
<tr>
<td>Stop</td>
<td>Stops playback. Press ◀ or ▶ while voice memo playback is stopped to go back to the previous file or advance to the next file respectively.</td>
</tr>
<tr>
<td>Fast forward / Rewind</td>
<td>Press ◀ or ▶ during playback to skip forwards or backwards through the voice memo. These buttons do not function while playback is paused.</td>
</tr>
</tbody>
</table>

**CHECK**

- Audio recording format: WAVE (→p.149), PCM recording format
- Audio file size: Approx. 480 KB (for a 30-second voice memo)

**MEMO Playing back voice memo files**

You may not be able to play back some voice memo files recorded on other cameras.

### Adjusting volume of voice memos

Volume can be adjusted while playing back voice memos.

1. Press MENU/OK while playing back voice memo. The voice memo is paused during playback.
2. Press ▲ or ▼ to adjust the volume.
3. Press MENU/OK to confirm your selection. Camera starts to play back the voice memo.
Trimming the images (TRIMMING)

Use this mode to trim the required part of the photographed image.

CHECK

Before selecting the "TRIMMING" menu, select the frame (file) to trim.

1. Press W or T to zoom in or out on an image.

2. Press ▲, ▼,◄, or ► to display another part of the image.

3. Press MENU/OK.

4. Check the saved image size and press MENU/OK.
   The trimmed image is added as a separate file in the final frame.
MEMO

- Pressing DISP/BACK in step ① or ② returns to single-frame playback.
- A saved image size varies depending on the zoom scale of step ①. For 0.3 M,  a YES option appears in yellow.
- Image sizes

<table>
<thead>
<tr>
<th>3M</th>
<th>Printing at up to 6R (15.2 × 20.3 cm / 6 × 8 in.) / A5 size</th>
</tr>
</thead>
<tbody>
<tr>
<td>2M</td>
<td>Printing at up to 4R (10.2 × 15.2 cm / 4 × 6 in.) / A6 size</td>
</tr>
<tr>
<td>8M</td>
<td>To use for e-mail or web site</td>
</tr>
</tbody>
</table>

- When ③ quality setting is selected, the image is trimmed to normal size (4:3 aspect ratio).

CAUTION

You may not be able to trim images that were shot with a camera other than FinePix Z5fd.

Intelligent Face Detection

For images taken with Intelligent Face Detection (→ p.28) (  appears on the LCD monitor), you can zoom in on the focused faces and easily trim the main subject by pressing  (Intelligent Face Detection).

When you want the freedom to trim a particular location, you can adjust images with the normal trimming procedure.
Recording Movies

Use this mode to record movies with sound.

1 Set the camera to Movie mode.
Set the Mode switch to 🎥 .

Zooming the image
You must zoom beforehand as you cannot zoom during recording.

Press W or T to zoom in or out on an image.

CHECK
- Optical zoom focal length
  Approx. 36 mm to 108 mm (35 mm camera equivalent)
  Max. zoom scale: 3x
- Focal range
  Approx. 60 cm (2.0 ft.) to infinity

The available recording time appears on the LCD monitor.
2 Record movies.

Press the shutter button down fully to start recording. During recording, REC and a counter that shows the remaining time appear on the LCD monitor.

Recording ends when pressing the shutter button down halfway during recording or the remaining time runs out.

MEMO
There is no need to hold down the shutter button during recording.

☑ CHECK Recording movies
- Specifications: Motion JPEG (→p.149), Monaural sound
- Quality selection method: 640 (640 × 480 pixels) 320 (320 × 240 pixels)
- Frame rate (→p.149): 30 frames per second (fixed)

MEMO
- The brightness and color of the LCD monitor shown during movie recording may differ from those shown before recording begins.
- Pressing the shutter button down fully fixes the focus, however the exposure and white balance are adjusted to the scene being shot.
- If recording is stopped immediately after it begins, 1 second of the movie is recorded onto the xD-Picture Card or internal memory.

⚠️ CAUTION
- Because a movie is recorded onto the xD-Picture Card or internal memory as it is saved, it cannot be recorded correctly if the camera suddenly loses power (if the battery runs out or the AC power adapter is disconnected).
- A movie file taken by FinePix Z5fd may not be playable on other cameras.
- Because sound is recorded concurrently with the images, make sure that you do not cover the microphone with a finger, etc. (→p.12).
- Camera operation noises may be recorded during movie shooting.

Continued ➔
Changing movie size

Press \( F \) to open the \( F \)-MODE MENU.

1. Press \( \uparrow \).
2. Press \( \uparrow \) or \( \downarrow \) to change the setting.
3. Press MENU/OK to confirm the setting.

### Quality settings in Movie mode

- **640** (640 × 480 pixels): For better quality
- **320** (320 × 240 pixels): To record longer movies

### MEMO

- The quality setting is retained even when the camera is turned off or the mode setting is changed.
- In Camera mode, you cannot set the \( \mathcal{F} \) (sensitivity) setting and \( \mathcal{H} \) FinePix COLOR setting.
- See p.147 for information on recording times per xD-Picture Card or internal memory.

### CAUTION

If you shoot using the xD-Picture Cards with model numbers containing “M” such as DPC-M1GB, movie recording time may be reduced if you repeatedly record and erase (frame erase) image files. In such a case, erase all frames or format the xD-Picture Card before use. Back up important frames (files) onto your PC or another media.
### Playing Back Movies

1. Press ▼ or ► to select the movie file. 🎥 appears on the LCD monitor.

2. Press ▼ to begin playing back movie.

The playback time appears on the LCD monitor along with a progress bar.

### Playing back movies

<table>
<thead>
<tr>
<th>Control</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Playback</strong></td>
<td>Playback begins. Playback stops when the end of the movie is reached.</td>
</tr>
<tr>
<td><strong>Pause / Resume</strong></td>
<td>Pauses the movie during playback. Press ▼ again to resume playback.</td>
</tr>
<tr>
<td><strong>Stop</strong></td>
<td>Stops playback. Press ◀ or ▶ while playback is stopped to go back to the previous file or advance to the next file respectively.</td>
</tr>
<tr>
<td><strong>Fast forward / Rewind</strong></td>
<td>Press ◀ or ▶ during playback to skip forwards or backwards through the movie.</td>
</tr>
<tr>
<td><strong>Skip playback</strong></td>
<td>Press ◀ or ▶ when the movie is paused, the movie advances or goes back one frame. Hold down ◀ or ▶ to move through the frames quickly.</td>
</tr>
</tbody>
</table>

*Continued ➔*
MEMO
If the subject of the shot is very bright, white vertical streaks or black horizontal streaks may appear in the image during playback. This is normal.

