FUJIFILM Business Innovation Digital Platform
The first step towards Digital Platforms with Workflow Application

Workflow Application

Currently, many companies have turned to using **Work from Home or Remote Work policies more frequently**. This has resulted in a shift towards using electronic forms instead of paper forms, in order to facilitate document approvals from anywhere. Examples of paper forms include purchase order forms, registration forms, expense reimbursement forms, and leave application forms, among others. The use of paper forms in companies has therefore become a problem due to limitations and issues associated with their use.

Problems encountered when using paper forms in the present day

"Wouldn't it be better if you start using electronic forms instead of paper forms today? It will help you create forms automatically, save time, reduce paper costs, and simplify the approval process each time."

Workflow Application

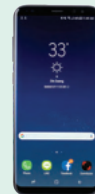

Build Enterprise Mobile+Web Apps No Coding.

Workflow Application is a Business Process Management (BPM) solution in the form of a web application that includes tools that can work on web browsers without the need for additional software installation.

It allows users to create e-Forms to replace paper forms, set e-Approval workflows, and create reports and charts easily using drag and drop. Users do not need to have coding knowledge (Low Code).

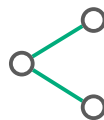

Supports various operating systems.

WHAT ARE THE ADVANTAGES OF WORKFLOW APPLICATION ?

Dashboards & Reports

Integration to Backend Systems

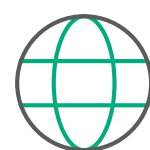

Testing on all mobile devices

Testing on all mobile size

Workflows

Webforms & Business Logic

STEP FOR USING WORKFLOW APPLICATION

01

User fill out their information in e-Form.

02

e-Form runs in the system for approval in the hierarchy.

03

The manager clicks to approve or disapprove.

THE ADVANTAGES OF USING WORKFLOW APPLICATION

Reduce the consumption of paper forms, printing costs and document storage rental costs.

Get accurate, fast and timely information which is ready to use immediately.

Accessible anywhere and anytime.
