

**FUJIFILM**

Let's make  
working  
from home,  
work better  
for everyone.

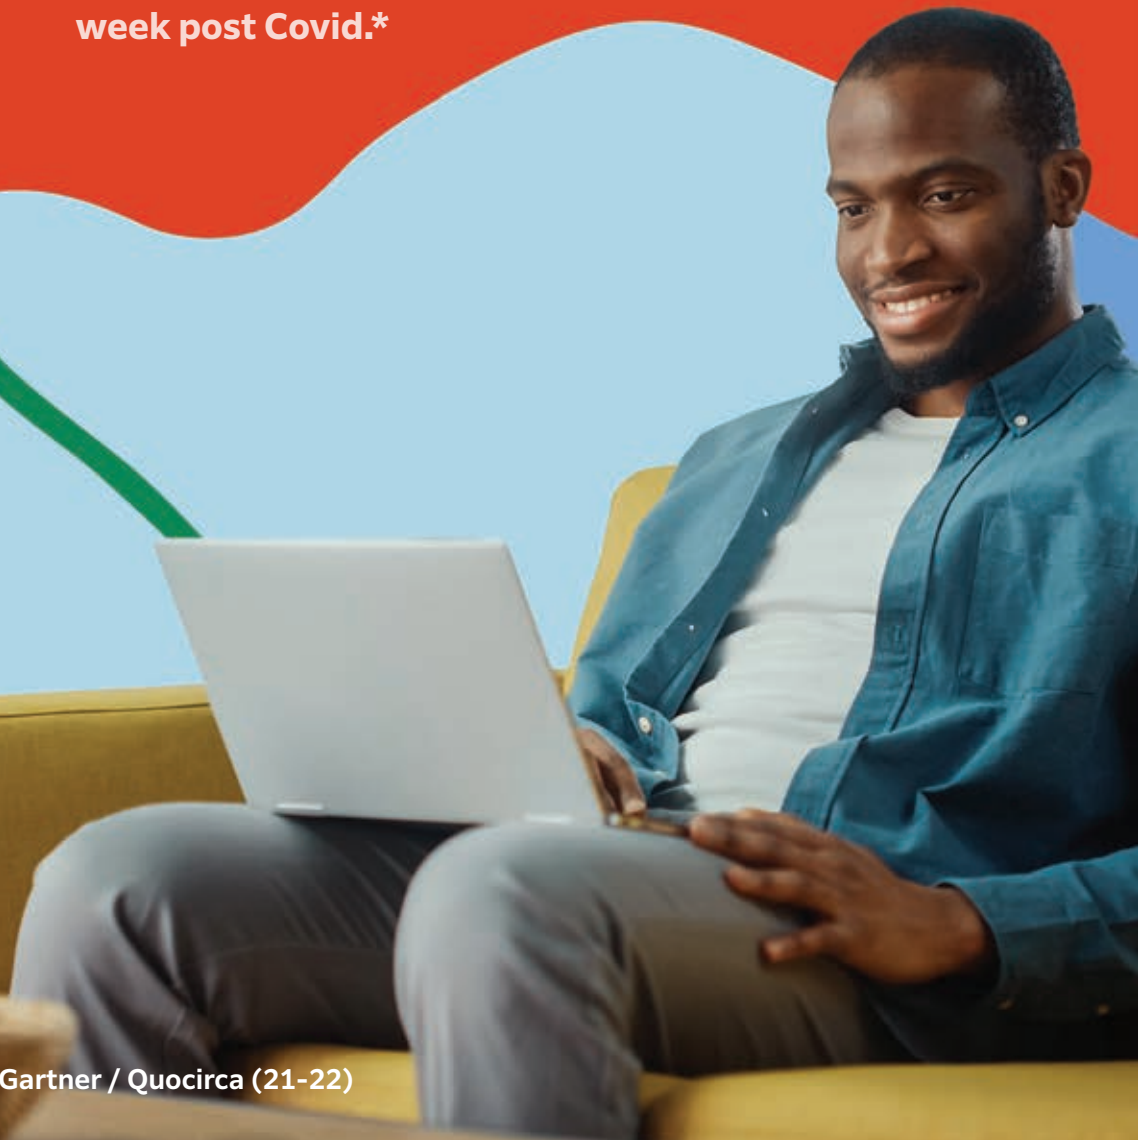

# Welcome to Print@Home™ from FUJIFILM Business Innovation Australia.

How and where we work has changed dramatically over the last two years.

**85%** of employees prefer to work remotely at least two to three days a week post Covid.\*

**54%** of company leaders prefer a hybrid arrangement for their team (remote + office).\*

\* Source — #Info-trend's / Gartner / Quocirca (21-22)

## Prior to Covid-19, there was a trend towards more people opting to spend a portion of their working week based from a home office. And while fewer people are now in compulsory lockdown, this trend is expected to continue.

A survey conducted by the Australian Bureau of Statistics showed two in five people with a job (41 per cent) worked from home at least once a week in February 2021, compared with 24 per cent at least once a week before March 2020\*.