CAUTION
- You may not be able to play back some movie files recorded on other cameras.
- To play back movie files on a PC, save the movie file on the xD-Picture Card or internal memory to the PC's hard disk and then play back the saved file.
- Uncover the speaker. The sound is difficult to hear.

Adjusting volume of movies
Volume can be adjusted while playing back movies.

1. Press MENU/OK while playing back movie.
   The movie is paused during playback.

2. Press ▲ or ▼ to adjust the volume.

3. Press MENU/OK to confirm the setting.
   Camera starts to play back the movie.
Using the SET-UP menu

1 Open the SET-UP menu.

   Press MENU/OK to open the menu.

   Press ▲ or ▼ to select SET-UP.

   Press ▼.

2 Change the page.

   Press ▼ or ▲ to select the page.

   Press ▼ to move to menu item.

3 Change the setting.

   Press ▲ or ▼ to select the menu.

   Press ▼.

   Different type of screen appears depending on selected item.

   Press ▲ or ▼ to change the setting.

   Press MENU/OK to confirm the setting.
## SET-UP menu option

</tr>
</tbody>
</table>
IMAGE DISP.

Use this setting to specify the way for displaying the check image screen (photograph result) after taking a picture.

3 SEC/1.5 SEC:
The image appears for about 3 or 1.5 seconds and is then recorded.

ZOOM (CONTINUOUS):
The image appears enlarged. Use this mode to check details of image.

⚠️ CAUTION
- The color tones in images displayed when 3 SEC or 1.5 SEC is selected may differ slightly from those in the images actually recorded.
- IMAGE DISP. cannot be used when $\text{LONG PERIOD} (\rightarrow \text{p.63})$ is set.

Enlarging images

Navigation screen (Current displayed image)

1. Press W or T to zoom in or out the image.
2. Press A, V, L, or R to display another part of the image.

3. Press MENU/OK to take another picture.
The image is recorded automatically.

MEMO
- When $\text{FINE}$ quality setting is selected, the image cannot be enlarged.
- Press DISP/BACK to cancel the zoom setting.
- This function is disabled when setting the continuous shooting.
- This function is disabled when selecting $\text{CONTINUOUS}$ in the $\text{SHOOTING MODE}$.

Intelligent Face Detection
For images taken with Intelligent Face Detection ($\rightarrow \text{p.28}$), the displayed face switches to allow confirmation each time you press $\text{FACE}$ (Intelligent Face Detection).

Press the W button (zoom out) or T button (zoom in) to display the selected face zoomed in or out. Press A, V, L, or R to display another part of the image.
FRAME NO.

Use this function to specify whether frame numbers are assigned consecutively from previous numbers or begin again.

<CONT.>  <RENEW>

CONT.: Pictures are stored beginning from the highest file number stored on the last xD-Picture Card or internal memory used.

RENEW: Pictures are stored on each xD-Picture Card beginning with a file number 0001.

* Formatted xD-Picture Card or internal memory used for both A and B.

CHECK

The last 4 digits of the 7-digit number in the top right corner of the LCD monitor are the file numbers, while the first 3 digits show the directory number.

MEMO

- Setting this function to CONT. makes file management easier as it makes sure that file names are not duplicated when images are downloaded to a PC.
- When the camera settings are RESET (→p.96), the frame number setting (CONT. or RENEW) is changed to CONT. and the frame number itself does not return to 0001.
- In CONT. setting, images are stored beginning from the highest file number on the current xD-Picture Card when the xD-Picture Card already contains image files with file numbers higher than the highest file number on the last xD-Picture Card.
- File number runs from 0001 to 9999. Once 9999 is exceeded, the directory number changes from 100 to 101. The maximum number is 999-9999.
- The displayed frame number may differ for images photographed on other cameras.
<table>
<thead>
<tr>
<th>ILLUMINATION</th>
</tr>

<tbody>
<tr>
<td>Use this function to shoot enlarged images than maximum optical zoom scale.</td>
</tr>
</tbody>
</table>

- **Zoom bar display**
  - **OFF**: Optical zoom: 3x
  - **ON**: Optical zoom: 3x Digital zoom: approx. 6.2x

- **CHECK**
  - Optical zoom focal length*
    - Approx. 36 mm to 108 mm
    - (35: Approx. 38 mm to 114 mm)
  - Digital zoom focal length*
    - Approx. 108 mm to 670 mm
    - (35: Approx. 114 mm to 707 mm)
  - Max. zoom scale: approx. 6.2x
  
  * 35 mm camera equivalents

- **MEMO**
  When zooming changes between optical and digital, the position of the “■” indicator stops. Press the same Zoom button again to start the “■” indicator moving again.

- **CAUTION**
  Using the digital zoom allows you to enlarge your subject and shoot it. However, it will lower your image quality. Set the digital zoom when requiring it.
**SET-UP**

How to use the SET-UP menu (→p.94)

---

**LCD MODE**

Use this function to set the LCD monitor display to the fine mode or power save mode.

- **30fps/60fps**
  
  Use this function to change the number of images (frames) per second on the LCD monitor display.
  
  **ęż 60 fps is the finer setting.**

- **POWER SAVE**
  
  The LCD monitor darkens when camera is not used for 10 seconds.
  
  When this function is active, you can save power and get the maximum possible running time from your battery.

- **MEMO**
  
  Pressing any button wakes the camera up.

- **CAUTION**
  
  - The LCD MODE function is disabled during the High-speed shooting mode, Playback mode, and Movie mode.
  
  - Power save mode is disabled when Intelligent Face Detection (→p.28) is on.

---

**PLAYBACK VOLUME**

Use this function to adjust volume while playing back movie and voice memo.

- **1** Press ▲ or ▼ to adjust the volume.
  
  The larger the number, the larger the volume is emitted. 0 indicates a sound deadening.

- **2** Press MENU/OK to confirm the setting.
**LCD BRIGHTNESS**

Use this function to adjust the LCD monitor brightness.

1. Press ▲ or ▼ to adjust the LCD monitor brightness.
   The indicator moves to the + to display the LCD monitor brightly or to the – to darken the LCD monitor.
2. Press MENU/OK to confirm the setting.

**FORMAT**

Initialize (format) the xD-Picture Card or internal memory for use with the camera.

