Thank you for your purchase of this product. This manual describes how to use your FUJIFILM X-Pro1 digital camera and install the supplied software. Be sure that you have read and understood its contents before using the camera.

For information on related products, visit our website at http://www.fujifilm.com/products/digital_cameras/index.html

For more information on the X-Pro1, visit http://fujifilm-x.com/x-pro1/
**For Your Safety**

**IMPORTANT SAFETY INSTRUCTIONS**

- **Read Instructions**: All the safety and operating instructions should be read before the appliance is operated.
- **Retain Instructions**: The safety and operating instructions should be retained for future reference.
- ** heed Warnings**: All warnings on the appliance and in the operating instructions should be adhered to.
- **Follow Instructions**: All operating and use instructions should be followed.

**Installation**

**Power Sources**: This video product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your appliance dealer or local power company. For video products intended to operate from battery power, or other sources, refer to the operating instructions.

**Grounding or Polarization**: This video product is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

**Alternate Warnings**: This video product is equipped with a three-wire grounding-type plug, a plug having a third (grounding) pin. This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding type plug.

**Overloading**: Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.

**Ventilation**: Slots and openings in the cabinet are provided for ventilation, to ensure reliable operation of the video product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the video product on a bed, sofa, rug, or other similar surface.

This video product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to. This video product should never be placed near or over a radiator or heat register.

**Attachments**: Do not use attachments not recommended by the video product manufacturer as they may cause hazards.

**Water and Moisture**: Do not use this video product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.

**Power-Cord Protection**: Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.

**Accessories**: Do not place this video product on an unstable cart, stand, tripod, bracket, or table. The video product may fall, causing serious injury to a child or adult, and serious damage to the appliance. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the video product. Any mounting of the appliance should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

**Antennas**

**Outdoor Antenna Grounding**: If an outside antenna or cable system is connected to the video product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No. 70, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

**Use**

**Cleaning**: Unplug this video product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

**Object and Liquid Entry**: Never push objects of any kind into this video product through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the video product.

**Lightning**: For added protection for this video product receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the video product due to lightning and power-line surges.
Servicing: Do not attempt to service this video product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Damage Requiring Service: Unplug this video product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
• When the power-supply cord or plug is damaged
• If liquid has been spilled, or objects have fallen into the video product.
• If the video product has been exposed to rain or water.
• If the video product has been dropped or the cabinet has been damaged.

If the video product does not operate normally follow the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the video product to its normal operation.

When the video product exhibits a distinct change in performance — this indicates a need for service.

Replacement Parts: When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

Safety Check: Upon completion of any service or repairs to this video product, ask the service technician to perform safety checks to determine that the video product is in proper operating condition.

Be sure to read these notes before use

Safety Notes
• Make sure that you use your camera correctly. Read these safety notes and your Owner’s Manual carefully before use.
• After reading these safety notes, store them in a safe place.

About the Icons

The icons shown below are used in this document to indicate the severity of the injury or damage that can result if the information indicated by the icon is ignored and the product is used incorrectly as a result.

⚠️ WARNING
This icon indicates that death or serious injury can result if the information is ignored.

⚠️ CAUTION
This icon indicates that personal injury or material damage can result if the information is ignored.

⚠️ Important
Triangular icons tell you that this information requires attention (“Important”).

⚠️ Prohibited
Circular icons with a diagonal bar tell you that the action indicated is prohibited (“Prohibited”).

⚠️ Required
Filled circles with an exclamation mark indicate an action that must be performed (“Required”).

⚠️ WARNING
If a problem arises, turn the camera off, remove the battery, and disconnect and unplug the AC power adapter. Continued use of the camera when it is emitting smoke, is emitting any unusual odor, or is in any other abnormal state can cause a fire or electric shock. Contact your FUJIFILM dealer.

Don’t allow water or foreign objects to enter the camera. If water or foreign objects get inside the camera, turn the camera off, remove the battery, and disconnect and unplug the AC power adapter. Continued use of the camera can cause a fire or electric shock. Contact your FUJIFILM dealer.

For Your Safety

⚠️ WARNING
Do not use the camera in the bathroom or shower. This can cause a fire or electric shock.

Never attempt to change or take apart the camera (never open the case). Failure to observe this precaution can cause fire or electric shock.

Should the case break open as the result of a fall or other accident, do not touch the exposed parts. Failure to observe this precaution could result in electric shock or in injury from touching the damaged parts. Remove the battery immediately, taking care to avoid injury or electric shock, and take the product to the point of purchase for consultation.

Do not change, heat or unduly twist or pull the connection cord and do not place heavy objects on the connection cord. These actions could damage the cord and cause a fire or electric shock. If the cord is damaged, contact your FUJIFILM dealer.

Do not place the camera on an unstable surface. This can cause the camera to fall or tip over and cause injury.

Never attempt to take pictures while in motion. Do not use the camera while walking or driving. This can result in you falling down or being involved in a traffic accident.

Do not touch any metal parts of the camera during a thunderstorm. This can cause an electric shock due to induced current from the lightning discharge.

Do not use the battery except as specified. Load the battery as shown by the indicator.

Do not heat, change or take apart the battery. Do not drop or subject the battery to impacts. Do not store the battery with metallic products. Any of these actions can cause the battery to burst or leak and cause fire or injury as a result.
## For Your Safety

### WARNING

- **Do not use the charger to charge batteries other than those specified here.** The supplied charger is for use only with batteries of the type supplied with the camera. Using the charger to charge conventional batteries or other types of rechargeable batteries can cause the battery to leak, overheat or burst.
- **Do not use in the presence of flammable objects, explosive gases, or dust.**
- **When carrying the battery, install it in a digital camera or keep it in the hard case. When storing the battery, keep it in the hard case. When discarding, cover the battery terminals with insulation tape.** Contact with other metallic objects or batteries could cause the battery to ignite or burst.
- **Keep memory cards out of the reach of small children.** Because memory cards are small, they can be swallowed by children. Be sure to store memory cards out of the reach of small children. If a child swallows a memory card, seek medical attention or call an emergency number right away.

### CAUTION

- **Do not use this camera in locations affected by oil fumes, steam, humidity or dust.** This can cause a fire or electric shock.
- **Do not leave this camera in places subject to extremely high temperatures.** Do not leave the camera in locations such as a sealed vehicle or in direct sunlight. This can cause a fire.
- **Keep out of the reach of small children.** This product could cause injury in the hands of a child.

---

### The Battery and Power Supply

**Note:** Check the type of battery used in your camera and read the appropriate sections.

The following describes the proper use of batteries and how to prolong their life. Incorrect use can shorten battery life or cause leakage, overheating, fire, or explosion.

#### Li-ion Batteries

*Read this section if your camera uses a rechargeable Li-ion battery.*

The battery is not charged at shipment. Charge the battery before use. Keep the battery in its case when not in use.

#### Notes on the Battery

- **The battery gradually loses its charge when not in use.** Charge the battery one or two days before use.
- Battery life can be extended by turning the camera off when not in use.
- Battery capacity decreases at low temperatures; a depleted battery may not function at when cold. Keep a fully charged spare battery in a warm place and exchange as necessary, or keep the battery in your pocket or other warm place and insert it in the camera only when shooting. Do not place the battery in direct contact with hand warmers or other heating devices.

#### Charging the Battery

Charge the battery in the supplied battery charger. Charging times will increase at ambient temperatures below +10 °C (+50 °F) or above +35 °C (+95 °F). Do not attempt to charge the battery at temperatures above 40 °C (+104 °F); at temperatures below 0 °C (+32 °F), the battery will not charge.

Do not attempt to recharge a fully charged battery. The battery does not however need to be fully discharged before charging.

The battery may be warm to the touch immediately after charging or use. This is normal.

#### Battery Life

At normal temperatures, the battery can be recharged about 300 times. A noticeable decrease in the length of time the battery will hold a charge indicates that it has reached the...
end of its service life and should be replaced.

**Storage**
Performance may be impaired if the battery is left unused for extended periods when fully charged. Run the battery flat before storing it.

If the camera will not be used for an extended period, remove the battery and store it in a dry place with an ambient temperature of from +15 °C to +25 °C (+59 °F to +77 °F). Do not store in locations exposed to extremes of temperature.

**Cautions: Handling the Battery**
- Do not transport or store with metal objects such as necklaces or hairpins.
- Do not expose to flame or heat.
- Do not disassemble or modify.
- Use with designated chargers only.
- Dispose of used batteries promptly.
- Do not drop or subject to strong physical shocks.
- Do not expose to water.
- Keep the terminals clean.
- The battery and camera body may become warm to the touch after extended use. This is normal.

**AA Alkaline/Rechargeable Ni-MH Batteries**

_Read this section if your camera uses AA alkaline or rechargeable AA Ni-MH batteries._ Information on compatible battery types may be found elsewhere in the camera manual.

**Cautions: Handling the Batteries**
- Do not expose to water, flame, or heat, or store in warm or humid conditions.
- Do not transport or store with metal objects such as necklaces or hairpins.
- Do not disassemble or modify the batteries or battery casing.
- Do not subject to strong physical shocks.
- Do not use batteries that are leaking, deformed, or discolored.
- Keep out of reach of infants and small children.
- Insert in the correct orientation.
- Do not mix old and new batteries, batteries with different charge levels, or batteries of different types.
- If the camera will not be used for an extended period, remove the batteries. Note that the camera clock will be reset.
  - The batteries may be warm to the touch immediately after use. Turn the camera off and allow the batteries to cool before handling.
  - Battery capacity tends to decrease at low temperatures. Keep spare batteries in a pocket or other warm place and exchange as necessary. Cold batteries may recover some of their charge when warmed.
  - Fingerprints and other stains on the battery terminals can impair battery performance. Thoroughly clean the terminals with a soft, dry cloth before inserting them in the camera.

If the batteries leak, clean the battery compartment thoroughly before inserting new batteries.

If fluid from the battery comes into contact with skin or clothing, flush the affected area with water. _If fluid enters your eyes, immediately flush the affected area with water and seek medical attention. Do not rub your eyes. Failure to observe this precaution could result in permanent visual impairment._

**Ni-MH Batteries**
The capacity of Ni-MH batteries may be temporarily reduced when new, after long periods of disuse, or if they are repeatedly recharged before being fully discharged. This is normal and does not indicate a malfunction. Capacity can be increased by repeatedly discharging the batteries using the discharge option in the camera setup menu and recharging them using a battery charger.

**: CAUTION:** Do not use the discharge option with alkaline batteries.

The camera draws a small amount of current even when off. Ni-MH batteries that have been left in the camera for an extended period may be drawn down to the point that they no longer hold a charge. Battery performance may also drop if the batteries are run down in a device such as a flashlight. Use the discharge option in the camera setup menu to discharge Ni-MH batteries. Batteries that no longer hold a charge even after repeatedly being discharged and recharged have reached the end of their service life and must be replaced.

Ni-MH batteries can be recharged in a battery charger (sold separately). Batteries may become warm to the touch after charg-
For Your Safety

**Using the Camera**

Do not aim the camera at extremely bright light sources, such as the sun in a cloudless sky. Failure to observe this precaution could damage the camera image sensor.

**Take Test Shots**

Before taking photographs on important occasions (such as at weddings or before taking the camera on a trip), take a test shot and view the results to ensure that the camera is functioning normally. FUJIFILM Corporation cannot accept liability for damages or lost profits incurred as a result of product malfunction.

**Notes on Copyright**

Unless intended solely for personal use, images recorded using your digital camera system cannot be used in ways that infringe copyright laws without the consent of the owner. Note that some restrictions apply to the photographing of stage performances, entertainments, and exhibits, even when intended purely for personal use. Users are also asked to note that the transfer of memory cards containing images or data protected under copyright laws is only permissible within the restrictions imposed by those copyright laws.

**Handling**

To ensure that images are recorded correctly, do not subject the camera to impact or physical shocks while images are being recorded.

**Liquid Crystal**

In the event that the display is damaged, care should be taken to avoid contact with liquid crystal. Take the urgent action indicated should any of the following situations arise:

- If liquid crystal comes in contact with your skin, clean the area with a cloth and then wash thoroughly with soap and running water.
- If liquid crystal enters your eyes, flush the affected eye with clean water for at least 15 minutes and then seek medical assistance.
- If liquid crystal is swallowed, rinse your mouth thoroughly with water. Drink large quantities of water and induce vomiting, then seek medical assistance.

Although the display is manufactured using extremely high-precision technology, it may contain pixels that are always lit or that do not light. This is not a malfunction, and images recorded with the product are unaffected.

**Trademark Information**

*xD-Picture Card* and *SD* are trademarks of FUJIFILM Corporation. The typefaces included herein are solely developed by DynaComware Taiwan Inc. Macintosh, QuickTime, and Mac OS are trademarks of Apple Inc. in the U.S.A. and other countries. Windows 7, Windows Vista, and the Windows logo are trademarks of the Microsoft group of companies. Adobe and Adobe Reader are either trademarks or registered trademarks of Adobe Systems Incorporated in the U.S.A. and/or other countries. The SDHC and SDXC logos are trademarks of SD-3C, LLC. The HDMI logo is a trademark. YouTube is a trademark of Google Inc. All other trade names mentioned in this manual are the trademarks or registered trademarks of their respective owners.

**Electrical Interference**

This camera may interfere with hospital or aviation equipment. Consult with hospital or airline staff before using the camera in a hospital or on an aircraft.