With portable laptops and easy connection via video conferencing, daily work has continued seamlessly, however the inability to print and scan, has caused frustrations with many companies dependent on printed material.

With mobile computing, standard applications and easy connection via video conferencing, daily work has continued seamlessly, however barriers to printing has caused frustrations with many companies dependent on printed material.

## So how can you make working from home, work more effectively for your business?

### Discover Print@Home™ by FUJIFILM Business Innovation Australia.

Print@Home offers your employees flexible printing and scanning options while away from the office. Our small but mighty, award-winning device is designed for little spaces, so won't cramp your employees' home offices. They incorporate security features for peace of mind, and our world-leading print services and round-the-clock support.

- Allows multiple employees to print at home with the simplicity of one contract
- Automated support notifications and alerts to manage devices and consumables
- Sophisticated end-to-end FFBI tech support
- One clear, monthly invoice

### Benefits that your business may experience from supporting employees to work-from-home include:

- Improved productivity
- A sense of familiarity for employees
- Increased employee satisfaction
- Improved continuity between the office and home

# Print@Home™ delivers a connected experience

Connecting your Fujifilm printer allows you to take advantage of connectivity and support, while encouraging flexibility and improved productivity.

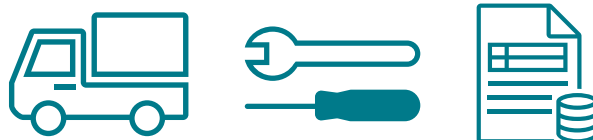

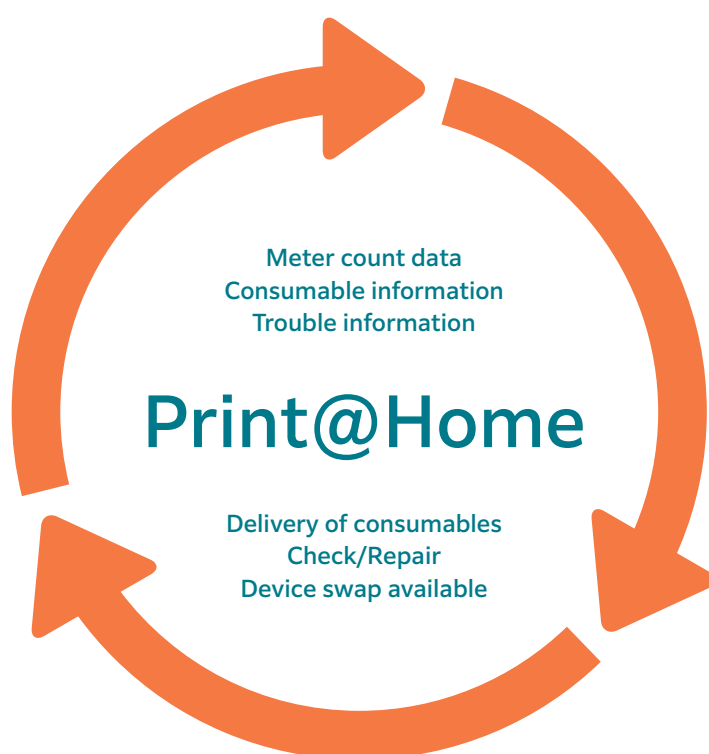

## How Print@Home™ works:

1. Customer

2. FUJIFILM  
Support Centre

3. Management of consumables,  
repairs and reporting

1. Employee sends print jobs direct to Print@Home™ device via Secure Sockets layer (SSL)
2. Device usage, consumable levels and fault information are all sent via employee's internet connection to FUJIFILM Business Innovation Support Centre's EP-BB cloud.
3. The FUJIFILM Business Innovation Support Centre use the data sent to the EP-BB cloud to manage:
  - Delivery of consumables
  - Device repair and maintenance needs
  - Billing
  - Usage and consumables reporting

# Streamline the WFH experience with Print@Home™

Print@Home devices automate a wide range of processes which can improve speed, productivity, proactivity and simplicity, when your device is connected to Fujifilm's device management system.

## Easy

Automatic meter reading

## Orderless

Automatic delivery of consumables\*\*

## Review

The effective use of data

## Proactive and Quick

Quickly respond when trouble occurs

\*\* This will depend on product model and latest firmware installed, and is therefore limited.

## Your Print@Home™ award-winning device

**ApeosPrint C325 — Small, powerful and clever.**

Its impressive print quality and steadfast functionality make the ApeosPrint C325 multifunction printer perfect for a WFH hybrid model.

The Apeos C325 series has proven to be a reliable multifunction printer with robust printing capability. During the 62,000-impression durability test, there were no misfeeds and no service required. The judges from Keypoint Intelligence were impressed with the overall user experience that the new designs create. The capacitive touchscreen built into the control panel of Apeos C325 series provides ease of use which is similar to a smartphone.

**The FUJIFILM ApeosPrint C325 was awarded the Buyers Lab (BLI) Winter 2022 A4 Pick Awards from Keypoint Intelligence for Outstanding Colour Multifunction Printer (MFP)/Printer for Small Workgroups.**