1. Press ◀ or ▶ to select OK.
2. Pressing MENU/OK initializes the xD-Picture Card or internal memory.

**CAUTION**

- The Format function erases all the frames (files), including protected frames (files). Back up important frames (files) onto your PC or another media.
- Do not open the battery cover during formatting, as formatting will be interrupted.

Place of initialize

[FORMAT]

- FORMAT: Internal memory
- FORMAT: xD-Picture Card

[FORMAT OK?]

- OK
- CANCEL

[ZOOM]

- OK
- CANCEL
AUTO POWER OFF

When this function is active and the camera remains unused for 2 or 5 minutes, it turns camera off. Use this function when you want to get the maximum possible running time from your battery.

⚠️ CAUTION
The Auto power off function is disabled during slide shows (→p.70), and when a printer or a PC connection (→p.105, 116) is being used.

 참고 MEMO To restore power to the camera
To take pictures, close the lens cover completely and then reopen it (→p.20). To play back images, hold down [DISP] for about 1 second (→p.20).

TIME DIFFERENCE

Use this function when traveling to destinations in different time zones. This function sets a time difference relative to the date and time currently set. When this setting is enabled, the specified time difference is applied when pictures are taken.

1 Use Time difference function.

Press [DISP] or [SET] to change between HOME and LOCAL.
To set the time difference, select LOCAL.
HOME: Your home time zone
LOCAL: Your destination time zone
2 Move to TIME DIFFERENCE screen.

![TIME DIFFERENCE screen]

Press ▶.

3 Set time difference.

![TIME DIFFERENCE menu]

① Press ◀ or ▶ to select +/-, hour, and minute.

② Press ▲ or ▼ to change the setting.

③ Always press MENU/OK after the settings are completed.

☑ CHECK
Available time setting
−23:45 to +23:45 (in 15-minute increments)

MEMO
In the time difference setting, when you change to the Shooting mode, and the date is displayed for 3 seconds, the date display turns yellow.

☑ CHECK
Upon returning from a trip, always change the time difference setting back to HOME and then check the date and time again.
Connecting to a TV

When connecting to a TV, images can be displayed on wider screen. You can enjoy using the slide show function (→p.70) at parties and other gatherings.

1. Plug the A/V cable (included) into the multi-connector adapter connection socket on the camera.

   Video (yellow)
   To terminals
   Audio (white)

2. Plug the other end of the cable into the audio/video input socket on the TV.

   CAUTION

   Plug the A/V cable (included) correctly and push it in the terminal.

   MEMO

   - When connecting the A/V cable (included) to TV, the LCD monitor is turned off.
   - The image quality for movie playback is lower than for still images.
   - When connecting to a TV, even if you adjust the volume from the PLAYBACK VOLUME, the TV volume cannot be changed. Refer to the instructions provided with your TV for more information on audio/video input for your TV.
Connecting Camera Directly to Printer — PictBridge Function

When a printer that supports PictBridge is available, images can be printed by connecting the camera directly to the PictBridge-compatible printer without a PC.

**Connecting to a printer**

1. Connect the camera to your printer using the USB cable.

2. Connect the camera to a printer and turn the printer on. Press the button for about 1 second to turn the camera on.

   • “USB” appears on the LCD monitor.

3. The following screen appears on the LCD monitor after a moment.

   • “Specifying images for printing” — p.106
   • “Printing with DPOF setting” — p.107

   **MEMO**

   Depending on the printer, some functions are disabled.

*Continued*
Specifying images for printing
(PRINT WITH DATE / PRINT WITHOUT DATE)

1. Press ▼ or ▲ to display the frame (file) for specifying PRINT setting.

2. Press ▲ or ▼ to set a value. Up to 99 sheets are printed.

To specify more PRINT settings, repeat steps 1 and 2.

3. Press MENU/OK to display the confirm setting.

4. Press MENU/OK again to download the data to the printer and start printing the specified number of prints.

**MEMO**

Even if MENU/OK is pressed with total number of images set at 0 (zero), the screen printing once appears on the LCD monitor. Press MENU/OK again and printing starts.

**MEMO Printing with date**

1. Press DISP/BACK to display the setting display.

2. Press ▲ or ▼ to select PRINT WITH DATE.

3. Press MENU/OK.

**CAUTION**

PRINT WITH DATE is not available when the camera is connected to a printer that does not support date printing.
Printing with DPOF setting

( PRINT DPOF)

① Press DISP/BACK to open the menu.

② Press ▲ or ▼ to select PRINT DPOF.

③ Press MENU/OK to display the confirm setting.

④ Press MENU/OK again to download the data to the printer and start printing the specified frames (files) continuously.

CHECK
To select PRINT DPOF, the DPOF settings must be specified on FinePix Z5fd beforehand (→p.71).

CAUTION
Even when WITH DATE is specified in the DPOF settings (→p.71), the date is not inserted on printers that do not support date printing.

Continued ➤
Connecting Camera Directly to Printer — PictBridge Function

MEMO

Press DISP/BACK to cancel the printing. Depending on the printer, the printing may not be canceled immediately or printing may stop midway through. When printing stops midway, press \( \square \) to turn the camera off and then on again.

Disconnecting the printer

1. Check that “PRINTING” is not displayed on the camera’s LCD monitor.
2. Press \( \square \) to turn the camera off. Unplug the USB cable.

MEMO

DPOF setting can be specified for images on internal memory.

CAUTION

- In PictBridge function, images photographed on other than a camera may not be printed.
- The camera cannot be used to specify printer settings such as the paper size and print quality.
- Use internal memory or an xD-Picture Card that was formatted on FinePix Z5fd.
- Movies cannot be printed.
- Images photographed with a camera other than FinePix Z5fd may not be printed.
## Installation on a Windows PC

### Pre-installation checklist

#### Hardware and software requirements

To run this software, you must have the hardware and software described below. Check your system before you begin the installation.

| Operating System*¹ | Windows 98 SE  
|                   | Windows Millennium Edition (Windows Me)  
|                   | Windows 2000 Professional*²  
|                   | Windows XP Home Edition*²  
|                   | Windows XP Professional*²  
| CPU               | 200 MHz Pentium minimum  
| RAM               | 64 MB minimum  
| Hard disk space   | Amount required for installation: 450 MB minimum  
|                   | Amount required for operation: 600 MB minimum  
|                   | (When using ImageMixer VCD2 LE for FinePix: 2 GB or better)  
| Display           | 800 × 600 pixels or better, 16-bit color or better  
|                   | (When using ImageMixer VCD2 LE for FinePix: 1024 × 768 pixels or better)  
| Internet connection*³ | • To use the FinePix Internet Service or mail attachment function: 
|                   | An Internet connection or e-mail transmission software is needed  
|                   | • Connection speed: 56 k or better recommended  

