

What Does Adapting to a Borderless Workspace Look Like?

Trends in Digital Workspaces

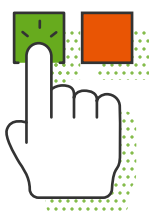

Automation

- Use digital tools to alleviate mundane tasks
- Reduce human errors
- Build knowledge bases and learning platforms for employees

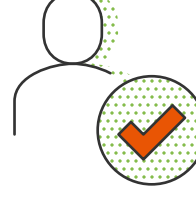

Cloud environment

- Centralise tools and information
- Reduce spending on tech infrastructure and paper-based workstreams
- Ease access to files whether working in the office or remotely

Flexible work setup

- Freedom to choose working style
- Develop agile and scalable teams
- Better prepare for disruptions

Employee experience

- Focus on strategies that improve employee well-being and boost productivity
- Provide resources for mental health
- Improve HR technology for increased ease and efficiency

Workplace of the Future

- ✓ Technology seamlessly integrated into the workspace
- ✓ Documents and contracts are easily accessible anytime, anywhere
- ✓ Office spaces adapted to employee working styles
- ✓ Increased sustainability through reduced carbon footprint and consumption

Benefits of Borderless Workspaces

Employees are more productive and adaptable to changing work situations

Better communication across teams

Cost-effective and scalable for business owners

APAC organisations find that digital workspaces increase productivity, communication and collaboration across teams.¹

79%

of employees who use advanced digital tools are highly satisfied at work

150%

higher revenues for organisations that have advanced tech-savvy workers

79%

of workers are highly interested in training for digital skills

What Does Your Organisation Need to Create a Better Workplace Experience?

Unified Communication

- Fosters better communication across teams
- Connects workspaces and achieves cloud productivity

Digital Workflows

- Increase employee productivity
- Track and share tasks and data for seamless collaboration

Cloud Sharing

- Adapts to different work arrangements
- Easily shares and searches information via the cloud

The Digital Workplace in Action

A machine supplier implemented Kintone, an all-in-one workplace platform, to centralise and speed up their sales and IT processes across employees and offices, increase productivity and improve the customer experience.

Using this all-in-one workplace platform, the company was able to convert manual and paper-based tasks containing large amounts of data into automated spreadsheets and databases.

This led to higher sales volume while giving them the tools to connect with customers faster and provide better service.

Build your high-performing borderless workspace with us.

At FUJIFILM Business Innovation, we aim to transform your workspace and the way you work. Learn more about our full suite of solutions and start your journey with us.
