

An All-in-One Web-to-Print Solution With Built-in *Prepress Automation*

REDUCE OVERHEAD AND LOWER COSTS ASSOCIATED WITH EVERY PRINT ORDER

XMPie PersonalEffect StoreFlow™ is the best-in-class Web-to-Print software solution for creating and managing online stores and marketing portals. With built-in prepress automation, StoreFlow enables the efficiencies of a truly automated, touchless workflow.

MORE VERSATILITY, MORE CONTROL

StoreFlow enables end-users to easily upload and order their own static documents, or select and order variable documents from a storefront catalog. Customers can also intermix both variable and static pages within the same document, enabling a rich set of products from flyers and brochures, to booklets and more. Adding personalized covers, dynamic tabs, and other customized options allows for unprecedented versatility and added value in fulfilling the production of customer orders.

BUILT FOR GROWTH

With the XMPie heritage of robust solutions and innovations in the areas of Web-to-Print, dynamic publishing and cross-media marketing solutions, customers can be assured of a cost-effective path to scale operations as their business grows.

- COMPLETE WORKFLOW FOR WEB-TO-PRINT
- BUILT-IN PREPRESS AUTOMATION
- MOBILE-FRIENDLY STOREFRONTS
- CONVENIENT STORE SETUP AND MAINTENANCE
- INDUSTRY COMPLIANT JDF/JMF WORKFLOW
- UPGRADABLE TO INCLUDE CROSS-MEDIA

Efficient, End-to-End Workflow

StoreFlow is a full-featured Web-to-print solution supporting variable documents, static products, and user-submitted Microsoft® Word, PowerPoint and Adobe® PDF documents. Multichannel campaigns can also be sold via StoreFlow with the optional Cross-Media upgrade. For variable documents, StoreFlow leverages XMPie's proven XLIM® document format and composition engine with an easy-to-use creative workflow, using Adobe® InDesign® and XMPie uCreate™ Designer or uCreate Print. For customers with graphically complex designs who require ultimate creative flexibility, StoreFlow Pro also includes a second composition engine that leverages a built-in Adobe InDesign Server. This allows customers to utilize all the creative functionality InDesign has to offer. StoreFlow automates order acquisition and implements efficient workflow processes without sacrificing key functionality, allowing service providers create and deploy cost effective Web-to-Print storefronts.

HIGHLIGHTS

END-USER E-COMMERCE EXPERIENCE

- Intuitive online shopping experience
- Mobile-friendly storefronts
- B2B corporate branded storefronts
- B2C storefronts with self registration
- Single sign-on using a Facebook account
- Accurate preview of finished product, including covers and tabs
- Instant pricing
- LivePerson® integration for proactive engagement with store visitors
- One-click reorders
- Secure

DOCUMENT WORKFLOW

- Advanced document handling leveraging XMPie with Adobe workflow
- Browser-based file submission by end-user (Microsoft Word, PowerPoint and PDF)
- Instant conversion to PDF and preflight
- Customization and personalization from template catalog
- Combine static and personalized documents for composite documents
- Instant WYSIWYG preview

ADMINISTRATION AND SETUP

- Custom skins to match brand identity
- Unlimited number of stores with unlimited product templates
- Product Profiles for defining global product properties, pricing, etc.
- Easy setup, simple maintenance
- Promotional codes, coupons and discount support
- Multilingual storefronts out-of-the-box: English, Spanish, French, Italian, German, Portuguese and Dutch
- Adobe InDesign workflow for template creation using XMPie XLIM document format
- Guided, step-by-step storefront setup

STATE-OF-THE-ART, INTUITIVE USER EXPERIENCE

StoreFlow is built to support all the latest browsers and platforms, keeping your storefront up-to-date and accessible from multiple devices - desktops, tablets and smartphones. The easy-to-use, intuitive GUI will provide your customers with a simple and familiar e-commerce experience. Furthermore, adjusting the store skin to control the look and feel or match a brand standard is easy because StoreFlow leverages standard CSS (Cascading Style Sheets). State-of-the-art tools, such as social media sign-on and embedded YouTube videos, will further enhance the user experience and appeal of your storefronts.

StoreFlow keeps your storefront up-to-date and accessible from multiple devices - desktops, tablets and smartphones

CONVENIENT STORE SETUP AND MAINTENANCE

The StoreFlow administration dashboard allows operators to set up and manage each store. Step through a few set-up tabs to define basic store information and get your store online quickly. Product catalogs are easily created from document templates built using XMPie uCreate Designer or uCreate Print, which runs natively inside Adobe InDesign. Simply select a template, specify which variables a customer can modify, and define production and fulfillment parameters.