*¹ Models with one of the above operating systems pre-installed.  
*² When you install the software, login using a system administrator account (e.g. “Administrator”).  
*³ Required to use the FinePix Internet Service. The software can still be installed even if you do not have an Internet connection.
### Recommended system

</tbody>
</table>

**MEMO**

- Connect the camera directly to the PC using the USB cable. The software may not operate correctly when you use an extension cable or connect the camera via a USB hub.
- When your PC has more than one USB port, the camera can be connected to either port.
- Push the USB connector fully into the socket to ensure that it is securely connected. The software may not operate correctly if the connection is faulty.
- Additional USB interface board is not guaranteed.
- Windows 95, Windows 98 and Windows NT cannot be used.
- Operation is not guaranteed on home-built PCs or on PCs running updated operating system software.
- When you reinstall or remove FinePixViewer, the Internet menu and your user ID and password for the FinePix Internet Service are deleted from your PC. Click the [Register now] button, enter your registered user ID and password and download the menu again.

Continued ➔
Do not connect the camera to your PC until the software installation is completed.

1 Install FinePixViewer as instructed in the Quick start guide.

Launching the installer manually
1 Double-click the “My Computer” icon.
   * Windows XP users should click “My Computer” in the “Start” menu.
2 Right-click “FINEPIX” (CD-ROM drive) in the “My Computer” window and select “Open”.
3 Double-click “SETUP” or “SETUP.exe” in the CD-ROM window.

* The way file names are displayed differs as described below depending on your PC settings.
- File extensions (3-letter suffixes indicating the file type) may be shown or hidden. (e.g. Setup.exe or Setup)
- Text may be shown normally or all in uppercase (e.g. Setup or SETUP).

Installing other applications
You may see messages for installing ImageMixer VCD2 LE for FinePix. Install this application as directed by the on-screen instructions.

2 Install DirectX as directed by the on-screen instructions and then restart your PC. If the latest version of DirectX is already installed on your PC, this installation is not performed.

⚠ CAUTION
- If the latest version is already installed, this window does not appear.
- Do not remove the CD-ROM during this procedure.

3 After restarting, the USB Video Class Driver would be installed.

⚠ CAUTION
If the latest version is already installed, this window does not appear.

4 After restarting the PC, a message appears stating “Installation of the FinePixViewer has been completed”.
Installation on a Mac OS X

Pre-installation checklist

Hardware and software requirements
To run this software, you must have the hardware and software described below. Check your system before you begin the installation.

<table>
<thead>
<tr>
<th>Compatible Mac*1</th>
<th>Power Macintosh G3<em>2, PowerBook G3</em>2, Power Macintosh G4, iMac, iBook, Power Macintosh G4 Cube, PowerBook G4, Power Macintosh G5, MacBook, MacBook Pro, or Mac mini</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating System</td>
<td>Mac OS X (compatible with version 10.3.9 to 10.4.7)</td>
</tr>
<tr>
<td>RAM</td>
<td>192 MB minimum 256 MB or better recommended</td>
</tr>
<tr>
<td>Hard disk space</td>
<td>Amount required for installation: 200 MB minimum Amount required for operation: 400 MB minimum (When using ImageMixer VCD2 LE for FinePix: 2 GB or better)</td>
</tr>
<tr>
<td>Display</td>
<td>800 × 600 pixels or better, at least 32,000 colors (When using ImageMixer VCD2 LE for FinePix: 1024 × 768 pixels or better)</td>
</tr>
</tbody>
</table>
| Internet connection*3 | • To use the FinePix Internet Service or mail attachment function: An Internet connection or e-mail transmission software is needed  
• Connection speed: 56 k or better recommended |

*1 PowerPC or Intel Processor loaded  
*2 Models with a USB port as a standard feature  
*3 Required to use the FinePix Internet Service. The software can still be installed even if you do not have an Internet connection.

MEMO

- Connect the camera directly to the Macintosh using the USB cable. The software may not operate correctly if you use an extension cable or connect the camera via a USB hub.
- Push the USB connector fully into the socket to ensure that it is securely connected. The software may not operate correctly if the connection is faulty.
- Additional USB interface board is not guaranteed.
1 Turn your Macintosh on and start up Mac OS X. Do not launch any other applications.

2 When the bundled CD-ROM is loaded into the CD-ROM drive, the “FinePix” icon appears. Double-click the “FinePix” icon to open the “FinePix” volume window.

3 Double-click on “Installer for MacOSX”.

4 The Installer setup dialog appears. Click the [Installing FinePixViewer] button.

5 The “Authenticate” dialog appears. Enter the name and password for the administrator account and then click the [OK] button.*

* The administrator account is the user account used for Mac OS X installation and you can confirm the user account in the Accounts dialog in the System Preferences.

6 The “License” dialog appears. Read the agreement carefully and then, if you agree to the terms of the Agreement, click the [Accept] button.

7 The “Read me” dialog appears. Click the [Continue] button.

8 The “FinePixInstallOSX” window appears. Click the [Install] button to install FinePixViewer.

⚠️ CAUTION
For more information on what is installed, click the [Read Me First] button and [Using FinePixViewer] button.
9 The ImageMixer VCD2 LE for FinePix installer automatically starts up and a window showing the installation progress appears (Installation may take several minutes).

10 The “FinePixViewer installation completed” message dialog appears. Then click exit button and close it.

⚠️ CAUTION
When Safari is used as the Web browser, a message may be displayed and the CD-ROM may not be removed. If this happens, click the Safari icon in the Dock to make Safari the active application and then select “Quit Safari” in the “Safari” menu to shut down Safari.

11 Launch “Image Capture” from the “Applications” folder.

12 Change the Image Capture settings. Select “Preferences...” from the “Image Capture” menu.

13 Select “Other...” from “When a camera is connected, open”.

14 Select “FPVBridge” from “FinePixViewer” folder in the “Applications” folder and click the [Open] button.

15 Select “Quit Image Capture” menu in the “Image Capture” menu.
Connecting to a PC

By connecting the camera to a PC, your system can be expanded to fill a wide range of uses. Using “FinePixViewer” performs images saving, browsing and file management etc.

MEMO

We recommend connecting the camera when it has sufficient battery charge remaining. If the power cuts out during data transmission, the data will not be transmitted correctly. Always use the AC power adapter when connecting the camera to a PC.

