Initiatives for environmental consideration

We are working to develop environmentally conscious products, including technologies that reduce the power consumption of multifunction devices and printers to achieve lower environmental impact.
Fujifilm Group introduced the certification program in which we clarify the environmental value of each product by assessments at the time of product development, conduct the evaluation based on our in-house certification criteria and certify the products* that are excellent in reducing environmental impact as "Green Value Products".
This product was certificated as a "Gold" rank product that contributes to reduction of environmental impact at industries' highest level.

* Products and services excellent in reducing environmental impact are those designed in consideration of environmental impact throughout their life cycle from acquisition of raw materials, production, usage, disposition, to reuse.

Initiatives for energy conservation

- Achieve both energy conservation and customer convenience by adopting IH fusing technologies that enable quick heating to eliminate the necessity of preheating in standby or power-saving mode
- Achieve both high image quality and energy conservation by equipping the LED printhead that enables space and energy saving design, as well as Super EA-Eco toner that has low-temperature fusing performance
- Reduce the power consumption with the smart power saving feature that solely powers on the required parts according to the functions being used by customers

Initiatives for resources conservation

- Staple-free stapling that helps reducing waste and that also can be used with peace of mind at certain places where need considerations for safety or any contamination
- Functions contributing to paper consumption reduction
  -Private Charge Print, Scan, Paperless Fax, Pages per Side/Multiple-Up etc.