**Color Television Systems**

NTSC (National Television System Committee) is a color television telecasting specification adopted mainly in the U.S.A., Canada, and Japan. PAL (Phase Alternation by Line) is a color television system adopted mainly in European countries and China.

**Electrical Interference**

Exif Print is a newly revised digital camera file format in which information stored with photographs is used for optimal color reproduction during printing.

**IMPORTANT NOTICE: Read Before Using the Software**

Direct or indirect export, in whole or in part, of licensed software without the permission of the applicable governing bodies is prohibited.
NOTICES

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

Please read the “Safety Notes” and make sure you understand them before using the camera.

Perchlorate Material—special handling may apply. See http://www.dtsc.ca.gov/hazardouswaste/perchlorate.

For Customers in the U.S.A.

Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

FCC Statement: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

• You are cautioned that any changes or modifications not expressly approved in this manual could void the user’s authority to operate the equipment.

Notes on the Grant: To comply with Part 15 of the FCC Rules, this product must be used with a Fujifilm-specified ferrite-core A/V cable, USB cable, and DC supply cord.

For Customers in Canada

CAUTION: This Class B digital apparatus complies with Canadian ICES-003.

Disposal of Electrical and Electronic Equipment in Private Households

In the European Union, Norway, Iceland and Liechtenstein: This symbol on the product, or in the manual and in the warranty, and/or on its packaging indicates that this product shall not be treated as household waste. Instead it should be taken to an applicable collection point for the recycling of electrical and electronic equipment.

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

This symbol on the batteries or accumulators indicates that those batteries shall not be treated as household waste.

If your equipment contains easy removable batteries or accumulators please dispose these separately according to your local requirements.

The recycling of materials will help to conserve natural resources. For more detailed information about recycling this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

In Countries Outside the European Union, Norway, Iceland and Liechtenstein: If you wish to discard this product, including the batteries or accumulators, please contact your local authorities and ask for the correct way of disposal.

Product Care

**Camera body**: For continued enjoyment of your camera, use a soft, dry cloth to clean the camera body after each use. Do not use alcohol, thinner, or other volatile chemicals, which could discolor or deform the leather on the camera body. Any liquid on the camera should be removed immediately with a soft, dry cloth. Use a blower to remove dust from the monitor, taking care to avoid scratches, and then gently wipe with a soft, dry cloth. Any remaining stains can be removed by wiping gently with a piece of FUJIFILM lens-cleaning paper to which a small amount of lens-cleaning fluid has been applied. To prevent dust entering the camera, replace the body cap when not lens is in place.

**Image sensor**: Dust can be removed from the image sensor using the [SENSOR CLEANING](#) option in the setup menu (82).

**Lenses**: Use a blower to remove dust, then gently wipe with a soft, dry cloth. Any remaining stains can be removed by wiping gently with a piece of FUJIFILM lens-cleaning paper to which a small amount of lens-cleaning fluid has been applied. Replace the front and rear caps when the lens is not use.

Symbols and Conventions

The following symbols are used in this manual:

⚠️ This information should be read before use to ensure correct operation.
🚀 Additional information that may be helpful when using the camera.
📚 Other pages in this manual on which related information may be found.

Menus and other text in the displays are shown in **bold**. In the illustrations in this manual, displays may be simplified for explanatory purposes.

Supplied Accessories

The following items are included with the camera:

- **NP-W126 rechargeable battery**
- **BC-W126 battery charger**
- **Body cap**
- **USB cable**
- **CD-ROM**
- **Clip attaching tool**
- **Metal strap clips (× 2)**
- **Owner’s Manual (this manual)**
- **Shoulder strap**
- **Protective covers (× 2)**
- **Diopter adjustment lens (comes installed in camera)**
Parts of the Camera

For more information, refer to the page listed to the right of each item.
Before You Begin

Parts of the Camera

The indicator lamp shows camera status as follows:

<table>
<thead>
<tr>
<th>Indicator lamp</th>
<th>Camera status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glows green</td>
<td>Focus locked.</td>
</tr>
<tr>
<td>Blinks green</td>
<td>Blur, focus, or exposure warning. Picture can be taken.</td>

</tr>
<tr>
<td>Glows orange</td>
<td>Recording pictures. No additional pictures can be taken at this time.</td>
</tr>
<tr>
<td>Blinks red</td>
<td>Lens or memory error.</td>
</tr>
</tbody>
</table>

Warnings may also appear in the display (106).
The Selector
Press the selector up (1), right (2), down (3), or left (4) to highlight items and press MENU/OK (5) to select. Pressing the selector up (MACRO) during shooting displays macro options (P 31).

Control Lock
To avoid accidentally displaying macro options during shooting, press MENU/OK until is displayed. The control can be unlocked by pressing MENU/OK until is no longer displayed.

The Command Dial
The command dial can be used to navigate the menus, to view the most recent picture (P 56), and to select options in the quick menu display (P 5).

Press the center of the command dial to zoom in on the focus area selected for manual focus (P 46) or the active focus point during playback (P 57).
The Q (Quick Menu) Button

Press Q for quick access to the following items:

<table>
<thead>
<tr>
<th>Option</th>
<th>Option</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>SELECT CUSTOM SETTING</td>
<td>IMAGE QUALITY</td>
<td>SELF-TIMER</td>
</tr>
<tr>

<td>LCD BRIGHTNESS</td>
</tr>
<tr>
<td>NOISE REDUCTION</td>
<td>COLOR COLOR</td>
<td></td>
</tr>
<tr>
<td>IMAGE SIZE</td>
<td>SHARPNESS</td>
<td></td>
</tr>
</tbody>
</table>

1. Press Q to display the quick menu during shooting.

2. Use the selector to highlight items and rotate the command dial to change.

3. Press Q to exit when settings are complete.

- For quick access to custom settings banks, press and hold the Q button.
**Camera Displays**
The following types of indicator may be displayed during shooting and playback. Indicators vary with camera settings.

### Shooting: Optical Viewfinder

1. Manual focus indicator ................................... 45
2. Flash mode ................................................... 54
3. Metering ...................................................... 49
4. White balance ............................................... 32

First Steps

Attaching the Strap

Attach the strap clips to the camera and then attach the strap.

1 Open a strap clip.
   Use the clip attaching tool to open a strap clip as shown.

① Keep the tool in a safe place. You will need it to open the strap clips when removing the strap.

2 Place the strap clip on an eyelet.
   Hook the strap eyelet in the clip opening. Remove the tool, using the other hand to keep the clip in place.

3 Pass the clip through the eyelet.
   Rotate the clip fully through the eyelet until it clicks closed.

4 Attach a protective cover.
   Place a protective cover over the eyelet as shown, with the black side of the cover toward the camera. Repeat Steps 1–4 for the second eyelet.
5 Insert the strap.
Insert the strap through a protective cover and strap clip.

6 Fasten the strap.
Fasten the strap as shown. Repeat Steps 5–6 for the second eyelet.

To avoid dropping the camera, be sure the strap is correctly secured.
## Attaching a Lens

Lenses attach as described below.

1. **Care is required to prevent dust entering the camera while attaching and removing lenses.**

1. **Remove the body and rear caps.**
   Remove the body cap from the camera and the rear cap from the lens.

   - Do not touch the camera’s internal parts.

2. **Attach the lens.**
   Place the lens on mount, keeping the marks on the lens and camera aligned, and then rotate the lens until it clicks into place.

   - Do not press the lens release button while attaching the lens.

### Removing Lenses

To remove the lens, turn the camera off, then press the lens release button and rotate the lens as shown.

- To prevent dust accumulating inside the camera, replace the body cap when no lens is attached.

### Supported Lenses (96)

The camera can be used with optional XF18mmF2 R, XF35mmF1.4 R, and XF60mmF2.4 R Macro interchangeable lenses.
Charging the Battery

The battery is not charged at shipment. Charge the battery before use.

1 Place the battery in the charger.
   Place the battery in the supplied battery charger as shown.

2 Plug the charger in.
   Plug the charger into a power outlet. The charging indicator will light.

   **The Charging Indicator**
   The charging indicator shows battery charge status as follows:

<table>
<thead>
<tr>
<th>Charging indicator</th>
<th>Battery status</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Battery not inserted.</td>
<td>Insert the battery.</td>
</tr>
<tr>
<td></td>
<td>Battery fully charged.</td>
<td>Remove the battery.</td>
</tr>
<tr>
<td>On</td>
<td>Battery charging.</td>
<td></td>
</tr>
<tr>
<td>Blinks</td>
<td>Battery fault.</td>
<td>Unplug the charger and remove the battery.</td>
</tr>
</tbody>
</table>

3 Charge the battery.
   Remove the battery when charging is complete. See the specifications (114) for charging times (note that charging times increase at low temperatures).

   🔴 Unplug the charger when it is not in use.
Inserting the Battery and a Memory Card

The camera has no internal memory; instead, pictures are stored on optional SD, SDHC, and SDXC memory cards (sold separately). After charging the battery, insert the battery and memory card as described below.

1 Open the battery-chamber cover. Slide the battery-chamber latch as shown and open the battery-chamber cover.

- Do not open the battery-chamber cover when the camera is on. Failure to observe this precaution could damage image files or memory cards.
- Do not use excessive force when handling the battery-chamber cover.

2 Insert the battery. Insert the battery as shown inside the battery chamber, using the battery to keep the battery latch pressed to one side.

- Insert the battery in the correct orientation. Do not use force or attempt to insert the battery upside down or backwards. The battery will slide in easily in the correct orientation.
3 Insert the memory card.
Holding the memory card in the orientation shown at right, slide it in until it clicks into place at the back of the slot.

Be sure card is in the correct orientation; do not insert at an angle or use force.
SD/SDHC/SDXC memory cards can be locked, making it impossible to format the card or to record or delete images. Before inserting a memory card, slide the write-protect switch to the unlocked position.

4 Close the battery-chamber cover.
Slide the battery-chamber latch as shown and close the battery-chamber cover.
Removing the Battery and Memory Card
Before removing the battery or memory card, turn the camera off and open the battery-chamber cover.

To remove the battery, press the battery latch to the side, and slide the battery out of the camera as shown.

To remove the memory card, press it in and release it slowly. The card can then be removed by hand. When a memory card is removed, the card could come out of the slot too quickly. Use your finger to hold it and gently release the card.

Batteries
- Remove dirt from the battery terminals with a clean, dry cloth. Failure to observe this precaution could prevent the battery from charging.
- Do not affix stickers or other objects to the battery. Failure to observe this precaution could make it impossible to remove the battery from the camera.
- Do not short the battery terminals. The battery could overheat.
- Read the cautions in “The Battery and Power Supply” (iv).
- Use only battery chargers designated for use with the battery. Failure to observe this precaution could result in product malfunction.
- Do not remove the labels from the battery or attempt to split or peel the outer casing.
- The battery gradually loses its charge when not in use. Charge the battery one or two days before use.
Compatible Memory Cards
FUJIFILM and SanDisk SD, SDHC, and SDXC memory cards have been approved for use in the camera. A complete list of approved memory cards is available at http://www.fujifilm.com/support/digital_cameras/compatibility/. Operation is not guaranteed with other cards. The camera cannot be used with xD-Picture Cards or MultiMediaCard (MMC) devices.

Memory Cards
- Do not turn the camera off or remove the memory card while the memory card is being formatted or data are being recorded to or deleted from the card. Failure to observe this precaution could damage the card.
- Format memory cards before first use, and be sure to reformat all memory cards after using them in a computer or other device. For more information on formatting memory cards, see page 83.
- Memory cards are small and can be swallowed; keep out of reach of children. If a child swallows a memory card, seek medical assistance immediately.
- miniSD or microSD adapters that are larger or smaller than the standard dimensions of an SD/SDHC/SDXC card may not eject normally; if the card does not eject, take the camera to an authorized service representative. Do not forcibly remove the card.
- Do not affix labels to memory cards. Peeling labels can cause camera malfunction.
- Movie recording may be interrupted with some types of SD/SDHC/SDXC memory card. Use a Class 4 card or better when shooting HD movies.
- Formatting a memory card in the camera creates a folder in which pictures are stored. Do not rename or delete this folder or use a computer or other device to edit, delete, or rename image files. Always use the camera to delete pictures; before editing or renaming files, copy them to a computer and edit or rename the copies, not the originals. Renaming the files on the camera can cause problems during playback.
**Turning the Camera on and Off**

Rotate the **ON/OFF** switch to **ON** to turn the camera on. Select **OFF** to turn the camera off.

Press the button to start playback. Press the shutter button halfway to return to shooting mode.

The camera will turn off automatically if no operations are performed for the length of time selected for **AUTO POWER OFF** (82). To reactivate the camera after it has turned off automatically, press the shutter button halfway or turn the **ON/OFF** switch to **OFF** and then back to **ON**.

For information on other power saving and startup options, see page 23.

Fingerprints and other marks on the lens or viewfinder can affect pictures or the view through the viewfinder. Keep the lens and viewfinder clean.

---

**Battery Level**

After turning the camera on, check the battery level in the display.