Refer to Software Installation (→p.110, 113) the first time you connect the camera to your PC. Install the software first. Do not connect the camera to the PC before installing all the software.

A Insert the xD-Picture Card with images into the camera (→p.18).

CAUTION

- Do not format the xD-Picture Card in the camera on the PC.
- Use the xD-Picture Card with images taken by a FUJIFILM Digital camera.
- When connecting to a PC, if the xD-Picture Card contains large image or movie files, connection or transmission may take time or images may not be stored. In these cases, use the Image Memory Card Reader (sold separately), etc.

B Connect the camera to the PC with the supplied USB cable.

C Press for about 1 second to turn the camera on.
CAUTION

- The FinePix Z5fd is a PTP-compatible camera. PTP-compatible cameras automatically recognize PC or printer connections for easy connectability.
- We recommend connecting the camera when it has sufficient battery charge remaining. If the camera suddenly loses power during data exchange, the xD-Picture Card or internal memory could be damaged.
- Do not disconnect the USB cable when the camera is communicating with a PC. If disconnecting the USB cable during communication, the files on the xD-Picture Card or internal memory could be damaged.
- In Mac OS X, you must set the automatic setup when the first time you connect the camera to your PC.
- Make sure that USB cable is connected correctly and pushed in.
- Perform pre-arranged steps to disconnect and turn off the camera (→ p.118).
- When the camera and PC are exchanging data, the indicator lamp blinks alternately green and orange.
- Auto power off is disabled during PC connection.
- Before replacing the xD-Picture Card, always disconnect the camera from the PC. See p.118 for information on the disconnection procedure.
- The camera and PC may be exchanging data even when “Copying” disappears on your PC screen. Before disconnecting the USB cable, always check that the indicator lamp is off.
- Always use FinePixViewer to transfer images with voice memos to a PC.

4 Set a PC.

Windows 98 SE / Me / 2000 Professional / Macintosh

CAUTION

The Windows CD-ROM may also be required during installation. In this event, change CD-ROMs as directed by the on-screen instructions.

- FinePixViewer automatically starts up and the Save Image Wizard window (Save Image dialog box) appears. Follow the instructions provided on screen to save the images. To proceed without saving the images, click the [Cancel] button.

* Screen for Windows 2000 Professional

Continued ➤
Connecting to a PC

MEMO
- Only images saved with FinePix Viewer can be viewed. We recommend always saving your images on a PC.
- If you cancel saving by clicking the [Cancel] button, make sure to press the camera button to turn off the camera before disconnecting it from the PC.

Windows XP
1 The “Found New Hardware” help message appears in the bottom-right corner of your screen. This message will close when the settings are completed. No action is required.

CAUTION
This step is not required for subsequent connections.

2 FinePixViewer automatically starts up and the Save Image Wizard window (Save Image dialog box) appears. Follow the instructions provided on screen to save the images. To proceed without saving the images, click the [Cancel] button.

MEMO
- Only images saved with FinePix Viewer can be viewed. We recommend always saving your images on a PC.
- If you cancel saving by clicking the [Cancel] button, make sure to press the camera button to turn off the camera before disconnecting it from the PC.

Proceed to “Using FinePixViewer” (→p.119).

Disconnecting the camera

1 Windows
Once the image has been saved, the window below appears (Save Image Wizard window). To disconnect the camera, click the [Remove] button.

Macintosh
Once the image has been saved, the window below appears. To disconnect the camera, click the [OK] button.

2 1 Press the camera button to turn the camera off.
   2 Disconnect the USB cable from the camera.
Using FinePixViewer

Mastering FinePixViewer

For all information on FinePixViewer functions, refer to “How to Use FinePixViewer” in the Help menu for details.

- What is explained in “How to Use FinePixViewer”... “How to Use FinePixViewer” covers a range of topics, including batch processing and ordering prints.

Example: Looking up slide shows

1. Click “How to Use FinePixViewer” in the FinePixViewer Help menu.
2. Click “Basic Operation” and then click “Slide Show” in the menu that appears.
3. The “Slide Show” information appears. Press the “<<<” key to view the previous page or the “>>>” key to view the next page.

Uninstalling the software

Only perform this operation when you no longer require the installed software or when the software was not installed correctly.

Windows

1. Check that the camera is not connected to the PC.
2. Quit all currently running applications.
3. Open the “My Computer” window. Then open the “Control Panel” and double-click on “Add/Remove Programs”.
4. The “Add/Remove Programs Properties” window appears. Select the software to be uninstalled (FinePixViewer or the driver) and then click the [Add/Remove] button.

To remove FinePixViewer
FinePixViewer Ver.5.3

To remove the driver software
FUJIFILM USB Driver
Connecting to a PC

⑤ When the message appears, click the [OK] button. Check your selection carefully since the process cannot be canceled once you click the [OK] button.

⑥ Automatic uninstallation begins. When uninstallation ends, click the [OK] button.

Macintosh
Quit FinePixViewer. Then drag the installed FinePixViewer folder to the Trash and select “Empty Trash” in the “Finder” menu.
System Expansion Option

By using FinePix Z5fd together with other optional FUJIFILM products, your system can be expanded to fill a wide range of uses. Accessory availability may vary by country. Please check with your local Fujifilm representative to confirm product availability.
Accessories Guide

Visit the FUJIFILM web site for the latest information on camera accessories.
Accessory availability may vary by country. Please check with your local Fujifilm representative to confirm product availability.

- **xD-Picture Card**
  Use the following **xD-Picture Cards:**
  16MB/32MB/64MB/128MB/256MB/512MB/1GB/2GB
  There are two types of **xD-Picture Card:** standard type and Type M (containing “M” in the model number, such as DPC-M1GB).
  FinePix Z5fd is compatible with Type M, however they may no be compatible depending on the device used (Image Memory Card Reader, etc.).

- **Battery Charger BC-65S**
  Quickly charges the rechargeable battery. The BC-65S reduces charging time to approx. 95 minutes (for the NP-40). Use the Battery adapter when the NP-40 is being charged. The battery adapter is supplied with the BC-65S.

- **Rechargeable Battery NP-40 (750 mAh)**
  A Lithium-ion slimline rechargeable battery

Using Your Camera Correctly

Read this information and the “Safety Notes” (→p.157), to make sure you use your camera correctly.

