Print Market is Evolving

USD 472 Billion

Global Commercial Printing Market is projected to grow by 2026¹

33%

will pay for speciality colours such as white, metallic, and fluorescent²

26%

CAGR growth for High Production Colour Unit demand in APAC³

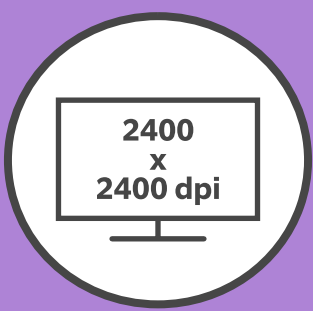

When The Market Changes, Can Your Business Adapt and Thrive?

PRODUCE STUNNING OUTPUT

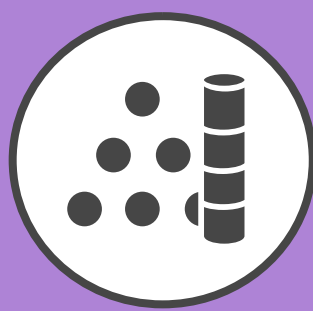

Amaze your customers with speciality colours beyond CMYK, immaculate high resolution images, and produce beautiful lifelike printouts.

Speciality colours such as Gold, Silver, White, Pink, and Clear, to push creative boundaries on different medias.

Superior quality image data with 10-bit processing, in addition to high resolution and smooth screen images of 2400 x 2400 dpi with our unique technology.

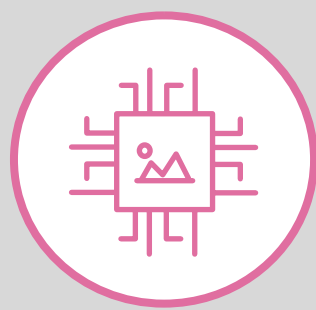

Super EA Eco toner produces smooth and beautiful photograph gradation, density uniformity in figures, and printed text without glare.

OUT-OF-THE-BOX PRODUCTIVITY

Intelligent printing output with automated print processes enables you to save time and deliver superior productivity.

AI-based Photo Quality Optimisation to enhance and correct RGB images quickly and effortlessly.

Automatic pink layer separation to easily achieve more natural gradients and smoother skin tones through an additional pink channel.

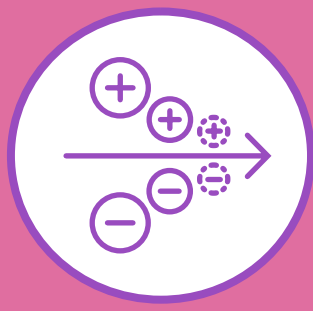

Colour Inverter simplifies conversion of artwork when using speciality colour on different media.

LIMITLESS CAPABILITIES

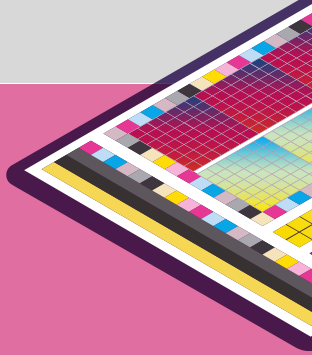

Streamline your operations and improve productivity with innovative features.

Air-suction feeder enables you to use a variety of media without the risk of double- and mis-feeding.

Static eliminator makes it easy to stack and align film and metallic media without them sticking together.

Unlock the power of infinite colours