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(white)</td>
<td>Battery partially discharged.</td>
</tr>
<tr>
<td>(white)</td>
<td>Battery more than half discharged</td>
</tr>
<tr>
<td>(red)</td>
<td>Low battery. Charge as soon as possible.</td>
</tr>
<tr>
<td>(blinks red)</td>
<td>Battery exhausted. Turn camera off and recharge battery.</td>
</tr>
</tbody>
</table>
**Basic Setup**

A language-selection dialog is displayed the first time the camera is turned on. Set up the camera as described below (you can reset the clock or change languages at any time using the DATE/TIME or 言語/LANG. options in the setup menu; for information on displaying the setup menu, see page 80).

1. **Choose a language.**
   
   Highlight a language and press MENU/OK.
   
   Press DISP/BACK to skip the current step. Any steps you skip will be displayed the next time the camera is turned on.

2. **Set the date and time.**
   
   Press the selector left or right to highlight the year, month, day, hour, or minute and press up or down to change. To change the order in which the year, month, and day are displayed, highlight the date format and press the selector up or down. Press MENU/OK to exit to shooting mode when settings are complete.

   If the battery is removed for an extended period, the camera clock will be reset and the language-selection dialog will be displayed when the camera is turned on.
Choosing a Display

The camera is equipped with a hybrid optical/electronic viewfinder (OVF/EVF) and an LCD monitor (LCD). Press **VIEW MODE** to choose a display.

**Automatic Display Selection**

In this mode, the viewfinder turns on automatically when you put your eye to the viewfinder, and the LCD monitor turns on when you take your eye away (note that the eye sensor may respond to objects other than your eye or to light shining directly on the sensor).
**Using the Hybrid Viewfinder**

Use the viewfinder selector to choose between optical and electronic viewfinders. Keep the selector pressed up to choose the optical viewfinder display zoom ratio.

<table>
<thead>
<tr>
<th>Display</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Optical viewfinder (OVF)</td>
<td>This display is immune from digital video effects and allows the subject to be viewed directly with no display lag. Subjects are always in focus, allowing you to check their expression at any time, while a field of view slightly larger than that of the lens makes it easier to locate your subject without removing your eye from the viewfinder. The viewfinder window is however at a slight distance from the lens, with the result that the display in the viewfinder may differ slightly from the final photograph due to parallax.</td>
</tr>
<tr>
<td>Electronic viewfinder (EVF)</td>
<td>This display shows the view through the lens and has exactly the same field of view, allowing you to frame your subjects precisely and preview focus, depth of field, exposure, and white balance (although there may be a slight display lag). It can also be used to view photographs after shooting.</td>
</tr>
<tr>
<td>LCD monitor</td>
<td>This display is identical to the electronic viewfinder, except that its large size makes it easier to view shooting indicators and the view through the lens. It may however be difficult to see in bright light.</td>
</tr>
</tbody>
</table>
**The DISP/BACK Button**

The **DISP/BACK** button controls the display of indicators in the viewfinder and LCD monitor.

- **Optical Viewfinder: Shooting**
  - Standard display
  - Custom display

- **Electronic Viewfinder: Shooting**
  - Standard display
  - Custom display

- **LCD Monitor: Shooting**
  - **Detailed display**
  - **Standard display**
  - **Custom display**

**Custom Display**

Choose items for display using **DISP. CUSTOM SETTING** in the shooting menu (P. 71):

<table>
<thead>
<tr>
<th>Item</th>
<th>Display</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Framing grid</td>
<td>Exposure (shutter speed, aperture, and sensitivity)</td>

⚠️ See pages 6 – 7 for the locations of these items in the displays.
The DISP/BACK Button

Electronic Viewfinder/LCD Monitor: Playback

- **Indicators displayed**
- **Indicators hidden**
- **Favorites**
- **Photo information**

1. The optical viewfinder can not be used for playback.

**Histograms**

Histograms show the distribution of tones in the image. Brightness is shown by the horizontal axis, the number of pixels by the vertical axis.

- **Shadows**
- **Highlights**

**Optimal exposure**: Pixels are distributed in an even curve throughout the tone range.

**Overexposed**: Pixels are clustered on the right side of the graph.

**Underexposed**: Pixels are clustered on the left side of the graph.
**Power Management**

The setup menu contains the following power management options (81). For information on using the setup menu, see page 79.

- **POWER SAVE MODE**: Select ON to increase the number of photographs that can be taken with a fully-charged battery.
- **QUICK START MODE**: Select ON to reduce camera startup time.

<table>

<tr>
<td>Endurance</td>
<td>150 shots</td>
<td>250 shots (400 shots when optical viewfinder is used)</td>
</tr>
</tbody>
</table>

- All figures are approximate. The values for endurance are measured under FUJIFILM test conditions and may vary depending on how the camera is used.
Taking Photographs

Program AE (P)

To allow the camera to adjust both shutter speed and aperture for optimal exposure, rotate the shutter speed dial and lens aperture ring to A. P will appear in the display.

If the subject is outside the metering range of the camera, the shutter speed and aperture displays will show “– – –”.

Program Shift

If desired, you can press the selector left or right to other combinations of shutter speed and aperture without altering exposure (program shift). Program shift is not available if the attached flash supports TTL auto, AUTO is selected for DYNAMIC RANGE in the shooting menu (68), or an auto option is selected for ISO in the shooting menu (48).
**Shutter-Priority AE (S)**

To adjust shutter speed manually while letting the camera select aperture for optimal exposure, rotate the lens aperture ring to A and use the shutter speed dial (if A is currently selected for shutter speed, press the dial release while rotating the shutter speed dial). S will appear in the display.

1. If the correct exposure cannot be achieved at the selected shutter speed, aperture will be displayed in red when the shutter button is pressed halfway. Adjust shutter speed until the correct exposure is achieved.
2. If the subject is outside the metering range of the camera, the aperture display will show “—–”.

---

**Optical viewfinder**

**EVF/LCD**
Aperture-Priority AE (A)

To adjust aperture manually while letting the camera select shutter speed for optimal exposure, rotate the shutter speed dial to A and use the lens aperture ring. A will appear in the display.

1. If the correct exposure can not be achieved at the selected aperture, the shutter speed will be displayed in red when the shutter button is pressed halfway. Adjust aperture until the correct exposure is achieved.
2. If the subject is outside the metering range of the camera, the shutter speed display will show “———”.
3. The slowest shutter speed available when ON is selected for POWER SAVE MODE is 1/4 s (81).

Depth of Field

The aperture ring can be used to adjust aperture before recording begins. Choose a low f-numbers to soften background details. The effect can be heightened by increasing the distance between your subject and the background.

Previewing Depth of Field

When PREVIEW DEPTH OF FIELD is selected for Fn BUTTON (50) in the shooting menu, pressing the Fn button stops aperture down to the selected setting, allowing depth of field to be previewed in the electronic viewfinder or LCD monitor.
Taking Photographs

Manual Exposure (M)

Exposure can be altered from the value suggested by the camera by rotating both the shutter speed dial and aperture ring to settings other than A (if A is currently selected for shutter speed, press the dial release while rotating the shutter speed dial). M will appear in the display.

- The manual exposure display includes an exposure indicator that shows the amount the picture would be under- or over-exposed at current settings.
Long Time-Exposures (T/B)

Select a shutter speed of **T** (time) or **B** (bulb) for long time-exposures.

- Use of a tripod is recommended to prevent the camera from moving during the exposure.
- To reduce “noise” (mottling) in long time-exposures, select **ON** for **LONG EXPOSURE NR** in the shooting menu. Note that this may increase the time needed to record images after shooting.

### Time (T)

1. Rotate the shutter speed dial to **T**.

2. Press the selector left or right to choose a shutter speed between 2 s and 30 s in steps of ½ EV.

3. Press the shutter button all the way down to take a picture at the selected shutter speed.

### Bulb (B)

1. Rotate the shutter speed dial to **B**.

2. Press the shutter button all the way down. The shutter will remain open for up to 60 minutes while the shutter button is pressed.

- Selecting an aperture of **A** fixes shutter speed at 30 s.

#### Using a Remote Release

A remote release (available from third-party suppliers) can be used for long time-exposures.
Exposure Compensation

Rotate the exposure compensation dial to adjust exposure when photographing very bright, very dark, or high-contrast subjects. The effect is visible in the LCD monitor and electronic viewfinder; when using the optical viewfinder, use the exposure indicator to check exposure.

Choosing an Exposure Compensation Value

- **Backlit subjects:** Choose values from +2/3 EV to +12/3 EV (for an explanation of the term “EV”, see the Glossary on page 109).

- **Highly reflective subjects or very bright scenes** (e.g., snowfields): +1 EV

- **Scenes that are mostly sky:** +1 EV

- **Spotlit subjects** (particularly if photographed against dark backgrounds): −2/3 EV

- **Subjects with low reflectivity** (pine trees or dark-colored foliage): −2/3 EV

Choose positive values (+) to increase exposure

Choose negative values (−) to reduce exposure
Focusing and Taking Pictures
Press the shutter button halfway to focus and the rest of the way down to shoot.

1 Focus.
Frame the picture with your subject in the center focus area and press the shutter button halfway to focus.

If the subject is poorly lit, the AF-assist illuminator may light (72).

If the camera is able to focus, it will beep twice and focus area will glow green. Focus and exposure will lock while the shutter button is pressed halfway.

If the camera is unable to focus, the focus frame will turn red, and !AF will be displayed.

2 Shoot.
Smoothly press the shutter button the rest of the way down to take the picture.

Silent Mode
In situations in which camera sounds or lights may be unwelcome, press the DISP/BACK button for a second, or select ON for SILENT MODE in the setup menu (80; note that silent mode is not available during movie playback). The camera speaker, flash, and AF-assist illuminator/self-timer lamp turn off and flash and volume settings can not be adjusted.
More on Photography

Macro Mode (Close-ups)

To focus at short distances, press the selector up (MACRO) and select 🌟. If the optical viewfinder is on, the camera will automatically switch to the electronic viewfinder (because of parallax, the optical viewfinder is not recommended). To exit macro mode, press the selector up left and select OFF.

- The LCD monitor and electronic viewfinder can be used to focus at short ranges when macro mode is not selected, but the time needed to focus increases.
- The shadow cast by the lens may appear in photographs taken with the flash at distances under 50 cm/19.6 in. Turn the flash off or increase the distance to the subject.
White Balance

For natural colors, select **WB** WHITE BALANCE in the shooting menu to display the following options, then use the selector to highlight an option that matches the light source and press **MENU/OK**. The dialog shown at bottom right will be displayed; use the selector to fine-tune white balance or press **DISP/BACK** to exit without fine-tuning (for an explanation of “white balance,” see the Glossary on page 109).

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>White balance adjusted automatically.</td>
</tr>
<tr>
<td>☀️</td>
<td>Measure a value for white balance (<a href="#">33</a>).</td>
</tr>
<tr>
<td>⌨️</td>
<td>Selecting this option displays a list of color temperatures (<a href="#">33</a>); highlight a temperature and press <strong>MENU/OK</strong> to select the highlighted option and display the fine-tuning dialog.</td>
</tr>
<tr>
<td>☀️</td>
<td>For subjects in direct sunlight.</td>
</tr>
</tbody>
</table>

White balance is adjusted for flash lighting only in **AUTO** and ☀️ modes. Turn the flash off using other white balance options.

Results vary with shooting conditions. Play pictures back after shooting to check colors.

White balance can also be adjusted using the Q button.
**: Custom White Balance**

Choose ` ` to adjust white balance for unusual lighting conditions. White balance measurement options will be displayed; frame a white object so that it fills the display and press the shutter button all the way down to measure white balance (to select the most recent custom value and exit without measuring white balance, press **DISP/BACK**, or press **MENU/OK** to select the most recent value and display the fine-tuning dialog).

- If “COMPLETED!” is displayed, press **MENU/OK** to set white balance to the measured value.
- If “UNDER” is displayed, raise exposure compensation (P 29) and try again.
- If “OVER” is displayed, lower exposure compensation and try again.

**: Color Temperature**

Color temperature is an objective measure of the color of a light source, expressed in Kelvin (K). Light sources with a color temperature close to that of direct sunlight appear white; light sources with a lower color temperature have a yellow or red cast, while those with a higher color temperature are tinged with blue. You can match color temperature to the light source as shown in the following table, or choose options that differ sharply from the color of the light source to make pictures “warmer” or “colder.”

<table>
<thead>
<tr>
<th>Choose for redder light sources or “colder” pictures</th>
<th>Choose for bluer light sources or “warmer” pictures</th>
</tr>
</thead>
<tbody>
<tr>
<td>2,000 K 5,000 K 15,000 K</td>
<td>2,000 K 5,000 K 15,000 K</td>
</tr>
<tr>
<td>Candlelight Direct sunlight</td>
<td>Sunset/sunrise Shade</td>
</tr>
</tbody>
</table>
Continuous Shooting (Burst Mode)
Capture motion in a series of pictures.

1 Press the DRIVE button to display drive options.

2 Press the selector up or down to choose from frame rates of approximately 6 fps (frames per second) and 3 fps, and press left or right to choose the number of shots per burst.

3 Press the shutter button halfway to focus.

4 Press the shutter button the rest of the way down to start shooting. Shooting ends when the shutter button is released, the selected number of pictures has been taken, or memory is full.

- Focus and exposure are determined by the first frame in each series. The flash turns off automatically; the previously-selected flash mode is restored when burst shooting is turned off.
- Frame rate varies with shutter speed and may slow as more shots are taken.
- Additional time may be required to record pictures when shooting ends.
- If file numbering reaches 999 before shooting is complete, the remaining pictures will be recorded to a new folder (81).
# Bracketing

Automatically vary settings over a series of pictures.