■ Places to Avoid

Do not store or use the camera in the following types of locations:
- In the rain or in very humid, dirty, or dusty places
- In direct sunlight or in places subject to extreme temperature rises, such as in a closed car in summer
- Extremely cold places
- Places with strong vibration
- Places with smoke or steam
- Places subject to strong magnetic fields (such as near motors, transformers, or magnets)
- In contact with chemicals such as pesticides
- Next to rubber or vinyl products

■ Damaged by Water or Sand

FinePix Z5fd can be damaged on the inside and outside by water and sand. When you are at the beach or close to water, make sure that the camera is not damaged by water or sand. Take care not to place the camera on a wet surface.

■ Damaged by Condensation

If the camera is carried from a cold location into a warm place, water droplets (condensation) may form on the inside of the camera or on the lens. When this occurs, turn the camera off and wait an hour before using the camera. Condensation may also form on the xD-Picture Card. In this event, remove the xD-Picture Card and wait a short time.

■ When the Camera is Not Used or is stored Periods of Time

If you do not intend to use the camera for a long period of time, remove the battery and the xD-Picture Card.

■ Cleaning Your Camera

- Use a blower brush to remove any dust on the lens or LCD monitor, and then gently wipe the camera with a soft, dry cloth to remove soil such as fingerprints. If any soil remains, apply a small amount of lens cleaning liquid to a piece of FUJIFILM lens cleaning paper and wipe gently.
- Do not scratch hard objects against the lens or LCD monitor.
- Clean the body of the camera with a soft, dry cloth. Do not use volatile substances or cleaning products these items can cause damage.

■ Using the Camera When Traveling

When traveling overseas, do not place your camera in the check-in baggage. Baggage can be subjected to violent shocks, and the camera may be damaged inside or outside.
Power Supply and Battery

Notes on the Battery (NP-40)
This camera uses the Rechargeable Lithium-ion Battery NP-40. Note the points below when using the rechargeable battery. Take particular care to read the Safety Notes to make sure that you use the battery correctly.
* When shipped, the NP-40 is not fully charged. Always charge the NP-40 before using it.
* When carrying the NP-40, install it in a digital camera or keep it in the soft case.
* When storing the NP-40, place it inside the special soft case provided.

Battery Features
* The NP-40 gradually loses its charge even when not used. Use a NP-40 that has been charged recently (in the last day or two) to take pictures.
* To maximize the life of the NP-40, turn the camera off as quickly as possible when it is not being used.
* The number of available frames will be lower in cold locations or at low temperatures. Take along a spare fully charged NP-40.

You can also increase the amount of power produced by putting the NP-40 in your pocket or another warm place to heat it and then loading it into the camera just before you take a picture.
If you are using a heating pad, take care not to place the NP-40 directly against the pad. The camera may not operate if you use a depleted NP-40 in cold conditions.

Charging the Battery
* You can charge the battery using the camera, and the AC power adapter (included).
* The NP-40 can be charged at ambient temperatures between 0°C and +40°C (+32°F and +104°F). At an ambient temperature of +23°C (+73°F), it takes approx. 2 hours to charge a fully depleted NP-40 battery.
* You should charge the NP-40 at an ambient temperature between +10°C and +35°C (+50°F and +95°F). If you charge the NP-40 at a temperature outside this range, charging takes longer because the performance of the NP-40 is impaired.
* You cannot charge the NP-40 at temperatures of 0°C (+32°F) or below.
* You can also use the optional Battery Charger BC-65S to charge the NP-40. When charging, use the NP-40 battery adapter supplied with the BC-65S (Refer to the Owner’s Manual for details).
* The NP-40 can be charged using the BC-65S Battery Charger at ambient temperatures between 0°C and +40°C (+32°F and +104°F). At an ambient temperature of +23°C (+73°F), it takes approx. 95 minutes to charge a fully depleted NP-40 battery.
* You should charge the NP-40 at an ambient temperature between +10°C and +35°C (+50°F and +95°F). If you charge the NP-40 at a temperature outside this range, charging takes longer because the performance of the NP-40 is impaired.
* The NP-40 does not need to be fully discharged or exhausted flat before being charged.
* The NP-40 may feel warm after it has been charged or immediately after being used. This is perfectly normal.
* Do not recharge a fully charged NP-40.
Battery Life
At normal temperatures, the NP-40 can be used at least 300 times.
If the time for which the NP-40 provides power shortens markedly, this indicates that the NP-40 has reached the end of its effective life and should be replaced.

Notes on storage
The Rechargeable Lithium-ion Battery NP-40 is both compact and capable of storing large quantities of power. However, if it is stored for long periods while charged, the performance of the battery can be impaired.
• If the battery will not be used for some time, run the battery out before storing it.
• If you do not intend to use the camera for a long period of time, remove the battery from the camera.
• Place the battery pack inside the soft case and store in a cool place.
  * The battery should be stored in a dry location with an ambient temperature between +15°C and +25°C (+59°F and +77°F).
  * Do not leave the battery in hot or extremely cold places.

Handling the Battery
To avoid injury or damage, observe the following:
• Do not carry or store battery with metal objects such as necklaces or hairpins.
• Do not heat the battery or throw it into a fire.
• Do not attempt to take apart or change the battery.
• Do not recharge the battery with chargers other than those specified.
• Dispose of used battery promptly.
To avoid damaging the battery or shortening its life, observe the following:
• Do not drop the battery or otherwise subject it to strong impacts.
• Do not expose the battery to water.

To make sure that you obtain optimum battery performance, observe the following:
• Always keep the battery terminals clean.
• Do not store battery in warm or humid places. Storing the battery for long periods in a hot location can shorten the battery life.

If you use the battery for a long period, the camera body and the battery itself will become warm. This is normal. Use the AC power adapter supplied with the camera if you are taking pictures or viewing images for a long period of time.

Power Supply and Battery

AC Power Adapter

Always use the AC Power Adapter AC-5VZ with the camera.
The use of an AC power adapter other than AC-5VZ can be damaged to your digital camera.

- Use the AC power adapter for indoor use only.
- Plug the connection cord plug securely into the multi-connector adapter connection socket on the camera.
- Turn off the camera before disconnecting the cord from the multi-connector adapter connection socket on the camera. To disconnect, pull out the plug gently. Do not pull on the cord.
- Do not use the AC power adapter with any device other than your camera.
- During use, the AC power adapter will become hot to the touch. This is normal.
- Do not take apart the AC power adapter. Doing so could be dangerous.
- Do not use the AC power adapter in a hot and humid place.
- Do not subject the AC power adapter to strong shocks.
- The AC power adapter may emit a humming. This is normal.
- If used near a radio, the AC power adapter may cause static. If this happens, move the camera away from the radio.