To accelerate the setup of similar products, StoreFlow uses Product Profiles, allowing administrators to define global product properties, including pricing and production parameters, that will apply to a group of products. Those properties automatically cascade to all products sharing that profile, saving time and avoiding errors. To maintain flexibility, administrators can selectively decide what parameters are inherited, and which are overridden on a product-by-product basis.

StoreFlow combines XMPie's proven uStore and uProduce technologies with Xerox FreeFlow Core to achieve a truly touchless workflow.

LIGHTS-OUT PRODUCTION AUTOMATION

StoreFlow includes Xerox® FreeFlow® Core, which enables store administrators to define multi-step workflows that preflight documents, automate imposition, and either submit jobs directly to your digital press or drop in a hot folder - everything that is needed to efficiently prepare and process Web-to-print jobs for production.

End-users can immediately see accurate previews of finished products, including bindings, covers and tabs.

JDF COMPLIANCE AND JOB TICKETING

Every print job created in StoreFlow is accompanied with an automatically-generated JDF job ticket, which makes processing the jobs through JDF-compliant devices a straightforward task. With these JDF capabilities, customers can gain the benefits of greater automation, speed, cost-efficiency and ease-of-use. StoreFlow's JDF scheme has been validated with Xerox FreeFlow Process Manager®. Therefore, customers who already work with FreeFlow Process Manager can now seamlessly integrate with StoreFlow.

“XMPie uStore continues to take giant leaps ahead, becoming one of the most intuitive, flexible, and extensible solutions out there for expanding a print business and improving operational efficiencies...”

Will Furphy, Managing Director at Technique, Melbourne, Australia

HIGHLIGHTS

BUSINESS INTERACTION

- Role-based user privileges
- Manager level approval workflows
- Supports split shipments and multiple delivery addresses
- Worldwide currency support
- Instant pricing from UPS and FedEx
- Automatic shipping slip
- Billing methods: PO, credit card, and PayPal
- Customizable receipts and email notifications
- Bill-to/Ship-to tax calculations

JOB MANAGEMENT

- Bird's-eye view on business and production activities
- Dashboard for complete control and tracking
- Activity reports with pivot tables and graphs
- Excel sheet pricing tables along with a built-in pricing engine
- External pricing engine plug-in for integration with MIS systems

AUTOMATION

- JDF / JMF Compliant
- Bundled with Xerox FreeFlow Core for prepress automation
- Imposition, barcodes, pressmarks and other pre-press processes
- Integration with Xerox FreeFlow Process Manager

EXTENSIBILITY

- Optional Adobe InDesign composition engine
- XML Export
- Optional SDK with extensive APIs
- Scalable architecture supports fault tolerant configurations via optional upgrades
- Cross-Media upgrade
- FreeFlow Core Advanced Prepress and Advanced Automation add-on modules

RECOMMENDED HARDWARE/SOFTWARE REQUIREMENTS

System requirements for server:

uProduce Server with uStore

- CPU**
- Two (2) Physical Intel Xeon Quad Core
 - 8 GB RAM

Hard Drive Storage

- Two 500 GB hard drives in RAID 1 (mirroring) configuration with two partitions:
Partition C: Operating system (80 GB)
Partition D: XMPie Applications and Job Storage

General Requirements

- Gigabit Ethernet Adapter

Software requirements:

- Windows Server® 2008 R2 (64-bit), Windows Server 2012 or Windows Server 2012 R2
- Microsoft SQL Server 2012 Express Edition SP1 with Advanced Services, or Microsoft SQL Server 2012 Standard edition

System requirements for desktop tools:

uCreate Designer / uCreate Print

Windows

- Intel® Core™ 2 Duo or higher
- Windows 7 Professional 32/64 bit edition SP1 or higher

Macintosh

- MacIntel 2.0 GHz
- MAC OS X 10.7, 10.8 or 10.9

General Requirements

- 4 GB RAM
- 250 GB Serial ATA Hard Disk
- Gigabit Ethernet Adapter
- uCreate Designer / uCreate Print require Adobe InDesign CS6 or Creative Cloud

uPlan

- Intel® Core™ 2 Duo or higher
- Windows 7 Professional 32/64 bit edition SP1 or higher
- 4 GB RAM
- 250 GB Serial ATA Hard Disk
- Gigabit Ethernet Adapter