1. Press the **DRIVE** button to display drive options and press the selector up or down to highlight one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AE BKT</strong></td>
<td>Press the selector left or right to highlight a bracketing amount. Each time the shutter button is pressed, the camera will take three shots at up to about 6 fps: one using the metered value for exposure, the second overexposed by the selected amount, and the third underexposed by the same amount (regardless of the amount selected, exposure will not exceed the limits of the exposure metering system).</td>
</tr>
<tr>
<td><strong>ISO BKT</strong></td>
<td>Press the selector left or right to highlight a bracketing amount. Each time the shutter is released, the camera will take a picture at the current sensitivity and process it to create two additional copies, one with sensitivity raised and the other with sensitivity lowered by the selected amount (regardless of the amount selected, sensitivity will not exceed ISO 6400 or fall below ISO 200).</td>
</tr>
<tr>
<td><strong>FILM SIMULATION BKT</strong></td>
<td>Each time the shutter is released, the camera takes one shot and processes it to create copies with the film simulation settings selected for <strong>FILM SIMULATION BKT</strong> in the shooting menu.</td>
</tr>
<tr>
<td><strong>DYNAMIC RANGE BKT</strong></td>
<td>Each time the shutter button is pressed, the camera takes three shots with different dynamic ranges: 100% for the first, 200% for the second, and 400% for the third. The shots are taken at rates of up to about 6 fps. While dynamic range bracketing is in effect, sensitivity will be restricted to a minimum of ISO 800; the sensitivity previously in effect is restored when bracketing ends.</td>
</tr>
</tbody>
</table>

Press **MENU/OK** to select the highlighted option.

2. Take photographs.
**Multiple Exposures**

Create a photograph that combines two exposures.

1. Select **ON** for **MULTIPLE EXPOSURE** in the shooting menu.

2. Take the first shot.

3. Press **MENU/OK**. You will be prompted to take the second shot.
   - To return to Step 2 and retake the first shot, press the selector left. To save the first shot and exit without creating a multiple exposure, press **DISP/BACK**.

4. Take the second shot.

5. Press **MENU/OK** to create the multiple exposure, or press the selector left to return to Step 4 and retake the second shot.
Panoramas

Follow an on-screen guide to create a panorama.

1. Press the DRIVE button to display drive options. Press the selector up or down to highlight (MOTION PANORAMA) and press MENU/OK.

2. To select the size of the angle through which you will pan the camera while shooting, press the selector left. Highlight a size and press MENU/OK.

3. Press the selector right to view a choice of pan directions. Highlight a pan direction and press MENU/OK.

4. Press the shutter button all the way down to start recording. There is no need to keep the shutter button pressed during recording.

5. Pan the camera in the direction shown by the arrow. Shooting ends automatically when the camera is panned to the end of the guides and the panorama is complete.

- Shooting ends if the shutter button is pressed all the way down during shooting. No panorama may be recorded if the shutter button is pressed before the panorama is complete.

The size of the completed panorama varies with the angle and pan direction.

<table>
<thead>
<tr>
<th>Angle</th>
<th>Pan direction</th>
<th>Size (W × H)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Horizontal</td>
<td>5,120 × 1,440/ 7.3 M</td>
</tr>
<tr>
<td></td>
<td>Vertical</td>
<td>2,160 × 5,120/11.1 M</td>
</tr>
<tr>
<td>M</td>
<td>Horizontal</td>
<td>7,680 × 1,440/11.1 M</td>
</tr>
<tr>
<td></td>
<td>Vertical</td>
<td>2,160 × 7,680/16.6 M</td>
</tr>
</tbody>
</table>
Panoramas

Panoramas are created from multiple frames; exposure for the entire panorama is determined by the first frame. The camera may in some cases record an greater or lesser angle than selected or be unable to stitch the frames together perfectly. The last part of the panorama may not be recorded if shooting ends before the panorama is complete.

Shooting may be interrupted if the camera is panned too quickly or too slowly. Panning the camera in a direction other than that shown cancels shooting.

The desired results may not be achieved with moving subjects, subjects close to the camera, unvarying subjects such as the sky or a field of grass, subjects that are in constant motion, such as waves and waterfalls, or subjects that undergo marked changes in brightness. Panoramas may be blurred if the subject is poorly lit.

For Best Results

For best results, use a lens with a focal length of 35 mm or less (50 mm or less in 35 mm format). Prop your elbows against your sides and move the camera slowly in a small circle at a steady speed, keeping the camera horizontal and being careful only to pan in the direction shown by the guides. Use a tripod for best results. If the desired results are not achieved, try panning at a different speed.
Recording High-Definition (HD) Movies

Record short high-definition movies. Sound is recorded in stereo via the built-in microphone; during recording, do not cover the microphone or use the viewfinder selector, which is located next to the microphone.

1 Press the **DRIVE** button to display drive options. Press the selector up or down to highlight ✨ (MOVIE) and press **MENU/OK**.

- If the optical viewfinder is on, the camera will automatically switch to the electronic viewfinder.

2 Press the shutter button all the way down to start recording.

3 Press the shutter button all the way down again to end recording. Recording ends automatically after ten minutes or when memory is full.

- Focus, exposure, and white balance are adjusted automatically throughout recording. The color and brightness of the image may vary from those displayed before recording begins.
- The indicator lamp lights while movies are being recorded.
- The microphone may pick up lens noise and other sounds made by the camera during recording.
- Vertical or horizontal streaks may appear in movies containing very bright subjects. This is normal and does not indicate a malfunction.
**Before Recording**
Before recording, choose a frame size of **FULL HD 1920** (1,920 × 1,080, or Full HD) or **HD 1280** (1,280 × 720, or HD) using the **MOVIE MODE** option in the shooting menu (P 73), adjust aperture (P 26), white balance (P 32), film simulation (P 51), and exposure compensation (P 29), and select a focus mode (P 45).

1. Continuous AF is used when S is selected for focus mode.
**Using the Self-Timer**

Use the timer for self-portraits or to prevent blur caused by camera shake.

1. Press **MENU/OK** in shooting mode to display the shooting menu. Press the selector up or down to highlight ✉ SELF-TIMER and press **MENU/OK**.

2. Press the selector up or down to highlight one of the following options and press **MENU/OK** to select.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>📸 2 SEC</td>
<td>The shutter is released two seconds after the shutter button is pressed. Use to reduce blur caused by the camera moving when the shutter button is pressed.</td>
</tr>
<tr>
<td>📸 10 SEC</td>
<td>The shutter is released ten seconds after the shutter button is pressed. Use for photographs in which you wish to appear yourself.</td>
</tr>
<tr>
<td>OFF</td>
<td>Self-timer off.</td>
</tr>
</tbody>
</table>

3. Press the shutter button halfway to focus.

⚠️ Stand behind the camera when using the shutter button. Standing in front of the lens can interfere with focus and exposure.
Using the Self-Timer

4. Press the shutter button the rest of the way down to start the timer. The display in the monitor shows the number of seconds remaining until the shutter is released. To stop the timer before the picture is taken, press **DISP/BACK**.

The self-timer lamp on the front of the camera will blink immediately before the picture is taken. If the two-second timer is selected, the self-timer lamp will blink as the timer counts down.

- The self-timer turns off automatically when the camera is turned off.
Focus/Exposure Lock

To compose photographs with off-center subjects:

1 **Focus**: Position the subject in the focus frame and press the shutter button halfway to lock focus and exposure. Focus and exposure will remain locked while the shutter button is pressed halfway (AF/AE lock).

- Depending on the option selected for AE/AF-LOCK BUTTON in the shooting menu (72), focus and/or exposure can also be locked by pressing the AFL/AEL button; focus and/or exposure will remain locked even if the shutter button is pressed. Choose AE LOCK ONLY to lock exposure but not focus, AF LOCK ONLY to lock focus but not exposure, or AE/AF LOCK to lock both focus and exposure. In manual focus mode (45), the camera will focus automatically with the AFL/AEL button.

2 **Recompose**: Keep the shutter button pressed halfway or keep the AFL/AEL button pressed.

- If AE&AF ON/OFF SWITCH is selected for AE/AF-LOCK MODE (72), focus and/or exposure lock when the AFL/AEL button is pressed and remain locked until the button is pressed again.

3 **Shoot**: Press the button all the way down.
**Autofocus**

Although the camera boasts a high-precision autofocus system, it may be unable to focus on the subjects listed below.

- Very shiny subjects such as mirrors or car bodies.

- Fast-moving subjects.

- Subjects photographed through a window or other reflective object.
- Dark subjects and subjects that absorb rather than reflect light, such as hair or fur.
- Insubstantial subjects, such as smoke or flame.
- Subjects that show little contrast with the background (for example, subjects in clothing that is the same color as the background).
- Subjects positioned in front of or behind a high-contrast object that is also in the focus frame (for example, a subject photographed against a backdrop of highly contrasting elements).
Focus Mode

Use the focus mode selector to choose how the camera focuses.

- **S** (single AF): Focus locks while the shutter button is pressed halfway. Choose for stationary subjects.
- **C** (continuous AF): Focus is continually adjusted to reflect changes in the distance to the subject even when the shutter button is not pressed halfway (note that this increases the drain on the battery).
- **M** (manual): Focus manually using the focus ring. Rotate the ring left to reduce the focus distance, right to increase. The manual focus indicator indicates how closely the focus distance matches the distance to the subject in the focus brackets (the red bar indicates the focus distance, the white bar the depth of field, or in other words the distance in front of and behind the focus point that appears to be in focus); you can also check focus visually in the electronic viewfinder or LCD monitor. Choose for manual control of focus or in situations in which the camera is unable to focus using autofocus (44).

- Use the FOCUS RING option in the setup menu (81) to reverse the direction of rotation of the focus ring.
- The camera will not focus if the focus ring is rotated past infinity.
- To focus using autofocus, press the AFL/AEL button. This can be used to quickly focus on a chosen subject in manual focus mode.
- The camera can show focus distance in meters or feet. Use the FOCUS SCALE UNITS option in the setup menu (83) to choose the units used.
Manual Focus
Pressing the center of the command dial magnifies the view in the electronic viewfinder or LCD monitor for precise focus. To scroll to other areas of the frame, press the AF button and use the selector.
Focus Frame Selection

When [ ] AREA is selected for [ ] AF MODE in the shooting menu and S is selected for focus mode, the electronic viewfinder and LCD monitor offer a choice of 49 focus points and the optical viewfinder a choice of 25, allowing photographs to be composed with the main subject positioned almost anywhere in the frame. To position the focus frame, press the AF button and use the selector (the focus frame can be returned to the center by pressing MENU/OK). Press the AF button again to put the setting into effect.

When you switch to the optical viewfinder, the camera will select the focus frame closest to that selected in the electronic viewfinder or LCD monitor.

When framing pictures in the electronic viewfinder or LCD monitor, you can choose the size of the focus frame for S by pressing the AF button and rotating the command dial left or right. Rotate the dial left to reduce the frame by up to 50%, right to enlarge it by up to 150%, or press the center of the dial to restore the frame to its original size. Press the AF button again to put the setting into effect.
**Sensitivity**

“Sensitivity” refers to the camera’s sensitivity to light. Choose from values between L (100) (ISO 100) and H (25600) (ISO 25600). Higher values can be used to reduce blur when lighting is poor, while lower values allow slower shutter speeds or wider apertures in bright light; note, however, that mottling may appear in pictures taken at high sensitivities, particularly at H (25600), while choosing L (100) reduces dynamic range. Values of from ISO 200 to ISO 6400 are recommended in most situations. If an AUTO option is selected, the camera will adjust sensitivity automatically in response to shooting conditions; the value in parentheses is the maximum sensitivity that will be selected when the subject is poorly lit.

1 Press MENU/OK in shooting mode to display the shooting menu. Press the selector up or down to highlight ISO and press MENU/OK.

   - At default settings, ISO options can also be displayed by pressing the Fn button.

2 Press the selector up or down to highlight the desired option and press MENU/OK to select.

   - Sensitivity is not reset when the camera is turned off.
   - L (100) is reset to ISO 200 and H (12800) and H (25600) are reset to ISO 6400 when RAW, FINE+RAW, or NORMAL+RAW is selected for image quality (53, 67). For more information on the settings available with L (100), H (12800), and H (25600), see page 116.
# Metering

To choose how the camera meters exposure, press the AE button to display metering options. Use the selector to highlight an option and press AE to select.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[0] (MULTI)</td>
<td>The camera instantly determines exposure based on an analysis of composition, color, and brightness distribution. Recommended in most situations.</td>
</tr>
<tr>
<td>[0] (SPOT)</td>
<td>The camera meters lighting conditions in an area at the center of the frame equivalent to 2% of the total. Recommended when the background is much brighter or darker than the main subject; due to parallax, not recommended when pictures are framed in the optical viewfinder.</td>
</tr>
<tr>
<td>[ ] (AVERAGE)</td>
<td>Exposure is set to the average for the entire frame. Provides consistent exposure across multiple shots with the same lighting, and is particularly effective for landscapes and portraits of subjects dressed in black or white.</td>
</tr>
</tbody>
</table>
The Fn Button

The role played by the Fn button can be selected using the **Fn BUTTON** option in the shooting menu (70). The options available include multiple exposure (36), depth-of-field preview (26), the self-timer (41), sensitivity (48), image size (67), image quality (67), dynamic range (68), film simulation (51), white balance (32), AF mode (69), movie recording (39), RAW/JPEG toggle (53), and custom settings (52).