* Very occasionally, DC output will be prevented by the operation of the internal protection circuit. In this event, unplug the AC power adapter AC-5VZ from the power socket for a few moments and then plug it in again. This will restore DC output.

Notes on the xD-Picture Card™ and the Internal Memory

■ Image Memory Card
- This Image Memory Card is a new image recording media (xD-Picture Card) developed for digital cameras. The Image Memory Card consists of a semiconductor memory (NAND-type flash memory) to record digital image data. The recording process is electrically performed and enables erasure of existing image data as well as re-recording of new image data.
- When using a new Memory Card, or a Memory Card that has been formatted by a PC, be sure to format the card with your digital camera before using it.

■ Internal Memory
- Images held in the camera’s internal memory may be corrupted or erased due to problems such as camera faults. Save your important data to another media (i.e., CD-R, CD-RW, DVD-R, hard disk, etc.).
- Data stored in the camera’s internal memory cannot be guaranteed in the event that the camera is submitted for repairs.
- When the camera is repaired, any data stored in the camera’s internal memory is subject to checking by the repairer.

■ Protecting Your Data
- Images and movies may be lost or destroyed in the following situations. Please note that FUJIFILM assumes no responsibility for data that is lost or destroyed.
  1. Removal of the memory card or turning the power off while the memory card or internal memory is being accessed (i.e., during record, erase, initialization, and playback operations).
  2. Improper handling and use of the memory card or internal memory by the user or third party.

MEMO
- Save your important data to another media (i.e., CD-R, CD-RW, DVD-R, hard disk, etc.).

■ Handling xD-Picture Card
- When storing xD-Picture Cards, make sure that they are kept out of the reach of children. An xD-Picture Card could be swallowed cause suffocation. If a child swallows an xD-Picture Card, seek medical attention or call emergency number right away.
- When inserting the xD-Picture Card into the camera, hold the xD-Picture Card straight as you push it in.
- Do not expose an xD-Picture Card to shock. Do not apply pressure, and avoid bending.
- Do not use or store xD-Picture Card in hot and humid places.
- Clean the xD-Picture Card with a soft dry piece of cloth when dirty.
- When carrying or storing an xD-Picture Card, keep it in the special protective case.
- The xD-Picture Card will work well for long time, but will sooner or later lose its ability to store and play back images or movies. If this happens replace it with a new xD-Picture Card.
- Never remove the xD-Picture Card or turn the camera off during data recording or erasing (xD-Picture Card formatting) as this could be damaged to the xD-Picture Card.
- The use of xD-Picture Cards is recommended with FinePix Z5fd. The recording quality cannot be guaranteed when xD-Picture Cards other than those manufactured by FUJIFILM are used.

Continued ➤
Notes on the xD-Picture Card™ and the Internal Memory

- The xD-Picture Card may feel warm when it is removed from the camera after taking pictures. This is normal.
- Do not put labels on the xD-Picture Card. Peeling labels can cause the camera not to work properly.

MEMO
- There are two types of xD-Picture Card: standard type and Type M (containing "M" in the model number, such as DPC-M1GB). FinePix Z5fd is compatible with Type M, however they may not be compatible depending on the device used (Image Memory Card Reader, etc.).
- The compatibility of Type H is the same as Type M. However, owners of the xD-Picture Card USB Drive DPC-UD1 can use Type M but not Type H.

Using xD-Picture Card or Internal Memory with a PC
- When taking pictures using an xD-Picture Card or internal memory that has been used on a PC, reformat the xD-Picture Card or internal memory using your camera for best quality.
- When formatting an xD-Picture Card or internal memory, a directory (folder) is created. Image data is then recorded in this directory.
- Do not change or delete the directory (folder) or file names on the xD-Picture Card or internal memory because this will make it impossible to use the xD-Picture Card or internal memory in your camera.
- Always use the camera to erase image data on an xD-Picture Card or internal memory.
- To edit image data, copy or transfer the image data to the PC and edit the copied or transferred data.

#### Guide to the number of available frames for battery operation

<table>
<thead>
<tr>
<th>Battery Type</th>
<th>Number of frames</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP-40 (750 mAh)</td>
<td>Approx. 200 frames</td>
</tr>
</tbody>
</table>

According to the CIPA (Camera & Imaging Products Association) standard procedure for measuring digital still camera battery consumption (extract):

When using a battery, use the battery supplied with the camera. The storage media should be **xD-Picture Card**.

Pictures should be taken at a temperature of +23°C (+73°F), with the LCD monitor turned on, the optical zoom moved from full wide-angle to full telephoto (or vice-versa) and back again to its original position every 30 seconds, the flash used at full power every second shot and the camera turned off and then on again once every 10 shots.

- Note: Because the number of available shots varies depending on the level of charge in the battery, the figures shown here for the number of available shots using the battery is not guaranteed. The number of available shots will also decline at low temperatures.

#### Camera dimensions (W/H/D)

92.8 mm × 55.0 mm × 19.4 mm/3.5 in. × 2.2 in. × 0.8 in. (not including accessories and attachments)

#### Camera mass (weight)

Approx. 130 g/4.6 oz. (not including accessories, battery and **xD-Picture Card**)

#### Weight for photography

Approx. 148 g/5.2 oz. (including battery and **xD-Picture Card**)

#### Operating Conditions

Temperature: 0°C to +40°C (+32°F to +104°F)
80% humidity or less (no condensation)
Standard number of available frames/recording time per xD-Picture Card and internal memory

The number of available frames, recording time or file size varies slightly depending on the subjects photographed. Note also that the divergence between standard number of frames and the actual number of frames is greater for xD-Picture Cards with higher capacities.

Continued ➤
If you shoot using the **xD-Picture Card**s with model numbers containing “M” such as DPC-M2GB, movie recording time may be reduced if you repeatedly record and erase (frame erase) image files. In such a case, erase all frames or format the **xD-Picture Card** before use. Back up important frames (files) onto your PC or another media.

* These specifications are subject to change without notice. FUJIFILM shall not be held liable for damages resulting from errors in this Owner’s Manual.
* The LCD monitor on your digital camera is manufactured using advanced high-precision technology. Even so, small bright points and anomalous colors (particularly around text) may appear on the monitor. These are normal display characteristics and do not indicate a fault with the monitor. This phenomenon will not appear on the recorded image.
* The operation error may be caused in a digital camera by the strong radio interference (i.e. electric fields, static electricity, line noise, etc.).
* Due to the nature of the lens, the edges of images may appear distorted. This is normal.
Explanation of Terms

**EV**
A number denotes Exposure Value. The EV is determined by the brightness of the subject and sensitivity (speed) of the film or CCD. The number is larger for bright subjects and smaller for dark subjects. As the brightness of the subject changes, a digital camera maintains the amount of light hitting the CCD at a constant level by adjusting the aperture and shutter speed. When the amount of light striking the CCD doubles, the EV increases by 1. Likewise, when the light is halved, the EV decreases by 1.

