

Moji 5 Success Case Story

About the company:

The company operates a manufacturing business providing services for the production of tires and inner tubes.

Process Name :

Approval Request Sheet

Current Problems :

- 1 The approval process takes a long time.
- 2 Wrong information due to misreading the upper handwritten on the form.
- 3 Documents are easily lost or torn.
- 4 High cost of paper and printing cost.

Recommended Solution : MOJI5

Recommended Solution : MOJI5

Solution details :

Moji5 is a web application that can help customers quickly create electronic forms using a drag and drop method where anyone can set up a form to enter data, business conditions and workflows, reports and charts. All from the web browser you use regularly.

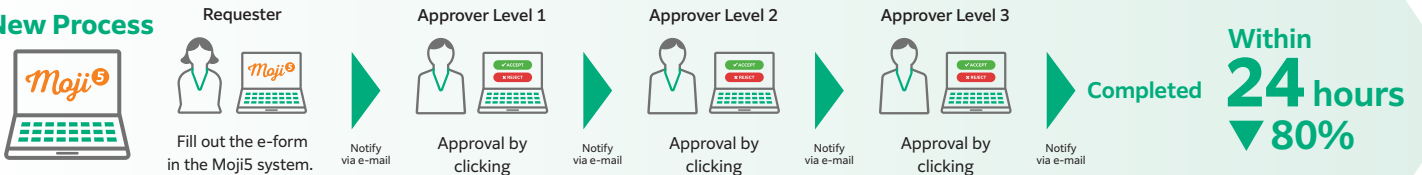

How the solution works :

- 1 The requester fills out the e-form in the Moji5 system.
- 2 The system sends a notification to Approver Level 1 via e-mail for approval.
- 3 After that, the system will send a notification to the Approver Level 2 via email for approval and forwarded to Approver Level 3 for approval in order of steps.
- 4 When fully approved, the system will send a notification to the applicant for further action.

Current Process

New Process

Benefits from Moji5 :

- 1 Reduce the use of paper forms, reduce printing costs and document storage rental costs.
- 2 Get accurate, fast and up-to-date information. Ready to use immediately.
- 3 Access information anytime, anywhere.
- 4 There are dashboards and reports which summarize everything on one screen for easy viewing.