The **Fn BUTTON** menu can also be displayed by pressing and holding the Fn button.
**Film Simulation**

Simulate the effects of different kinds of film, including black-and-white (with or without color filters).

1. Press **MENU/OK** in shooting mode to display the shooting menu. Press the selector up or down to highlight **FILM SIMULATION** and press **MENU/OK**.

2. Press the selector up or down to highlight one of the following options and press **MENU/OK** to select.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PROVIA/STANDARD</td>
<td>Standard color reproduction. Suited to a wide range of subjects, from portraits to landscapes.</td>
</tr>
<tr>
<td>Velvia/VIVID</td>
<td>A high-contrast palette of saturated colors, suited to nature photos.</td>
</tr>
<tr>
<td>ASTIA/SOFT</td>
<td>Enhances the range of hues available for skin tones in portraits while preserving the bright blues of daylight skies. Recommended for outdoor portrait photography.</td>
</tr>
<tr>
<td>PRO Neg. Hi</td>
<td>Offers slightly more contrast than PRO Neg. Std. Recommended for outdoor portrait photography.</td>
</tr>
<tr>
<td>PRO Neg. Std</td>
<td>A soft-toned palette. The range of hues available for skin tones is enhanced, making this a good choice for studio portrait photography.</td>
</tr>
<tr>
<td>MONOCHROME</td>
<td>Take pictures in standard black and white.</td>
</tr>
<tr>
<td>MONOCHROME + Ye FILTER</td>
<td>Take black-and-white pictures with slightly increased contrast. This setting also slightly tones down the brightness of the sky.</td>
</tr>
<tr>
<td>MONOCHROME + R FILTER</td>
<td>Take black-and-white pictures with increased contrast. This setting also tones down the brightness of the sky.</td>
</tr>
<tr>
<td>MONOCHROME + G FILTER</td>
<td>Soften skin tones in black-and-white portraits</td>
</tr>
<tr>
<td>SEPIA</td>
<td>Take pictures in sepia.</td>
</tr>
</tbody>
</table>

Film simulation options can be combined with tone and sharpness settings (69).
**Saving Settings**

Save up to 7 sets of custom camera settings for commonly-encountered situations. Saved settings can be recalled using the SELECT CUSTOM SETTING option in the shooting menu.

1. Press MENU/OK in shooting mode to display the shooting menu. Press the selector up or down to highlight EDIT/SAVE CUSTOM SETTING and press MENU/OK.

2. Highlight a custom settings bank and press MENU/OK to select. Adjust the following as desired and press DISP/BACK when adjustments are complete: ISO, DYNAMIC RANGE, FILM SIMULATION, WHITE BALANCE, COLOR, SHARPNESS, HIGHLIGHT TONE, SHADOW TONE, and NOISE REDUCTION.

   To replace the settings in the selected bank with the settings currently selected with the camera, select SAVE CURRENT SETTINGS and press MENU/OK.

3. A confirmation dialog will be displayed; highlight OK and press MENU/OK.
Recording Pictures in RAW Format

To toggle RAW image quality on or off for a single shot, assign **RAW** to the **Fn** button (50). If a JPEG option is currently selected for image quality, pressing the **Fn** button temporarily selects the equivalent JPEG+RAW option. If a JPEG+RAW option is currently selected, pressing the **Fn** button temporarily selects the equivalent JPEG option, while if **RAW** is selected, pressing the **Fn** button temporarily selects **FINE**. Taking a picture or pressing the **Fn** button again restores the previous setting.

- RAW images record raw, unprocessed data from the camera image sensor. JPEG copies of RAW images can be created using the **RAW CONVERSION** option in the playback menu, or RAW images can be viewed on a computer using the RAW File Converter application that is installed with the software on the supplied CD (90, 92).
- Sensitivities of **L (100)**, **H (12800)**, and **H (25600)** are not available when RAW image quality is on (48).
- Control lock (4) disables the **RAW** button. To enable the **RAW** button, press **MENU/OK** until the **fn** icon clears from the display.
### Flash Photography

Optional EF-42, EF-20, and EF-X20 shoe-mounted flash units (p. 97) can be used for additional lighting when shooting at night or indoors under low light. See the manual provided with the flash unit for details.

To choose the flash mode for the optional flash unit, select **FLASH MODE** in the shooting menu. The options shown below will be displayed; press the selector up or down to highlight an option and press **MENU/OK** to select.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AUTO</strong> (AUTO FLASH) / <strong>AUTO</strong> (RED EYE REDUCTION)*</td>
<td>The flash fires when required. Recommended in most situations.</td>
</tr>
<tr>
<td><strong>Flash</strong> (FORCED FLASH) / <strong>Flash</strong> (FORCED FLASH)*</td>
<td>The flash fires whenever a picture is taken. Use for backlit subjects or for natural coloration when shooting in bright light.</td>
</tr>
<tr>
<td><strong>Suppressed Flash</strong></td>
<td>The flash does not fire even when the subject is poorly lit. Use of a tripod is recommended.</td>
</tr>
<tr>
<td><strong>2nd Curtain Sync.</strong> / <strong>2nd Curtain Sync.</strong>*</td>
<td>The flash fires immediately before the shutter closes.</td>
</tr>
<tr>
<td><strong>Slow Synchro</strong> / <strong>Red-Eye &amp; Slow</strong></td>
<td>Capture both the main subject and the background under low light (note that brightly lit scenes may be overexposed).</td>
</tr>
</tbody>
</table>

*Red-eye removal* (**Flash**, **2nd Curtain Sync.**, **Slow Synchro**, or **Red-Eye & Slow**) is available in these modes when **ON** is selected for **RED EYE REMOVAL** in the shooting menu (p. 73). Red-eye removal minimizes “red-eye” caused when light from the flash is reflected from the subject’s retinas as shown in the illustration at right.

- If **Flash** is displayed when the shutter button is pressed halfway, the flash will fire when the photo is taken.
- The flash may fire several times with each shot. Do not move the camera until shooting is complete.
- Remove lens hoods to prevent shadows in photos taken with the flash.
- The flash does not fire in silent mode.
Flash Sync Speed
The flash will synchronize with the shutter at shutter speeds of $\frac{1}{180}$ s or slower.

The Sync Terminal
Use the sync terminal to connect flash units that require a sync cable.

Third-Party Flash Units
Do not use third-party flash units that apply over 300V to the camera hot shoe.
Viewing Pictures

Viewing Pictures Full Frame

Pictures can be viewed in the electronic viewfinder or LCD monitor. When taking important pictures, take a test shot and check the results.

To view pictures full frame, press \[ \text{ ]}. Additional pictures can be viewed by pressing the selector left or right or rotating the command dial. Press the selector or rotate the dial right to view pictures in the order recorded, left to view pictures in reverse order. Keep the selector pressed to scroll rapidly to the desired frame.

- Pictures taken using other cameras are indicated by a \[ \text{ ]} (“gift image”) icon during playback.

Favorites: Rating Pictures

To rate the current picture, press \[ \text{ DISP/BACK} and press the selector up and down to select from zero to five stars.

Deleting Pictures

To delete the current picture, press the \[ \text{ } \] button. The following dialog will be displayed.

To delete the picture, highlight \text{OK} and press \text{MENU/OK}. To exit without deleting the picture, highlight \text{CANCEL} and press \text{MENU/OK}.

- Pictures can also be deleted from the playback menu (\text{65}).

Creating JPEG Copies of RAW Pictures

Pressing the RAW button during playback displays RAW conversion options (\text{53}).
**Viewing Photo Information**

The photo information display changes each time the selector is pressed up.

- **Basic data**
  - 100-0001
  - 12/31/2050
  - 10:00 AM
  - 1/1000
  - F4.5

- **Details, page 1**
  - D-RANGE: 100
  - COLOR: STD
  - HIGH LIGHT TONE: STD
  - SHADOW TONE: STD
  - SHARPNESS: STD
  - FILM SIM.: PROVA
  - WHITE BALANCE: AUTO

- **Details, page 2**
  - COLOR SPACE: sRGB
  - METERING: PATTERN
  - FLASH MODE: OFF
  - LENS: 18mm
  - FOCAL LENGTH: 18mm

- **Active focus point (“+”)**

- **Zooming in on the Focus Point**

Press the center of the command control to zoom in on the focus point. Press the center of the command control again to return to full-frame playback.

- **Zoom indicator**

The maximum zoom ratio varies with image size (p. 67). Playback zoom is not available with cropped or resized copies saved at a size of 640.

- **Playback Zoom**

Press \( \text{Q} \) to zoom in on the current picture, \( \text{Q} \) to zoom out. When the picture is zoomed in, the selector can be used to view areas of the image not currently visible in the display. Press **DISP/BACK** or **MENU/OK** to exit zoom.

- **Navigation window shows portion of image currently displayed**
**Multi-Frame Playback**
To change the number of images displayed, press  when a picture is displayed full frame.

Press  to view more images.

Use the selector to highlight images and press **MENU/OK** to view the highlighted image full frame. In the nine- and hundred-frame displays, press the selector up or down to view more pictures.
## Viewing Movies

During playback, movies are displayed as shown at right. The following operations can be performed while a movie is displayed:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start/pause playback</td>
<td><strong>Press the selector down</strong> to start playback. Press again to pause. While playback is paused, you can press the selector left or right to rewind or advance one frame at a time.</td>
</tr>
<tr>
<td>End playback</td>
<td><strong>Press the selector up</strong> to end playback.</td>
</tr>
<tr>
<td>Adjust speed</td>
<td><strong>Press the selector left or right</strong> to adjust playback speed during playback. Speed is shown by the number of arrows (▶ or ◀).</td>
</tr>
<tr>
<td>Adjust volume</td>
<td><strong>Press MENU/OK</strong> to pause playback and display volume controls. Press the selector up or down to adjust the volume; press MENU/OK again to resume playback. Volume can also be adjusted in the playback menu (78).</td>
</tr>
</tbody>
</table>

Progress is shown in the display during playback.

1. Do not cover the speaker during playback.
2. Sound is not played back in silent mode.
**Image Search**

Follow the steps below to search for pictures.

1. Press **MENU/OK** during playback to display the playback menu. Press the selector up or down to highlight  
   ![Image Search Icon]  
   and press **MENU/OK**.

2. Highlight an option and press **MENU/OK**.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BY DATE</td>
<td>Search by date.</td>
</tr>
<tr>
<td>BY FACE</td>
<td>Search for pictures that include faces.</td>
</tr>
<tr>
<td>BY ★ FAVORITES</td>
<td>Search by rating.</td>
</tr>
<tr>
<td>BY TYPE OF DATA</td>
<td>Find all still pictures, all movies, all pictures taken in burst mode, or all RAW pictures.</td>
</tr>
<tr>
<td>BY UPLOAD MARK</td>
<td>Find all pictures selected for upload to a specified destination.</td>
</tr>
</tbody>
</table>

3. Select a search condition. Only pictures that match the search condition will be displayed. To delete or protect selected pictures or to view the selected pictures in a slide show, press **MENU/OK** and choose from the options at right.

4. To end the search, select **EXIT SEARCH**.
PhotoBook Assist

Create books from your favorite photos.

Creating a PhotoBook

1 Select **NEW BOOK** for PhotoBook Assist in the playback menu (P 77) and choose from the following options:

- **SELECT FROM ALL**: Choose from all available pictures.
- **SELECT BY IMAGE SEARCH**: Choose from pictures matching selected search conditions (P 60).

 Neither photographs nor smaller nor movies can be selected for photobooks.

2 Scroll through the images and press the selector up to select or deselect. To display the current image on the cover, press the selector down. Press **MENU/OK** to exit when the book is complete.

 Neither photographs nor smaller nor movies can be selected for photobooks.

3 Select **COMPLETE PHOTOBOOK** (to select all photos or all photos matching the specified search conditions for the book, choose SELECT ALL). The new book will be added to the list in the photobook assist menu.

- Books can contain up to 300 pictures.
- Books that contain no photos are automatically deleted.
PhotoBook Assist

**Viewing Photobooks**
Highlight a book in the photobook assist menu and press **MENU/OK** to display the book, then press the selector left or right to scroll through the pictures.

**Editing and Deleting Photobooks**
Display the photobook and press **MENU/OK**. The following options will be displayed; select the desired option and follow the on-screen instructions.

- **EDIT**: Edit the book as described in “Creating a PhotoBook” (§ 61).
- **ERASE**: Delete the book.

---

**Photobooks**
Photobooks can be copied to a computer using the supplied MyFinePix Studio software (§ 90).
Viewing Panoramas

If you press the selector down when a panorama is displayed full frame, the camera will play back the picture from left to right or from bottom to top. Press the selector down to pause and resume playback, or press the dial up to return to full-frame playback. To rewind or advance one frame at a time, press the selector left or right while playback is paused.
Viewing Pictures Taken in a Single Burst

When a picture taken in continuous shooting mode is displayed full frame, the first picture in the current burst can be viewed by pressing the selector down (burst mode playback). Press the dial right to view pictures in the order recorded, left to view pictures in reverse order. Keep the dial pressed to scroll rapidly to the desired frame. To exit, press DISP/BACK.

