

Intelligent Automation

Your bridge to the future of business

FUJIFILM

From Document Intelligence to Digital Intelligence

Intelligent Automation is a combination of intuitive automation technologies that allow organisations to transform complex workflows and digitise document-intensive processes from beginning to end.

It does this by harnessing the power of artificial intelligence (AI), using robotic process automation (RPA), information capture, mobility, analytics, and process orchestration. This allows you to create a seamless, real-time link between customer-facing systems of engagement and internal systems of record. Whereas business process automation platforms can trigger workflows to help people make decisions, intelligent automation allows for complex decision-making with minimal human intervention.

Robust and agile platform

A single, flexible platform with five interoperable technologies is designed to eliminate manual tasks from processing high volumes of data from multiple sources. Information-heavy processes such as approving mortgage applications or admitting healthcare patients are often labour-intensive, slow- and error-prone. Intelligent Automation simplifies, automates, and integrates these for increased efficiency, accuracy, and quality service.

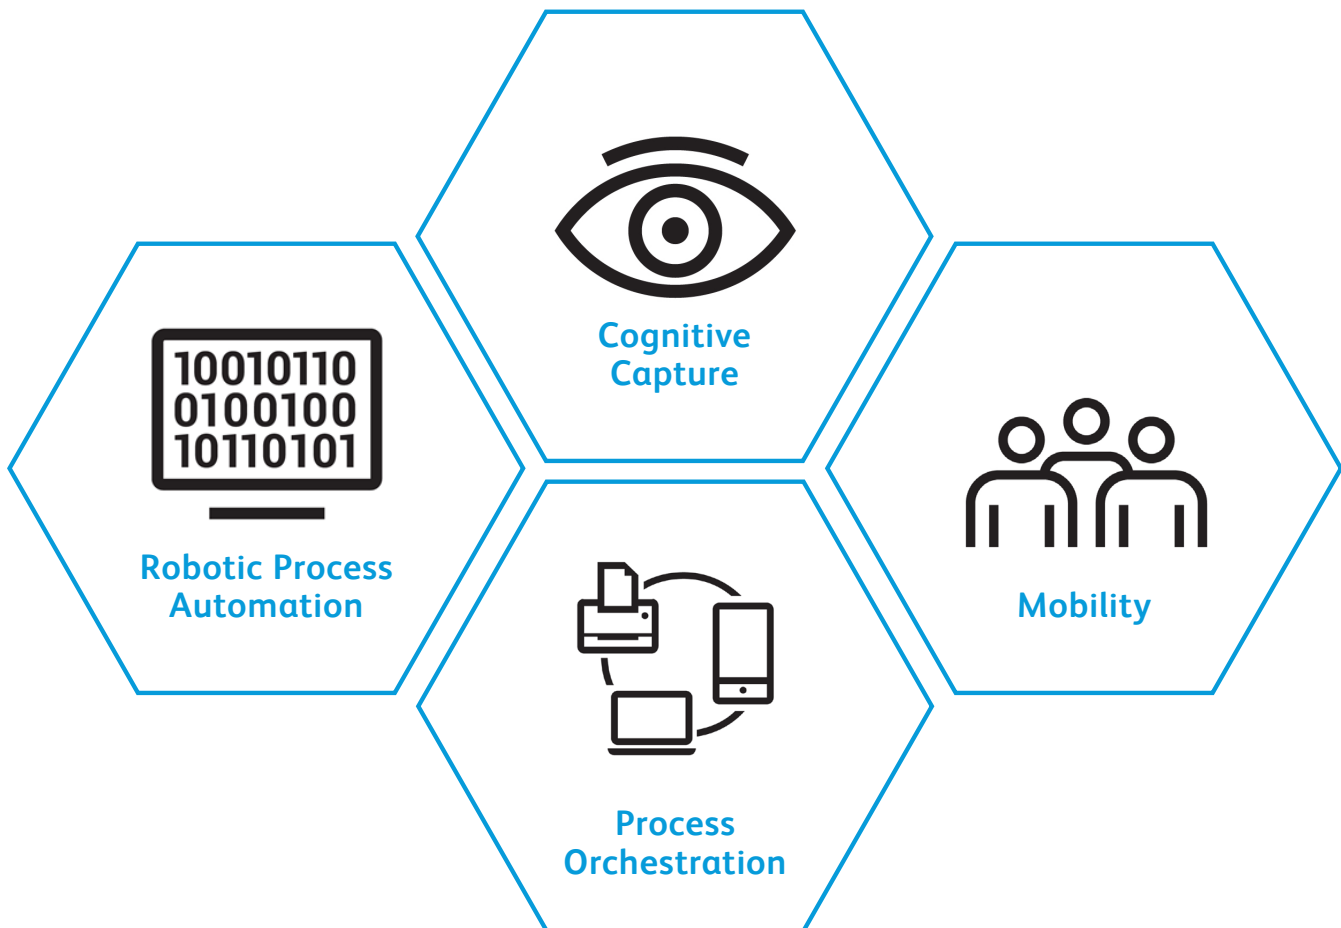

Benefits of Fuji Xerox Intelligent Automation

- ✓ Replaces manual processes to reduce errors
- ✓ Cuts down completion time and minimises costs
- ✓ Ensures compliance and prevents fraud risks
- ✓ Improves customer satisfaction

Intelligent Automation allows you to scale and expand your digital transformation, resulting in a powerful workforce comprising digital workers and human talent.

Harnessing the power of artificial intelligence

Fuji Xerox Intelligent Automation's features use AI-powered technologies to transform complex workflows and help your business cross over into the future.

Cognitive Capture

Embedded AI can now understand, classify, separate, and validate content from any type of structured or unstructured document (ex. contracts, forms, letters, emails) coming from any channel (ex. mobile, desktop scanner, MFD). Cognitive capture extracts data and separates sentiment from important information.

Robotic Process Automation

Configure software robots to perform repetitive and data-intensive tasks, freeing your workers to focus on more valuable matters. RPA robots can communicate with other systems and applications to execute a wide variety of programmed tasks, from simple to complex.

Mobility

Empower customers to interact with your systems by adding powerful data extraction and interactive validation software into your mobile apps. Fuji Xerox Intelligent Automation is developed with mobility in mind, delivering rich experiences on mobile devices and supporting a broad spectrum of digital and physical channels.