**Frame rate (fps)**
The frame rate refers to the number of images (frames) that are photographed or played back per second. For example, when 10 frames are continuously photographed in a 1-second interval, the frame rate is expressed as 10 fps. For reference, TV images are displayed at 30 fps (NTSC).

**JPEG**
Joint Photographic Experts Group
A file format used for compressing and saving color images. The higher the compression rate, the greater the loss of quality in the decompressed (restored) image.

**Motion JPEG**
A type of AVI (Audio Video Interleave) file format that handles images and sound as a single file. Images in the file are recorded in JPEG format. Motion JPEG can be played back by QuickTime 3.0 or later.

**Smear**
A phenomenon specific to CCDs whereby white streaks appear on the image when there is a very strong light source, such as the sun or reflected sunlight, in the photography screen.

**WAVE**
A standard format used on Windows systems for saving audio data. WAVE files have the “.WAV” file extension and the data can be saved in either compressed or uncompressed format. Uncompressed recording is used on this camera. WAVE files can be played back on a personal computer using the following software:
Windows: MediaPlayer
Macintosh: QuickTime Player (QuickTime 3.0 or later)

**White Balance**
Whatever the kind of the light, the human eye adapts to it so that a white object still looks white. On the other hand, devices such as digital cameras see a white subject as white by first adjusting the color balance to suit the color of the ambient light around the subject. This adjustment is called matching the white balance.

**Exif Print**
Exif Print Format is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.
If you have technical questions or if you need repair service, ask the following local distributor. Please present the warranty card and your purchase receipt when you ask for repairs. Refer to the warranty card for conditions of the warranty. There is a case that repair and Technical support cannot be accepted for some models which your local distributor does not deal with. These lists are subject to change without notice.

Safety Notes

- Make sure that you use your FinePix Z5fd camera correctly. Read these Safety Notes and your Owner’s Manual carefully before use.
- After reading these Safety Notes, store them in a safe place.

About the Icons

- The icons shown below are used in this document to indicate the severity of the injury or damage that can result if the information indicated by the icon is ignored and the product is used incorrectly as a result.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>! WARNING</td>
<td>This icon indicates that death or serious injury can result if the information is ignored.</td>
</tr>
<tr>
<td>! CAUTION</td>
<td>This icon indicates that personal injury or material damage can result if the information is ignored.</td>
</tr>
</tbody>
</table>

The icons shown below are used to indicate the nature of the information which is to be observed.

- Triangular icons tell you that this information requires attention ("important").
- Circular icons with a diagonal bar tell you that the action indicated is prohibited ("Prohibited").
- Filled circles with an exclamation mark tell you an action that must be performed ("Required").

</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Do not use the charger to charge battery other than those specified here.</strong> The charger is designed for NP-40 Rechargeable Battery. Using the charger to charge conventional battery or other types of rechargeable battery can cause the battery to leak fluid, overheat or burst.</td>
</tr>
</tbody>
</table>
### WARNING

When carrying the NP-40, install it in a digital camera or keep it in the soft case provided.  
When storing the NP-40, keep it in the soft case provided.  
When discarding, cover the battery terminals with insulation tape.  
Contact with other metallic objects or battery could cause the battery to ignite or burst.

Keep xD-Picture Cards out of the reach of small children.  
Because xD-Picture Cards are small, they can be swallowed by children. Be sure to store xD-Picture Cards out of the reach of small children. If a child swallows an xD-Picture Card, seek medical attention or call an emergency number.

### CAUTION

Do not use this camera in locations affected by oil fumes, steam, humidity or dust.  
This can cause a fire or electric shock.

Do not leave this camera in places subject to extremely high temperatures.  
Do not leave the camera in locations such as a sealed vehicle or in direct sunlight.  
This can cause a fire.

Keep out of the reach of small children.  
This product could cause injury in the hands of a child.

Do not place heavy objects on the camera.  
This can cause the heavy object to tip over or fall and cause injury.

Do not move the camera while the AC power adapter is still connected.  
Do not pull on the connection cord to disconnect the AC power adapter.  
This can damage the power cord or cables and cause a fire or electric shock.

Do not use the AC power adapter when the plug is damaged or the plug socket connection is loose.  
This could cause a fire or electric shock.

Do not cover or wrap the camera or the AC power adapter in a cloth or blanket.  
This can cause heat to build up and distort the casing or cause a fire.
## Safety Notes

<table>
<thead>
<tr>
<th><strong>CAUTION</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When you are cleaning the camera or you do not plan to use the camera for an extended period, remove the battery and disconnect and unplug the AC power adapter.</strong> Failure to do so can cause a fire or electric shock.</td>
</tr>
<tr>
<td><strong>When charging ends, unplug the charger from the power socket.</strong> Leaving the charger plugged into the power socket can cause a fire.</td>
</tr>
<tr>
<td><strong>Using a flash too close to a person’s eyes may temporarily affect the eyesight.</strong> Take particular care when photographing infants and young children.</td>
</tr>
<tr>
<td><strong>When an xD-Picture Card is removed, the card could come out of the slot too quickly. Use your finger to hold it and gently release the card.</strong></td>
</tr>
</tbody>
</table>
| **Request regular internal testing and cleaning for your camera.** Build-up of dust in your camera can cause a fire or electric shock.  
  - Contact your FUJIFILM dealer to request internal cleaning every 2 years.  
  - Please note this is not a free of charge service. |

<table>
<thead>
<tr>
<th><strong>CAUTION</strong></th>
</tr>
</thead>
</table>
| **Do not sit down putting the camera into a trousers pocket etc.** When putting the camera into a bag, keep it in the special protective case. Do not place heavy objects on the camera.  
  **Do not leave the camera on the place such as floor. When storing the camera, keep it in the special protective case. It prevents subjecting the camera to strong shocks.**  
  - Any of these actions can cause an unexpected injury by broken reinforced glass.  
  - Be careful of glass splinter if the LCD monitor is broken. When the camera suffers damage, put the camera into a plastic bag and take it to your FUJIFILM dealer.  
  **During extended periods of use, minimize direct skin contact with the camera.** If you use the camera for a long time, it may become warm and result in minor burns. |