- Pressing the selector right when the last picture in the burst is displayed displays the first picture in the burst; similarly, pressing the dial left when the first picture is displayed displays the last picture.
- Deletion (P 65), rotation (P 75), and protect (P 75) operations applied during burst mode playback apply only to the current picture. In contrast, if these operations are performed when a picture taken in continuous shooting mode is displayed in single-frame playback, all images in the same burst will be affected.

**Bursts That Cross Folders**

If a single burst is spread across multiple folders, the pictures in each folder will be treated as separate bursts.

**Viewing Photo Information**

To view photo information for a picture taken in continuous shooting mode, display it in burst mode playback. Photo information for pictures taken in continuous shooting mode can not be viewed during single-frame playback.
Deleting Pictures

The "ERASE" option in the playback menu can be used to delete individual pictures, multiple selected pictures, or all pictures. *Note that deleted pictures can not be recovered. Copy important pictures to a computer or other storage device before proceeding.*

Press *MENU/OK* during playback to display the playback menu, then press the selector up or down to highlight "ERASE" and press right to display the following options. Press the selector up or down to highlight an option and press *MENU/OK* to select.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FRAME</td>
<td>Press the selector left or right through pictures and press <em>MENU/OK</em> to delete the current picture (a confirmation dialog is not displayed)</td>
</tr>
<tr>
<td>SELECTED FRAMES</td>
<td>Highlight pictures and press <em>MENU/OK</em> to select or deselect (pictures that in a photobook or print order are shown by &quot;S&quot;). When the operation is complete, press <em>DISP/BACK</em> to display a confirmation dialog, then highlight &quot;OK&quot; and press <em>MENU/OK</em>.</td>
</tr>
<tr>
<td>ALL FRAMES</td>
<td>A confirmation dialog will be displayed; highlight &quot;OK&quot; and press <em>MENU/OK</em> to delete all unprotected pictures. Pressing <em>DISP/BACK</em> cancels deletion; note that any pictures deleted before the button was pressed can not be recovered.</td>
</tr>
</tbody>
</table>

* Protected pictures can not be deleted. Remove protection from any pictures you wish to delete (75).
* If a message appears stating that the selected images are part of a DPOF print order, press *MENU/OK* to delete the pictures.
Creating JPEG Copies of RAW Pictures

RAW pictures store information on camera settings separately from the data captured by the camera image sensor. Using the **RAW CONVERSION** option in the playback menu, you can create JPEG copies of RAW pictures using different options for the settings listed below. The original image data are unaffected, allowing a single RAW image to be processed in a multitude of different ways.

1. Press **MENU/OK** during playback to display the playback menu, then press the selector up or down to highlight **RAW CONVERSION** and press **MENU/OK** to display the settings listed in the table at right.

   ![RAW CONVERSION Menu](image)

   If **RAW** is assigned to the **Fn** button (P 53), these options can also be displayed by pressing **Fn** during playback.

2. Press the selector up or down to highlight a setting and press the dial right to select. Press the dial up or down to highlight the desired option and press **MENU/OK** to select and return to the settings list. Repeat this step to adjust additional settings.

3. Press the **Q** button to preview the JPEG copy and press **MENU/OK** to save.

<table>
<thead>
<tr>
<th>Setting</th>

<td>Process the copy to reduce mottling (P 69).</td>
</tr>
<tr>
<td>COLOR SPACE</td>
<td>Choose the color space used for color reproduction (P 83).</td>
</tr>
</tbody>
</table>
Menus

Using the Menus: Shooting Mode

The shooting menu is used to adjust settings for a wide range of shooting conditions. To display the shooting menu, press MENU/OK in shooting mode. Highlight items and press the selector right to view options, then highlight an option and press MENU/OK. Press DISP/BACK to exit when settings are complete.

Shooting Menu Options

ISO ISO

Control the camera's sensitivity to light (48).

IMAGE SIZE

Choose the size and aspect ratio at which still pictures are recorded.

Aspect Ratio

Pictures with an aspect ratio of 3:2 have the same proportions as a frame of 35 mm film, while an aspect ratio of 16:9 is suited to display on High Definition (HD) devices. Pictures with an aspect ratio of 1:1 are square.

IMAGE SIZE is not reset when the camera is turned off or another shooting mode is selected.

IMAGE QUALITY

Choose a file format and compression ratio. Select FINE or NORMAL to record JPEG images, RAW to record RAW images, or FINE+RAW or NORMAL+RAW to record both JPEG and RAW images. FINE and FINE+RAW use lower JPEG compression ratios for higher-quality JPEG images, while NORMAL and NORMAL+RAW use higher JPEG compression ratios to increase the number of images that can be stored.
Using the Menus: Shooting Mode

<table>
<thead>
<tr>
<th>DYNAMIC RANGE</th>
<th>(defaults to 100)</th>
</tr>
</thead>
</table>

Control contrast. Choose lower values to increase contrast when shooting indoors or under overcast skies, higher values to reduce loss of detail in highlights and shadows when photographing high-contrast scenes. Higher values are recommended for scenes that include both sunlight and deep shade, for such high-contrast subjects as sunlight on water, brightly-lit autumn leaves, and portraits taken against a blue sky, and for white objects or people wearing white; note, however, that mottling may appear in pictures taken at higher values.

- If AUTO is selected, shutter speed and aperture will be displayed when the shutter button is pressed halfway.
- If 200% is available at sensitivities of ISO 400 and above, 400% at sensitivities of ISO 800 and above.

<table>
<thead>
<tr>
<th>FILM SIMULATION</th>
<th>(defaults to EDR)</th>
</tr>
</thead>
</table>

Simulate the effects of different types of film (51).

<table>
<thead>
<tr>
<th>FILM SIMULATION BKT</th>
</tr>
</thead>
</table>

Choose film types for film simulation bracketing (35).

<table>
<thead>
<tr>
<th>SELF-TIMER</th>
<th>(defaults to OFF)</th>
</tr>
</thead>
</table>

Take pictures with the self-timer (41).

<table>
<thead>
<tr>
<th>WHITE BALANCE</th>
<th>(defaults to AUTO)</th>
</tr>
</thead>
</table>

Adjust colors to match the light source (32).

<table>
<thead>
<tr>
<th>COLOR</th>
<th>(defaults to MID)</th>
</tr>
</thead>
</table>

Adjust color density.
**SHARPNESS**
(defaults to STANDARD)
Sharpen or soften outlines.

**HIGHLIGHT TONE**
(defaults to STANDARD)
Adjust the appearance of highlights.

**SHADOW TONE**
(defaults to STANDARD)
Adjust the appearance of shadows.

**NOISE REDUCTION**
(defaults to STANDARD)
Reduce noise in pictures taken at high sensitivities.

**LONG EXPOSURE NR**
(defaults to ON)
Select ON to reduce mottling in long time-exposures (28).

**SELECT CUSTOM SETTING**
Recall settings saved with EDIT/SAVE CUSTOM SETTING.

**EDIT/SAVE CUSTOM SETTING**
Save settings (52).

**AF MODE**
(defaults to AREA)
Choose how the camera selects the focus area when in focus mode S.
- **MULTI**: When the shutter button is pressed halfway, the camera detects high-contrast subjects and selects the focus area automatically.
- **AREA**: Choose the focus area manually (47).
Using the Menus: Shooting Mode

**CORRECTED AF FRAME** *(defaults to OFF)*

If **ON** is selected, a second focus frame for focus distances of about 80 cm (2.6 ft) will be added to the display in the optical viewfinder. The focus frame for the current focus distance is displayed in green when the shutter button is pressed halfway.

<table>
<thead>
<tr>
<th>ON</th>
<th>OFF</th>
</tr>
</thead>
<tbody>
<tr>
<td>Focus frame for focus distance of infinity</td>
<td>Focus frame for focus distance of about 80 cm (2.6 ft)</td>
</tr>
</tbody>
</table>

**FOCAL LENGTH SETTING** *(defaults to 50 mm)*

Enter lens focal length when using a lens that does not supply the focal length to the camera. Choose from **LENS 1 (21 mm)**, **LENS 2 (24 mm)**, **LENS 3 (28 mm)**, **LENS 4 (35 mm)**, **LENS 5 (50 mm)**, and **LENS 6 (75 mm)**. The focal length for lenses 5 and 6 can be chosen by rotating the command dial; the focal lengths for the remaining options are fixed at the value given in brackets.

**SHOOT WITHOUT LENS** *(defaults to OFF)*

Choose whether shutter release is enabled when no lens is attached.

**Fn BUTTON** *(defaults to ISO)*

Choose the role played by the **Fn** button (50).

**MULTIPLE EXPOSURE** *(defaults to OFF)*

Create a photograph that combines two exposures (36).
Using the Menus: Shooting Mode

**DISP. CUSTOM SETTING**

Choose the items displayed in the optical viewfinder or in the electronic viewfinder and LCD monitor (P 21). The following items can be displayed: framing grid (you can also select the grid type as described on page 71), virtual horizon, focus distance (auto or manual), histogram, exposure (shutter speed, aperture, and sensitivity), exposure compensation/exposure indicator, metering, flash mode, white balance, film simulation, dynamic range, number of exposures remaining, image size and quality, and battery level. See pages 6–8 for the locations of these items in the displays.

1. Highlight **OVF** or **EVF/LCD** and press **MENU/OK**.

2. Press the selector up or down to highlight items and press **MENU/OK** to select or deselect. Press **DISP/BACK** to exit when settings are complete.

### Virtual Horizon

Selecting **ELECTRONIC LEVEL** displays a virtual horizon. The camera is level when the two lines overlap.

- The virtual horizon may not be displayed if the camera lens is pointed up or down.

### FRAMING GUIDELINE

Choose the type of framing grid available in shooting mode.

<table>
<thead>
<tr>
<th>GRID 9</th>
<th>GRID 24</th>
<th>HD HD FRAMING</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Grid 9" /></td>
<td><img src="image" alt="Grid 24" /></td>
<td><img src="image" alt="HD Framing" /></td>
</tr>
</tbody>
</table>

For “rule of thirds” composition.  
A six-by-four grid.  
Frame HD pictures in the crop shown by the lines at the top and bottom of the display.
### AF ILLUMINATOR

If **ON** is selected, the AF-assist illuminator will light to assist autofocus.

- The AF-assist illuminator turns off automatically in silent mode.

- The camera may be unable to focus using the AF-assist illuminator in some cases. If the camera is unable to focus in macro mode, try increasing the distance to the subject.

- Avoid shining the AF-assist illuminator directly into your subject’s eyes.

### AE/AF-LOCK MODE

If **AE & AF ON WHEN PRESSING** is selected, exposure and/or focus will lock while the AFL/AEL button is pressed. If **AE & AF ON/OFF SWITCH** is selected, exposure and/or focus will lock while the AFL/AEL button is pressed and remain locked until the button is pressed again.

### AE/AF-LOCK BUTTON

Choose the role played by the AFL/AEL button (P 43).

### AUTOROTATE PB

Choose **ON** to automatically rotate “tall” (portrait-orientation) pictures during playback.

### FLASH MODE

Choose a flash mode for optional flash units (P 54).

### FLASH

Adjust flash brightness. Choose from values between +2/3 EV and −2/3 EV. Note that the desired results may not be achieved depending on shooting conditions and the distance to the subject.
### RED EYE REMOVAL
(defaults to OFF)

Choose **ON** to remove red-eye effects caused by the flash.

- Red-eye reduction is performed only when a face is detected.
- Red-eye removal is not available with RAW images.

### SAVE ORG IMAGE
(defaults to OFF)

Choose **ON** to save unprocessed copies of pictures taken using **RED EYE REMOVAL**.

### MOVIE MODE
(defaults to HS)

Choose a frame size for movie recording (39).
Using the Menus: Playback Mode

To display the playback menu, press **MENU/OK** in playback mode. Highlight items and press the selector right to view options, then highlight an option and press **MENU/OK**. Press **DISP/BACK** to exit when settings are complete.

**Playback Menu Options**

**RAW CONVERSION**
Create JPEG copies of RAW pictures (p. 56).

**ERASE**
Delete all or selected pictures (p. 65).

**CROP**
Create a cropped copy of the current picture.

1. Display the desired picture.
2. Select **CROP** in the playback menu.
3. Use the **Q** and **Q** buttons to zoom in and out and press the selector up, down, left, or right to scroll the picture until the desired portion is displayed.
4. Press **MENU/OK** to display a confirmation dialog.
5. Press **MENU/OK** again to save the cropped copy to a separate file.

- Larger crops produce larger copies; all copies have an aspect ratio of 3:2. If the size of the final copy will be **640**, **OK** will be displayed in yellow.
Using the Menus: Playback Mode

<table>
<thead>

</tr>
<tr>
<td></td>
<td>Pictures taken with AUTORotate PB are automatically displayed in the correct orientation during playback (72).</td>
</tr>
</tbody>
</table>
**RED EYE REMOVAL**

Remove red-eye from portraits. The camera will analyze the image; if red-eye is detected, the image will be processed to create a copy with reduced red-eye.