Process Orchestration

Drive successful outcomes by orchestrating multiple actions, people, software robots, policies, and systems. Automate routine workflows and streamline case management processes for better compliance, more informed decision-making, and process visibility.

Advanced analytics at a glance, opportunities at your fingertips

Intelligent Automation provides advanced and actionable analytics, giving you valuable insights into all aspects of your business processes and operations. You'll be able to make more informed, effective decisions sooner, based on accurate, measurable data. With easy-to-use and customisable dashboards, Advanced analytics lets you:

- ✓ **Analyse content and data** for any business process to quickly identify bottlenecks
- ✓ **Monitor and compare** the performance of specific branches and departments
- ✓ **Track documents** through your workflow, from extraction to validation and storage
- ✓ **Find missed opportunities** or issues that could lead to problems
- ✓ **Uncover real-time trends** affecting performance, accuracy, and costs
- ✓ **Optimise business processes** and ensure compliance

How Industries are Using Automated Intelligence

Financial Services

New account opening
Customer due diligence
Loan application

Insurance

New policy application
New claim submission
Policy coverage extension

Government

Benefit program enrolment
Permit or license application
Appeal / dispute registration

Manufacturing

Replenishment
Supplier onboarding
Contract renewal

Transportation

Fleet maintenance
Load tracking
Driver onboarding

Healthcare

Patient registration
Staff certification renewal
Physician onboarding

All product names and company names mentioned in this brochure are trademarks or registered trademarks of their respective companies. The product specifications, appearance and other details in this brochure are subject to change without notice for improvements.

Reproduction Prohibitions Please note that reproduction of the following is prohibited by law: Domestic and foreign currencies, government-issued securities, and national bonds and local bond certificates. Unused postage stamps, post cards, etc. Certificate stamps stipulated by law. Reproducing works forming the subject matter of copyright (literary works, musical works, paintings, engravings, maps, cinematographic works, drawings, photographic works, etc.) is not permitted unless the reproduction is for the purpose of personal use, family use or other similar uses within a limited circle.

For Your Safety
Before using the product, read the Instruction Manual carefully for proper use. Use the product with the power source and voltage specified. Be sure to establish ground connection. Otherwise, electronic shock may result in the case of a failure or short circuit.