1. Display the desired picture.
2. Select **RED EYE REMOVAL** in the playback menu.
3. Press **MENU/OK**.

- Red eye may not be removed if the camera is unable to detect a face or the face is in profile. Results may differ depending on the scene. Red eye can not be removed from pictures that have already been processed using red-eye removal or pictures created with other devices.
- The amount of time needed to process the image varies with the number of faces detected.
- Copies created with **RED EYE REMOVAL** are indicated by a icon during playback.
- Red eye removal can not be performed on RAW images.

**SLIDE SHOW**

View pictures in an automated slide show. Choose the type of show and press **MENU/OK** to start. Press **DISP/BACK** at any time during the show to view on-screen help. The show can be ended at any time by pressing **MENU/OK**.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>

</tr>
<tr>
<td>MULTIPLE</td>
<td>Display several pictures at once.</td>
</tr>
</tbody>
</table>

- The camera will not turn off automatically while a slide show is in progress.
Create books from your favorite photos (61).

**MARK FOR UPLOAD TO**
Select pictures for upload to YouTube or Facebook using MyFinePix Studio (Windows only).

1. Select **YouTube** to choose movies for upload to YouTube, **FACEBOOK** to choose photos and movies for upload to Facebook.
2. Press the selector left or right to display pictures and press **MENU/OK** to select or deselect. Press **DISP/BACK** to exit when all the desired pictures are selected.

- Only movies can be selected for upload to YouTube.
- During playback, selected pictures are marked with **YouTube** or **FACEBOOK** indicators.
- Choose **RESET ALL** to deselect all pictures. If the number of pictures affected is very large, a message will be displayed while the operation is in progress. Press **DISP/BACK** to exit before the operation is complete.

**Uploading Pictures (Windows Only)**
Selected pictures can be uploaded using the **YouTube/Facebook Upload** option in MyFinePix Studio. For information on installing MyFinePix Studio and connecting the camera to a computer, see “Viewing Pictures on a Computer” (90).

**IMAGE SEARCH**
Search for pictures (60).

**PRINT ORDER (DPOF)**
Select pictures for printing on DPOF- and PictBridge-compatible devices (87).
Using the Menus: Playback Mode

**DISP ASPECT**
Choose how High Definition (HD) devices display pictures with an aspect ratio of 3:2 (this option is available only when an HDMI cable is connected). Select 16:9 to display the image so that it fills the screen with its top and bottom cropped out, 3:2 to display the entire image with black bands at either side.

<table>
<thead>
<tr>
<th>16:9</th>
<th>3:2</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.png" alt="Image 16:9" /></td>
<td><img src="image2.png" alt="Image 3:2" /></td>
</tr>
</tbody>
</table>

**PLAYBACK VOLUME**
Control the volume for movie playback.

(defaults to 7)
The Setup Menu

Using the Setup Menu

1 Display the setup menu.
   1.1 Press MENU/OK to display the menu for the current mode.

   1.2 Press the selector left to highlight the tab for the current menu.

   1.3 Press the selector down to highlight "SET-UP".

   1.4 Press the selector right to place the cursor in the setup menu.

2 Adjust settings.
   Highlight items and press the selector right to view options, then highlight an option and press MENU/OK. Press DISP/BACK to exit when settings are complete.
### Setup Menu Options

**DATE/TIME**
Set the camera clock (P 18).

**TIME DIFFERENCE**
Switch the camera clock instantly from your home time zone to the local time at your destination when traveling. To specify the difference between local time and your home time zone:

1. Highlight 🔄 LOCAL and press the selector right.
2. Use the selector to choose the time difference between local time and your home time zone. Press MENU/OK when settings are complete.

To set the camera clock to local time, highlight 🔄 LOCAL and press MENU/OK. To set the clock to the time in your home time zone, select 🛡 HOME. If 🔄 LOCAL is selected, 🔄 will be displayed for three seconds when the camera is turned on.

**言語/LANG:**
Choose a language (P 18).

**RESET**
Reset all settings except DATE/TIME, TIME DIFFERENCE, and BACKGROUND COLOR to default values. Press the selector right to display a confirmation dialog, then highlight OK and press MENU/OK.

**SILENT MODE**
Select ON to disable the speaker, flash, and illuminator in situations in which camera sounds or lights may be unwelcome (P 30).
The Setup Menu

**FRAME NO.**
(new defaults to CONTINUOUS)

New pictures are stored in image files named using a four-digit file number assigned by adding one to the last file number used. The file number is displayed during playback as shown at right. **FRAME NO.** controls whether file numbering is reset to 0001 when a new memory card is inserted or the current memory card is formatted.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONTINUOUS</td>
<td>Numbering continues from the last file number used or the first available file number, whichever is higher. Choose this option to reduce the number of pictures with duplicate file names.</td>
</tr>
<tr>
<td>RENEW</td>
<td>Numbering is reset to 0001 after formatting or when a new memory card is inserted.</td>
</tr>
</tbody>
</table>

- If the frame number reaches 999-9999, the shutter release will be disabled (107).
- Selecting **RESET** (80) sets **FRAME NO.** to **CONTINUOUS** but does not reset the file number.
- Frame numbers for pictures taken with other cameras may differ.

**FOCUS RING**
(new defaults to CW)

Choose the direction in which the focus ring is rotated to increase the focus distance.

**LCD BRIGHTNESS**
(new defaults to 0)

Control the brightness of the displays.

**POWER SAVE MODE**
(new defaults to OFF)

Select ON to reduce the drain on the battery, increasing the number of pictures that can be taken on a single charge (23).

**QUICK START MODE**
(new defaults to OFF)

Select ON to reduce the time needed to restart the camera after it has been turned off (23).
The Setup Menu

**AUTO POWER OFF**

Choose the length of time before the camera turns off automatically when no operations are performed. Shorter times reduce the drain on the battery; if **OFF** is selected, the camera must be turned off manually. Note that in some situations the camera turns off automatically even when **OFF** is selected.

**OPERATION VOL.**

Adjust the volume of the sounds produced when camera controls are operated. Choose **OFF** (mute) to disable control sounds.

**IMAGE DISP.**

Choose how long images are displayed after shooting. Colors may differ slightly from those in the final image and “noise” mottling may be visible at high sensitivities.

</tbody>
</table>

**GUIDANCE DISPLAY** *(defaults to ON)*
Choose whether to display tool tips.

**FOCUS SCALE UNITS** *(defaults to METERS)*
Choose the units used for the focus distance indicator (p. 45).

**BACKGROUND COLOR**
Choose a color scheme.

**FORMAT**
Select **OK** to format the memory card.

1. All data—including protected pictures—will be deleted from the memory card. Be sure important files have been copied to a computer or other storage device.
2. Do not open the battery-chamber cover during formatting.
Connections

Viewing Pictures on TV

To show pictures to a group, connect the camera to a TV using an HDMI cable (available separately from third-party suppliers; note that the TV can only be used for playback, not shooting).

1. Turn the camera off.

2. Connect the cable as shown below.

   ![Connection Diagram]

   - Be sure the connectors are fully inserted.

3. Tune the television to the HDMI input channel. See the documentation supplied with the television for details.

4. Turn the camera on and press [ ] button. The camera monitor turns off and pictures and movies are played back on the TV. Note that the camera volume controls have no effect on sounds played on the TV; use the television volume controls to adjust the volume.

   - The USB cable cannot be used while an HDMI cable is connected.
   - Some televisions may briefly display a black screen when movie playback begins.

**Printing Pictures via USB**

If the printer supports PictBridge, the camera can be connected directly to the printer and pictures can be printed without first being copied to a computer. Note that depending on the printer, not all the functions described below may be supported.

**Connecting the Camera**

1. Connect the supplied USB cable as shown and turn the printer on.

2. Turn the camera on. USB will be displayed in the monitor, followed by the PictBridge display shown below at right.

- Pictures can be printed from memory cards that has been formatted in the camera.
- Page size, print quality, and border selections are made using the printer.

**Printing Selected Pictures**

1. Press the selector left or right to display a picture you wish to print.

   - To print one copy of the current picture, proceed directly to Step 3.

2. Press the selector up or down to choose the number of copies (up to 99). Repeat steps 1–2 to select additional pictures.

3. Press MENU/OK to display a confirmation dialog.

4. Press MENU/OK to start printing.
Printing the Date of Recording
To print the date of recording on pictures, press DISP/BACK in the PictBridge display and select PRINT WITH DATE [amburger] (to print pictures without the date of recording, select PRINT WITHOUT DATE). To ensure that the date is correct, set the camera clock before taking pictures. Some printers do not support date printing. See the printer manual for details.

Printing the DPOF Print Order
To print the print order created with PRINT ORDER (DPOF) in the playback menu (P 77):

1. In the PictBridge display, press DISP/BACK to open the PictBridge menu.

2. Press the selector up or down to highlight PRINT DPOF.

3. Press MENU/OK to display a confirmation dialog.

4. Press MENU/OK to start printing.
During Printing
The message shown at right is displayed during printing. Press DISP/BACK to cancel before all pictures are printed (depending on the printer, printing may end before the current picture has printed).

If printing is interrupted, turn the camera off and then on again.

Disconnecting the Camera
Confirm that the above message is not displayed and turn the camera off. Disconnect the USB cable.

Creating a DPOF Print Order
The PRINT ORDER (DPOF) option in the playback menu can be used to create a digital “print order” for PictBridge-compatible printers or devices that support DPOF.

DPOF
DPOF (Digital Print Order Format) is standard that allows pictures to be printed from “print orders” stored on the memory card. The information in the order includes the pictures to be printed and the number of copies of each picture.
Printing Pictures via USB

**WITH DATE / WITHOUT DATE**
To modify the DPOF print order, select `PRINT ORDER (DPOF)` in the playback menu and press the selector up or down to highlight **WITH DATE** or **WITHOUT DATE**.

Press **MENU/OK** and follow the steps below.

1. Press the selector left or right to display a picture you wish to include in or remove from the print order.

2. Press the selector up or down to choose the number of copies (up to 99). To remove a picture from the order, press the selector down until the number of copies is 0.

3. Repeat steps 1–2 to complete the print order. Press **MENU/OK** to save the print order when settings are complete, or **DISP/BACK** to exit without changing the print order.

4. The total number of prints is displayed in the monitor. Press **MENU/OK** to exit.

The pictures in the current print order are indicated by a 📷 icon during playback.
■ **RESET ALL**

To cancel the current print order, select **RESET ALL** for PRINT ORDER (DPOF). The confirmation shown at right will be displayed; press **MENU/OK** to remove all pictures from the order.

Print orders can contain a maximum of 999 pictures.

If a memory card is inserted containing a print order created by another camera, the message shown at right will be displayed. Pressing **MENU/OK** cancels the print order; a new print order must be created as described above.
**Viewing Pictures on a Computer**

The supplied software can be used to copy pictures to a computer, where they can be stored, viewed, organized, and printed. Before proceeding, install the software as described below. *Do not connect the camera to the computer until installation is complete.*

**Windows: Installing MyFinePix Studio**

1 Confirm that the computer meets the following system requirements:

<table>
<thead>
<tr>
<th></th>
<th>Windows 7 (Service Pack 1)/Windows Vista (Service Pack 2)¹</th>
<th>Windows XP (Service Pack 3)¹</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CPU</strong></td>
<td>3 GHz Pentium 4 or better (2.4 GHz Core 2 Duo or better²)</td>
<td>2 GHz Pentium 4 or better (2.4 GHz Core 2 Duo or better²)</td>
</tr>
<tr>
<td><strong>RAM</strong></td>
<td>1 GB or more</td>
<td>512 MB or more (1 GB or more²)</td>
</tr>
<tr>
<td><strong>Free disk space</strong></td>
<td></td>
<td>2 GB or more</td>
</tr>
<tr>
<td><strong>GPU</strong></td>
<td>Supports DirectX 9 or later (recommended)</td>
<td>Supports DirectX 7 or later (required; performance not guaranteed with other GPUs)</td>
</tr>
<tr>
<td><strong>Video</strong></td>
<td>1024 × 768 pixels or more with 24-bit color or better</td>
<td></td>
</tr>
</tbody>
</table>
| **Other**              | • Built-in USB port recommended. Operation is not guaranteed with other USB ports.  
                          | • .NET Framework 3.5 Service Pack 1 required when uploading images or using Map Viewer.  
                          | • Internet connection (broadband recommended) required to install .NET Framework (if necessary), to use auto update feature, and when performing such tasks as sharing pictures on-line or via e-mail. |

1 Other versions of Windows are not supported. Only pre-installed operating systems are supported; operation is not guaranteed on home-built computers or computers that have been upgraded from earlier versions of Windows.

2 Recommended when displaying HD movies.

2 Start the computer. Log in to an account with administrator privileges before proceeding.
3 Exit any applications that may be running and insert the installer CD in a CD-ROM drive.

**Windows 7/Windows Vista**
If an AutoPlay dialog is displayed, click **SETUP.EXE**. A “User Account Control” dialog will then be displayed; click **Yes** (Windows 7) or **Allow** (Windows Vista).

The installer will start automatically; click **Install MyFinePix Studio** and follow the on-screen instructions to install MyFinePix Studio and RAW FILE CONVERTER.

**If the Installer Does Not Start Automatically**
If the installer does not start automatically, select **Computer** or **My Computer** from the **Start** menu, then double-click the **FINEPIX** CD icon to open the FINEPIX CD window and double-click **setup** or **SETUP.EXE**.

4 If prompted to install Windows Media Player or DirectX, follow the on-screen instructions to complete installation.

5 Remove the installer CD from the CD-ROM drive when installation is complete. Store the installer CD in a dry location out of direct sunlight in case you need to re-install the software.

Installation is now complete. Proceed to “Connecting the Camera” (94).
**Macintosh: Installing FinePixViewer**

1. Confirm that the computer meets the following system requirements:

<table>
<thead>
<tr>
<th>Category</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>PowerPC or Intel (Core 2 Duo or better)</td>
</tr>
<tr>
<td>RAM</td>
<td>256 MB or more (1 GB or more recommended when displaying HD movies)</td>
</tr>
<tr>
<td>Free disk space</td>
<td>A minimum of 200 MB required for installation with 400 MB available when FinePixViewer is running</td>
</tr>
<tr>
<td>Video</td>
<td>800 × 600 pixels or more with thousands of colors or better</td>
</tr>
<tr>
<td>Other</td>
<td>Built-in USB port recommended. Operation is not guaranteed with other USB ports.</td>
</tr>
</tbody>
</table>

2. After starting the computer and quitting any applications that may be running, insert the installer CD in a CD-ROM drive and double-click **Installer for Mac OS X**.

3. An installer dialog will be displayed; click **Installing FinePixViewer** to start installation. Enter an administrator name and password when prompted and click **OK**, then follow the on-screen instructions to install FinePixViewer. Click **Exit** to quit the installer when installation is complete.

   To install RAW FILE CONVERTER, double-click **SILKYRFCEXInstaller**. RAW FILE CONVERTER is used to view RAW images on your computer.

4. Remove the installer CD from the CD-ROM drive. Note that you may be unable to remove the CD if Safari is running; if necessary, quit Safari before removing the CD. Store the installer CD in a dry location out of direct sunlight in case you need to re-install the software.
5 Mac OS X 10.5 or earlier: Open the “Applications” folder, start Image Capture, and select Preferences… from the Image Capture application menu. The Image Capture preferences dialog will be displayed; choose Other… in the When a camera is connected, open menu, then select FPVBridge in the “Applications/FinePixViewer” folder and click Open. Quit Image Capture.

Mac OS X 10.6: Connect the camera and turn it on. Open the “Applications” folder and start Image Capture. The camera will be listed under DEVICES; select the camera and choose FPVBridge from the Connecting this camera opens menu and click Choose. Quit Image Capture.

Installation is now complete. Proceed to “Connecting the Camera” (94).
**Connecting the Camera**

1. Find a memory card containing pictures you want to copy to the computer and insert the card into the camera (14).
   - Windows users may require the Windows CD when starting the software for the first time.
   - Loss of power during transfer could result in loss of data or damage to the memory card. Insert a fresh or fully-charged battery before connecting the camera.

2. Turn the camera off and connect the supplied USB cable as shown, making sure the connectors are fully inserted. Connect the camera directly to the computer; do not use a USB hub or keyboard.

3. Turn the camera on. MyFinePix Studio or FinePixViewer will start automatically; follow the on-screen instructions to copy pictures to the computer. To exit without copying pictures, click **Cancel**.
   - If the software does not start automatically, it may not be correctly installed. Disconnect the camera and reinstall the software.

For more information on using the supplied software, start the application and select the appropriate option from the **Help** menu.
If a memory card containing a large number of images is inserted, there may be a delay before the software starts and you may be unable to import or save images. Use a memory card reader to transfer pictures.

Make sure that the computer does not display a message stating that copying is in progress and that the indicator lamp is out before turning the camera off or disconnecting the USB cable (if the number of images copied is very large, the indicator lamp may remain lit after the message has cleared from the computer display). Failure to observe this precaution could result in loss of data or damage to the memory card.

Disconnect the camera before inserting or removing memory cards.

In some cases, it may not be possible to access pictures saved to a network server using the supplied software in the same way as on a standalone computer.

The user bears all applicable fees charged by the phone company or Internet service provider when using services that require an Internet connection.

**Disconnecting the Camera**

After confirming that the indicator lamp is out, turn the camera off and disconnect the USB cable.

**Uninstalling the Supplied Software**

Only uninstall the supplied software when it is no longer required or before beginning reinstallation. After quitting the software and disconnecting the camera, drag the “FinePixViewer” folder from “Applications” into the Trash and select **Empty Trash** in the **Finder** menu (Macintosh), or open the control panel and use “Programs and Features” (Windows 7/Windows Vista) or “Add or Remove Programs” (Windows XP) to uninstall MyFinePix Studio. Under Windows, one or more confirmation dialogs may be displayed; read the contents carefully before clicking **OK**.
**Technical Notes**

**Optional Accessories**
The camera supports a wide range of accessories from FUJIFILM and other manufacturers.

**Accessories from FUJIFILM**
The following optional accessories are available from FUJIFILM. For the latest information on the accessories available in your region, check with your local FUJIFILM representative or visit [http://www.fujifilm.com/products/digital_cameras/index.html](http://www.fujifilm.com/products/digital_cameras/index.html).

Caring for the Camera
To ensure continued enjoyment of the product, observe the following precautions.

**Storage and Use**
If the camera will not be used for an extended period, remove the battery and memory card. Do not store or use the camera in locations that are:
- exposed to rain, steam, or smoke
- very humid or extremely dusty
- exposed to direct sunlight or very high temperatures, such as in a closed vehicle on a sunny day
- extremely cold
- subject to strong vibration
- exposed to strong magnetic fields, such as near a broadcasting antenna, power line, radar emitter, motor, transformer, or magnet
- in contact with volatile chemicals such as pesticides
- next to rubber or vinyl products

**Water and Sand**
Exposure to water and sand can also damage the camera and its internal circuitry and mechanisms. When using the camera at the beach or seaside, avoid exposing the camera to water or sand. Do not place the camera on a wet surface.

**Condensation**
Sudden increases in temperature, such as occur when entering a heated building on a cold day, can cause condensation inside the camera. If this occurs, turn the camera off and wait an hour before turning it on again. If condensation forms on the memory card, remove the card and wait for the condensation to dissipate.

**Traveling**
Keep the camera in your carry-on baggage. Checked baggage may suffer violent shocks that could damage the camera.
Cleaning the Image Sensor

Multiple photographs marred by spots or blotches in identical locations may indicate the presence of dust on the camera image sensor. Clean the sensor using the SENSOR CLEANING option in the setup menu; if the problem persists, you can clean the sensor manually as described below. Note that there will be a charge to repair or replace the image sensor if it is damaged during cleaning.

1. Use a blower (not a brush) to remove dust from the sensor.

   ![Blowing dust from sensor](image)

   Do not use a brush or blower brush. Failure to observe this precaution could damage the sensor.

2. Check whether the dust has been successfully removed.

   - Repeat Steps 1 and 2 as necessary.

3. Replace the body cap or lens.
## Troubleshooting

### Problems and Solutions

#### Power and Battery

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| The camera does not turn on.                     | • **The battery is exhausted**: Charge the battery (P 12) or insert a fully-charged spare battery (P 13).  
|                                                  | • **The battery is inserted incorrectly**: Reinsert in the correct orientation (P 13).  
|                                                  | • **The battery-chamber cover is not latched**: Latch the battery-chamber cover (P 14).                        |
| The battery runs down quickly.                   | • **The battery is cold**: Warm the battery by placing it in a pocket or other warm place and reinsert it in the camera immediately before taking a picture.  
|                                                  | • **There is dirt on the battery terminals**: Clean the terminals with a soft, dry cloth.  
|                                                  | • **C is selected for focus mode**: Select a different focus mode (P 45).                                     |
| The camera turns off suddenly.                   | **The battery is exhausted**: Charge the battery (P 12) or insert a fully-charged spare battery (P 13).        |
| Charging does not start.                         | Reinsert the battery in the correct orientation and make sure that the charger is plugged in (P 12).         |
| Charging is slow.                                | Charge the battery at room temperature (P iv).                                                               |
| The charging lamp lights, but the battery does not charge. | • **There is dirt on the battery terminals**: Clean the terminals with a soft, dry cloth.  
|                                                  | • **The battery has been charged many times**: The battery has reached the end of its charging life. Purchase a new battery. |

## Warning Messages and Displays

The following warnings appear in the display.

<table>
<thead>
<tr>
<th>Warning</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Low battery (red). Charge the battery (12) or insert a fully-charged spare battery (13).</td>
<td></td>
</tr>
<tr>
<td>• Battery exhausted. Charge the battery (12) or insert a fully-charged spare battery (13).</td>
<td></td>
</tr>
<tr>
<td>• Slow shutter speed. Pictures may be blurred; use the flash or a tripod.</td>
<td></td>
</tr>
</tbody>
</table>
| • The camera can not focus. Try one of the following solutions:  
  • Use focus lock to focus on another subject at the same distance, then recompose the picture (43).  
  • Use macro mode to focus when taking close-ups (31). |
| • The subject is too bright or too dark and the picture will be over- or under-exposed. If the subject is dark, use the flash (54). |
| • Camera malfunction. Turn the camera off and then on again. If the message persists, contact a FUJIFILM dealer. |
| • Turn the camera off, remove the lens, and clean the mounting surfaces, then replace the lens and turn the camera on. If the problem persists, contact a FUJIFILM dealer. |
| • The memory card is incorrectly formatted. Use the camera to format the card (83). |
| • The memory card is locked. Unlock the card (14). |

<th>Warning</th>
<th>Description</th>
</tr>
</thead>
</table>
| CARD ERROR          | - The memory card is not formatted for use in the camera: Format the card (page 83).  
- The memory card contacts require cleaning or the memory card is damaged: Clean the contacts with a soft, dry cloth. If the message is repeated, format the card (page 83). If the message persists, replace the card.  
- Incompatible memory card: Use a compatible card (page 16).  
- Camera malfunction: Contact a FUJIFILM dealer. |
| MEMORY FULL         | The memory card is full and pictures can not be recorded. Delete pictures (page 65) or insert a memory card with more free space (page 14).          |
| NO CARD             | The shutter can only be released when a memory card is inserted. Insert a memory card.                                                      |
| WRITE ERROR         | - Memory card error or connection error: Reinsert the card or turn the camera off and then on again. If the message persists, contact a FUJIFILM dealer.  
- Not enough memory remaining to record additional pictures: Delete pictures (page 65) or insert a memory card with more free space (page 14).  
- The memory card is not formatted: Format the memory card (page 83). |
| READ ERROR          | - The file is corrupt or was not created with the camera: The file can not be viewed.  
- The memory card contacts require cleaning: Clean the contacts with a soft, dry cloth. If the message is repeated, format the card (page 83). If the message persists, replace the card.  
- Camera malfunction: Contact a FUJIFILM dealer. |
| FRAME NO. FULL      | The camera has run out of frame numbers (current frame number is 999-9999). Format the memory card and select **RENEW** for **MEMORY CARD NO.** Take a picture to reset frame numbering to 100-0001, then select **CONTINUOUS** for **FRAME NO.** (page 81). |
| TOO MANY FRAMES     | - A search has returned more than 30,000 results: Choose a search that returns fewer results.  
- More than 999 images are selected for deletion: Choose fewer images. |

Appendix

Glossary

**DPOF (Digital Print Order Format)**: A standard that allows pictures to be printed from “print orders” stored on a memory card. The information in the order includes the pictures to be printed and the number of copies of each picture.

**EV (Exposure Value)**: The exposure value is determined by the sensitivity of the image sensor and the amount of light that enters the camera while the image sensor is exposed. Each time the amount of light doubles, EV increases by one; each time the amount of light is halved, EV decreases by one. The amount of light entering the camera can be controlled by adjusting aperture and shutter speed.

**Exif Print**: A standard for storing information with pictures for optimal color reproduction during printing.

**HDMI (High-Definition Multimedia Interface)**: An interface standard for the transmission of images and sound that adds audio input to the DVI interface used to connect computers to displays.

**JPEG (Joint Photographic Experts Group)**: A compressed file format for color images. The higher the compression rate, the greater the loss of information and more noticeable drop in quality when the picture is displayed.

**MOV**: A movie file format (extension “.mov”) developed by Apple, Inc., and viewed using QuickTime Player. This format is popular on the Internet.

**White balance**: The human brain automatically adapts to changes in the color of light, with the result that objects that appear white under one light source still appear white when the color of the light source changes. Digital cameras can mimic this adjustment by processing images according to the color of the light source. This process is known as “white balance.”
## Memory Card Capacity

The following table shows the recording time or number of pictures available at different image sizes. All figures are approximate; file size varies with the scene recorded, producing wide variations in the number of files that can be stored. The number of exposures or length remaining may not diminish at an even rate.

Weight and dimensions vary with the country or region of sale. Labels, menus, and other displays may differ from those on the actual camera.
• Specifications subject to change without notice; for the latest information, visit http://www.fujifilm.com/products/digital_cameras/index.html. FUJIFILM shall not be held liable for damages resulting from errors in this manual.
• Although the electronic viewfinder and LCD monitor are manufactured using advanced high-precision technology, small bright points and anomalous colors may appear, particularly in the vicinity of text. This is normal for this type of LCD display and does not indicate a malfunction; images recorded with the camera are unaffected.
• Digital cameras may malfunction when exposed to strong radio interference (e.g., electric fields, static electricity, or line noise).
• Due to the type of lens used, some distortion may occur at the periphery of images. This is normal.
